—Tresurer Quay in his report for July, shows that $1,727,523.28 was in the general fund at the close of business on July 30, of which the following sums were in Philadelphia banks: Farmers and Mechanics' National, $372,600; People's, $180,000; Girard National, $20,000.

Items of News.

—Nine thousand nine hundred and eighty-six new bills have already been introduced in the House of Representatives this session.

—The Board of Health at their last Friday's meeting considered a resolution passed at a regular meeting of the State Board, recommending a more thorough examination of in-coming vessels and passengers, especially between October 1st and June 1st.

—A large stone country house is to be built for Miss Riegel at corner of Wayne avenue and Harvey street, Germantown. It is to be completed December first. Lindlay Johnson is architect. The stairs from the first to the third floor will be contained in a round tower.

—The stockholders of the Gloucester and Salem Turnpike Company have unanimously decided to dispose of that portion of the pike between Swedesboro and Woodstown to the Freeholders of Gloucester and Salem counties with the view of making it a free road.

—The fire commissioners want $664,056 for the expenses of 1887. The Park commission asks for $524,462.50. Among the items of expense are $7,000 for settees; $1,500 for sheds for protection from storm; for developing additional springs, $1,500; for improving the East Park drive, $20,000.

—At the meeting of the Atlantic County Board of Freeholders at May's Landing, last week, it was decided not to purchase the Atlantic City and Pleasantville turnpike, in order to make it a free road, at the price offered by the company, $26,000. This is the only toll road now in the county.

—It is thought that the Lehigh Zink and Iron Company will remove from South Bethlehem, residents having complained of the smoke and gas that issue from the works. As the company employs four hundred men, and has a pay-roll of $11,000 per month, it will be a serious loss to that borough.

—Messrs. Collins & Audenreith, 410 Walnut street, are erecting a fine mill at Thirty-second and Spring Garden streets for Mr. H. D. Justice. Kister & Oram are the builders and Kline & Bro. have the plumbing. They are also making extensive alterations in Mr. J. Weener's residence at 866 N. Seventh street.

The large building, which for many years was the head-quarters of M. Thomas & Sons, the auctioneers, has been purchased by a syndicate, composed of John C. Bullitt, George F. Tyler and others, including the ground in the site intended for the new Fourth Street Bank. This will give the new building a frontage of 100 feet on Fourth street and a depth of 180 feet. A magnificient building is to be erected.

—There is a movement afoot which promises to repair the break at Collins' Beach and reclaim the medows and lowlands in consequence of this breach in the bank. A majority of the shareholders of the Cedar Creek Marsh Company are about to sell their interest to the National Dredging Company, of Wilmington, Del. The whole track contains about 2,000 acres, much of which was once valuable land for agricultural purposes.

—$8,397,455.80 were received during the first seven months of the present year for city taxes. This is an increase of $410,812.02 over the collections for the same period of last year. The collections of State taxes during the present year amounted to $387,044.67, and during the corresponding period of 1885 $310,730.88 was collected. The total collections thus far this year are $8,784,500.47, which is an increase of $487,127.81 over the same period of last year.

—The project for a glass factory at Pennsgrove has failed owing to some of the blowers who were in the scheme backing out. The citizens of the place had raised the money to purchase a lot and for the capital stock.

—At the Health Board meeting on Wednesday, the total receipts of the office in July were reported to be $4910.02. A protest was received from the residents of the Twenty-eighth ward against the discharge of sediment from the basin at Sixth street and Lehigh avenue along Clearfield street.

—The will of Elizabeth Houseman, who left a $3000 estate, authorizes the cancellation of a loan of $2000 made by the decedent to the Roman Catholic Church of the Immaculate Conception. After the payment of a few small legacies the residue is bequeathed to the pastor of the same church to be expended for the uses and wants of the church.

—During the recent session of Congress 13,202 measures were introduced. Very few of these were measures of national importance. The number of measures vetoed was in excess of the entire number vetoed during all preceding administrations. We certainly seem to be in urgent need of a higher order of statesmanship than we have at Washington.

—President Edwards, of the Ridge Avenue Passenger Railway, wrote last Friday to Commissioner McDonald that the Union Line should do the paving on Ninth street. It only now remains for the Union Line President to write and say that it is the business of the Ridge Avenue people to do it. Then the two Presidents can meet together in a quiet parlor and open a bottle of champagne.

—A large number of very fine mansions are going up in New York, and a good many in this city. North Broad street will soon have some residences such as Philadelphia has never seen. A New Yorker, William Rockfellow by name, is building a magnificent house at Fifth avenue and Fifty-fourth street, and quite a number of others are going up, to cost about a quarter of a million dollars each.

ALL the municipal departments have submitted to City Controller Dechert their estimates for the coming year, as well as anticipated receipts. The estimates are $13,103,-896.94. The appropriations for 1886 were $8,763,838.46. The item of Education is the largest on the list being, for 1887, $2,172,-958.35. The Highway Department wants $1,270,000, which is over a half million more than they had this year. The Police Department calls for $1,613,254.73, which is about $100,000 more than the appropriation for 1886. The Public Building Commissions ask for $1,226,637.26, which is nearly three-quarters of a million more than they had this year. The Water Department wants $2,444,000. This year they had $569,458. The Survey Department this year had $355,918, and next year wants $509,706. The Health Department had $97,000 this year, and want $159,000 next year. Most of the other departments are satisfied if they can get as much as they had this year. The Guardians of the Poor, however, think that it will take $375,000 to see them through, or $62,000 more than they had this year.

A comparative statement of the appropriations to the several departments for the present year and the estimated expenses during 1887 are here given. They are exclusive of the moneys diverted to the sinking fund and for interest on loans. Neither do the appropriations include the moneys from the general surplus, nor from the surplus from gas loan No. 9 and balances not merging at the end of 1885,

A PORTABLE ELECTRIC LAMP.—A portable electric lamp which is now being used in Paris, and which in its shape resembles a dinner pail and weighing about two pounds is meeting with great success. This lamp is the patent of M. Trouvé, who is a well-known Paris electrician. The incandescent light is protected on one side by a heavy convex glass, while the light is shed in front of the beaver much in the same manner as is the bull's-eye lantern. A primary battery runs an incandescent electric light of seven candle power which will burn for two hours. One of the peculiarities of the construction is that when the lamp rests on the ground the battery will not work, which prevents a useless loss from the battery, but as soon as raised a bright light flashes out. It is principally being used by the Pompiers of Paris.

—Thomas Meehan endorses Dr. J. A. Paxton's views in regard to the desirability of fire brick for a street pavement. He states that one of the most heavily used streets in St. Louis had this pavement in use for years without perceptible wear and tear. He declares it to be decidedly better than asphalt block. Certainly give fire brick a chance. It is something new here, and will answer us as well as it will the people of St. Louis. We have tried nearly every invention, and need something.

No. 16 North Seventh Street,

PHILADELPHIA.

Old Roofs Repaired and Painted.

The Answer to that Question!

Very frequently we are asked, "Why do you advertise other people? When you have a store of your own in Philadelphia, why do you call attention to the stores of others and recommend their goods as well as your own?" Our reply is this: Our object is to introduce and sell the DAY SEWED SHOES anywhere and everywhere that shoes are bought and worn. It does not matter in the least who sells them, for every pair sold is just so much gained for the company. Consequently we can afford to advertise other people. The store, No. 23 North EIGHTH Street, was opened for the express purpose of putting the DAY SEWED SHOES before the people, with every facility for displaying the various kinds, grades, sizes and prices of the boots and shoes manufactured by the DAY SEWED SHOE MANUFACTURING COMPANY.

Everybody is invited to call and examine the stock any day and every day, but if any one wishes to purchase the DAY SEWED SHOES from any other shoe dealer they are cordially recommended to do so, and we mean what we say, since it will still be our gain. The DAY SEWED SHOE STORE is truly a FAMILY SHOE STORE, provided with all the different requirements of such an establishment.

$100 REWARD.

In order to protect ourselves from the infringement of our rights, we will pay One Hundred Dollars to any one proving to us that they have bought from any manufacturer or dealer a pair of shoes as "Day Sewed" without the Trade Mark or Royalty Stamps of the patentee, GEO. W. DAY.

THE DAY SEWED SHOE MFG. CO.,

No. 23 N. EIGHTH STREET.

Mr. H. S. BEEBE, No. 231 North NINTH Street, dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and original designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 32. PHILADELPHIA, MONDAY, AUGUST 16, 1886. PRICE 15 CENTS

Items of News.

—The iron trade is booming at Pittsburg.

—The city will expend next year $17,523.-711.

—The Baldwin Locomotive Works now employ 2,514 hands.

—The Police Station Telegraph Operators get $950 per annum.

—The two properties, 711 and 713 S. Fifth street, sold for $10,000.

—The dwelling and lot, 21x90, 2007 Columbia ave., sold for $8,000.

—The new sub-Treasurer, S. Davis Page, has entered upon his duties.

—The property S. W. cor. 22d and Mt. Vernon street sold for $7,500.

—The sales of lumber in Philadelphia for the year ending July 1 amounted to 455,250,-000 feet.

—Railroad mileage so far this year foots up 2,300 miles, against 1,300 miles for same time last year.

—The firm of J. C. McCurdy & Co., auctioneers, 428 Market street, has made an assignment to D. R. Patterson.

—William M. Singerly is having sixty-six dwellings erected in the vicinity of Twenty-third and Norris and Diamond streets.

—Along the docks in Chicago workmen are unloading a cargo of 1,800,000 feet of lumber from Duluth, the largest consignment ever known.

—A charter will be granted to the "Philadelphia Steam Paving Co.," the character and object of which is the paving by steam of streets, alleys, parks and public thoroughfares.

—In London gas is furnished at the rate of sixty-five cents per thousand feet, and the companies pay dividends of twelve per cent. In Brussels the price is eighty-five cents per thousand feet.

—Contracts are now being made at the Treasury Department for fuel, light, and miscellaneous supplies for all public buildings, for which there is an available appropriation of $600,000.

—Wrought iron fire-escapes have been placed on the northern and southern walls of the Academy of Music. There are now six exits from the amphitheatre and seven from the family circle.

—The stockholders of the Baltimore and Ohio Telegraph Company, in Pennsylvania, have decided to transfer the property and franchises of that corporation to the Baltimore and Ohio Telegraph Company of Pennsylvania.

—The work of the assessors, as completed, shows a total valuation of property in the city of Boston of $710,581,700, being an increase of $25,002,700, or 3⅔ per cent. above that of last year. Such a marked advance in valuation has not been known of late years.

—Application was last Tuesday made to the Common Please Court for a charter for the "Philadelphia and Reading Railroad Employes' Mutual Relief Association of Philadelphia." The purposes of the society is to aid its members and their families in sickness, accident or death.

—The window glass works of Wetherald & Wells, at Massillion, were destroyed by fire on Wednesday afternoon. The building contained a large amount of finished goods all of which were lost. The books and a considerable amount of money were locked in a safe and are supposed to be intact.

—The Philadelphia carpenters propose to take steps to abolish piece work, so that a working day may really consist of nine hours and wages $2.75. It is stated that the carpenters employed by Mr. Wm. M. Singerly have been dismissed from the Union, because they insisted on working ten hours.

—Counterfeit standard silver dollars are being circulated. They are excellent imitations and have the ring of a gold coin. They have the date 1882. The figure 8 is a little imperfect and the milling is deeper and sharper than that of the Government dollar, as it extends across the full thickness of the piece.

—The commission as a Board of Fire Escapes accepted an invitation from Superintendent George Roney, of the Almshouse, to inspect the system of fire escapes lately erected in the new buildings, and directed advertisements to be made for proposals to build four new boilers for engines Nos. 14, 19 and the two substitute engines.

—Vast sums are seeking investment in mortgages. This is shown by the records in the office of the Recorder of Deeds. During the first half of last year 3,803 mortgages were satisfied, amounting to $11,250,000. During the last half 3,824 mortgages were satisfied, aggregating nearly $15,000,000. For the first half of this year 4,504 mortgages were satisfied, representing a little over $20,000,000.

—The lumber and furniture failures in Boston excite but little attention in the trade here. A representative of the Pearl street firm said on Monday that the Western furniture makers, through superior facilities for obtaining their lumber, had cut into the business of the Boston dealers, and this had probably embarrassed them to a large extent, but there was no trouble in the business here, which was on a sound basis.

—A combination of asphaltum paving contractors having raised the price 10 cents per yard, the Street Committee of the Camden City Council has decided to discard that material for Belgian block. A bid from an asphaltum contractor for the paving of two streets has been rejected. It is understood that the combination will carry the matter into the City Council and endeavor to have the action of the committee reversed.

—For sixteen points in the West and Northwest the records of the Signal Service show an average of 6.53 inches of rainfall during May, June and July of this year. The average of the same points for 11 years past is 12.52 inches for those three months. The supply of moisture this summer, thus far, has been but very little more than half the average of the season.

—At a meeting of the Gas Trust's Finance Committee, on Thursday, the payment of $35,250 on account of the contract with Floyd & Krischner, of New York, for erecting the experiment plant of the regenerative system at the Ninth Ward Works was authorized. The Cashier made his monthly statement, and the necessary appropriations for wages and emergency bills were made.

—The Harleigh Cemetery was opened to the public last week. It is situated on the Haddonfield pike, two miles from Federal Street Ferry. The cemetery is arranged on the European plan, and where graves are dug no mounds are permissible. The spot where persons are interred is to be marked by headstones or marble shafts. A mausoleum is in course of erection, and a beautiful lake adorns the centre of the grounds.

—There are 53,614 postmasters in the United States. Out of this total 22,747 have been appointed by the present Administration, 3,482 to fill offices newly established, 587 to fill vacancies occasioned by death, and 9,112 in consequence of resignation or the expiration of the time for which they were commissioned. There have been only 9,566 removals or suspensions. Over half the post offices, it will be seen, are still in the hands of Republican appointees.

—Health Officer Veale imparted the welcome information to the Health Board last week that there had not been a case of varioloid or small-pox in this city since June 2, 1885. Several supposed cases of small-pox were found to be harmless ailments. Objections were filed to the closing of the pump wells at 1013 Otis street and 1501 East Montgomery avenue. Both cases were referred to the Sanitary Committee. It was reported that 482 plumbers had registered with the Board. Twenty-eight vessels were inspected and found to be in good sanitary condition.

—It takes annually 75,000 acres of thirty years' growth to furnish ties alone. In the United States 3,500,000 telegraph poles are in use, and more than half that number are used every year to build new lines, and for repairing those already constructed. Lumber for general building purposes, worth $233,-000,000, is annually consumed in the United States, and it is safe to estimate that one-third more of the amount is required for the whole North America. Exports of wood for manufacturing purposes have a value $22,000,000. The value of shingles is given at $100,000,000, lumber for cabinet making and fencing valued at $800,000,000, coopers' stock at $45,000,-000, for agricultural inplements $100,000,000.

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, AUGUST 16, 1886.

ANOTHER mechanic comes forward, who proposes to construct an engine, which will effect a saving in coal of 80 per cent. He proposes to do it by using the same steam over and over.

A FOUNTAIN in a public square needed painting. A painter offered to do the work for nothing if he could take his time about it and not be obliged to finish by any fixed date, and could put up a fence to screen himself from the vulgar gaze. His proposition was accepted and he immediately put up the fence and sold out its surface to advertisers. When he will get through with painting that fountain no one can tell. It would seem to depend on how long the fence will last before it rots away.

THE master carpenters of this city are opposed to the nine-hour rule and are considering how they can return to the normal work day. There is talk of establishing a building exchange on the style of the Journeymen's Buildings Trade Council. One reason for the desire to return to the ten-hour day is the urgency for building labor. It is said that labor is in very active demand,and while there is no other objection to the nine-hour day, the employers think that the present favorable opportuuities should not be lost simply for the gain of an hour which does no practical good. They are willing to pay for the additional services, and will make the request of their workmen to add one hour to the work day. The master carpenters of this city certainly should have an exchange of their own, in place of the present loose and disorganized association. The interests are extensive enough, and with the proper effort, no doubt an exchange can be built up which will put the employing carpenters upon a very different basis.

THE system of advertising for competition among architects where a public building is to be erected has its good point and its bad ones. The evil is that architects plan the cheapest possible building, at the expense of good work and good judgment. In a certain case a school building, which was to cost $70,000, cost $190,000, under the competitive plan when it was finished.

THE sewage question is attracting a good deal of attention, and is one, which will crowd itself upon the attention of municipal authorities. It is strange to say that no perfect system has yet been devised. In some parts of Europe, the sewage is utilized in irrigation. Originally much objection was made to this, but a few years experience has demonserated its advantages. The rental of land in irrigated districts has multiplied five times.

THE Master Builders of Boston, have an association for the gathering of information and for discussion and the interchange of social, architectural and business matters. The association will meet quarterly. There is an arbitration committee of three, which is empowered to settle disputes among the members and adjust grievances. They are to receive $5.00 apiece for each side, to be paid by the loosing party. The capital stock is to be $5,000 in 100 salaries of $50 each. Each member may hold only one share, all firms to count as a single member only. The membership is consequently limited to 100. No one is eligible for membership but those engaged in their own name in some branch of the building business. While the by-laws do not restrict membership to builders located in Boston, such is no doubt the intention. A "non-corporate" membership is further provided for "branches of business subsidary to the mechanical trades represented in the corporation to the number of 125."

The officers are a president, vice-president and secretary, who also acts as treasurer. These, with six other members, constitute a board of trustees. There are committees on room, admissions, complaints and arbitration. As to the room, members are prohibited from using it as an office to pay off employees, or to allow them to congregate in the vicinity. The complaint committee is to receive charges preferred in writing against any member, such charges to be attested by the written signatures of five other members. They have power to try the case and either acquit or censure, suspend, fine or expel from the association.

SEVERAL co-operative companies are projected in this city.

THE Board of Revision of Taxes puts the total real and personal property of Philadelphia, taxable for municipal purposes, at $628,679,312, an increase of $18,000,000 over a year ago. These assessments do not, of course, properly represent or even approximately represent the actual increase in value. A reform is needed in this direction. Assessments at actual value is the only sensible and honest way. Within nine years about 30,000 new buildings have been erected at a cost of $120,000,000, but the assessments show an increase in value of only $7,000,000.

THE insolence of the bankers now in session at Boston is only equalled by their learned ignorance. If they had their own way they would participate a panic in this country within twelve months. Money is too plenty for their convenience and too cheap. They wish to make money scarce and dear. They therefore advocate a return to the gold standard and a discontinuance of the silver coinage. The bankers had their way years ago, and through their control over Congress, precipitated a panic, which held the country under the throes of bankruptcy for several years. The bi-metallic standard can never be safely departed from. Our country has prospered under silver money, and the abundance of silver has put off the evil day, which is sure to come when that money is legislated out of existence. The bankers have been biding their iime. They hate silver and will crush it out whenever they find the opportunity. Hugh McCullough wrote a letter, in which he said that the country is drifting financially from old land marks. He admits the danger of the single standard. He knows very well that means national bankruptcy. He urges the suspension of silver coinage for an indefinite period, and the discontinuance of notes under $5.00. The association represents 8,300 banks. The bankers took note of the petition of the Knights of Labor, which asks that the Secretary of the Treasury shall establish loan offices in each county in all the states,where money shall be loaned upon request, on offer of good security at 3 per cent. This would not suit the national bankers. Too many great fortunes have been made by the loaning of scarce and dear money for them to admit to a scheme which would have the tendency to cheapen money. The people of the country are interested in an abundant supply of good money on a bi-metallic basis, and they will have it.

THE leakage of drain pipes in cellars and basements is a fruitful source of disease too little guarded against.

PHILADELPHIA is provided this week with a new railroad through the enterprise of the Baltimore and Ohio Railroad Company. That company is not seeking Philadelphia trade as a matter of sentiment by any means, but the probabilities are that the competition which increased facilities create will benefit our business men in lower prices for transportation than would otherwise be possible.

THE heavy demand for improved heating ventilating apparatus has resulted in quite a number of inventions being brought out within the past few months. All of them have advantages which show a marked improvement over the apparatus of a few years ago. The high and deep buildings of to-day call for more perfect devices, than were necessary in the small low buildings of a few years ago. The neceseity for utilizing every foot of space, brings with it the necessity for proper light and ventilation. The architects, on their part, have solved the question of light in an admirable manner, and the inventors are solving the question of ventilation in a very satisfactory way. The use of the electric light in large buildings allows of the utilization of space which has heretofore beeh practically useless. Light and ventilating apparatus and heating appparatus have all been brought to their present high degree of perfection.

THERE has always been a difference between architects and builders as to whom architects should be responsible. Most builders think the architects ought to be the agents of the contractors instead of the owner. An architect scores builders pretty hard in the following lines:

"If they have taken the job too low, made a mistake in their calculations, or the price of materials goes up on them, or they are slow about pushing things when the weather is good and then can't work when it is bad, or if third-rate lumber is sent when first-class is specified, or thin doors where the specification calls for thick ones, or they get all the sashes in a block of a dozen houses hung with cheap American hemp cord when the best Italian is specified, or the plasterer lays off his job when three-coat work is called for, or puts up eighteen-inch cornice where the plan calls for twenty-four-inch or thirty-inch, or—I could fill two hundred and fifty pages with more of the same brand and then not get through—then they expect the architect to help them palm it off on the owner, or coax him to accept it as being just as good or better than what was specified, when every one knows it is not, and to make no deduction for inferior work or materials, loss of time, etc., etc. I could use several more etc.s and then not fill up the bill."

If the architect holds the builder to the contract, the builder is likely to feel he has been badly treated. In some of the Western cities both sides are endeavoing to harmonize their relations and to get at a proper understanding. The architect is, properly speaking, the agent of the owner, and is employed by him to see that justice is done him. If it is not his business to do so, then his services are not of much value. It is to the interest of the architects to have their relationships properly understood, and to act faithfully as the agent of the owner, and compel adherence to the contract, without regard to consequences. Fortunately, in Philadelphia there is but little occasion for misunderstanding, yet misunderstandings do arise. In some cases builders expect the architects to practically play the part of foreman, and do things which do not properly come within the range of the architect's duties. If work is spoiled the builder sometimes unjustly blames the architect. The builder has his work, the architect has his. Owners sometimes make the mistake of ordering modifications without consulting their architect. This, besides being unbusinesslike, is discourteous, and has led to serious trouble. Where men want instructions how to do a certain light piece of work, the architects claim they should come to them. This is a debatable question. Sometimes they should and sometimes they should not. The workmen are not to be blamed for making mistakes. Ordinarily, they should go to the builder, but the builder would not undertake to give directions which should come first from the architect.

THE real estate market has been more active during this summer season than heretofore, a fact which real estate agents are not able to intelligently account for. The activity is without any marked appreciation in properties. There is so much building property available that owners find it dangerous or impossible to put up prices. Even in the building, which has shaken all the city, owners have shown themselves quite willing to accept reasonable prices, although in some cases advances have been paid without objection. The erection of a few fine business structures on Arch, Market, Chestnut and Walnut Streets will have the effect of improving the value of real estate and increasing the demand for it on those streets for building purposes. As previously remarked, the tendency is in that direction. It will not be many years before those streets will be largely utilized for business purposes. A good many inquiries are being now quietly made to ascertain whether properties can be had and the prices. Of course inquiries are conducted very prudently, and in many cases without, as yet, any success. The old property holders do not readily surrender, even to the imperious demands of trade. Trade is stronger than sentiment and the old houses will go. The Thomas auction house has started the movement on Chestnut street, and other houses will likely move from down town to west of Broad street. The prices asked are not high considering the probable increase in values that may be expected during the next five or ten years. Compared to down town, prices there are certainly low. The chief difficulty is the unwillingness of property owners there to vacate. In suburban districts there has been a rather moderate movement. A large amount of property has been secured by builders for next year's requirements. A good deal is being offered. It would be quite an interesting exhibit, when our Real Estate Exchange gets into working order, to see the amount of property that can be had. Property is rather scarce along the line of the Pennsylvania Railroad, both Westward and in the New York direction, but there is an abundance of cheap real estate elsewhere. Speculation has not entered into the movement and has very little opportunity of making itself felt. Our lists of conveyances are quite instructive. They show that small properties are selling more freely than any other. The list of mortgages is increasing, but they are being rapidly paid off. The rate of money is low, and is abundant in large blocks. Small borrowers are obliged sometimes to pay high rates to street brokers. There are rumors on the street of large building operations which may not be undertaken this fall. These rumors generally precede large operations. We are not at the end of our building activity, yet it may be doubted whether any very heavy operations will be undertaken with the expectation of completing them before cold weather.

INSURANCE people are endeavoring to devise or suggesting the necessity for the devising of some means by which the immense losses by water can be avoided, in part at least. Chemical engines are being used, and as they are found efficient their use is being increased. A vast amount of damage is done to material in large warehouses and stores. A trifling fire often leads to the destruction of immense quantities of costly fabrics. Architects are giving their attention to the matter. The Boston Board of Fire Underwriters recommends that the floors of upper stories be placed at an incline of one-eighth of an inch to the foot, so that with proper iron scupper holes placed in the external walls, all water thrown into a given story for the extinguishment of fire will quickly run out of the building, without doing any possible damage by water to goods on the floors below. Another plan is to lay a plank floor, and then put on a regular felt and tar roofing (of course without gravel), and lay a matched upper boarding in the hot tar. This makes the floor water-tight, and is thought to be superior to the first-mentioned plan. All things considered, there is a great improvement in this respect over the experience of a decade ago, but it is believed that modern ingenuity may yet do much to lessen the loss from this source.

The Daily *Record* makes this statement:

Philadelphians need not point their fingers in derision at the people of New York because of the Squire business. We have had as many as nine departments under the cohtrol of one man, who dictated appointments and more or less influenced their business. Even the Judges on the Bench bent to his will. Would it shock the community if it were to know that checks, with indorsements, are still in existence showing how a percentage of the expenditures of one city department was paid into a pool, and that dividends were paid regularly by means of checks?

THE Brotherhood of Carpenters have agreed to locate their General Executive Board in this city for the next ten years. No better place can be selected.

WORK on the Baltimore and Ohio tunnel is being pushed as rapidly as labor and electric light can push it.

THE Pullman Palace Car Company seems to be unfortunate. A few years ago it had an angel for a cashier, who ran away with a large amount of money and who for several years has been residing in Joliet. The sudden departure of their Mr. Bradley is now leading to a hurried examination of the books. The assistant agent of the company does not feel at liberty to give any statements to the press just now. These defalcations are getting entirely too numerous. Respectable thievery is not punished as it should be. We need a few hard-hearted judges and juries.

THE Electro-pneumatic Transit Company will establish six stations on the experimental line on Walnut and Fifteenth streets. One will be at the Pennsylvania Railroad Station at the foot of Walnut street, one at the Colonade Hotel, and one at Broad Street Station. The other three have not yet been located. If the Girard Estate can be crossed there will be one at the foot of Market street. A package can be sent to New York in 17 minutes, or to any part of the system in this city in five minutes. The box containing the package or message will be 2 inches in diameter by 7 inches long. Wherever desired branch connections can be made, under the control of the electric switches at the central station; the carrier tubes may be used at night to blow a whistle at the nearest patrol box. The color of the carrier shows whether the alarm is on account of fire, or whether a policeman is wanted, and on the side of the carrier is stamped the street and number of the house; but it is to be tested first as to its paying capacity.

THE question of protection from lightning has of late years assumed large proportions. There is room for study and discussion as to the best methods to be used. Sometimes, where accidents happen, it is because the rods have not been examined. Sometimes there are not rods enough; sometimes they are not of suitable size; sometimes they have not proper earth contact. A good thick iron rod will generally answer, but sometimes copper does better. It is best to carry the rod up the side which is exposed to the rain, and sharp angles should be avoided.

It is not necessary to insulate the rod from the building by passing it through glass rings, as was formerly done, but it may be fastened directly to the wood or brick work by strips of the same material as the rod. The lower end may be forked where it enters the earth, and in some cases it is attached to metal bars or plates buried at the bottom of a pit to give a large surface for discharge.

It is important that the ground connection be kept always moist, and where a cistern is not available a rain water spout is sometimes brought down from the roof, so as to discharge directly over the place where the rod enters the ground, thus providing automatically for its dampening by the shower itself.

REAL ESTATE.

Chicago real estate men report business in their circles of residence property as brisk. They say that most of this sort of realty is being purchased for immediate improvement.

The real estate market, generally speaking, is in a very healthy condition as regards auction and private sales. The total amount realized from auction sales during the past week was $355,076.42, against $147,890 for the preceding week. Last week the brokers' sales amounted to $840,500; this week the total is estimated at $450,000. Notwithstanding the decrease in the number of private sales, the market is decidedly active for this season of the year.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ADVERSED POSSESSION.

An adverse possession of land for twenty-one years is sufficient under the statute of limitations to confer title to the possessor, and although the statute does not directly apply to a merely incorporeal right the courts have in furtherance of justness and for security of title, applied the principles of the statute to them as an artificial rule of law.

BUILDING ASSOCIATION.

Although a borrowing member of a Building Association who has assigned his stock to the association, and also given to it a mortgage upon his property to secure the payment of the loan, may by express act, apply his payments of stock due in part liquidation of his mortgage debt, such payments do not *ipso facto* amount to payment on account of the mortgage.

One who has no lien upon the stock, but merely holds a junior mortgage upon the land, cannot compel the association to appropriate the stock payments to the satisfaction of the mortgage debt.

COVENENT.

Door steps and the right to maintain them upon lands, are a breach of the covenants of seizin freedom from incumbrances, and quiet enjoyment, which by the Act of May 28, 1715 are implied in the words "grant bargain and sell" in a conveyance.

But in the case of front steps of an adjoining house so constructed as to occupy a portion of the sidewalk in front of the premises conveyed, there is the presumption, this being a special condition of the property that the purchaser bought with a knowledge of the fact. In such and similar cases there is the further presumption that if the incumbrance is really an injury; such injury was in the contemplation of the parties and that the price was regulated accordingly.

LEASE.

In an action on a covenant in a lease to give the refusal of a subsequent lease to lessee or his assignees who have been accepted by the lessor, an unaccepted assignee has no standing if lessor neglects to give him the refusal of a subsequent case.

MECHANIC'S LIEN.

To recover under a mechanic's lien claim, claimant must show a debt contracted for work done or materials furnished for or about the construction of the building, and that the claim was properly made and filed in pursuance of the terms of the statue.

The fact that the work was done on the credit of the building will be presumed where claimant has complied with all the provisions of the statute relating to the lien which he claims.

MORTGAGE.

The mere execution of a release of the lien of a mortgage on the land described therein, does not discharge the bond secured by it, nor extinguish the debt, without any other evidence. Even the entry of satisfaction of a mortgage, the bond secured by it being unpaid, and retained by the mortgagee, and the interests of third persons not involved, does not discharge the bond.

SALE.

By the sale of a lot bounded by a street, title passes to the centre thereof if the street is not expressly or by express implication reserved.

By a sheriff's sale of the lot, title coextensive therewith, passed to the purchaser.

TENANCY.

A parol lease made by the owner of land, without writing, or by his agent without written authority, for a term exceeding three years, is of itself but a lease at will, but if possession has been taken and held under it for more than a year, the tenant paying and the landlord receiving the rents annually as they accrue, according to its terms, the lease, although it could not have any further or greater operation, will thereafter be construed as a lease from year to year, and, upon proper notice, may be terminated at the end of any year, but at no other time, excepting by assent of the parties.

F. R. SHATTUCK.

THE Chicago *Times* thinks "there is promise of a large amount of new railroad building throughout the West and Southwest during this year and next. Several of the old-established companies have important enterprises under way or projected, and it is estimated that from $75,000,000 to $100,000,000 will be expended in the construction of new lines and the extension of old ones. The greater portion of the new mileage will be built by such companies as the Chicago and Northwestern, the Chicago, Milwaukee and St. Paul, the Missouri Pacific, and the St. Louis and San Francisco." To the foregoing we may add the following from the Chicago *Railway Age:* "The number of new railway enterprises that we are called upon to record from week to week is surprising. Not only are the great railway systems in the West continually pushing out new lines but numerous independent local organizations are coming to the front." Undoubtedly there is a genuine revival in railroad building.

DR. LEON CRUZ, an eminent Nicaraguan, and Dr. Jose Macias are in this city, from Central America, to purchase engines, machinery, water-pipe and other material for the town of Leon, the most thickly settled city in their country. Dr. Cruz was sent here by the President and others to secure American machinery, which was desired in preference to the cumbersome English article. The contract will be the largest ever given to the United States from Central America.

A NEW YORK money broker says: "There is any amount of money in the market to be loaned at from 4 to 5 per cent. So far this month I have loaned over $300,000, and have $1,000,000 and more to loan at from 4 to 4½ per cent. The only trouble is, good applications are exceedingly hard to obtain; that is why the amount of money lying idle is so great." The increase in the amount of money loaned during the past building year is stated to be from between $12,000,000 and 15,000,000 over preceding years.

BUILDERS' ITEMS.

Building and Real Estate Notes.

"LOTS of business in sight" is what everybody says.

JOHN LEONARD, builder, is erecting twensix six-room houses on Hillery street, to cost about $2,000.

THE rent of a florist's house and small store at 2028 Columbia avenue was advanced from $17 to $35 per month.

A FINE M. E. Church on the S. E. corner of Eighteenth and Wharton of brick and brown stone trimmings will be erected.

STEMBACH & CHESTNUT, builders, are building twenty-eight dwelling houses, from Morris to Moore, on Bancroft street.

WM. M. CRAVEN & SON, real estate brokers, 1546 North Seventh street, has just completed the sale of a property, 2340 Otter street, east of Memphis street; also two on Lawrence street, Nos. 2918 and 2920, for $1,650 each.

THE forks of Nineteenth street and Ridge avenue, the site of the "Old Portico House," and two stores, have been purchased by Mr. Bainbridge, on which he will erect himself a handsome three-story store and dwelling. The property realized $14,500.

DIXON & HALLOWELL, Ridge and Fairmount avenues, have just completed the sale of properties 722 North Eleventh street, for $4,200; also 1608 Fawn street, for $2,300; also 504 Larkin street, for $1,300. They report business generally very encouraging, with fall prospects.

W. TWINING & SON, 2133 Columbia avenue, real estate brokers and conveyancers, have just completed the sale of a property, 1510 N. Twenty-third street, for $2,500. They have several other matters all but closed. They report real estate with them as being good, with good fall prospects.

P. H. SCHAEFFER, 1309 Columbia avenue, real estate broker and conveyancer, has just completed the sale of a property, 1416 North Twelfth street, for $5,850, to Chas. D. Escher, Jr., and within the last ten days has done considerable business in mortgages and conveyancing, also making alterations, 1735 Columbia avenue, turning private dwelling into a store.

S. E. GARDENER, Third street and Washington avenue, real estate broker and conveyancer, reports his business in conveyancing good; and further, says that real estate generally, is satisfactory, it being better at this season of the year with him than he has felt it for some three years. Inquiries for properties, both to rent and purchase, are commencing to be made freely.

J. R. MASSEY, real estate broker and conveyancer, Thirteenth and Green streets, report business generally good, with good fall prospects, houses from $25 to $30 being taken up freely. They have just completed the sale of a store and dwelling, 813 Thirteenth street, for $4,150. They have several desirable warehouses at their disposal, well located for business purpose, some on Sansom and one on Chestnut street.

GEO. LODGE, real estate broker and conveyancer, reports business a little dull. He has just completed the sale of five houses on Bankeroft street for $1,450 each. Mr. Lodge is at present staying in Atlantic City with his family and while there has had the misfortune to loose one of his handsome horses which he had taken with him, in spite of all the skill of best vets. The horse was fortunately insured, but will be difficult to replace.

A LARGE Presbyterian Church is to be erected at the corner of Eighteenth and Tasker on the S. W. corner. It will be of brick and brown stone.

FRIEL & SIMPSON, Nineteenth and Wharton, real estate agents and builders, report properties renting freely; have within the past few days made sale of six houses on Mole street for $1,900 each. Mr. Friel states fifty-two houses were built by them and finished August 1, on Mole and Hick streets, forty-two of which have already been sold and inquiries are now being made for the remainder. They are erecting fifty-six six-room houses on Morris and Moore streets, which will rent for $15.00, several of which are already sold.

Building Material.

Wonderful progress has been made in the production of building material. The attention of builders and architects and others has been closely devoted to supplying material for buildings that would add to beauty, cheapness and durability. The improvements run from slate roofs and tile drainage to mural jointings. Nothing that can add to the practical or esthetical value of a home has been lost sight of.

The stove and grate manufacturers deserve much credit for what they have done. Mantels have been vastly improved and are now real ornaments. Open fire-places are finding favor with architects, builders and buyers. Old style brass fenders and andirons are met with very frequently in the better class, of especially suburban residences.

Shaded antique glass is also finding quite a general recognition. Tiles of all descriptions and moysaic work is now common, where a few years ago it was exceptional. Endwood floors are also quite a feature in a good many of the finer houses. Art metal work has taken a fresh start within a year or two and front doors are made now with a character suggestive of reproductions of the sixteenth century of olden times. Brass railings are much more frequent in offices. They impart a livliness which woodwork or ironwork cannot do. Interior decoration is becoming an art in itself, not only in churches, but in banks and private houses. The sombreness that held such a grip upon art is disappearing and invention is racking itself to supplant the old notions and introduce ornamentation that accords with taste.

Asbestos has of late years been very generally used for the line between floors, under slate, shingles and trap boards. It deadens sound, reduces the danger from fire and has advantages which is leading to a very extended use. Natural wood ornaments in panels, rosettes, etc., are very common. Papered vaneers for plastered walls and ceilings are coming into quite general use. The demand for fire proof building material has doubled itself within a short time. The manufacturers of coarse terracotta brick have had more demand this year for their products, than during any former season. Corrugated iron roofing is in much more general use, a fact that is made evident by the increased capacity of the manufacturing establishments throughout the country. Metal shingles are preferred, where insurance costs are large. The wire cloth manufacturers report this season a very heavy demand for fire proof wire lathing. A thousand and one little inventions have been introduced into generol use, without which the modern residence is incomplete.

The sanitary improvements keep pace with all others. At the same time a good many comparatively worthless inventions are coming out, but they are short lived. The manufacturers of gas engines have sold as many engines this year as last and give a good account of trade. Most of the manufacturers of steam heating apparatus are busy. The business must be encouraging as several new firms have started up this season. Gas making machines for houses are coming into use. Some of the companies report themselves full of business. Patent air bells have been introduced for houses and offices, worked without wires or batteries. The variety of new and improved shutters is sufficient to please the most exacting taste. The interior decorations are everything which taste and art can suggest. The spirit of improvement is abroad, and with all the progress we have made, there is yet a wide field for further progress.

Building material of all kinds is surprisingly cheap. In a short time, the builders of cheap houses will find it possible to introduce some of the adornments, which at present, are to be found only in the more costly.

Improvement of Niagara Railroad Suspension Bridge.

Some important improvememts are being made in the Niagara railroad suspension bridge which may turn out to be as dangerous as they are difficult of accomplishing in an engineering way. The four massive towers of stone, which support the big cables of the bridge are to be replaced with iron supports, and it is thought now, that, although perhaps dangerous, this can be done without much interference with the use of the bridge. Every precaution to avoid an accident has been taken by Mr. Buck, the engineer in charge of the work. Workmen are now making room on the sides of the towers for the preliminary iron work, and stone is being chipped away with care by experienced men, who know just which one to remove. On the top of the towers, men who look like pigmies from below, are drilling in the caps so that when the time comes the hydraulic jacks may be applied and the great cables safely cradled from the stone supports which have held them up so long, and placed on strong iron towers which will replace the stone ones. The ironwork is being made in Detroit, and the shipments of material will soon begin. The cost of the new towers will be $40,000. Disintegration of the stone is the reason for changing the towers.

Has It Come True?

The meteorologist, Professor Foster, will say, in the Burlington *Hawkeye*, to-morrow, that one of the greatest storm periods of 1886 will begin on August 16th and continue till the 27th, during which the great drought will be completely broken by heavy rains, hail and tornadoes, and heavy gales. A tropical hurricane will be felt on the southeast Atlantic coast between the 16th and 20th. These storms will be general, and Iowa, Illinois, New England States, Eastern Canada and Labrador will be in the danger path. Vivid sun spots will appear from the 16th to the 24th, and brilliant auroras on the 20th and 23d.

A CINCINNATI dispatch last week stated that the Builders' Exchange has ascertained on reliable authority that the bricklayers' strike in that city on account of the employment of non-union hod-carriers is in obedience to an order from the International Amalgamated Union. It is stated that the Amalgamated Union selected the bricklayers of Cincinnati, who are well organized, to begin a movement against non-union labor of all kinds. Thus far the strike has thrown 3,000 men in the various building trades out of work, and next week the number of idle men in these trades will be doubled. A boycott is to be organized not only against contractors who employ non-union men in any branch of organized labor but also against all employers who use material which has been got in readiness by non-union men.

The New B. & O. Depot.

Mr. Frank Furness, the architect, says that the new Baltimore and Ohio depot, to be erected at Twenty-fourth and Chestnut streets, will be equally as fine as the Broad street depot.

The lot upon which the new station will stand is bounded by Chestnut street on the North, Sansom street on the South, Twenty-fourth street on the East and the Schuylkill River on the West. It was formerly occupied by marble and stone yards and had upon it a number of unsightly frame buildings, all of which have been cleared away to make room for the new station. The ground was purchased of P. S. Rowland and Victor I. Sartori. Its dimensions are 230 by 238 feet, and it has fine natural advantages for the Baltimore and Ohio's purpose. The tracks of the road running up along the Schuylkill will pass between the station and the river, and under the second arch of the Chestnut street bridge, or Northward, to join the tracks of the Reading. The chief advantage will be that the East end of Chestnut street bridge will be used as an entrance to the station. People can step directly off a street car and walk into the main floor of the building, which will be on a level with the bridge.

The main portion of the building, which the passenger enters, will rise sixty-seven feet above the pavement of the bridge and ninety-four feet above the bed of Twenty-fourth street. In the centre of the main entrance, which is near the Northeast corner of the building, will rise an ornamental tower, 140 feet above the level of the street. Near the top will be a clock with a four-foot dial on each of the four sides. The building will front 173 feet on Chestnut street and 110 on Twenty-fourth street.

The outward appearance of the building will be striking. The style of architecture is Flemish. The lower wall will be principally of iron, carried on iron columns and boxes, and the upper walls will be of brick, red-stone and terra cotta. The string courses, cornices and brackets will be of terra-cotta, and the roof will be covered with red tile. The appearance of the building in profile will be most picturesque.

The main entrances to the station will be from the Chestnut street bridge, one at the east end of the depot and one at the west. The eastern entrance will be 63 feet wide, and the western 38 feet; the main waiting-room will be 119 by 38 feet; the ladies waiting-room, 48 by 63 feet; the restaurant, 40 by 50 feet, and the lunch bar 40 feet square. The ceiling of the main floor will be 20 feet high. The architectural work will be of the very finest description and elaborate in all details. Hard wood will be unsparingly used. Leaded glass will be used in the skylights; the floor will be granolithic cement with ornamental border. The stair cases will be broad and elegant. The third and fourth stories will belong to the officers. The main operating room will be 120 feet long with accommodation for 100 operators.

Work upon the station is now to be rapidly pushed. The train shed, which will adjoin the station and will be 300 feet long and 110 feet wide, is already under contract and work has been begun. The architect is now hard at work upon the foundation plans of the station proper, finishing them up so that specifications can be drawn in a day or two and the contracts be given out. The foundations will be laid early in the Fall.

—The Pennsylvania Company proposes to build a connecting link between Youngstown, O., and Wheatland or Sharon, Pa., uniting the Erie and Pittsburg and the Pittsburg, Fort Wayne and Chicago Railroads. It will be an important feeder for freight from the North.

Southern yellow pine is invading the white pine region. The new elevator at Duluth, Minn., on the shores of Lake Superior, and the most northern point in the state, in the very centre of a heavily timbered country, is being built of pine from Mississippi and Louisiana. Although the lumber has to be carried by rail 1,200 miles, it is still found the best and the cheapest for this purpose. In Chicago also, the most important lumber market in the world, the largest warehouse yet built there is under construction of Southern pine, it being the strongest and best timber for heavy edifices. These facts bear evidence of the value of this southern timber. If it can compete with the product of Michigan and Minnesota to-day, while their forests yet remain, what must be its superiority, what its value, when the northern pine is no more?

New Buildings and Improvements.

A good deal of building is going on in Kensington, nearly all of two and three story dwellings.

A neat brick building is being erected in Bordentown for the Citizens' Hook and Ladder Company. It will be ready for occupancy by September 1.

The National theatre at Tenth and Chestnut, is being improved under the direction of the George Plowman Company. Among the new features will be a 60 feet ballustrade along Tenth street. A new lobby 45 feet deep and 18 feet high. The cost of the alterations will be about $15,000. The lobby will be of black and white marble tiles. There will be abundant rich carved walnut cornice. The management expects to present a theatre to the public which will command first class patronage.

The North end of the South Eleventh street market house is to be transformed into stores, over which a hall will be built The improvement will take in three avenues of 18 feet each. The hall will occupy a front of 54 feet and a depth of 80 feet. The stairway leading to it will be at the north side, and the two stores, each of which will be 18 feet front by 40 feet deep, adjoining on the south. The hall will be provided with a stage at the west end, flanked by dressing rooms, and will be rented for general meeting and society purposes, while the stores will be rented for business purposes.

At the regular meeting of the Common Council last Tuesday, an ordinance was passed granting the privilege to erect and operate water-works to Mitchelon & Saxon, of Philadelphia, the work to be commenced within thirty days and to be completed in ninety days. The ordinance to grant privileges to the New York Gas Light Company was referred to the Ordinance Committee. The macadamizing of the streets was indefinitely postponed, as there is no ordinance which will permit them to carry out the work and the city charter does not allow for the contracting of more than $3,000 debt unless so voted by the people.

A large theatre will be built on the lot adjoining the Casino on Broad street above Columbia ave. A new well managed theatre in this section would be patronized. The lot on which it is to be erected is 103 feet on Broad street and 197 feet deep. The new theatre will have an elevation of 40 feet, with a roof garden for summer entertainments, which can be reached by two elevators or by stairways. The interior will be constructed in ampitheatre form and will seat 3,000 people. There will be no galleries. The building will be fire-proof and heated by steam. Stage will be 40 feet deep with an opening of 36 feet and will be 32 feet high. Frances Blackburn owns the ground.

Almost one-half of the 260 public schoolhouses are now in the hands of workmen undergoing repairs and improvements. Several new buildings are springing up at an outlay of over $135,000. Particular attention is being paid to sanitary plumbing and ventilation.

Among the improvements to be made in the Mercantile Library building, Tenth street above Chestnut, with the $2,000 authorized by the Board of Directors will be the fitting up of a comfortable reading-room for women; one for men and a third for those who are not members, but who are entitled to the use of the Library because the Board is exempt from the payment of a tax on that part of the building occupied as reading rooms The entrance hall and vestibule will also undergo decided improvements, and four additional book-cases will be placed in the gallery. A new feature of the Library is the issuing of a quarterly magazine, containg a list of newly added books and historical novels of several countries.

John D. Austin, architect of the board of Education has charge of the public school improvements. A good deal of under drainage is to be done and numerous minor alterations made. New floors are being put in some cases; some schools are being painted and kalsomined. The light has been increased in several buildings and fire proof stairways have been built. Sky lights have been put in and furniture in several. The more important repairs, alterations, etc., include the enlargement of windows at the Livingston School, in the Fifteenth Section, the putting down of pavements around the Franklin School, in the Nineteenth Section, new class rooms at the Lynd School, in the Twentieth Section, new desks and blackboards in the Washington School in the Twenty-first Section, and the building of a new six-room addition in the Elisha Kent Kane School, in the Twenty-ninth Section. In all the sections the desks have been thoroughly renovated and a number of new blackboards have been added.

Of Interest to Architects.

Some of the St. Louis architects have adopted printed contracts with their clients, the use of which would seem to obviate any misunderstanding as to conditions and terms of payment.

The Boston Society of Architects is taking steps toward securing the erection of a fitting memorial to the late H. H. Richardson. It is proposed that architects and architectural societies contribute.

The Kansas City Society of Architects hold no meeting during July and August. The first meetings will be held the first Monday in September. Mr. E. F. Fassett is now secretary of the association, which is in a thriving condition.

The resolution excluding from the office of the Cincinnati architects builders making a practice of furnishing drawings was very kindly received by all but those so excluded. About half of the names upon the blacklist have been withdrawn at the request of the parties, accompanied by a written statement of their abandonment of the practice.

It is pleasing to learn that young students in architecture are organizing themselves into sketching clubs in most of our larger cities. These clubs bring many minds in contact with each other, and each imparts its acquired knowledge, keeps afresh the love and enthusiasm for the profession, makes the dry abstract part of architecture pleasing and interesting, and, what is more, it advances the art and elevates the standard of architecture.

A St. Louis architect has got into a difficulty with his client regarding commissions on extra work which was ordered done by the owner after the plans had been adopted and the work commenced. The architect claims commission on these extras, which the client refuses to allow, on the ground that the architect had nothing to do with them and no responsibility was incurred.

The architects of Milwaukee have come to the unanimous conclusion that two per cent. commission is not an adequate consideration for furnishing plans. The same thing was found out in other cities some time since, but a few arbhitects are yet to be found who are willing to take work on the "quick sale and small profit" plan of doing business. The State Associations have remedied the matter to a great extent, and in time they will see that the truth of the adage "the laborer is worthy of his hire," applies with equal force to the profession of architecture.

A Chicago architect writes: "It is perfectly astonishing the number of residences now underway in the suburban towns; not only residences alone, either, but also handsome and commodious business blocks. We all were under the impression a month or so ago, that '86 would prove a very backward year as to the amount of building in Chicago and her suburbs. But lately this has been disproved and a wonderful revival is now taking place. I will guarantee that all architects with whom you talk to-day will bear me out in this statement."

A Milwaukee architect writes: "The Milwaukee Association of Architects was formed in the spring to fill one more of the 'long-felt wants.' There was no fraternity amongst them, and the major portion of them, while not even knowing their associates by sight, had a fine stock of knowledge of their shortcomings without anything to offset it. Aside from this the city has been getting its work done for the munificent sum of two per cent. It has also been desirable to secure some uniform schedule of prices among the better members at least; and also some uniform methods of office rules. We have drawn up a price list for city work, which *will* be accepted, as they have been unable to secure any plans lately, because they at first rejected our proposition." That would not be a bad idea in Philadelphia.

The Western architects are composed of different material from our Eastern architects. They believe in Associations. The Illinois State Association meets on the first Thursday of every month, in Chicago. The Illinois Architectural Sketch Club meets every other Monday. The Kansas City Society meets every Saturday afternoon. The Architectural Association of Minnesota meets every other Tuesday. The Ohio State Association of Architects holds an annual convention on July 15th of next year. The Iowa State Association met last Wednesday. The Texas Association of Architects, recently formed, will meet next January, at Austin. The Missouri State Association meets on the second Tuesday of January. The Nebraska State Association holds its annual sessions on the first Monday of May, and meets quarterly besides. The St. Louis Institute of Architects meets every Monday.

Some Western architects have recently been discussing some interesting questions, which open a very wide field for discussion. One is, "As to the common practice of extending footing courses or courses beyond the boundaries of the property being improved in order to keep the centre of gravity as nearly as possible in line with the centre of the footings." Among other questions are the following:

Would a verbal notice (from the owner or agent of adjoining property) not to extend footings upon his property, subject an architect, who should disregard the request, to an action for damages; or would it involve the owner or both; and would that depend upon whether any damages had been sustained? In other words, admitting the trespass, would an architect be subjecting himself or his client to the annoyance and cost of litigation with a possibility of constructive damages by doing what seems to be a well-nigh universal practice?

Admitting the necessity or at least the urgent desirability of so extending footings, and presuming that the common law would prohibit its practice, is it expedient to attempt to secure a law which shall permit that to be done legally, which is now done without sanction of the law, and thus disarm malicious prosecution in case of unfriendly neighbors?

Are there any constitutional considerations that would be likely to defeat the operations of such a law; or, on the other hand, would the recognized principle, that the greatest good should be paramount to individual rights, be held to justify such a law? This would seem to be a question for constitutional lawyers, and in our judgment it is an important one.

If the owner of adjoining property can, after the foundations have been built, (or partially built), extending upon his property compel the architect or owner of the offending wall to remove the trespassing portions of said wall *at once*, can he obtain damages (constructive or real) for said trespass, and what would be the measure of such constructive damages? It would seem to be desirable that the owner of the wall could legally insist that the wall should remain intact, until such time as its trespass involved the question of *real*, not constructive damages.

Of Interest to Builders.

The manufacture of Portland cement in Germany has steadily improved, and it is a well-known fact that German cement is not only equal to the best English brands, but will surpass the latter by the higher standard of its quality, and is therefore preferred in Germany as well as in foreign countries.

A Pittsburgh man, who builds moderate-priced houses for rent, is using matched flooring instead of lath and plaster for the sides and ceilings of rooms. On this cotton-cloth is glued, and upon that wall-paper is pasted. He says it is cheaper and better than plaster, and cold weather does not hinder work.

The very prettiest decorations for a bedroom are white. Whether the material used be the cheapest muslin or the costliest lace, the result willl be appropriate. A room so fitted will be found cool and airy to the eye, suggestive of sleep and refinement, not mere duty. Next to white the lighter tones may be employed, the warm or cool grays, the latter preferable, buffs and so on. Whatever color is used in the furniture should be carried out in the rest of the fittings of the room. Matting is better than carpet for a bed-room, with a goat-skin or other rug at the bedside.

In bath-tubs, perhaps the most important and luxurious of our sanitary appliances, too great precaution cannot be taken to guard against the dangers of using those having a lining or composed of any material that will in any way oxidize, exude or absorb contaminating or poisonous substances, whether of the vegetable, mineral or animal kingdoms Such materials should not be used. The extent of the bad effects and dangers of bathing in tubs of such nature can, in the absence of thorough scientific research and investigation, only be a matter of conjecture, but to the average intellect it must be apparent that there exist possibilities of a most startling nature.

A method of utilizing the luminous powder prepared mainly as a sulphide of calcium for admixture with cements, plaster of Paris and concrete has been recently invented by E. Ormerod and W. C. Horne, of London, the object being to prepare the articles with a self-contained phosphorescent property instead of coating them with luminous paint. As an example, the patentees take cement, such as is known as Keen's Parian or other suitable make, in varying proportions, as, for instance, 2 pounds to 5 pounds to one pound of the luminous powder; mix the same with water, and then mold it to required shape in the usual way, or lay it on ceilings or walls by means of a trowel.

Lime is cheap. A peck of lime will absorb seven pounds of water, and when thoroughly air-slaked it is just in the right condition to apply to the land. It is then a hydrate of lime. The condition of dryness can be had by occasionally placing lime in the cellar in a broad dish. This will absorb the moisture from the air, but if warm damp air is admitted this drying will have accomplished no good end, unless the lime is constantly renewed, and then the cellar, instead of being cool, will be warm. Hence to gain the maximum coolness naturally the ventilation of the cellar should take place at night or, better, just before daylight, when the air is usually in its coolest state, and generally the driest.

In the construction of fire-proof buildings, the greatest difficlty has always been to find a cheap but incombustible material for floor, iron and stone being necessarily very expensive. It has been recently suggested that this trouble would be overcome by introducing a layer of ashes two or three inches deep in each partition separating the stories. The ashes should be sifted and packed solidly between the wooden floors. These latter, so far as the planks are concerned, may be destroyed, but fire cannot be communicated from one story to another. The earthy mineral particles remaining after the combustion of wood form the best fire-proof of all substances, and, should the burning story be flooded with water, not one drop could pass through the layer of ashes to damage goods in the lower stories. Five to eight dollars per square of ten feet would cover the expense of rendering floors fire-proof in this manner.

A door of the right construction to resist fire should be made of good pine and should be made of two or more thicknesses of matched boards nailed across each other, either at right angles or at forty-five degrees. If the doorway be more than seven by four feet, it would be better to use three thicknesses of the same stuff; in other words, the door should be of a thickness proportioned to its area. Such a door should always be made to shut into a rabbet, or flush with the wall when practicable; or, if it is a sliding, then it should be made to shut into or behind a jamb, which would press it up against the wall. The door and its jambs, if of wood, should then be sheathed with tin, the plates should then be locked at joints and securely nailed under the lockings with nails at least one inch long. No air spaces should be left in a door, by paneling or otherwise, as the door will resist best that has the most solid material in it.

A process has been invented the object of which is to treat bricks or building blocks to solutions of coloring matter and glaze, whereby their value for building purposes will be enhanced, and a structure be ornamented by allowing a choice of colors and shades at the will of the builder. In carrying out the invention, the following formula is employed to form the solution, which, for convenience we will designate the "white body or slip:' Blue clay, ninety-nine pounds; China clay

three hundred and twenty-one pounds; spar, three hundred and fifteen pounds; flint, forty-two pounds; bone (calcined and ground) three hundred and fifty-four pounds. These ingredients are mixed in a sufficient quantity of water, which will give a consistence to the solution that will allow it to be passed through a bolting cloth of seventy meshes to the square inch, after which the solution is allowed to settle, and the water poured off until the residuum will weigh, approximately, twenty-four ounces to the pint. The bricks are dipped or immersed in this solution and allowed to dry, after which they are treated with a glaze or enameling solution, and again dried. The glaze solution is prepared as follows: Spar, ninety pounds; Paris white, eighty pounds; China clay, twenty pounds; borax, sixty pounds; soda-ash, sixty pounds; flint, forty pounds. These mix and calcine in a gloss-kiln. Of this mixture, take two hundred pounds; spar, seventy pounds; flint, forty pounds; white lead, fifty pounds. Grind together wet, and with water form a solution which will pass through a bolting-cloth of eighty meshes to the square inch. After treating with this solution, the bricks are placed in saggers and set in a kiln, and burned until the glaze flows.

Interesting to Plumbers.

Mr. James Tucker, one of the most intelligent plumbers in Boston, in reply to a personal inquiry, writes: "I am unable to give you the percentage of bad plumbing in the better class of houses in this city. I am free to say, however, that there are not twenty houses out of a thousand that I would care to live in."

The case of Bernard Byrnes, a plumber on Seventh avenue, in this city, whose prosecution by the Board of Health was briefly noticed last week, seems to be a gross attempt to violate the plumbing law by deception. The job was new work in a house on Sixth avenue. Two-thirds of the cellar drain was covered in before Mr. Hooper, the Health Board Inspector, began the examination required by law. On uncovering it some recklessly bad work was revealed. No attempt had been made to close the joints of the drain, either with lead, putty, or even cement; the joints of the rain-leader were similarly defective, and the air-inlet was so loosely connected that the inspector drew it out with his hand. Byrnes admitted that the work was in violation of the law, but asked the inspector to pass it anyway. Of course he was not gratified, but was brought before Justice Smith and held for trial in $300 bail. The case is now in the hands of the District Attorney.

When before the justice, Byrnes pleaded that he had remedied the defects in the drain, but a reinspection proved his statement to be untrue, as the joints were found to be still open.

We hope a speedy conviction will once more be a warning that it is dangerous to willfully violate the plumbing law.—*N. Y. Sanitary Engineer.*

C. F. Wingate, a high authority on plumbing matters in New York, makes a rather sweeping statement concerning the quality of plumbing, which the average plumber will not be inclined to accept without protest. He has been looking very carefully, as it is his custom, into good and bad plumbing in the larger cities, and gives this as his deliberate judgment:

"No words can do justice to the wretched plumbing in the average dwelling of the better class, not only in New York but in other cities, and throughout the country generally. The variety of blundering seems endless. I have never inspected a house without finding some new and ingeniously defective device, and hence my daily experience has been a series of surprises. In the homes of rich and poor alike one finds cheap pan water-closets, which, under no circumstances, can be kept sweet and clean, and which are usually foul, unflushed and unwholesome. Fixtures without traps, or traps of bad shape, alike abound. Traps with no protection against siphonage or evaporation are universal. Leader pipes, ending near windows, are open to the sewer. Cellar drains have no barriers against foul odors. Refrigerators and drinking water tanks are open to pollution from the same source and are constant sources of sickness. Underground tile drains, such as are in universal use, are rarely found tight, or with a proper fall; they constantly pitch away from the sewer instead of toward it; they are broken and leak at the joints, or are undermined by rats, and they usually require to be taken out and replaced by an iron drain, carried along the cellar wall. The sites of these houses are not dry; made land and rock are the usual foundations, and there is no such thing as cellar drainage. Furnace cold air boxes are usually warped, so as to open to cellar and ground air, and are full of street dust. They are frequently over servants' water-closets, so as to absorb the foul emanations from the latter into it. Lastly, the space behind wooden casings, around fixtures, becomes a receptacle for dirt, such as no housekeeper ever suspects, or would countenance for a moment if she did. When these generic faults are added to the effects of intentional bad workmanship and poor material there is no limit to the evil results."

New Inventions.

For staining bricks red, melt one ounce of glue in one gallon of water; add a piece of alum the size of an egg, then one-half pound of Venetian red and one pound of Spanish brown.

J. G. Vaughn, of Middleborough, Mass., has invented a chimney constructed of an outer and inner pipe made of clay or other similar material molded and baked. The space between them is filled with a plastic substance. Thimbles are arranged at proper intervals to connect the chimney passage with the outer lining.

A door has been patented by Messrs. Garrett G. Ackerson and Julius F. Shy, of St. Louis, Mo. The keyholes for opposite sides of the door are out of line with each other, and the locking bolt has two key bit receiving notches, and there are also special key hole guard plates, making a simple and strong lock, not easily picked, and preventing peeping through key holes.

A Boston inventor has invented a new form of brick. The brick has a projection on the bottom along one edge, and a rabbet is made on its opposite upper edge to receive the projection of the next brick above. The brick for corner work are made somewhat different. On account of the bricks lapping at the corners, one-half have the projection and rabbets at one end and the other half at the other; or, as commonly called, are made right and left hand. The projections are sufficiently thinner than the width of the rabbet to hold an amount of mortar sufficiently to permit each brick to be properly set level and plumb, and to hold it. But very little mortar is used between the plain parts of the bottom and top of each brick. Bricks made of this shape have a number of excellent features. The most important points of advantage are the strength of the work they produce, the rapidity with which they can be laid, and the minimum amount of mortar required. For building chimney flues and smoke stacks they are indispensable, and are practically fire proof for the various kinds of work in which they can be used.

THE *Saw Mill Gazette* relates that an oak tree was recently cut that measured seven feet in diameter, from which were cut 9,200 pieces for 30-inch staves. From the top of the tree were cut 500 pieces of heading and 15½ cords of stove wood. The counting of the grain indicated that the tree was 684 years old.

Building Permits.

One two-story house, 18 ft. by 42 ft., Sixteenth, above Tioga st., to Hiram A. Miller, 1210 Ridge ave.

Twenty-nine two.story houses, 14 ft. by 41 ft., Linwood, above Thirty-eighth st., to Jacob Rightley, 2519 Franklin st.

Fourth-story addition, 32 ft. by 50 ft., 1134 N. Front st., to Albert F. Rau, 1755 North Seventh st.

One-story back building, 10 ft. by 9 ft., 532 N. Twelfth st., to Joseph Bird, 1106 Hunter st.

A two-story frame building, 14 ft. by 46 ft., Sixty-third-and-a-half and Race sts., to M. Bartleson, Sixty-third and Vine sts.

Eight two-story houses, 17 ft. by 43 ft., Bellevue, above Twenty-first st., to Thomas J. Jeffins, 239 Chestnut st.

Two two-story houses, 17 ft. by 45 ft., Penn, above Arrott st., to Thos. S. Foulkrod, Leiper and Arrott sts.

A two-story stable, 29 ft. by 162 ft., Amber, above Huntingdon st., to Wm. Steele & Son, 2141 Howard st.

One two-story house, 17 ft. by 30 ft., Ontario st., above Kensington ave., to Joseph McNutt, 2320 Sepviva st.

A one-story back building, 4 ft. by 16 ft., 2042 Frankford rd., to same party.

A two-story carriage house, 15 ft. by 24 ft., Queen and Wayne sts., to David Hey, Queen and Wayne sts., Germantown.

Four three-story houses, 18 ft. by 60 ft., Carpenter, above Cresheim st., to C. R. Kohl & Bros., 45 West Johnson st.

Three two-story houses, 15 ft. by 28 ft., Girard ave., above Forty-sixth st., to W. Price Davis, 4008 Lancaster ave.

One two-story house, 17 ft. by 54 ft., Cedar and Ann sts., to James Walter, Cedar and Ann sts.

Two three-story houses, 20 ft. by 50 ft., Price, above Main st., to McManus Bros., 4 Evans st., Germantown.

Five three-story houses, 15 ft. by 51 ft., York, above Marshall st, to D. R. Meadle, 2452 Frankford ave.

Five three-story houses, 15 ft. by 51 ft., Cumberland, above Marshall st., to same party.

Four three-story houses, 17 ft. by 49 ft., Lehigh ave. and Mutter st., to Jacob Weber, 300 West Cambria st.

French roof, 20 ft. by 30 ft., 2019 Green st., to Arthur H. Williams, 402 Tenor Place.

A two.story building, Botanic ave. and Seventy-eighth st., to Samuel J. Rea, 1741 Fairmount ave.

A two-story house, 16 ft. by 42 ft., Mulberry ave. and Orthodox st., to Samuel R. Eckert, 781 Cherry st.

Two two-story houses, 18 ft. by 59 ft., Seventh and Norris sts., to Mary E. Broomall, 1934 North Sixth st.

A three-story addition, 16 ft. by 15 ft., 810 S. Third st, to Lee & Walker, 810 S. Third st.

A one-story office, 18 ft. by 30 ft., Lancaster avenue, above Preston st., to Frank H. Vogdes, 3959 Lancaster ave.

Three two-story houses, 11 ft. by 30 ft., Garden above Sepviva st., to Ellwanger & Lentz, 2210 East Dauphin st.

One two-story building, 8 ft. by 10 ft., 1014 Passyunk ave., to C. H. V. Newkirk, 1827 Passyunk ave.

One three-story building, 16 ft. by 76 ft., 1635 South st., to McFetridge O. McConnell, 1608 Spruce st.

One two-story house, 16 ft. by 42 ft., Carpenter, above Green st., to Wm. Garolin, 5008 Adams st.

One two-story stable, 18 ft. by 42 ft., Owen st., above Township Line, to Joseph Parker, 2639 Germantown ave.

Two two-story houses, 14 ft. by 28 ft., Almendo and Heinston sts., to John Janda, 2823 Edgemont st.

One three-story house, 65 ft. by 78 ft., Powelton ave. and Thirty-fourth st., to J. E. & A. L. Pennock, 1901 Wood st.

One two-story stable, 17 ft. by 30 ft., Victoria, above Dauber st., to Christian Dear, Frankford.

Four two-story houses, 14 ft. by 38 ft., Forty-fifth st. and Germantown ave., to John Bateson 1002 S. Nineteenth st.

Four two-story houses, 13 ft. by 28 ft., Philadelphia, above Dauphin st., to L. A. White, 2318 Carlisle st.

Nine two-story houses, 14 ft. by 25 ft., Orkney st., above Lehigh ave., to F. Lowbrecht, 2020 N. Fifth st.

Eight three-story houses, 16 ft. by 42 ft., Fifth st., above Lehigh ave., to same party.

One two-story building, 11 ft. by 14 ft., 234 N. Twentieth st., to J. H. Jarden, 2431 Jefferson st.

A two-story stable, 25 ft. by 20 ft., Washington st., above Trenton ave., to Wm. O'Brien, Frankford.

Four two story houses, 10 ft. by 56 ft., Germantown ave. and Somerset st., to Jacob Marsh, 2835 Germantown ave.

Seven two-story houses, 13 ft. by 28 ft., Hutchinson, above Cambria st., to same party.

Four two-story houses, 15 ft. by 45 ft., Twenty-first and Federal sts., to H. R. Coulomb, 731 S. Tenth st.

One two-story store, 16 ft. by 50 ft., Twentieth and Tasker sts., to Wm. H. Messick, 509 Snyder ave.

Nine two-story houses, 12 ft. by 26 ft., Palethorp st. and Lehigh ave., to A. M. Zane, 1529 N. Seventh st.

Five three-story houses, 13 ft. by 28 ft., Second st., above Lehigh ave., to same party.

Four three-story houses, 12 ft. by 28 ft., Second, above Lehigh ave., to same party.

A two-story house, 19 ft. by 40 ft., Nice ave. and Township Line, to Joseph Hutelmeyer, Jr., Nice ave.

One three-story dwelling, 16 ft. by 28 ft., Thirty-sixth and Rockland sts., to William J. Shedwick, 674 N. Thirty-fourth st.

A two-story building, 18 ft. by 43 ft., Bockius, above Aramingo st., to Thomas Greenwood, same place.

M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—Mr. Pradanovic, of Pesth, has been using dynamite for driving piles. He places an plate, 15 inches in diameter and 3¾ inches thick, in a perfectly horizontal position on the pile to be driven. A dynamite cartridge in the form of a disc, containing 17½ ounces of dynamite, is placed on the iron plate and exploded by electricity. It is stated that the pile is driven by each explosion to a depth equal to five blows of a pile engine weighing 14¾ Vienna hundredweight falling 9 feet, 10 inches. The iron plate on the average, resists 25 explosions.

—The will of James Creighton, who died at St. Joseph's Hospital on July 30th, possessed of personal property amounting to $4,000, was admitted to probate on Thursday. It contains the following bequests: Rev. Patrick Smith, of Tuabnet, County Monaghan, Ireland, to assist in finishing his church, $100; to the Seminary of St. Charles Borromeo, at Overbrook, $500; to the St. Vincent de Paul Society, attached to St. Paul's Roman Catholic Church, $100; to the St. Vincent de Paul's Society of St. Joseph's Church, $100; to the St. John's Orphan Asylum, $300; to St. Joseph's Orphan Asylum, $300; to the German Orphan Asylum at Tacony, $100; to the Purgatorical Society of St. Paul's Roman Catholic Church, $100; to Archbishop Ryan, for the use of the Catholic Home for Fallen Women, $500; to the Little Sisters of the Poor. $100; to their branch house in Germantown, $100; to the House of the Good Shepherd, $200; to the Sisters of Notre Dame, Rittenhouse Square, $100; to the Sisters of St. Francis, to aid in building St. Agnes Hospital, $100; to St. Joseph's Hospital, $300; to the Sisters of the Immaculate Heart of St. Paul's Roman Catholic Church, $100.

Preservation of Forests.

Those interested in the preservation of the forests will find a frightful subject for their study in the disastrous forest fires, which are occuring with increasing frequency throughout the country. The necessary denudation of forests is bad enough, but the destruction of forests by fire is a catastrophe, with which the public are becoming familiar. There seems to be no way of stopping these conflagrations. Railroads are penetrating new timber fields constantly. The papers have been filled with accounts of recent fires, which recall the urgency for some sort of protection, if it be at all possible. A recent Milwaukee dispatch states that D. H. Graves, a land hunter, of Eau Claire, has just returned from an exploring trip through the forests on the Upper Chippewa and toward the Superior region. He reports the destruction of standing pine and hard wood beyond calculation. He says the fire is making great havoc along the river twelve miles this side of Superior, and what few cultivated farms there are in that direction are completely swept over and the crops and considerable other property destroyed, in many instances leaving the owners dependent. The fire extends from that point all along the Superior and Omaha Road nearly to Chippewa Falls, ten miles north of here. The grain fields are a pitiable sight, all of them having as sombre an apearance as coal.

—It is surprising that the finances of a town or city could be so badly mismanaged as those of our neighboring city Gloucester. The bond for $25,000 is not to be found and the City Treasurer has gone where processes cannot reach him. The amount of funds held by the ex-treasurer are estimated at from $7,000 to $10,000.

Browning, King AND Co.

910 & 912 CHESTNUT STREET.

The Answer to that Question!

Very frequently we are asked, "Why do you advertise other people? When you have a store of your own in Philadelphia, why do you call attention to the stores of others and recommend their goods as well as your own?" Our reply is this: Our object is to introduce and sell the DAY SEWED SHOES anywhere and everywhere that shoes are bought and worn. It does not matter in the least who sells them, for every pair sold is just so much gained for the company. Consequently we can afford to advertise other people. The store, No. 23 North EIGHTH Street, was opened for the express purpose of putting the DAY SEWED SHOES before the people, with every facility for displaying the various kinds, grades, sizes and prices of the boots and shoes manufactured by the DAY SEWED SHOE MANUFACTURING COMPANY.

Everybody is invited to call and examine the stock any day and every day, but if any one wishes to purchase the DAY SEWED SHOES from any other shoe dealer they are cordially recommended to do so, and we mean what we say, since it will still be our gain. The DAY SEWED SHOE STORE is truly a FAMILY SHOE STORE, provided with all the different requirements of such an establishment.

$100 REWARD.

In order to protect ourselves from the infringement of our rights, we will pay One Hundred Dollars to any one proving to us that they have bought from any manufacturer or dealer a pair of shoes as "Day Sewed" without the Trade Mark or Royalty Stamps of the patentee, GEO. W. DAY.

THE DAY SEWED SHOE MFG. CO.,

No. 23 N. EIGHTH STREET.

Mr. H. S. BEEBE, No. 231 North NINTH Street, dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the ***Works are under contract with us*** to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under ***this Brand or a Private Brand.***

VOL. I.—NO. 33. PHILADELPHIA, MONDAY, AUGUST 23, 1886. PRICE 15 CENTS

Items of News

—The Welsh Mountain christians are to have a church at a cost of $1,100.

—The brickmakers of the United States will hold a convention in Chicago about next October.

—An ordinary brick will absorb one pint of water, which occupies the space that in the dry brick was filled with air.

—Corrugated iron is said to be the strongest known form of sheet iron, and imparts material strength to the structure to which it is attached.

—A varnish for roofs is composed of 35 parts of clay, 30 parts of mica slate and 35 parts resin, all finely powdered and heated with 50 parts of tar.

—Carpenters Union 154, Marloboro, Mass., have asked for eight and one-half hours to constitute a day's work on Saturday The bosses have all complied except one, and he wants to compromise.

—A mortgage for $25,000 against the Pennsylvania Tack Works, held by Francis H. Keith, was foreclosed at Norristown last Thursday in default of payment of interest. The mortgage covers the building and machinery.

—The will of the late John C. Miller, the well-known brewer of Germantown, who died on the 8th instant, was admitted to probate on Thursday. His entire estate, valued at about $250,000, is bequeathed to his widow and two children.

—Commissioner of City Property Dixey placed the name of James M. Powell, 516 South Delaware avenue, on the contractors' blacklist. Powell was given a contract for repairing Christian street wharf, but he failed to do the work as required.

—The contract for the paving of Ninth street from Race to Sargent streets, about which there has been so much controversy with the Union and Ridge-avenue Passenger Railway Companies, was awarded to D. & P. McNichol at $2.30 per square yard.

—A palace to cost $250,600, exclusive of the ground occupied, will be built in Washington City for the Chinese Legation. It will be after the fashion of a mandarian palace, surrounded by a wall, and occupy the entire block in the most elegant part of the city. Carpenters and masons from China will do the work.

—The Inspectors of the County Prison, with Councils' Committee on Prisons, opened bids for the preliminary work on the new county prison, near Holmesburg Junction. R. J. Malone & Sons were the successful bidders. They were awarded contracts for excavating the foundation, at 40 cents per cubic yard; for furnishing the stone and building the foundation wall, $4.90 per cubic yard below the surface, and $5.90 per cubic yard above.

—It is not because good paving sand is not easily procurable close at hand that the wretched stuff too often used in our city paving is taken for that purpose. There are lots of first quality sand within easy reach on a short haul by water. There must be some other reason or pretext for using poor stuff instead of the good.

—The Chicago *News* suggests as a remedy for anarchy the procurement of homes for the working people through the agency of co-operative building associations like those of Philadelphia, whose holdings exceed $50,000,000, and where, during the labor riots of 1877 the 20,000,000 members acted as an efficient counterpoise to the lawless classes.

—Several cases, says the *Electrical World*, have recently been reported in which lightning, having struck the water mains of towns, caused their destruction in parts. The latest of these occurrences took place in Halifax, N. S., where lightning struck a fire hydrant, and, notwithstanding the easy path to ground which the mains apparently afforded, tore up the length of two blocks, throwing large rocks to the surface.

—At the adjourned meeting of the Gloucester City Council on Wednesday evening, the Finance Committee reported having appointed Samuel Hufty, of Camden, to audit the accounts of the late Treasurer, Albert J. Greene, deceased. Mr. Hufty reported the total amount received by Mr. Greene was $19,143.06; expended, $9,981.06, leaving a balance due the city of $9,162. The Recorder said he had not found the missing bond of Mr. Greene.

—The Board of Health at its meeting on Thursday received a communication complaining of the existence of a nuisance on Worth street, above Margaretta street, Frankford, which is alleged to be prejudicial to the public health. It stated that the bed of the street is several inches lower than the gutter, and the waste water flows into the depression, where it becomes stagnant. The matter was referred to the Chief Inspector for examination.

—In Lincoln county, Neveda, on the Rio Virgin, there is a deposit of pure rock salt which is exposed for a length of two miles, and a width of half a mile, and is of unknown depth. In places, canons are cut through it to a depth of 60 feet. It is of ancient formation, being covered in some places by basaltic rock and volcanic tufa. The deposit has been traced on the surface for a distance of nine miles. It is so solid that it must be blasted like a rock, and so pure and transparent that print can be read through blocks of it a foot thick. At Sand Springs, Churchill county, there is a deposit of rock salt 14 feet in depth, free from any particle of foreign substance, which can be quarried at the rate of five tons a day to the man. The great Humboldt salt field is about fifteen miles long by six wide.

—The largest bell in the world is the great bell of Moscow, at the foot of the Kremlin. Its circumference at the bottom is nearly 68 feet, and its height more than 21 feet. In its stoutest part it is 23 inches thick, and its weight has been computed to be 443,722 pounds. It has never been hung and was probably cast on the spot where it now stands. A piece of the bell is broken off. The fracture is supposed to have been occasioned by water having been thrown upon it when heated by the building erected over it being on fire.

—The largest blast of rock ever made in West Virginia was fired on the extension of the Ohio River Railroad, opposite the town of Little Hocking, O., recently. The line of the blast was 190 feet long, eighty-four kegs of giant powder being used, and over 20,000 cubic feet of sandstone rock was moved. Eye-witnesses say it seemed as though the entire face of the hill was thrown into the air. Rocks weighing hundreds of pounds were thrown across the Ohio into Little Hocking. Almost every window in the town was broken, and residents were thrown to the ground by the shock.

—The English Commission on Trade Depression has made its third report, and find that the supply of gold has decreased, while the demand has increased. While the returns from the external trade showed little diminution, the volume of money value, owing to the fall in prices, appeared to be greatly reduced. It is the opinion of the Commission that the fluctuations in the relative value of gold and silver have caused serious losses, tending in certain cases to divert the course of trade and aggravate depression. The Commission strongly advises that a searching inquiry be made into the currency question. Bimetalists look upon this as a strong argument in their favor, which it undoubtedly is.

—A novel system of fire extinguishing has been introduced in London by Mr. William Glenister, chief of the Volunteer Fire Brigade, Hastings, and Mr. J. C. Merryweather, of London. The apparatus forms the subject of a patent. The new fire and life saving machine consists of a tricycle with which are embodied the following: 1. A hose real carrying a large quantity of specially constructed hose for winding in a small compass, with all the attachments for working on to a fire from the street hydrants. 2. A light double-pump fire engine in collapsible cistern, capable of throwing 25 gallons per minute, to be worked by two pumpers. 3. A simple fire escape, with descending ropes and bag. 4. Jumping seats formed from the riders' seats. The machine is run at full bicycle speed by two men, and if desired the treadles can be so disposed as to work the fire pump, but for this a special gearing is required. For country districts and suburban towns, this improved machine will doubtless be appreciated.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, AUGUST 23, 1886.

NORTH Broad Street is becoming quite a fashionable thoroughfare.

SOME old tumble-down Second Street properties are about changing hands, it is said, with a view of extensive improvements.

QUITE a number of dwellings are to be torn out this fall on some of the principal streets to make stores out of them.

THERE will be very little increase in the revenue of the Commonwealth this year over last from personal property. This is accounted for by the reason that the rate of taxation is reduced 25 per cent., and by the exemption of manufacturing corporations from tax. The skrinkage from these two causes will nearly overcome the increased valuation.

Philadelphia county valuation is put at $146,336,985. Total for the State, $386,149,417.

THE immense quantity of timber employed in building can be rendered practically fireproof by being covered throughout with patent asbestos paint, says a scientific paper. To show the extraordinary capacity of this composition in resisting fire, and as a non-conductor of heat, two huge wooden packing cases, open on one side, were placed side by side. One of these cases was coated with asbestos paint; the other was *au naturel*, and the interiors of both were filled with shavings liberally soaked in petroleum. The shavings were then set on fire. The unpainted case was speedily in a blaze, and ultimately caved in, leaving only a heap of charred timbers. The fire in the asbestos-painted case slowly burned itself out, doing no damage beyond slightly blistering the paint on the surrounding sides.

THE stationary engine of the rolling mill at the Reading Iron Works, in Reading, Pa., has just been taken out, after working steadily for close upon fifty years. This engine was built in Pittsburg, and was hauled by wagon the greater part of the distance thence to Reading. It is still in good order, and is now removed to make way for a larger engine.

BUILDING permits and conveyances have fallen off this week; architects and builders are taking their vacation. Real estate agents say business is slack—nothing doing in fact. There are numerous inquiries booked however. Business is dead this week, but those who predict dullness next week or next month will prove to be unsafe prophets. Large operations will shortly be consummated which the principals desire to be kept under cover until the time comes to talk.

MORE than the usual number of people have been absent from business this year for a week or two. Vacations are becoming popular. Society works under an enormous pressure. The tired man at business is liable to be beat on a trade. The tired professional man is in danger of being circumvented. The tired mechanic is in danger of losing his place. Intellectual as well as physical relaxation is a necessity which cannot be unheeded. The mind needs rest rather than or more than the body. In the hurly-burly strife which characterizes modern social and business intercourse everything is done at a high pressure speed. The energies are worn out; vital strength is exhausted rapidly, and rest and leisure become absolute necessities every season.

ONE of the important industries of this city, about which the public know but little, is the manufacture of architectural mouldings, cornices, church and other fine plaster decorations. The modeling of the figures and arts pertaining to the branch, executed in plaster of Paris, as performed at the establishment of Mr. Thomas Heath, 42 North Eleventh street, are without doubt very fine; they combine the rare proportions and matchless symmetry of classical forms with French esprit and grace. The taste of the American people for such articles, for furnishing, is becoming greater every year. Many of the more palatial residences of our citizens, banks, halls, churches and schools bear the productions of this form of workmanship. Amongst them is the Masonic Temple. The demand for the architectural manufacture of these goods within the last few years has grown very rapidly.

THIS is a bad time to make money in or out of speculation. The best way is to hammer money out in the old-fashioned way by honest, legitimate, plodding work. Where one finds himself a lucky dog, nineteen find themselves losers, and, even though they succeed in hiding their losses, they never survive the bitter remembrances and disappointments.

ONE of the most original and valuable contributions to engineering science that has been made of late years, is the method devised by Mr. Poetsch for sinking shafts and making excavations for the foundations of buildings, bridges and other structures, and for constructing subaqueous tunnels, sewers, conduits and the like, and, generally speaking, for the execution of all kinds of excavation in quicksand, and similar soft and water-bearing strata. It is a radical departure from all previous methods, and has the merit of extreme simplicity, so that its announcement was received by the engineering fraternity with expressions of very general approbation, which the subsequent brilliant success of the system in actual practice demonstrated to have been entirely justified.

The Poetsch system consists simply in freezing the material all around the space to be excavated, by which it is for the time being converted into a solid mass, or wall, which permits the excavation to be made and the permanent work to be executed with the same ease and certainty as similar work in rock or solid earth, and with entire safety against disastrous collapse. It differs essentially, therefore, from all other methods hitherto proposed for accomplishing this extremely difficult and dangerous class of engineering work, in dispensing with the necessity of erecting and operating a costly pumping plant to remove the water from the water-bearing stratum while the work of excavation is being executed; or with equally expensive methods of holding the water back by the use of air pressure, which involves the employment of caissons and a system of air locks and air-compressing machinery. Besides dispensing with these complicated and costly appliances, the Poetsch system eliminates completely the ever-present element of danger in this class of work, permits the work of excavation to be done precisely as though it were in solid rock, and dispenses, therefore, with all necessity of providing against bottom and lateral pressure, or, in a word, vastly simplifying the execution of a class of work which ranks among the most difficult and dangerous which the engineer is called upon to perform.

THE Southwestern section of the city has been transformed within a few years. Land at certain points has been doubled in value, at least in asking prices.

A COMPANY is about to be organized with a capital stock of $100,000 for the manufacture of petroleum gas for fuel. The company will be composed of a number of the leading capitalist of Erie. It is believed this gas can be sold at 5 cents per 1,000 feet, yielding a fair profit to the manufacturers, and that it will prove a strong competitor to the natural gas. Having much less pressure in the pipes than natural gas it is possible to use cast iron pipes instead of the wrought iron pipes, as usual.

THE iron manufacturers, coal miners, machinery and locomotive makers and mechanics, in a thousand avenues of activity, are all looking forward to booming business demands Business men and manufacturers have learned much of late years, and so far have been wise enough to avoid overproduction. The railmakers will run night and day to the end of the year and not overproduce. The skelf and wrought-iron pipemakers will do the same. The pigiron makers are producing 122,000 tons of iron per month, the largest output in our history, and yet all of this finds market and fair prices. We are moving along steadily in the right direction, but it is necessary to keep it always in mind that with our enormous producing capacity it is no difficult matter to spoil our prosperity by gorging the channels of trade.

THE artificial stone pavement has within the last few months become very prominent for which Mr. Samuel A. Miller is the Philadelphia representative. His office is at 14 North Seventh street. He has also a patent sewer and conduit invert block. This material is suited to constructing building walls of any design of ornament desired; columns, bridges, abutments and piers; flooring for damp cellars can be made perfectly dry; it is also a very useful article for storage, stable and brewery flooring. Its resistance to moisture renders it valuable in all cases when sanitary provision is requested. For side walks, garden or park walks it is unequaled. Philadelphia, as compared with other American and European cities, is far behind the times in the use of the valuable artificial stone for building purposes. Its value as a building material was demonstrated at the great fire in Chicago and in many other cities. At Paris, quite recently, a test was made of it as to the use for columns against those of cast and wrought iron against heat, and it was proven that it was far superior. Many cities are using it for sanitary purposes —sewer bottoms—and is found to be cheaper, cleaner and in all cases much more satisfactory. There is no uses to which stone or bricks are used that artificial stone cannot take its place. The bricks which are made of it are doubtless without fault and architects would do well to carefully examine into the desirability of using them.

DEFALCATIONS have their runs like all other epidemics. Now comes defalter Gray, treasurer of two large New England mills Who will be next? Certainly there are more to report. The slipshod financial management of so many of our large corporations invites rascality. Managers and directors are—to put it plainly—too lazy to look after money matters. They may feel like investigating sometimes but then it might offend the delicate sensibilities of our Wilsons, Grays and Pearsons to have their accounts looked over.

IT is bad business policy to not remodel. Hood, Bonbright and Strawbridge & Clothier have taken the lead. Who will follow? Why cannot Market street be transformed from an old fashioned provincial street into a cosmopolitan thoroughfare, with its commodious business establishments typical of our spirit of progress and enterprise. There is entirely too much conservatism in this respect. The newspaper publishers have done their duty. Look at the *Ledger*, the *Record*, the *Times*. We build fine residences in the suburbs, but we let our business places go. This is not right; our business men have piled up fortunes in their old stores. Why not then remodel them? It is parsimony not to do it.

THE most important features of the commercial situation during the past week have been the rapid and wide fluctuations of the money market, the sudden decline in the rates of foreign exchange to at or about the gold importing point, and the speculative flurry in wheat on account of unfavorable reports respecting the condition of foreign crops. Outside of these influences the movement of trade has not as yet developed any special or marked improvement. The demand for merchandise has been fairly active for this season of the year, but the general quickening of trade with the approach of the autumn months has not yet commenced. With scarcely an exception, however, a confident and hopeful feeling prevails and there is every reason to expect an early revival of business activity as the natural result of the commercial and industrial prosperity of the country that is slowly developing. The stringency of the money market has been foreshadowed for several weeks. The bank statement has indicated a gradual absorption of the surplus reserves at this city until now there is held by the associated banks less than $7,000,000. This absorption of money has been in no sense unhealthy, for it has not resulted from rank speculation or over-trading, but from the investment of funds in sound and substantial enterprises and the employment of money in the legitimate channels of trade. It can hardly be claimed that commercial affairs are prosperous so long as the banks are carrying a heavy accumulation of unproductive money, and the close working of the money market in all important financial centres, during the past week, s the best demonstration of the satisfactory condition of the commercial situation and the improving tendency of trade.

THOSE who entertain the opinion that the possibilities of labor-saving machinery are nearly exhausted, and that the whole field of art industry in which it may be advantageously employed has been already covered by inventive genius, are greatly mistaken. That the achievements of human ingenuity have been wonderful, goes without saying, and there are reasons to believe that future triumphs in this direction will be even greater and more fruitful. We are forced to this conclusion by reason and analogy. Who would have believed, only a very few years ago, that the difficult and complicated processes which are now every day being wrought out by machinery in various branches of manufacture would have been possible? Thus it is that the problems unsolved by one generation become accomplished facts by another. Who shall say that what now seems impossand improbable may not be successfully attained by those who will come after us? In the hands of the modern scientific inventor matter becomes almost miraculously endowed with life and intelligence, and with great accuracy performs those functions which the most skilled manual labor executes but slowly and imperfectly.

PHILADELPHIA has begun a liberal policy of expenditure in street improvements, water and electric light and park improvements. It will pay. Our business men ought to be as liberal. There are thousands of them doing business in an old style, three or four-story brick building, erected thirty or forty or perhaps sixty years ago. Why do they not tear out the old front and put in a new one, with iron front and plate glass and fine finish generally? Are our merchants and business men not making money enough to get out of the old, last-century coops and show the world that they are in sympathy with it? There are thousands of old stores that ought to be remodeled and that could and would be if the owners and occupiers only looked at the matter right. Look at Market street, either from Front street or from the Public Buildings. It looks very like it did twenty or thirty years ago. There stand block after block of the old style buildings; everyone of them ought to be remodelled. It would pay to do so. No body has yet dared to try the apartment house system in Philadelphia. Yet a few good apartment houses in the thickly-settled sections would undoubtedly pay. Look for instance at the overcrowded boarding houses along Spruce, Pine, Walnut and many other streets. Would not the occupants of some of these overcrowded houses gladly accept a change into a fine, large, airy, clean and commodious apartment house, with its day and night elevators and electric lights and everybody-attend-to-his-own-business conveniences? Assuredly. Why will not a company of enterprising men get together and talk it over. Green's at Eight and Chestnut streets and Dooner's on Tenth street shows what can be done. Our local bloods would patronize a finely-built apartment house in preference to the old-fashioned, dingy, last-century house of funeral aspect.

THE character of our architectural papers are improving. They seem as schools to sharpen the wits of architects and builders alike. A reader must be extremely stupid who can read the splendidly gotten up journals in architecture and building interest without being instructed and pleased. The best thoughts of our best minds are presented in excellent but plain language to the readers, and they have opportunities for both learning and unlearning all instruction, which all need.

THE present activity in our iron and steel industries would have been very much less than it is if our manufacturers had taken advantage of the improved business situation in the latter part of 1885 by attempting to push up their prices to the figures realized a few years ago. If this attempt had been made it is certain that the result would have been disappointing in every way. Our immense production of iron and steel would certainly have been checked by restricted buying, while high prices would have furnished to our foreign competitors an opportunity to undersell us in our own market. This time our people have been wise.

ALTHOUGH the indications in manufacturing circles all, or with the very rarest exceptions, point toward a period of activity and prosperity, yet there are those who regard the present rosy tints on the business sky as fictitious coloring. A leading and very successful manufacturer in Central New York predicts that the worst point in industrial disturbances has yet to come, and will not be safely passed until two great changes occur. The price of labor must be reduced until it bears a just relation to the profits of production. Wages remain practically now the same as they were when bar iron was worth 2½ cents and wheat $1.12. Both iron and wheat and manufacturers' profits, and, for that matter, interest rates, have materially decreased, while labor, at all times highly paid, stands menacingly ready to demand advances the moment—as in January and February last—business made a slight improvement. The fact that the purchasing power of a dollar, of the commodities of daily consumption, is greater in this country than in England does not tally well with that other great fact that American labor commands fifty per cent. to one hundred per cent. higher prices than are paid by John Bull. While the great body of manufacturers throughout the East believe that we are entering on a period of prosperity, and the history of the trade for the past half century fully warrants this belief, yet the cold fact remains that during all the depression wages did not sink one point to where the manufacturers' and agriculturists' profits dropped five or ten points. In all these facts this astute manufacturer sees causes for distrusting the present flattering outlook, while at the same time freely hoping he is mistaken in his impressions. This manufacturer does not stand alone in these views. The same thoughts found much stronger expression, if not so well defined, in the case of an old and well-known manufacturer in Connecticut. The relative number, however, of those in the trade who hold these views is very small; yet they afford some food for thought, and laborers, especially, would do well to study them carefully before taking any more disastrous steps toward coercing capital to adopt their wild views.

IN addition to the improvements now being made to St. John's Roman Catholic Church, Thirteenth street, above Chestnut, the old three-story brick house occupied by the officiating priests is being torn down, and will be replaced with a fine, new brick building, four stories high, with marble fronts on Thirteenth and on Clover streets. It will cost $20,000.

BUILDERS' and traders' exchanges are being organized in all large cities, those notable ones in Chicago, Cincinnati, New York and Boston serving as a model and incentive. The latest to form are those located at Indianapolis, Indiana, and Dayton, Ohio. The exchange at the former city starts with about 150 members, comprising all the leading manufacturers and contractors.

A NEW concrete now being used quite extensively in France is composed of eight parts sand, gravel and pebbles, one part powdered cinders and one and a half parts unslaked hydraulic lime. These materials are thoroughly beaten together, the mixture forming a concrete which dries almost immediately, and becomes in a few days extremely hard and solid. It may be improved by the addition of one part cement.

"Do you know," said an extensive city real estate owner "that about as acceptable a sidewalk as can be laid is one built of pines. A good plank walk is far more acceptable to the pedestrian than either asphalt, brick or stone. A plank walk, built of rough pine laid down into the ground, won't last long, and is a mean sidewalk at best. I build all my walks of 2x6, surfaced one side, laid crosswise one-half inch apart, on stringers placed on top of the ground. I give the walk just tip enough to allow the water to run off. A walk thus built will last for years in first-class condition, and cost but little for repairs."

IT will require very little observation to convince one that the uses of sheet metal in building construction has of late very considerably extended, while its adaptations in this important field have likewise gained in variety and importance. It may safely be affirmed that at the present time tenfold more sheet metal is used for building purposes than was used less than ten years ago; and its advocates claim, and not without good cause, that its utilities are only beginning to be appreciated at their proper value. New uses are being found for the material every year. Among the more interesting of such recent applications may be named, for example, fire-proof corrugated iron arches for ceilings; finely corrugated sheet metal, tastefully decorated, for the interiors of public halls, theatres, offices and stores, to say nothing of other special uses in building to which the material readily adapts itself, and not omitting mention of the well-known and successful use of sheet iron for roofing and siding, for which purpose immense qualities are annually consumed.

Of these products, it is not invidious to say that the corrugated forms of sheet metal are for most purposes decidedly the most useful, and the enormous increase in the demand for these products is the best evidence that could be presented to demonstrate the fact.

THE four hundred masons and bricklayers of Milwaukee, who struck about two weeks ago, causing an entire suspension of building operations, returned to work ten days ago. The eight-hour day continues without any agreement as to when it shall case.

DR. Kimball, Director of the Mint, has completed his report on the production of gold and silver in the United States during 1885. The production of gold is estimated at $31,800,000, an increase of $1,000,000 on 1884. The production of silver for the calendar year 1885, calculated at the coining rate in silver dollars, is estimated at $51,600,000, against $48,800,000 in 1884. The director estimates the amount of gold coin in the United States on January 1, 1886, to have been $533,485,453; of silver dollars, 218,259,-761; subsidiary silver, $75,034,111; or a total stock of coin of $826,779,325.

CHERRY.—The time is not far distant when good cherry timber will be as difficult to obtain as good walnut is at the present time. The cherry forests of Pennsylvania, undoubtedly the finest in the country, are nearly exhausted, and about all that is left in that State is held by a few large operators, who have advanced the price of the manufactured lumber to such a figure that in certain sections it has become a difficult matter to secure trade. In 1878 the demand for cherry lumber in the East began to increase, and it was the means for increasing the number of mills in the State mentioned. At that time stumpage cost nearly, if not quite, as much as at present, and the lumber sold at an average of $37 per 1000 feet at the mills for good, and the culls were considered worthless. As the demand increased, the manufacturers gradually advanced prices, and at the present time good first and second cherry is held at the Pennsylvania mills at $60 a thousand, while the general grade of the lumber is inferior to that sold seven years ago at $37. Cherry culls are sold today at from $10 to $15 a thousand.

THE liability of iron to rust is a great drawback to its use for many purposes, and the practical value of a process which will protect it, at a slight expense, is self-evident. That the process is successful in accomplishing this object seems no longer a matter of doubt, and at less cost than galvanizing or tinning. The color on cast and wrought iron is a bluish-gray, which to some may be objectionable, but as the coating takes paint far better than untreated iron, this objection is easily overcome, and with the assurance that the paint will remain, and not soon be thrown off as it is generally. For polished work the color is a lustrous blue-black, adding greatly to the beauty of the article treated. This process seems peculiarly well adapted for gas and water pipes. Any one who has had occasion to use water which has passed through a new iron pipe, or one that has not been used for some time, knows how full of rust it is, and that only after months of constant use does it become clear again. With pipe coated with the magnetic oxide by the Bower-Barff process, no trouble of the kind can occur. The water runs pure from the first day; and if for any reason the pipes are emptied, and left so, there is no danger of their becoming coated with rust. Another important fact is, that the water coming through one of these rustless pipes is just as pure as when it entered, for the water can dissolve none of the coating of oxide, as it always does with lead or galvanized pipes. It is a well-known fact that water running through lead pipes is very apt to contain lead in solution, and the continued use of such water causes lead poisoning, for, although the amount (of lead) dissolved may be very small, still it accumulates in the system, and finally causes sickness and disease.

THE New Jersey State Bureau of Labor Statistics, in dealing with the great question, how best to improve the condition of the working man, has obtained letters from representative workmen in various parts of the State. The following extracts from their replies are printed in its seventh annual report, and as giving the views of the more intelligent workmen themselves, they are entitled to the most thoughtful consideration.

One writer reports: "Whiskey and beer are the main obstacles here." Another says: "Too large a portion of our wages go to the sellers of rum and beer." Another: "Ignorance and intemperance are the chief causes which prevent us from improving. Various others remark: "Laws prohibiting the manufacture and sale of liquor would improve the working man's condition." "Local option has improved our condition." "We must have a prohibition law before our condition is much bettered." "What is wanted is that men should drink less and keep better hours." These are the views of the workmen themselves. In the same mood Mr Powderly says: "Boycott the saloons." Will the workmen do it?

HERE is the latest political utterance on the labor question: That we sympathize with labor in its efforts to make industrial and moral worth, not money, the true standard of individual and national greatness, and to secure to the workers the full enjoyment of the wealth they create and sufficient leisure in which to develop their intellectual and social faculties, and to this end we desire the enlargement of the Bureau of Statistics, the abrogation of all laws that do not bear equally upon capital and labor, and the prevention of the hiring out of convict labor, the adoption of measures providing for the health and safety and indemnification of injuries of those employed in mining, manufacturing and building industries; the enactment of laws by which labor organizations may be incorporated and arbitration extended and enforced, and a suitable apprenticeship act for the purpose of creating a better class of artisans and mechanics; the prohibition of the employment of children under fourteen years of age in workshops, mines and factories; the strict and exact enforcement of the laws relating to pluck-me-stores and store orders and those relating to the accounting of industrial works; the appointment of inspectors to carry out these provisions, and a rigid enforcement of existing emigration laws to exclude pauper, contract and assisted emigration.

IN an address lately delivered before the Massachusetts Institute of Technology, Jos. D. Weeks said: It will be found that the success of arbitration has been secured where there have been strong unions to compel the acceptance of the awards. It is not my purpose to discuss the advisability of unionism. From what has been said in previous chapters it will be inferred that to the principle I give my hearty assent. I believe with the Duke of Argyle, "that combinations of working men for the protection of their labor are recommended alike by reason and experience." What I desire to ask those who object to arbitration on this account is if their objection will do away with unionism, or if it will remove the necessity of recognizing and treating with unions in the near future. Unionism is here and it will not depart. It is growing yearly in power, in wisdom and in organization. It cannot be crushed out; it will not permit itself always to be ignored or dispised. Is it wisest to treat it as an enemy or friend? Is it not best to make it, in the language of the Court of Paris, "a new element of productive power and an earnest pledge of peace?"

The most effective pledge of industrial peace, in view of the present constitution of industrial society and the conditions which obtain, is arbitration and conciliation, with strong unions to enforce its decisions. I speak of strong unions, for it is only a strong union that dare be just. A weak union, which represents but a part of a section of trade, is timid and cowardly, and yet tyrannical, and seeks to make up in bluster and flagrant injustice what it lacks in power. But a strong union can be just and generous without fear of being charged with cowardice, and when there is beside it a strong employers' association, strikes and lockouts will be of rare occurance, peace will be assured and production go forward under the most promising conditions.

SIR F. ABLE, F. R. S., invented a silicate of soda which, when applied to wood in the form of a thick syrup, gives considerable resistance to fire. The silicate forms a hard coating, and can be used as follows: The treatment is by painting the wood, first, with a dilute solution of silicate of soda, secondly, with a lime-wash of slaked fat lime colored with mineral ochres or blacks, and, lastly, with a stronger solution of the silicate. The surface of wood should be moderately smooth, and any covering of paper, paint, etc., be removed. A solution of the silicate in the proportion of 1 part by measure of the syrup to 4 parts of water is prepared in a tub or earthen vessel by stirring the measured proportioned of the silicate first with a small quantity of the necessary water until a complete mixture is produced, and then adding the remainder of the water in successive quantities until a perfect mixture in the requisite proportions is obtained. The wood is then washed over with this liquid by means of an ordinary whitewash brush, the latter being passed three or four times over the surface, so that the wood may absorb as much of the solution as possible. When this coating is nearly dry the wood is painted with the lime-wash. A solution of the silicate, in the proportion of 1 part by measure of the syrup to 2 parts of water, is then made as above described, and a sufficient time having been allowed to elapse for the wood to become moderately dry, this liquid is applied upon the lime in the manner directed for the first coating.—*Building News.*

OF all the industrial arts known to the ancients, those which have made the least progress are building and road making. Those massive structures erected in Egypt and India still remain without a modern rival, and the roads to the modern city are equal to those by which the Roman drove to his capital. Only recently has it been shown that asphalt is the best material for much traveled roads, and there is no reason to believe that its application to that purpose as well as to building was not well known to the people of antiquity. We have the best of authorities showing that the Roman as well as the Assyrians were familiar with the uses of bituminous cement.

M. Leon Malo, long since determined that a mixture of asphalt and gravel, molded in small pieces, did not soften when subjected for weeks to the hottest summer sun, and he successfully erected a block of similar material which served as the foundation for a horizontal engine of fifty-horse power. This massive block has been analyzed and found to consist of stone broken to unequal size, the interstices being filled up with material the same as asphalt. This block became so hardened with age as to be broken up with the greatest difficulty, and the fracture was as clean as that of the finest sandstone rock. The slightest degree of electricity was sufficient to make the vibration of this large engine imperceptible to the censes. For more than twenty years this engine has been running regularly without the least indication of yielding a particle, even under the cylinder.

PROFITS OF THE ATLANTIC MILLS.—The Atlantic Cotton Mills, of Lawrence, Mass., whose treasurer, William Gray, Jr., has just committed suicide, after stealing from $250,000 to $500,000 from his trust, have not been very prosperous for several years. In 1874–77 they had another period of adversity. Nevertheless, the history of the company since its incorporation in 1846 has not been wholly dark. The sum of the semi-annual dividends has been 207 per cent., or an average of 5,17 per cent. per annum for the forty years from the start, and 5.92 per cent. since dividends began to be paid, in 1852. In 1866 14 per cent. on the capital was divided, and in each of the years 1881–83 10 per cent., and the dividend has been "passed" in only four years out of the thirty-five. The capital was originally $1,800,000. It was reduced to $1,500,000 in 1859 by the purchase and cancellation of shares aggregating $300,000. Losses subsequently wiped out $1,200,000, and in 1876 the capital was marked down to $300,000, and $700,000 of new money was then paid in, making the nominal aggregate $1,000,000. In 1852–59 the sum of the dividends was $936,000, together with a surplus apparently amounting to $250,000. In 1860–76 the dividends aggregated $1,440,000, and in 1877–86, $590,000. The net profits have thus amounted in the thirty-five years to $3,216,000, or to $2,016,000 after deducting the loss of $1,200,000 in 1876. On the former basis the shareholders have received an average dividend since 1852 of 6.45 per cent. per annum on the average capital invested, and they have cleared 4.05 per cent. after allowing for the capital charged off ten years ago. It is, moreover, of interest to observe that the company was much more prosperous during the period of free trade in which it was started than it has been in the later era of high protection. The average dividend was 6½ per cent. in 1852–59, 5.65 per cent. in 1860–76 and 5.90per cent. in 1877–86.

CONCERNING the mooted question of the danger of fire from the contact of steam-pipes with woodwork, the engineer of the City of Quebec writes the *Scientific American* as follows: "I am of opinion, from practical experience, that hot-water pipes in contact with woodwork are dangerous, and I only wonder that insurance companies do not refuse to insure where the necessary precautions are not taken to isolate pipes sufficiently to prevent danger, which, as I shall presently show, it is easy to do. During soft weather steam and hot-water pipes become very hot from the surrounding air being too warm to relieve them of or abstract their heat as colder air does. On one occasion this winter, a very soft day, my steam boiler had raised the temperature throughout all the pipes about the house to such a scorching heat that everywhere the woodwork was very hot, and I could not bear my hand on any portion of it without burning it as if I held it on a hot stove. It is only two or three weeks ago that a towel laid across the coil in a room on the third floor of a house was actually scorched as if by a red-hot iron, and this has happened more than once. True, water heated under atmospheric pressure only attains to a heat of 212° Fahrenheit or 100° Centigrade; but in a five-story house, even with an open well or cistern in the garret, above a height, say, of fifty feet—equal to a pressure per square inch of nearly twenty-two pounds—the water, of course, reaches a much higher temperature as it does in any closed vessel; and if to this be added the additional pressure or resistance in the rising mains due to the retarding by friction through long stretches of pipe with numerous right-angled bends, it is easy to understand how the temperature required to force the column of water along may be increased so as to become exceedingly dangerous."

BUILDERS' ITEMS.

Building and Real Estate Notes.

DORRNS & Co., 35 Kaighn's avenue, Camden, has just completed the sale of a property on Clinton street for $1,600; another, on Royden street, for $1,400; and one on lot on Jackson street for $250. They report inquiries to purchase small houses have increased, but the prices offered for them will hardly pay for the actual cost.

J. H. JACKSON, real estate and insurance broker, 33 Kaighn's avenue, Camden, speaks of the real estate business in a very encouraging way, and is of the opinion that this fall will be a good one with them. Renting, at present, with him is slow, but inquiries are increasing for small properties. He has just completed the sale of a store and dwelling, 115 Kaighn's avenue, above Front street, for $1,600.

C. LETHERBURY, 1123 Broadway, Camden, N. J., in speaking of real estate, says that with him the prospect for the fall is good, and that it will be general. Although in Camden, he is himself looking for Philadelphia real estate (small properties) investments for about $10,000. Mr. Letherbury has within the last eight days purchased 13 lots in the Eighth Ward, on the Stockton Land Association tract, situated between Ferry road and Bulsen street, and between Ninth and Mulford streets. He has now 60 lots in all, which he is offering at $50 each lot.

WM. A. TURNER, 904 Broadway, Camden, reports the demand for country properties increasihg, especially small farms. In speaking of Camden he says a large number of properties have changed hands, and a large number of strangers are arriving, inquiring for houses. Mr. Turner sold 15 acres at Clementen, N. J., for $700; also 2 acres, same situation, farm land, for $170; also 2 acres for building purposes, at Clementen, N. J., for $1,000; also a house and lot on Master and Van Hook for $1,000. Mr. Turner reports collections good, and the demand for five- and six-room houses increasing.

DAVIS & SMITH, real estate and insurance agents, report business as very satisfactory, and within the last six days report the sales of 22 acres in Montgomery county for $2,500; also three houses on Penn street, Camden, N. J. (two stories, five rooms), for $1,200; also a small country seat at Trevose Station, with three acres of land, for $3,800. These gentlemen make a specialty of farm and country properties, and within the last few years have made considerable progress. For some considerable time they carried on their business at 144 N. Seventh street, but for the want of more room found it desirable to remove to more commodious premises at 14 N. Seventh street, which they did on the 1st of July last. They report real estate as looking very good for the coming fall.

—Five years since, it is asserted, the imports of mahogany to this country amounted to only 500,000 feet annually. At present the volume of trade in this material is not less than 10,000,000 feet annually. A comparison of the figures will indicate the rapid growth of this wood in popularity. A short time since it was considered an expensive wood, but with the increased consumption its cost has been reduced, so that at present it is not much dearer than native walnut or cherry. Mahogany is not only fashionable wood, but it is the most reliable wood known to commerce. It is unequaled for doors, house trimming, furniture, or for any purpose where a hard wood is desired. It does not warp or check; neither does the sun fade it, but, on the contrary, it brings out its rich color. Time, which destroys other woods, only serves to increase the value of mahogany.

A New Move.

Elm Avenue, West Philadelphia, has been looked at a good deal during the past few years for building purposes. The latest rumor is that a syndicate, with one million dollars capital, has taken this avenue in hand. What will make residences here more desirable is the fact that some $80,000 is to be expended on Park improvements. A statue will be erected to the memory of the late John Welch. There will be a fine stone arch way. The Park, opposite this Avenue, will be made especially attractive. The rumor is that nearly all the property between Forty-first and Fifty-second streets is to be secured. Old houses and shanties are to be removed to make room for the superb mansions that are to be erected in their places. The old leases are not being renewed and tenants have been notified to vacate at their expiration. Several purchases, it is understood, have already been made by the syndicate. Stubborn owners, in some cases, were bought out at high prices. One owner who, six months ago, would have been glad to have sold his property at $4,500 was paid $12,000. A good deal of this property has already been secured by the syndicate.

This scheme has the elements of success in it. The Pennsylvania Railroad is within easy reach. An unobstructed view of the Park is assured. The Avenue is wide and well paved; it would become a grand drive. The Park attraction would make it a much sought for outlet. Just what the purposes of the syndicate are in detail cannot be ascertained as operations are quietly and in fact secretly conducted.

A New Flying Ship.

A new flying ship has been constructed in San Francisco, which is thus described: The balloon vessel, which is completed, all except the machinery, is 180 feet long, 43 feet broad; depth of car, 12 feet; capacity of balloon (hydrogen), 182,000 feet; engines, 3; horse-power, 36; lifting capacity, 16,000 lbs.; and total weight, 5 tons. Prof. Patterson calculates that when driven by its propelling power he can attain a speed of one mile a minute. The car is boat-shaped, and is made of the lightest kind of ash. It is divided into three compartments—a passenger compartment, each, forward and aft, and an engine boiler-room amidships. The balloon part is attached to the car so that an independent movement is prevented. The balloon is also divided into compartments, which prevents an accumulation of gas either at one end or the other, and thereby prevents a depression or elevation of either end. An automatic valve attached to each of the compartments permits the escape of the gas in case of expansion, announcing its exit by means of a whistle. A parachute attached to the upper deck snd under the balloon is so arranged that in case of necessity it can be thrown out in a moment by the simple movement of the lever. Running the full length of the hull of the machine are two keelsons, for stiffening purposes. Four pairs of wheels for landing purposes are affixed underneath the hull in such a manner as to prevent jolting when landing, spiral springs and rubber buffers being arranged for that purpose. Two lifting screws, made of strong steel frames of green hogskin stretched thereon and then dried, revolve beneath the hull, while a propelling screw, constructed in the same manner, is rigged astern to send the vessel ahead. In order to steer the machine this screw rod works through a swivel, the engine being moved one way or the other by means of a crane, in which it hangs. Water in sufficient quantities for steam-making purposes for two days can also be carried.

The Way to Construct Staircases.

1st. All staircases should be constructed with two or more runs with square landings.

2d. No staircase should be less than four feet six inches wide in the clear, and no winders or circular stairs should be used.

3d. No riser should be over seven and one-half inches, and all treads should be at least twelve inches.

4th. No wells, rails, newels or balusters should be used—stairs in all cases to be walled or boxed up.

5th. All stairs should be built on the outside walls of the building or in special wings prepared for them, and so placed that pupils occupying the upper floors of the building may enter and leave the structure without disturbing or interfering with the pupils of the lower doors.

They Never Strike.

There is a class of people in this country who get up at five o'clock in the morning and who never get back into bed until ten or eleven o'clock at night; who work without ceasing the whole of that time, and receive no other emolument than food and the plainest clothing; they understand something of every branch of economy and labor, from finance to cooking; though harassed by a hundred responsibilities, though driven and worried, though reproached and looked down upon, they never revolt, and they cannot organize for their own protection. Not even sickness releases them from their posts. No sacrifice is deemed too great for them to make, and no incompetency in any branch of their work is excused. No essays or books or poems are written in tribute to their steadfastness. They die in the harness and are supplanted as quickly as they may be. These are the housekeeping wives of the laboring men.

The Conservators' League of America.

The Conservators' League of America is the name of a new society which is probably destined to play an important part in the future of our industrial organizations. Formed but a few months ago, its ramifications already extend through several states where branch societies are being organized and disseminating the principles of the organization. As all great movements are started by some need to supply, or usually some wrong to correct, this has grown out of the labor troubles, men of wisdom with a desire for the future good of their fellows having resolved to place in active operation an organization which has for its object the practical realization of the scheme of co-operation between capital and labor. Though the society in question has taken in a manner the form of a secret body, it is only such as far as is necessary for perfect and uninterrupted work. Its membership is drawn from all conditions of men, the only requisite being that the applicant for admission be intelligent and a lover of law and order. The foundation of the society can perhaps be best told by Article 1 of its constitution, which reads:

"The purposes of the Conservators' League of America are: To protect the legitimate busines of the country against all unlawful and injurious interference, and to promote a better understanding of the true relations existing between employer and employes, maintaining the rights of each, and adjusting their differences."

The recent so-called labor troubles have largely arisen from a vital misapprehension of the true relation existing between all classes of business, and to counteract these injurious results and to protect all busines interests and thus promote the highest good of all, is the mission of this society.

The Material Market.

From one standpoint the prospect that higher prices may soon be obtained for lumber was never brighter. Throughout the country the stocks in retail yards are very light. Such are the signs of the times, and suggest what may be coming. Really there has been an increase of movement, but as yet no improvement worth mentioning in prices. Dealers are slow to believe that more favorable conditions are ahead. There is a degree of financial stringency in the district. Heavy buying at the mills has been going on, and bills are coming due. Trade has not been satisfactory, and profits on sales have been next to nothing. Collections between wholesale yards are slow. Under such circumstances it may be inferred that in their anxiety to realize, jobbers will offer favorable prices to the buyer.

The local lumber trade has been less active than in July. Dealers think that a few days will bring out buyers in large force. All kinds of lumber are in abundant supply and prices are steady.

The supply of concrete, plaster, etc. is up to requirements. The leading dealers report firm prices.

Roofing material has been the subject of considerable negotiation. Large supplies will be wanted during the next few weeks. Competition is as usual very close.

Prices of builders' hardware remain steady. Nails are $2 at $2.10. Supply fair.

The Johnson Steam Paving Rammer.

A trial of the Johnson steam paving rammer, a machine invented by Samuel Johnson, of this city, and designed to be used in the paving of streets, was made Wednesday afternoon at Forty-second street and Elm avenue. Chief Commissioner of Highways McDonald was present at the trial, and expressed himself as highly pleased. The machine weighs a little over four tons, and is run on four heavy wheels.

The engine which works the rammer or hammer is situated on the front of the truck, and moves it backward or forward. The engine has two cylinders, eight inches in diameter, and carries from sixty to eighty pounds of steam. It is said that the engine, working ten hours, will consume but a quarter of a ton of coal.

The rammer is nine inches in diameter and weighs 125 pounds. It is four feet six inches from the end of the truck, and is swung on a crane. The crane, which projects forward, carries a steam cylinder, containing a reciprocating piston, the rod of which is attached to the rammer. The piston reciprocates in much the same way as a steam hammer, and its movements are controlled by the attendant, who also moves the crane from one side to the other.

Only two persons are required to work the machine, and it has a power to strike from one to three thousand pounds, while a man cannot exert a force much more than two hundred pounds. It also makes one hundred and sixty strokes per minute, while a man's strokes do not exceed twenty. By working a lever attached to the rammer, it can be regulated to strike to suit the condition of the stones on streets, upon which it may be at work.

The trial yesterday was made on Forty-second street, where the street is paved with Belgian blocks. The dirt was very dry, but the rammer forced the stones about an inch in the ground, making a level piece of work. It was said that had the street been watered, the stones could have been rammed much more easily.

BRICKS are in plentiful supply. Prices are: salmon brick, $6.00; hand-made, $8.50; stretcher, $11.00; pressed, $22.00.

Embezzlement

NATIONAL BANK FUNDS—FEDERAL OFFENSE.

The embezzlement of the funds of a national bank being an offense over which the federal courts have jurisdiction, any prosecution thereof by the state courts is in violation of section 711 of the Revised Statues of the United States, according to the decision of the Supreme Court of Michigan in the case of People vs. Fonda, reported in the Chicago *Legal News*. Sherwood J. said: Section 711 of chapter 12 of the Revised Statues of the United States provides that "the jurisdiction vested in the courts of the United States in the cases and proceedings hereinafter mentioned shall be exclusive of the courts of the several states—first, of all crimes and offenses cognizable under the authority of the United States." The other clauses of the section need not be given, as none of them relate to criminal jurisdiction. Congress by law created the national banking system and provided for its internal working, and prescribed a punishment for the offenses charged against the respondent.

Commissioner Wright's Industrial Report.

The first report of the National Bureau of Labor Statistics is an extended document of quite five hundred pages. Its aim, as formally stated, is to throw light on the "character and alleged causes" of industrial depressions. To this end the statistics of the past, so far as any exist, have been gone over largely and summaries thereof made. The depressions occurring in the United States from 1837 until now are dealt with at length. These summaries are not without value, but they are apart from what the public had reason to expect. The need was a painstaking investigation as to the fact of the depression held to exist in the United States from 1881 to 1885. So much more is known now in the way of surface facts regarding general industry, owing to rapidly enlarging publicity, that to avoid overdrawn conclusions the closest attention needs to be given to the work of determining the actual state of the great primary industries with respect to distribution and consumption. This state of trade question is so prolific of loose writing with respect to proximate causes as to compel regret that Chief Wright did not address himself more immediately to the task of measuring the extent of the depression following upon 1881. Of the fact that certain industries and certain lines of enterprise were sensibly checked following upon 1881 there is no doubt. But there is considerable basis for the belief that the depression has been measurably confined to railway construction and steel rail making, together with the making and selling of stocks and bonds of all sorts and descriptions; that during the five years' production and consumption in the great close-to-life industries were quite, if not fully up to the normal volume. It was in this direction that investigation should have been pushed. Apart from routine statistics, the only point brought out in this report as a measure of the depression is the statement in round numbers that 1,000,000 industrial workers were out of employment at the height of the depression. As we as yet have no means of determining the number of unemployed in admittedly prosperous times, the above-given loose estimate of the bureau cannot be regarded as of any particular value or significance. As indicated, the thing needed was to explore to the utmost possible extent the production, distribution and consumption of the great necessaries of life—the several classes of food, the metals, the textiles, and other important groupings. The growing want is for some standard of measurement as to the existence and extent of commercial depressions. Such a treatment of the subject is attainable, and it is unfortunate that the Bureau of Labor Statistics did not address itself more directly and comprehensively to these primary points.

From one point of view the aim should have been to help to understand how far this whole question is a matter of names. Thus, may not the periods of so-called trade depression be the times of real prosperity as against the periods of feverish speculation and artificial prices? There is much to be said for this view. The high-price periods have been commended wide and far, but the opinion-making has very largely proceeded from those who gain money through price fluctuations rather than by actual production. Further, there is good ground for the belief that alternating periods of moderate depression and elation are gradually taking the place of former periods of extreme speculation, and after periods of extreme depression. Specific investigation along this line would have been wise. Again, a most desirable direction for inquiry exists in relation to the real character and effect of trade combinations gotten up to regulate prices. The power of the State is fairly necessary to insure success in that inquiry. Combinations of the sort may be confined to the regulation of production through a better knowledge of the facts. So long as trade combinations are restricted to throwing light on production and refrain from attempts at artificial price-making they must be counted as beneficent. There is great need for full knowledge regarding the banding together of various trades during recent years. We hear much of the wall-paper and other "pools." The need is practical knowledge regarding their operations, the methods employed and the effects. This question of combinations for price-making is of far-reaching importance. Production regulation through an enlarged publicity is to be encouraged, and this whether the facts are gathered within or from without a given trade. Artificial price-making is most pernicious. The nature of this question is well conveyed by the following from an English trade journal:

A question of some interest has arisen in Belgium. An attempt has been made by sundry Belgian industrials not only to regulate production, but also to control prices; and the parties to the latter combination are now a little uneasy as to the wisdom of their proceedings. It is not at all surprising that they should feel this uneasiness, because, although they may attempt to maintain a certain scale of prices for a certain period, it does not at all follow that they can compel eternal clients to accept their quotations. The uneasiness which has arisen among the members of the Belgian syndicate has been intensified by the fact that two or three foreign orders have already escaped them, having been taken at lower prices by French and German firms. It certainly does appear to us to be quite impossible for any syndicate, limited to any particular country, or still more to any district of any particular country, to attempt to fix prices at a certain standard for a certain time. If prices are to be regulated, the parties to the arrangement must not be one district or one country, but many districts and many countries. When a quotation syndicate has been formed upon an international scale, it is then, as recent events have shown, subject to the risk of internal disorganization from local jealousies and antagonisms. But, at any rate, it has a great deal more force and effect, while it lasts, than any purely national or local syndicate can possibly pretend to possess. It is one thing to attempt to restrict production, and another thing to attempt to regulate prices. A national or even a local syndicate may succeed in restricting production, although it may not, after all, answer the purpose of its members to do so; but it is quite hopeless for any local body to attempt to regulate the prices of an article produced in various quarters of the world. It is, indeed, a question whether syndicates should not confine themselves strictly to the production aspect of the industrial question, and should not leave prices to regulate themselves according to the old law of supply and demand. If it is not found remunerative to produce a certain amount of iron, it certainly is quite legitimate for industrials to attempt to ease the pressure on markets by reducing the current supply, and not only is it quite legitimate, but it does appear to us that a restriction policy must sooner or later have the effect which it is desired to exert. But it appears to us to be just as futile for any limited body of industrials to attempt to establish prices at a particular level as it is for a local body of workmen to attempt to enforce a certain scale of wages. Prices, like wages, are subject to

the external law of supply and demand, and sooner or later any combination arrangements attempting to reverse or impede the economic course of events must result in utter failure.

This first report of Commission Wright bears evidence of careless editing. Some loose opinions injected by the compilers should have been striken out. Thus, in one place, we are informed: "Recent events make it probable that gold will continue to become dearer, and as a consequence silver must become cheaper . . . . Silver has depreciated in value from two causes, one of which was the action of the Latin Monetary Union, and another the large recent production of the metal. Its value has been upheld mainly by the action of the United States, and there is so much that is artificial in its position that it is not possible to ascertain its probable future." This is worthy of a silver-mining man at his worst. Again, speaking of the enactment of laws "to stop (sic) speculation" the Commissioner is made to say: "The effect that such laws would have, if they could be applied specifically, would be for the public good . . . Under this head . . would come the question of corners and trading in futures. The attempt to make any law which shall be efficicacious in preventing men from engaging in the unholy (!) work of speculation in food products especially, and in bringing pecuniary responsibility to operations in future, will be found to tax the ingenuity of the law-maker." About all that is given out on the subject is equally loose in character. The question of enforcing speculative contracts in law is confounded with the difficulty of attempting "to prevent corners by law." The simple truth is that the Commissioner has gone far afield in trying to make up an economic treatise on the combination plan. It is to be hoped that subsequent reports will be confined more closely to specific lines of statistical investigation.

Of Interest to Architects.

An amusing instance of the deception and trickery oftentimes practiced in architectural competitions comes from across the water, from whence come many other very peculiar things. It is a statement that in the accepted design for the Sunderland municipal buildings some of the chimneys, which must exist according to the plan, are ignored in the elevation. An examination of the plans which were published in an esteemed foreign contemporary shows that this is the case unless the flues are mysteriously led off to the rear of the building to empty into some unseen chimney. Is this evasion of inconvenient facts common in this country?

Architects and builders who deem it necessary to keep up with the march of events should give full consideration to the growing art of sheet-metal construction. There is certainly ten times more sheet-metal used in building now than ten years ago, and its uses are only fairly initiated, many new ones being devised yearly, prominent among which we mention fire-proof corrugated iron arches for ceilings; tastefully painted small-sized corrugations for interior decorations of public halls, theatres, offices and stores, and also for various other uses adapted for particular cases only; these, in addition to the well-known and practically tested use of iron for roofing and siding.

When an architect, by a special arrangement with his employer, agrees to a certain remuneration, the work is only partly carried out, and he is then dismissed—is he legally entitled to charge the usual percentage and to claim two and one-half per cent. on the cost of work which has not been executed under his supervision? Such is the question which has been recently brought before a legal tribunal, and was reported in our last issue as settled by the defendant offering to increase the sum paid into court and to pay all costs. In this case the main consideration seems to be the cause of the dismissal. If the architect is dismissed without a sufficient cause being assigned, as it appears was the case in the instance mentioned, there is no doubt whatever the architect is entitled to throw over the agreement and to claim his usual commission. Neglect, incompetence or misconduct would have to be proved in order to make such a dismissal a reasonable plea. Clients have strange whims sometimes; they imagine the architect is neglectful if he does not appear every other day on the works, or that he is endeavoring to add to the expense, or is in alliance with the builder. On the other hand, suppose there is a ground for dismissing the services of the architect. Is he, under the circumstances, entitled to make the usual charges? It is veay questionable if he can do so. Let us imagine that the client alters his mind and decides not to go on with the work, or to save the further expense of the architect. Such a contingency is not contemplated at the beginning, and there has been no written or implied understanding to pay extra for what is so suddenly broken off. Is the architect to be satisfied with a nominal remuneration under such circumstances, or can he charge his full commission? There are many in the profession who would certainly think they were fully justified in setting aside the agreement, and we think the law would support them, if it could be proved that such an understanding was made only under the belief that the building would be fully carried out.

Of Interest to Builders.

An agreement has been entered into between the walking delegates of the building trades of New York, Brooklyn and Newark, by which they will act together for the common good of their trades. There are fifty-two delegates in the combinations, representing as many unions. The operations of the delegates will cover a radius of forty miles from New York. Of course, the intention is to prevent men working for less than union wages.

The Master Builders' and Mechanics' Exchange, of Troy, N Y., was incorporated June 19. The objects are to foster and promote the interests of those whose business is the erection of buildings; to reform abuses in such business; to secure freedom from unjust and unlawful exactions; to diffuse accurate and reliable information among members as to the standing of merchants, etc.; to produce uniformity and certainty in the customs and usages of the building trades and business; to settle differences between members, etc. The capital is $10,000, divided into $50 shares. The trustees are: John Magill, George J. Brennan, C. A. Meeker, Peter H. Buckley, George Wheeler, John Don, Wm. Ferguson, Thomas Judge, Michael Mahoney, C. P. P. Hutchins, David White and James Hallen.

Fire-proof buildings may be divided, in regard to their construction, into three classes, viz.: 1. Those constructed throughout of incombustible materials; 2. Those constructed on the "mill" or "slow-burning" principle, and then protected by fire-proof materials, and 3d, those constructed in the usual way with wooden floor joist, 12 or 16 inches on centers, and wooden partitions, etc.

The first method is undoubtedly the *most desirable* when there is sufficient money to allow of it; the second is probably the *cheapest* method of obtaining a thoroughly fire-proof building, and the third may be considered the least desirable of all, although it is not impossible to fire-proof a building constructed is this way and at perhaps as small expense as would be required in the second method.

Commissioner Platt issued during the month of July permits for the erection of 288 buildings, of which 194 were to be brick and 94 frame, the cost of which is estimated at $1,666,647. Permits were also issued for the alteration of 99 buildings, and to cost $112,-042. In July of 1883 the number of permits issued for new buildings was 256. estimated to cost $1,243,520; in July of 1884, 278 were issued, to cost $1,480,495; in July of 1885, 274, to cost $1,633,288; and in July of 1886, 288, estimated to cost $1,666,647.

In the struggle to establish shorter hours, builders, contractors and interested parties have endeavored to frighten those anticipating building by saying the eight-hour system would increase the cost of building 20 per cent. cent.

To this assertion *The Craftsman* replies that it is a false cry, on its face. Labor is not the only element entering into the cost of building, and 20 per cent. added to the cost of labor does not necessarily add $1,000 to every $5000, invested. The same cry has ever been raised when any advance step has been taken. When the people of this country broke loose from the twelve-hour system and established ten hours as a day's work, on the plea of humanity, the same cry was raised, and yet subsequent experience has proved that the aggregate production under ten hours was larger than under twelve hours, while humanity was benefited in every way.

The statement that a 12x12 inch beam, built up of 2x12 planks spiked together, is stronger than a 12x12 inch solid timber, will strike the novice as exceedingly absurd. Every millwright and carpenter knows that it is so, at least he has been taught to believe that it is so, whether he ever tested it by actual experience or not. The inexperienced will fail to see why a timber will be stronger simply because the adjacent vertical longitudinal portions of the wood have been separated by a saw, and if this were the only thing about it it would not be stronger, but the old principle that a chain is no stronger than its weakest link comes into the consideration. Most timbers have knots in them, or are sawed at an angle to the grain, so that they will split diagonally under a comparatively light load. In a built-up timber no large knots can weaken the beam except so much of it as is composed of one plank, and planks whose grain runs diagonally to the outside cut will be braced and strengthened by the other pieces spiked to it and having the grain running in a different direction.

Difficulties and mistakes in ventilation most frequently occur in the absence or improper arrangement of flues. These, however, are not difficult to overcome, especially in the construction of new buildings. Heated air is lighter than cold, and consequently always rises. Air which soon becomes impure in any room which is occupied, being heavier than pure air, naturally sinks to that part of the room where its pernicious effects are more felt. If there are no open fireplaces (which we consider the best ventilators), the chimney flue should be made double in order to use one-half for a ventilating shaft. The heat from the smoke flue warming the adjacent flue, causes a draft upward. By openings from the rooms into this, the impure air is readily drawn out, or the smoke may be carried from the furnace through a metal or tile pipe inside the chimney, which would warm the space around it. Another method is to provide ducts made of smooth boards, which should be placed in the partitions, with side-wall ventilating registers, next to the floor, for the foul air to enter and pass out at the top of the building. Both health and the correct principles of heating require a perfect system of ventilation. Any furnace will do better when this is observed.

There are but comparatively few materials that fire and water cannot harm, and as the safety of the building depends upon the material used, it is of the first importance that they be wisely selected. Those building materials which have stood the most severe tests are fire-clay, porous terra-cotta and magnesocalcite. The first two are, in the opinion of the writer, and I think of every impartial person, the most desirable materials to use in the protection of buildings. Common brick and some standstones will withstand a great heat without material damage, and common lime plaster on wire lathing will stand the fiercest fire if properly put on and free from plaster of Paris, but it is liable to be damaged from the water thrown on the fire; and if plaster is used in the form of blocks for partitions, etc., it cannot be depended upon to withstand the fire and water. The writer has seen plaster blocks in a building on fire almost entirely destroyed by the water from the fireman's hose.

In places where wooden floorings or trimmings undergo severe or constant use, the valuable Southern pine has become almost indispensable. In ship work its durability has been long acknowledged, but it is only within a few years that its usefulness for house purposes has been appreciated. In former times it was tedious stuff to work by hand, but its toughness is now overcome by improved tools and steam dressing, and the increased call for hard pine wainscottings and ceilings, that has attended the active building operations of late, has been readily supplied. No wooden flooring that is used bare is superior to narrow strips of seasoned Georgia yellow pine. A well-laid surface of the wood improves with age and friction, its resinous quality hardens and forms for it a sort of natural varnish. Art, too, has recently touched this sturdy old timber. Thin door-panels are sawed out of planks containing thick deposits of rosin. When these panels are placed in doors that the sun can strike, the effect produced is a rich, red wine color, showing inside the room. There is a process of artificially seasoning pine. There is also one of steaming it, so that the rosin will show uniformly in the board, but the naturally veined surfaces are handsome enough when properly smoothed.

The Western Manufacturers' Mutual Insurance Company says, that in the report of many mills a point of great danger is indicated in the location of shafting beneath the floor in confined places, that do not permit proper examination and oiling, and that favor accumulation of dust and rubbish. The company have deemed it is advisable in such cases, where alteration was difficult, to require automatic sprinklers, set five feet apart, above such shafts, and in all cases, where practicable, to ask an enlargement of the space sufficient to admit of easy examination, oiling and cleaning. It is desirable to call attention to this practice as both unsafe and unnecessary, as the defect continues to appear in new mills, in many cases designed by builders who should understand the danger attending it. All shafting should be examined and cleaned daily, and lubricants supplied at proper intervals and in proper quantity to insure safety and economy of power. Any obstacle to this constitutes a serious hazard. Where shafting must be placed beneath the floor of a mill in a low basement or small confined space, it is best to run in a brick-arched or cemented passage, over a trench deep enough to give five or six feet vertically, and at least four feet wide, which is about as small a space as oilers and cleaners can safely work in; it is very rarely, if ever, that shafting is so located from necessity, it being rather an individual freak of the owner or builder, either ignorant or careless of possible consequences. Belting from above, where practicable, is safer and avoids needless openings through the floor.

The Arcade Railway.

The Arcade Railway, of New York, under the authorization of the law passed last May, seemed likely to be built at last, and the Company is said to have been successfully getting together its three million dollars of paid up capital and its two million dollars indemnity-bond, which the charter of the road compelled it to provide before actual work had been begun. Meanwhile, the property-holders on Broadway, representing, it is said, over sixteen and a half million dollars' worth of real estate, held in fee simple, have organized themselves in opposition, and have obtained from Judge Barrett an injunction against the Arcade Railway Company, which they propose to serve on the Company in case actual operations should ever be begun. The grounds on which the injunction is granted include, of course, please that the law passed in May last is unconstitutional, that the Company's charter has expired, is defective, or does not cover the work which is in contemplation, and various other legal objections which do not concern us. The plea that the tunnel would interfere with existing vaults and cellars built out under the street can probably be met by showing that these structures have no legal right to penetrate beyond the curb-line. The possibility of excavating without imperilling the safety of existing buildings is a serious question, but the experience of the London underground railways, and the testimony of competent engineers, gives assurance of the entire practicability of the operation, and the question turns simply on whether the Company will prove to have sufficient financial strength to carry on the building of the tunnel, and the underpinning of such structures as may need it; but this is a mere matter of finance, and we believe the Company would be able to surmount this difficulty. The charge that the work be a serious interference to traffic, sounds as if the objectors expected that the whole length of Broadway would be opened, from end to end at the same time, whereas the entire work would probably be conducted from two or three headings, and the excavated material taken down the side streets to barges, or up the other avenues out of the city. One of the most startling charges is that the entire amount of the indemnity-bond, two million dollars, would not be enough to indemnify the city itself for the damage done to its sewers along a single mile of Broadway. This change, and the consequent increase of building operations, would begin almost immediately, as the undermining would probably affect the older and less well built, even if lighter, buildings quite as much as the more modern ones, and the owners, finding that new substructures were being provided for them, would see the advantage of joining hands with the Company, and making the new substructure substantial enough to serve as the foundation of wholly new buildings to be built forthwith.

Mountain Mahogany.

In Nevada there is a peculiar wood known as "mountain mahogany." A tree with a trunk a foot in diameter is much above the average. When dry the wood is about as hard as boxwood, and being of a very fine grain, might no doubt be used for the same purpose. It is of a rich, red color, very heavy, and would be a fine material for the wood carver. Used as a fuel, it creates intense heat. It burns with a blaze as long as ordinary wood would last, and then is found (almost unchanged in form) converted to a charcoal that lasts about twice as long as ordinary wood. For fuel it stands much higher than any other kind of wood; indeed, a cord of it always brings the same price as a ton of coal. The only objection to it as a fuel is that it creates such an intense heat as to burn out stoves more rapidly than coal, however bad.

Charters Granted.

The Lucinda Furnace Company, of Philadelphia, with a capital stock of $50,000, was chartered at the State Department on Thursday, as were also the Baldwin Homestead Association of Wissinoming, of Philadelphia, capital, $205,000; the Quakertown Building and Loan Association, of Quakertown, Bucks county, capital, $300,000, and the Nazareth Improvement Company, of Nazareth, Northampton county, capital, $10,000.

Public Supply of Hydraulic Power.

At a recent meeting of the Engineers' Club of Philadelphia, Mr. Howard Constable gave an interesting account of the system used in London for the public supply of hydraulic power, which he has recently had occasion to examine.

The company in London was started in 1882, based upon the success achieved by a similar scheme in Hull, which has been in operation some eight years; it in turn was the outgrowth of a system which prevails very extensively in many English manufacturing and warehouse concerns—that of employing hydraulic cranes, hoist capstans, and the like, and operating them from one pumping station. This plan was advocated by Mr. Bramah as early as 1802, and during the past forty years Sir Wm. Armstrong has done much towards putting it into practice by the manufacture of hydraulic plant, so that the advantages of the principle are much more thoroughly understood abroad than with us. The general mind in this country looks with some fear upon high pressures, and thinks the system rather novel, not knowing that in our practice of the pumping of oil to the seaboard, pressing cotton, and extracting oil from seeds, we employ hydraulic pressures ranging all the way from 400 to 5,000 pounds, and over, per square inch, whereas the London Supply Company use only 700 to 800 pounds.

Their plant consists of about 12 miles of cast-iron mains distributed throughout the busiest parts of London, on both sides of the river, and as far west as Victoria Station. The mains and branches are laid so as to avoid any dead ends, and with stop valves so that any length of 1,000 feet can be isolated. The water used is taken from the Thames and filtered into tanks, from which it is received by the pumps and passed into two accumulators, thence on through the mains. The pumps are of the vertical, three-cylinder, fly-wheel type, compound condensing, single acting plungers, directly connected to the piston rod. The starting and stopping of the pumps is done automatically by the accumulators; and in connection with this, the arrangement for letting live steam into the low-pressure cylinder is very ingenious. The boilers are of the Lancashire type, fitted out with automatic fuel hoppers, stokers, etc., and fuel elevator. The charges for power water are made upon meter register and a sliding scale of prices. The financial success of the company was almost assured from the first.

Some members of the club discussed various points with Mr. Constable, among others an improvement in the cast-iron mains which had been made by Mr. Ellington, the engineer of the London company, and had increased the strength of the pipe about fifty per cent.

Building Permits.

Three three-story houses, 28 ft. by 32 ft., Frank, above Wayne st., to William Beanbridge, 1500 Walnut st.

Addition to mill, 32 ft. by 40 ft., Franklin and Fayette sts., to George Smith, Broad and Baker sts.

Five three-story houses, 15 ft. by 47 ft., Perkiomen and Wiley sts., to John G. Ruff, 825 Filbert st.

Five three-story houses, 16 ft. by 48 ft., Forty-third and Oregon sts., to same party.

Three two-story stables, 14 ft. by 19 ft., Wood, above Spring st., to S. S. Keely, 350 Green Lane.

Alter a building into six houses, 12 ft. by 10 ft., Main, above Robinson st, to same party.

A two-story cottage building, Poplar, above Corinthian ave., to John Benner, 320 Fairmount st.

A two-story house, 14 ft. by 10 ft., Twenty-fifth and Pine sts, to Edward Gillin, 401 S. Twenty-first st.

A two-story house, 14 ft. by 28 ft., Caernarvon, below Dickinson st., to Henry Custer, Long Lane.

Two two-story houses, 16 ft. by 44 ft., Knox, above Manheim st., to A. J. Bunnor, Wister and Wakefield st.

Two-story brick stable, east side of Maple, between Germantown ave. and Hancock st., 24 ft. front by 48 feet deep, to Thomas W. Weegh & Son, Harvey st., Germantown.

New three-story brick front and gable wall, 1403 Mervine st., 15 ft. by 28 ft., to Jacob R. Jordan, 1219 Mosely st.

Second, third and fourth-story brick addition, building rear 409 Arch st., 18 ft. front, 45 ft. depth, to Frank W. Tweed, 2630 Brown st.

Two-story back addition building, Southwest corner Sixteenth and Chestnut sts., 12 ft. depth, to T. Keeney, 118 North Sixteenth st.

Three-story brick addition back building Southeast corner Fifteenth and Kater sts., building 17 ft. 4 in. front by 44 ft. deep, to McFetridge & Connell, 1608 Spruce st.

Additional story back building, 1505 Frankford Road, 10 ft. front by 14 ft. deep, to Geo. Stegoz, 1520 Frankford Road.

Three-story brick store and dwelling, 1805 Frankford ave., 18 ft. front by 50 ft. deep, to H. M. Martin, 521 Diamond st.

A three-story store, 18 ft. by 90 ft., 2412 Frankford ave., to Wm. Haddock, 2427 Sepviva st.

Five two-story houses, 16 ft. by 50 ft., Forty-fifth, above Wallace st., to R. S. Black, Sixty-third and Race st.

A three-story house, 16 ft. by 74 ft., Girard, above Montgomery ave., to James Macauley, 628 East Thompson st.

A three-story house, 32 ft. by 42 ft., Green and Sherman sts., to George Hearst, West School Lane.

A three-story house, 31 ft. by 45 ft., Franklin, above Green, to same party.

Seven two-story houses, 14 ft. by 30 ft., Ogle, above Fountain st., to Oram W. Pesther, Roxborough.

Three two-story houses, 15 ft. by 38 ft., Forty-fifth and Merion ave., to John Bateson, 1002 South Nineteenth st.

Eight two-story houses, 13 ft. by 30 ft., Auburn and Rush sts., to George Kessler, 1332 Marshall st.

Twenty-two three-story houses, 18 ft. by 69 ft., Diamond, above Fifteenth, to Jno. M. Sharp, 1936 South College ave.

Sixteen two-story houses, 15 ft. by 52 ft., Edgely, above Fifteenth st., to John M. Sharp.

Four three-story houses, 16 ft. by 58 ft., Fifteenth, above Diamond st., to John M. Sharp.

Four three-story houses, 16 ft. by 58 ft., Sixteenth, above Diamond st., to same party.

A one-story shed, 10 ft. by 25 ft., 1320 North Fifth st., to John G. Thumm, 144 Pegg st.

A one-story office, 13 ft. by 18 ft., McFerran, above Broad st., to Edward Clegg, 1316 Butler st.

A one-story church, 40 ft. by 43 ft., Tenth and Snyder ave., to G. S. Carsin, 916 Pine st.

One three-story building, 105 ft. by 53 ft., Sixteenth, above Barker st., to J. E. & R. L. Pennoe, 1901 Wood st.

Alteration of two houses into a stable, Nassau st., above Twenty-first st., to S. S. McCord, 2137 Jefferson st.

Carriage house and stable, 20 ft. by 40 ft., Bell, above Barney st., to John W. Leavey, 523 South Forty-second st.

Four two-story houses, 15 ft. by 44 ft., Emerald, above Letterly st., to F. P. Buckley, 1936 East Cumberland st.

A two-story schoolhouse, 54 ft. by 77 ft., Lafayette st., above Germantown ave., to Wm. H. Brenner, Adams and Duval sts.

Three three-story houses, 14 ft. by 45 ft., Green st. and Germantown ave., to same party.

Two three-story houses, 16 ft. by 44 ft., Sixth st. and Rising Sun Lane, to same party.

A one-story school building, 36 ft. by 44 ft., Green, above Carpenter st., to same party.

A two-story house, 18 ft. by 48 ft., Race, above Sixty-third st., to Wm. Douglass, 330 North Sixty-third st.

One three-story building, 13 ft. by 39 ft., Fairmount ave., above Third st., to Wm. H. Cooper, 712 N. Third st.

Two two-story houses, 15 ft. by 42 ft., Front st., above Allegheny ave., to A. Schuefl, 2731 N. Second st.

A two-story factory, 40 ft. by 75 ft., Third, above Brown st., to G. G. Thompson, 1102 Willow st.

A five-story building, 17 ft. by 67 ft., Filbert, above Ninth st., to C. McCaul, 20 North Eleventh st.

A five-story building, 30 ft. by 40 ft., Fayette st., above Filbert, to same person.

Two three-story houses, 12 ft. by 37 ft., Deacon and Stiles sts., to John T. Sauden, 2143 North Eleventh st.

One two-story house, 18 ft. by 28 ft., 1356 Atmore st., to same party.

One two-story house, 16 ft. by 36 ft., 1548 Doran st., to DuRoss & Welsh, 758 South Broad st.

A two-story stable, 24 ft. by 26 ft., Peach and Media st., to L. E. Dothard, 5122 Master st.

One three-story house, 10 ft. by 34 ft., 2837 Belgrade st., to A. McClay, 2702 Ann st.

A one-story back building, 13 ft. by 13 ft., 647 N. Twenty-second st., to John Duncan, 905 Chant st.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—The estate of John C. Miller, the Germantown brewer, is valued at $250,000.

—The Receivers of the Philadelphia and Reading R. R. having awarded the contract for erecting a new iron bridge across the Schuylkill river, to take the place of the Columbia wooden bridge, the contractors have began work, and the bridge is closed to pedestrians and vehicles.

—At a special meeting of Councils Committee on City Property, held on Wednesday afternoon, proposals were opened for repairing Christian street wharf and Bridge street landing, Bridesburg, on the Delaware. I. Nevelling, who offered to make the necessary repairs to the wharf and landing for $650 and $250 respectively, was the lowest bidder, and was accordingly awarded the contracts. Commissioner of City Property Dixey announced that John M. Powell had failed to repair Christian street wharf, Delaware river, after the contract for the work had been awarded to him by the department.

—Our British exchanges contain an account of a case of much interest to water consumers, which has just been finally determined in the House of Lords. It appears that a resident of Huddersfield sued the corporation for damages on account of ill-health, caused, as he alleges, by the water supplied by the corporation to his house, which he claims was contaminated by the lead pipe through which it passed. In the first instance, a jury awarded the plaintiff $10,000 damages, but on appeal, this verdict was set aside on the ground that there was no basis of action, and this latter decision has just been confirmed. The case is interesting to us because in many cities the water companies make the connection between the house and the street main, and often *insist* upon the use of lead piping for the connection.

—A brick—says a technical paper—being about as porous as a lump of sugar, and having six sides, needs a careful filling for water-tight work in cesspools, etc., and a thin grout, or porridge of cement, is commonly used. Heating the brick and soaking beforehand in thick coal tar has been recommended. A man may lay common wall all his life without learning how to make brick water-tight.

—The remarkable showing of the New York City savings banks for the past six months arrests attention, as well it may. The most noticeable feature is an increase of $8,024,304 67 in the deposits, as compared with those of the corresponding period last year. An industrial population that has been able to accomplish a result like this can not be in the desperate straits that some of the anarchic and socialistic orators are accustomed to represent. In fact, it shows that the laboring man is himself becoming a capitalist, and that on the whole his condition is far from uncomfortable.

—The slums of London and Paris are bad enough, but it appears that the slums of Berlin are, if possible, worse. *Das Echo* has just published some interesting details on the subject. There are about 40,000 houses in the Prussian capital. A small number are inhabited by one or two families, but the great majority are divided into several distinct lodgings. Two thousand five hundred contain from sixteen to twenty lodgings; 20,000 from twenty to thirty lodgings, and 10,000 over thirty lodging each. Seventy-five thousand of these lodgings are composed of one room only, and inhabited by no fewer than 270,000 persons, which is an average of nearly four persons per room; 75,000 other lodgings are composed of two rooms, and occupied by 360,000 inhabitants; while the remaining 30,000 lodgings are formed of three rooms, inhabited by 140,000 people. These figures show the promiscuous way in which the masses of Berlin population are lodged. The houses in the poor quarters, often five or six stories high, are built so close to one another that they are nearly totally devoid of light and air.

—Commenting upon the reported condemnation of the Knights of Labor by a prelate of the Roman Catholic Church in Canada, by authority of the Pope, the Bosten *Transcript*, after expressing doubt whether such a promulgation, even if general, would seriously deplete the membership of the Order, adds: "The destruction of the order can only be brought about by the folloy of its own members. If they are wise, cautious and respectful for the rights of others, while asserting those of the laboring class generally, they will serve a good purpose. If, on the other hand, they countenance violence and seek to exact by fear what they cannot obtain by fair representation and regard for the mutual responsibilities of labor and capital, their failure is as certain as that of all other men who array against themselves the moral sense of the community. The defeat of the Knights in their efforts to bulldoze the Cigar Makers' Union is a warning they should bear in mind of the boomerang possibilities of boycotting. What the country wants is a cessation of these labor troubles in an honorable peace, which shall have due acknowledgment of the rights of capital and labor and of the personal freedom of the employer and the employe. The public wishes to see the working man well paid and contented, justly used and valued at his proper worth. It will condone many faults in the agencies by which this consummation is attained; but it has as little patience with violence on one side as on the other, and it will tolerate no appeals which are directed, not to justice, but to class passion or class prejudice."

—Ten anvils are to be put up in the Manual Training School at Seventeenth and Wood streets. The school will open in September. All the higher branches of metal working will be taught. The boys who received a thorough course of metal and woodwork instruction and mechanical drawing will commence in September on soldering and brazing, brass and copper smithing and blacksmithing, using the anvil and lead until they learn the rudiments of smithing. Lieutenant Crawford expects by the time the third term commences to have a fifteen-horse-power engine to run the machinery.

—A company has been organized under the name of the American Brick and Tile Company, to manufacture slate, brick and tile from the refuse of slate quarries by converting it into dust and then burning it. The chief persons interested are John Truxel, Wm. Price and M. Canfield, of McKeesport, Pa. Tests have been made successfully both in Pittsburg and Philadelphia, and two experimental furnaces are in course of erection on Second avenue in Pittsburg. The chief works are to be erected at Easton, thirty miles from Philadelphia, and will contain ten great furnaces with a capacity of 15,000 bricks each. They are about completed and will employ 75 men. A branch office will be established in Pittsburg.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Summer Clothing.

We have a large stock of these goods new and fresh this season. Beautiful patterns in SEERSUCKERS, ALPACAS and SILKS. Foreign and Domestic manufacture. But our large stock of MEN'S BUSINESS SUITS is what we want you to see before you buy. Novelties constantly being received for BOYS' and CHILDREN'S WEAR. The Norfolk Takes the Lead this Season. We never before carried such a select stock in MEN'S FURNISHING.

Browning, King & Co.

910 & 912 CHESTNUT STREET.

The Answer to that Question!

Very frequently we are asked, "Why do you advertise other people? When you have a store of your own in Philadelphia, why do you call attention to the stores of others and recommend their goods as well as your own?" Our reply is this: Our object is to introduce and sell the DAY SEWED SHOES anywhere and everywhere that shoes are bought and worn. It does not matter in the least who sells them, for every pair sold is just so much gained for the company. Consequently we can afford to advertise other people. The store, No. 23 North EIGHTH Street, was opened for the express purpose of putting the DAY SEWED SHOES before the people, with every facility for displaying the various kinds, grades, sizes and prices of the boots and shoes manufactured by the DAY SEWED SHOE MANUFACTURING COMPANY.

Everybody is invited to call and examine the stock any day and every day, but if any one wishes to purchase the DAY SEWED SHOES from any other shoe dealer they are cordially recommended to do so, and we mean what we say, since it will still be our gain. The DAY SEWED SHOE STORE is truly a FAMILY SHOE STORE, provided with all the different requirements of such an establishment.

$100 REWARD.

In order to protect ourselves from the infringement of our rights, we will pay One Hundred Dollars to any one proving to us that they have bought from any manufacturer or dealer a pair of shoes as "Day Sewed" without the Trade Mark or Royalty Stamps of the patentee, GEO. W. DAY.

THE DAY SEWED SHOE MFG. CO.,

No. 23 N. EIGHTH STREET.

Mr. H. S. BEEBE, No. 231 North NINTH Street, dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

VOL. I.—NO. 34. PHILADELPHIA, MONDAY, AUGUST 30, 1886. PRICE 15 CENTS

Items of News

—Special Treasury Agent, A. M. Barney, is dead.

—Roberts & Cohn, builders, Camden, New Jersey, have agreed to the nine hour rule for their workmen.

—It is probable that the Secretary of the Treasury will make another call for $15,000,000 bonds early in September.

—A new national bank, with a capital of $100,000 has been authorized to commence business at Royer's Ford, Pa.

—Bricklayers who are at work on the new aqueduct in New York successfully struck last week for an advance from $4 to $4.50 a day.

—The New York Board of Health now want to exterminate the Allanthus trees because its pollen is poisonous and its odor unhealthy.

—The Fire loss this year according to Chief Engineer Cantlin is about the same for the same months of 1885, this is owing to the large January fires.

—A large building is being erected on Somerset street, to be used as a machine shop by Reeves & West.

—More houses are building in Gloucester at this time than for a number of years.

—The Water Committee of Camden recommend the construction of a new reservoir, and the City Solicitor is asked to suggest how the funds can be provided.

—John Measey, a prominent architect and builder of Camden, died at his home on Cramer's Hill last week. He was a former resident of Holly Beach, where he erected several fine buildings.

—Chas. F. Collom, the architect, 909 Walnut street, has presented a prospectus drawing for the new Germantown Almshouse at the Poor Managers' meeting at Germantown. The architect's estimate of the cost of the building is $53,000.

—Contractor Ellwood Jones, who has the contract for the erection of the twelve-division school-house at the Falls of Schuylkill, and who has not yet had his sureties approved by Councils, has been advised to go ahead, and will commence work at once.

—Hammonton is to have a Roman Catholic church, upon which work will be commenced immediately. The walls and gables are to be of native stone, the trimmings of Kentucky bluestone and brick, and the roof a Gothic arch.

—Solicitor General Jenks has rendered a decision confirming the right of Government agents to seize lumber and timber wrongfully taken from the public domain, wherever found, and dispose of the same, under the direction of the Secretary of the Interior, at either public or private sale.

—A. L. Van Zant, the retired confectioner, formerly under the Continental Hotel, has broken ground at 906 Filbert street for a five-story iron-front building, to be used for manufacturing purposes. It will cost $10,000.

—Charles Lippincott & Co., soda water apparatus manufacturers, 925 Filbert street, are building a five-story addition to their factory. It will be used for electrotyping and Britannia work, and will cost $9,000.

—A number of residents of the Twentieth Ward have complained to the Committee on Abuses and Complaints of the Citizens' Municipal Association, that Warnock street between Oxford and Jefferson streets is in need of repaving, "being full of ruts and in a very unsatisfactory condition," as well as "dangerous to light carriages and causing great trouble and annoyance to heavy teams."

—M. Thomas & Son on Wednesday sold the following real estate at the Philadelphia Exchange: A 3-story brick dwelling, No. 1338 Franklin street, 17 feet 5 inches front and 100 feet 6 inches deep, $5,000; "Willow Lawn," on Damon lane and Cobb's Creek, containing six acres, with stone dwelling, barn, etc., $12,000.

—The School Directors of the Eighteenth Section have for some time past been endeavoring to secure a new school-house in place of the one now leased by the city, on Allen street above Shackamaxon. At a meeting on Wednesday evening the Board selected a lot of ground, 101 by 94 feet, on Girard avenue below Vienna street, owned by William R. Leeds, and held at $9,200.

—William P. White, a well-known insurance man of Baltimore, was arrested last week and locked up, on the charge of having embezzled $1,500 of money belonging to the Western Assurance Company of Toronto, Canada. After he was locked up a civil writ was served on him for the recovery of the money. The accused has stood well with the business community heretofore.

—At a meeting of the Committee on Buildings of the Board of Education last week bids were opened for repairs on various buildings. Only two of the bids were over $100, one of which was for new outbuildings for Lee School-house, awarded to Cunningham & McGarrity, at $379.33, and the other was for new fences at the Rowland School, awarded to Elias Chase, at $250.

—Important alterations are being made in the building of the Consolidation Bank, Third street above Vine. The changes include the lowering of the general business room from the second to the ground floor, and the placing of four large windows, with Roman arches, on the front of the building. Vaults will be placed in the rear of the structure, and the whole interior of the building will be fitted up in a handsome manner.

—The value of merchandise exported from the United States during the month of July past was $52,782,707, and of the imports to the United States $55,530,799. In July, 1885, the exports amounted to $45,752,038, and imports to $49,114,662.

—Harriet W. Brooks has been elected assistant physician in the insane department of the Almshouse. Hereafter contractors' bills for work on the new buildings for the insane must be submitted to the Committee on buildings and Grounds.

—The Pennsylvania State Agricultural Society is making active preparations for the annual exhibition, which will open September 6th, and continue until the 18th. Several changes have to be made in the grounds and buildings, and workmen are now engaged in making them.

—The strike at the brickyard of Michael Gaylor, Twenty-ninth and Dickinson streets, still continues. The men reported that very few men were working at the yard, as several had joined the Order, and that in a few days Mr. Gaynor would have no men at all. There are 65 men on strike, and they all belong to Local Assembly No. 6541.

—Cohn & Roberts, Camden's extensive builders, have made an agreement with a committee of the Executive Board of the Carpenters and Joiners' Local Union, No. 20, to grant all non-union men nine hours per day, the same as union man. It is said that only three "boss" carpenters in Camden are now working their men ten hours per day.

—The Executive Board of District Assembly No. 1 last week visited Edmund Webster & Nephew, brick manufacturers, Thirtieth and Tasker streets, whose 85 employés have been on strike on account of the firm hiring carts from Michael Gaynor, brick manufacturer at Twenty-ninth and Dickinson streets, whose men are also on strike, and wanting to load them. The Board ordered them to work pending an investigation, but, as much dissatisfaction exists among them, it is very uncertain as to whether they will obey the order. It is said that the Board was not asked to settle the matter at all.

—The paper manufacturers of New England are organizing a mutual insurance company on the plan of the factory mutuals. Paper mills have not been profitable for insurance companies, and rates are generally regarded as very high. If the paper mill men organize to insure themselves they will probably become careful in the management of their mills and demonstrate the fact that there has been no necessity for such a large line of losses as have prevailed in paper mills. The plan of class mutual insurance seems to be on the increase. Who knows but its more general adoption may prove the long-sought remedy for the cure of our great fire waste?

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, AUGUST 30, 1886.

WHILE in the prophetic mood we may as well remark that values of properties along and near the Delaware river front will improve during the next few years.

THEY are now making rum-casks out of the wood of the old Roman bridge which was built across the Rhine by the emperors Trajan and Maximilan and which was fished out of the river in 1880.

THE sum of $18,000 will be used for widening the channel at Port Breeze. About 25,000 tons of stone will be placed between the Delaware Breakwater and the ice breaker about 1400 feet.

THE Textile Manufacturers have been quite successful in settling strikes. Trouble is threatened among the hosiery interests, but despite their threatened difficulties, business was never in a more prosperous condition.

CONGRESS gave permission last winter for the construction of some fifteen bridges over western streams. The structural iron mills even now are pretty well loaded up with orders but with this influx of business their capacity will be over-taxed.

TENANTS' effects can be sold for landlords' taxes. Of course it is very seldom such a thing occurs as the tenant can pay the taxes and deduct the payment from rent. This is frequently done. Some other way should be provided. The excuse for making such legislation was and is that the city can collect its taxes easier and quicker. It is not a good reason. Tenants ought not to be submitted to such law. The city should look to owners alone. As it is, a great deal of annoyance and trouble is sometimes caused by a levy.

DIAMOND street is marching to the front.

COLUMBIA ave. will soon be the up-town Chestnut street.

QUITE a number of Columbia ave. properties have been bought to be turned into stores.

REAL ESTATE men look on the bright side of things and are very confident of a big fall business.

THE Cemetery business is booming. Two or three more are projected. In time they will all be tenanted.

HOUSES for $35 to $45 in the upper end of the city are letting well. Demand for smaller houses is not quite so active.

NEW PROPERTIES in the 29th Ward are selling in blocks. Houses are bought in blocks of from five to forty.

THERE is a good deal of business in real estate going on in the graveyards. People are buying up lots and retailing them out to single lot buyers.

OUR criticising friend on church architecture does not like to be told the truth about church architecture As to the National association of architects, he ought to read between the lines of the article he criticised.

BRO. Contractor Flood will build 1,000 houses in the upper end of the city on the new ground. Diamond street is as fine a street as Broad. It is worth the "oldest inhabitant's," while to take a ride up through Singerlyville.

THE new addition to the manual training school at Seventeenth and Wood streets, when completed, will afford many new and extended facilities for the practical teaching of bronzing, soldering, and light metal work besides which, the working of iron will be taught in detail. Similar schools should be established in every ward in this city, contributions could be easily obtained to support them.

The mere lending of money will become as years pass a less profitable occupation. Mutual associations are multiplying in building, in insurance, in manufacturing enterprises, and in all avenues of activity. Labor and machinery is becoming more and more productive, and a constantly increasing surplus of energy in the shape of unused capital is being gathered. What to do with large blocks of money is now a serious question. The rate of interest, taking one year with another, is declining, and this process will continue until money for loaning purposes will possess very little value. Misfortune is the cheap reliance of money lenders to-day. The era of speculation is passing. Money lenders and bankers will some day be the first to favor the modification of our banking system from what it is to one in which the Government will itself control the issue and determine the volume of money. If they can turn their money over to the Government, and get a better interest for it than they can earn in lending it, they will not be slow in advocating such a change of system.

IT perhaps does not occur to the ordinary business man that the time will come when it will be no easy matter to find employment for capital. We are entering on the check age, when business will be done by book-keeping, by exchanges of bits of paper showing balances. The great bulk of the business of the civilized world is done that way now. The community are becoming less and less dependent upon mere money.

THE Building Trades Council of Philadelphia, represents at least 16,000 members, all of whom are busy. There is an urgent demand for outside labor and country journeymen are being tempted to come to the city under the higher wages and shorter days. The Council is in harmony and is gratified at the progress made in settling and preventing trade disputes. There are indications the council says of considerable work through the winter.

SOME large real estate operations are hanging fire because the owners ask prices which they expect property to be worth about 1888; provided the ratio of improvement keeps up and the building activity continues. This may not be wise. Some operators would purchase heavily if prices suited. They are anxious to buy in order that they may realize the natural advance, but are not willing to buy and pay holders the advantage they desire to gain.

THE old croakers who are still expecting a recurrence of Noah's flood, are saying "just wait, too many houses going up." These old fellows, many of them young in years, are not of the kind or calibre that is making Philadelphia expand her limits every year by a few thousand houses. They see disaster everywhere. The Singerlys, Floods, Shocks, Drexels and a score of others are crowding

ahead, putting their money where they can see it and where it is bound to appreciate in value.

MAYOR SMITH'S attention is directed to the loitering of a gang of policemen, while on official duty, at a saloon on Haverford ave., in West Philadelphia, kept by a woman.

THE offer to sell the Fifth and Library street property to the Philadelphia Stock Exchange has been withdrawn. The property was offered at $125,000. It is not beyond probabilities that a new exchange will be started conposed of those who consider themselves more progressive. Two opinions have divided the exchange for many years, one in favor of a new building and more extended operations and the other in favor of sticking in the old place in the rear of Girard Bank. The Committee took no further action. A meeting will be called in September and the matter will come up again. Several sites have been considered.

ELECTRO-MOTORS are coming. They are in successful operation in a dozen places. Philadelphia is not behind. Scores of inventors are at work to produce the best result at the lowest cost. A West Philadelphia inventor has the rough form of a machine for street cars' propulsion and awaits capital. No doubt some excellent opportunities will be allowed to slip by. People who have means and want a good thing, ought to be willing to make a good many unsuccessful investigations, if necessary, in order to find something really good. It might be right at hand. Horses have no business pulling street cars.

IT is now stated that disintegration has seized upon the new capitol building at Albany, New York. The massive walls are too heavy for the foundation. The cracks and seams which caused alarm three years ago and which were filled with cement have greatly enlarged and now threaten the safety of the structure, in many places large stones have been shattered and broken from the settling of the foundation. The Senate stair-case became so shattered that its rebuilding was positively necessary. It now presents no defects. The transom windows in the law library have been forced out of line by the weight upon them and wide crevices can be seen on the arches of stone that span the corridor in the law library. It is estimated that $3,000,000 will be necessary to complete the building and render it safe and lasting.

THE Lehigh Avenue Reservoir, according to the report of Medical Inspector Taylor, has been improperly cleaned. Mud and filth several inches deep, which should have been removed, remains undisturbed while the reservoir is being filled with water. The Board of Health, at its meeting held on Wednesday last, practically winked at the shiftless manner in which the work was done; and because the Port Physician had found no very injurious matter in the sediment, the Board thought it best to allow the filth to remain. This is certainly caring for the health of the people of this city with a vengeance. We need an acqueduct.

IMPROVEMENTS in house construction, and in making them comfortable after construction, are crowding in upon us; outside appointments are receiving more attention. We now have our granolithic pavements, flower-beds, fountains and Siemen's lamps to add to exterior convenience and attractiveness. We have almost exhausted our ingenuity on the inside of our houses, and now are giving attention to their surroundings. Of course vast interior improvements are possible if money is no object; but where work is limited to a given sum, the house must correspond. A few lamps, a few flower-beds, a fountain here and there, a good street-way, a pleasing facade, rooms of fair dimensions, paper of tasty design, all go to make a locality attractive. We are getting from our long rows of red bricks. People are demanding something else than a mere place to stay, which is the idea in which our homes have been built for genorations. In olden times more attention was given to personal convenience and comfort. Houses were not piled up one against the other. Land did not possess the artificial value it now does. People did not value minutes as we do. Other and more liberal and expansive ideas prevailed. But of late years we have been running into the opposite extreme. Houses were built and land utilized simply with a view to make the most money. Our offices and stores were narrow and dingy and low in ceilings. No attempt was made to present the appearance of comfort. All this has changed. Our architects deserve credit for the improvements in progress. More houses are now homes. Human beings rather than human machines inhabit them. They look more sensible, more attractive, more humanizing. The improvement ought to go on. Systems of rapid transportation are coming, by which in ten minutes we can go as far as a few years ago we went in an hour or more. This makes more remote residences from business centres possible and desirable.

CONSIDERABLE activity in building prevails in the northwest and northern sections of the city. Wm. F. Shaw has partially completed a building operation consisting of nearly one hundred dwellings on what was known as the Price estate, bounded by Cayuga and Butler streets on the north and south, and Sixteenth and Seventeenth streets on the east and west. The houses are all two stories high, and contain six rooms. The style of architecture is the Queen Anne, and the houses and their surroundings possess many novel features not often seen in and about houses of this size. The row on Cayuga street have wide porches in front, outside of which is a grass plot. Balconies project from the second-story windows, and the dormer windows are deeply hooded, presenting altogether attractive features. The houses on Sixteenth street have, in addition, flower vases at the bases of the second-story windows. The other houses are built fronting on avenues similar to those on St. Alban's place. The houses have double fronts of 24 feet, the parlor and dining-room facing the street, with the kitchen in the rear. The interior finish is in hard wood in its natural color. In several of the houses the parlor is supplied with a radiator and the dining-room with a low-down grate. The gas fixtures are of crystal and gilt. The vestibules are wainscoted in fancy colored Georgia marble, and the parlor mantels are of similar material. The avenues separating these houses have granolithic pavements, and are decorated with flower-beds and fountains, and Siemen's regenerative lamps are provided at convenient distances. In addition, Mr. Shaw has a church building, 122 by 42 feet in dimensions, in process of erection on Sixteenth street, which he proposes to present to the Presbyterian denomination under the title of the Cayuga Mission of the Wakefield Presbyterian Church. The corner-stone was laid on Sunday afternoon with appropriate ceremonies. In order to afford the children of the residents school facilities, a portion of the church building will be used for a day school until the Sectional School Board put up a building. The vicinity of Wayne Junction, on the Germantown branch of the Reading Railroad, within a few minutes walk of which these houses are located, is growing rapidly in population, the numerous manufacturing industries clustering around the station bringing hundreds of work people to the neighborhood, rendering residences necessary.

An available building for a new stock exchange now suggested in financial circles is one to be put up by Mr. Bullitt and his associates on Fourth street, near Walnut. For this purpose were purchased the Poulson estate and the estate of Moses Thomas. The building will have a frontage of 100 feet on Fourth street, and run back 180 feet to Hudson street, with an offset of fifty feet to Harmony street. There will be seven stories. It is understood that the first floor will be occupied by W. W. Kurtz & Co., bankers, and the New England Mutual Life Company, and the rear of the building by the Fourth-street National Bank. Upper floors will be used for offices. Operations will be commenced on the building within thirty days. There is quite a movement in favor of securing quarters in this new building for the Stock Exchange. Brokers argue that it is directly in the centre of the financial portion of the city; the great railroad offices being within a block or two of it at the south, the insurance companies at the west, the banks and trust companies at the north, and the brokers and bankers at the east, all these interests clustering in an area of a few blocks.

DR. EDW. GERMER, of Erie, president of the Pennsylvania state board of health: says "At the next meeting of the state board of health, we will consider a bill to be presented at the next session of the legislature on this landlord idea. We propose to ask the assembly-

men of Pennsylvania to pass an act providing that landlords shall give to their tenants houses with good roofs, dry cellars and sufficiency of pure drinking water and vaults built according to hygienic ideas. Our country is fast becoming thickly populated, and the sooner we begin to study the needs of all, from a health standpoint, the better it will be. With many of the houses that we have visited to-day it would be much better for the community if several gallons of oil were sprinkled over them, and the match applied. I feel satisfied that it would save many lives. The local authorities should at once organize themselves into a sanitary board."

An odor which suggested sewer-gas was observed in a clothes closet in a dwelling in Asbury Park, N. J., and the aid of the local inspector was sought to assist in learning the cause of the trouble. The drainage construction of the house was believed to be excellent, and it was therefore thought that the offensive smell might be caused by a dead rat between the partitions. Base boards were removed but no odor proceeded from behind them. As a soil and vent pipe passed up through the closet, it was then supposed that a leak must exist in one of them. It was with misgivings, however, that these structures were suspected, for the inspector knew that there was a trap on the main drain; that a cold air inlet was provided; that the soil pipe extended full-size through the roof, and that every trap in the house was vented into the soil pipe above the highest fixture. He was doubtful how such an undiluted and abominably bad odor could be emitted from the soil or vent pipes, even if they leaked at every joint. The peppermint test was applied with negative results. Before proceeding further with his examination, the inspector investigated a collection of bottles and packages on a shelf in the closet which contained the household stock of medicines. His nose soon told him he was upon the right track. A small paper package was found which was labeled "Pulv. Glycyrrhiza Co." This little package seemed to contain the essence of sewer-gas. It had been purchased months ago to serve as a laxative for one of the children, and the portion remaining had been laid carefully away for future use. Time had effected a change in its composition, so that it was rendered more offensive to the sense of smell than decomposing fish. Stale compound licorice powder is therefore to be placed on the list of sources of sewer-gas scare.

The plans for the improvement of the Delaware have been approved at Washington, and the work will begin at once. The appropriation is for $300,000. Of this $30,000 will be expended in improving the channel in front of the city. A channel is to be made through Smith's Island bar. The engineer in charge says:

"It was proposed to form a channel at least 200 feet wide and 10 feet deep at mean low water, by means of a cut dredged to the required depth and protected on each side against the inflow of sand by a timber revetement. The revetement should be first constructed, at an estimated cost of about $20,000, and the balance of available funds afterwards applied towards dredging a channel between the lines of revetement. The construction of the revetement and the work of dredging to be under separate contracts, made after advertising thirty days for proposals.

"The project for the comprehensive improvement of the Delaware river between Trenton and the upper part of Philadelphia has not yet been considered, since the necessary data cannot be determined for such a project until the completion of surveys which are yet in progress. The project sanctioned by the appropriation of Congress and under which work has been in progress since 1885, is the formation of a ship channel from a point opposite Philadelphia, and about three-quarters of a mile above the Port Richmond elevator wharves, to deep water in Delaware Bay, having a least width of 600 feet and a depth of 26 feet at mean low water. The formation of such a channel to be obtained (except at Schooner ledge, where rock would be required to be removed) by regulating the tidal flow by means of dikes, with recourse to dredging where necessary as an aid to such contracting and regulating works.

"It is proposed to expend the appropriation of August 5th, 1886, as follows:

"1. Of the $7500 applicable above Bridesburg, $2500 to be applied to the completion of the survey in progress in 1885 between Bridesburg and Trenton. The application of available funds in 1885 carried this survey to a point within about five miles of Trenton. The balance, or $5000, to be held for the present for such subsequent application as may be approved.

"3. Of the balance, $172,500, of the appropriation for improving Delaware river between Trenton and its mouth, I would propose to apply $20,000 for the extension, by dredging, of the main ship channel to a point about 500 feet above its present upper limit in the vicinity of the Port Richmond elevator wharves. The application of this amount would deepen the present areas, which now carry from 16 to 20 feet, to a depth of 26 feet at mean low water, and for a width of about 300 feet. This extension of the previously formed channel is required to meet the increasing demands of commerce along this part of the Delaware river front, and is in accordance with the approved project. The work to be done by contract, made after advertising 20 days for proposals.

"4. I would further propose to expend about $80,000 in raising, to within 4 feet of low water, the dike in process of construction, under existing contracts, between Hog and Maiden Islands, for the improvement of Mifflin Bar. This expenditure would be applied to furnishing and placing about 40,000 cubic yards of stone in the dike. The work to be done by contract, made after advertising 20 days for proposals.

"5. I would further propose to expend about $30,000 upon the commencement of the dike below Reedy Island, proposed by the Board of Engineers of 1884, for the improvement of Dan Baker's Shoal."

The present condition of the great railway alliance, formed with so much talk one year ago, furnishes a striking example of the assertion of natural laws over artificial restraints. The duplication of trunk lines connecting the western country with the Atlantic seaboard reached its climax when the West Shore was built in opposition to the New York Central, and at the same time the construction of the South Pennsylvania Railroad by Mr. Vanderbilt threatened the peace of the Pennsylvania Railroad. The state of war which prevailed for nearly a year among the trunk lines was in great part due to the determination of the Pennsylvania Railroad—probably the most powerful and best managed railway corporation in this country—to have no more to do with pools, and at the same time the Vanderbilt interests were engaged in a life and death struggle with the West Shore, whose competition involved not only through business but the local traffic of every mile of its line between New York and Buffalo. About a year ago peace suddenly appeared out of this conflict. The West Shore was completely crushed and was absorbed by the New York Central, on its own terms, while Mr. Vanderbilt surrendered the South Pennsylvania project to the Pennsylvania Railroad. The new pool, whose formation immediately followed this, was heralded as an outgrowth of a perfect understanding between the Vanderbilt and Pennsylvania interests, and as furnishing guarantees for keeping the peace between the roads. It will be remembered that the first jarring note was struck when the Baltimore & Ohio made the announcement that it declined to be longer dependent on the Pennsylvania for access to the metropolis. It has rapidly pushed an independent line toward completion, and doubtless in a short time, through a pending arrangement with the Reading and New Jersey Central companies, will have secured an independent outlet to New York. Beginning with the refusal of the Pennsylvania Railroad to carry the Baltimore and Ohio's passenger business over its line from New York to Philadelphia, the ill-feeling between the two lines has increased instead of diminishing, and the situation at the present moment is a delicate one. The Pennsylvania authorities are said to be less favorable to pools than ever, and on the other hand they have in the Baltimore & Ohio an aggressive and vigorous competitor. While it is not probable that the conflict will result in the disruption of the pool, such an event is by no means an impossibility.

"Land is such an encumbrance down our way that it won't be taken as security in business transactions," said Hon. J. R. Lynch, the colored ex-Congressman from Mississippi, last night at Union depot. He is a Republican and was on his way to New York, and was extremely loquacious about land and politics. After making the above statement, he continued: "During the war, land-owners contracted such enormous debts that the money-lenders had to take the land in return. As a result, men now own thousands of acres more than they want, and large tracts can be had for a mere song. There is really a good investment in Mississippi land for Northern capital. In the southern part of the State we have a steady trade in exporting red pine, but the capitalists generally throughout the State are raising cotton. Absentee landlordism, however, is a drag to everything progressive. We are making no headway in anything and some civilizing agency is much needed."

Engineers pronounce the project of tapping Niagara River by means of a canal entirely practicable, and experts have declared that not elsewhere within the known world are there such natural advantages for the erection of a gigantic water-power, and that it can be delivered at Lockport to the extent of 300,000 horse power, if so much shall be wanted, at a minimum of expense. Lake Erie and all the great upper lakes would be the mill-pond for this power, the Niagara River the head race and Lake Ontario its tail race. The supply of water can never be diminished by drought; no spring floods nor freshets will tear away the dams, for there will be no dams. The supply of water will be uniform, uninterrupted and practically unlimited. At the ordinary capitalized value of a horse power this would add about $200,000,000 to the material resources of the country.

Statute of Limitations.—Acknowledgment of Signature of Note.—The maker of a note acknowledged that the signature to the note was his, that the note must be "fixed," and that he and another would have to pay it. The Supreme Court of Pennsylvania held (Shaffer vs. Hoffman et al.) that this acknowledgment was not sufficient to take the note out of the statute of limitations. The court said: It is not such an acknowledgment from which an unequivocal promise to pay can be inferred. It does not prove an express promise to pay, nor an implied one. The acknowledgment of his signature to the note would not of itself be an acknowledgment of the debt. The latter might have been paid, or there might be a valid defense to it. The expressions that it must be "fixed," and that "he and William would have to pay it," are equivocal. In the one instance it is not the equivalent of "pay;" in the other it involves another person, and may refer to a supposed liability rather than a present intention to pay.

Communication.

"Hitting all Around."

PHILADELPHIA, Aug. 18, 1886.

Editor *Phila. Real Estate Record:*

In the third column of pp. 362 of your issue of August 9th, I find a number of minced and boiled sentences relating to the interests of architects in America, the mass beginning with the profoundly wise and wild observation that "A National Convention of Architects would be a very good thing. All other professions have their annual conventions * * * * * but architects have none." Unfortunately, for the emphasis of this statement, it is entirely untrue, since the American Institute of Architects has been organized for over ten years, and during that time has annually convened at different places in the East and West. Its honored presiding officer from the start, I believe, has been Mr. Thos. V. Walters, who is connected with John McArthur, Jr., of this city. The Institute was the god-father, so to speak, of the *American Architect and Building News*, and stands at present as an unostentatious but powerful force in the development of the architectural profession in this country.

Concerning the "exclusive spirit" spoken of as existing in the East, the writer, or his informant, is all at sea. There is quite as much fellowship manifested in the profession of architecture as in any other, and the jealousy and personal feeling is confined to the cities, where it is fastened by the terrible modern lust of competition or the knowledge of insufficiency or inability. This spirit in art matters is as old as Michael Angelo, and will probably be a great deal older when the last oldest inhabitant yields up his ghostly breath.

The balance of the column is a blundering mass of twaddle and withdrawals, the like of which it has seldom been my misfortune to come across, while in the first column of the same page we are harassed by another sermonlet, either from the same writer or one of his brethren. Here the subject is church architecture. We are informed, to begin with, that "There is a sameness about church architecture which is almost annoying," but that "Of late years there has been something of a protest against this." This protest, the writer goes on to tell us, is "trifling," but barely six lines below announces "There is a certain fashion in architecture which changes from year to year, like fashion in dress," a statement, which, if it be a fact, should surely do away with the "annoyance" which the perturbed architectural essayist experiences. But here is the trouble, "It lacks originality, and bears evidence of an anxiety to make things appear different without a real ability to do so." If we may judge from this, the highest ability lies, *not* in the most perfect adaptation of use to beauty and the truest expression of constructional forms, but in the power to "make things different." Granted that the writer has been brought up on Philadelphia brick fronts (of the period, either A. D. 1886, or the "darker ages") I can credit and sympathize with his "whole idea" of architecture, but we must not let this local coloring creep into such a solemnly wise production as column 1, page 362 presents to us. The city of our habitation is a poor field for the study of architectural expression, since the men who possess the ability have rarely been allowed to put their knowledge or power into their work, while the mass of people and their children are being led into belief that a certain conglomeration of blank monotony, good and indifferent sculpture and bold massiveness, cluttered upon the crossing of two wide highways, with a cracking and dislocating vainglorious stack of marble glued (partially) to one side, is an "architectural monument." If we really had come to this, what satire there would be in those two words!

I have already intruded upon you with this hasty memorandum, and will only note, finally, the writer's lament that our churches "do not suggest the idea of the old style temple," and that "the old time temple is nowhere seen." How often has it been told, again and again, that we cannot use art forms suitable only to a country utterly unlike ours in climate and people. One would suppose that the examples of the "old style temple" already erected would convince the world of this: is it utter dumbness, or only a mighty desire to appear as an "authority" that raises this clamor? It might also be well to remember that "religion and religious contemplation" *do not* monopolize a very large "share of the human mind" at present, and that borrowing dead ideas from an age when they did, will neither revive them nor strengthen an art springing from a different soil, with a higher ambition and destiny. The expression of 19th century American Art aims rather to be that of an *act* than of a *feeling*. Very truly yours,

J. C. WORTHINGTON.

Underground Wire System.

The New York system of putting electric wires underground contemplates a main trunk system of conduits connected at intervals with inclusive junction boxes and doing away with man holes, as first proposed, altogether. The main sections are to be rectangular, in cross sections, and perforated longitudinally by a series of ducts for the reception of wires and cables. The junction boxes will be shallow cases, formed by a single casting of iron, sunk into the street surface until the edge of the open portion of the box is flush with the paving. They will be provided with heavy outside covers to take the strain of the street traffic, and inside covers screwed down on gaskets to secure water-tight joints. The cables and wires will be spliced, tapped, and handled generally at the junction boxes, the operator being practically at the surface of the street.

To make a continuous subway the conduit sections, after being laid, are to be first brought into alignment by inserting mandrels in the ducts, a cast iron sleeve being then slid over the contiguous ends of the section. To the opening on the upper side of the sleeve a steam hose will be secured and steam turned on. Under the influence of this the ends and sides of the sections will become plastic, the hose will then be removed and melted asphaltum run into the opening, completely filling the space within the sleeve and around the mandrels between the faces of the sections. The joint will thus be welded and form a homogeneous mass throughout, thus, with the added strength of the sleeve, insuring as great strength at the joints as in any other portions of the sections. The advantage claimed for this process is that the conduit will be made water and gas tight throughout, and that the several ducts will be maintained in perfect continuity from junction box to junction box. The bottom of the trench in which the sections are to be placed will be filled with beton, or asphaltum concrete, to a depth of from four to six inches, thus forming a level and solid bed, and above the conduit a layer about an inch deep of nearly pure asphaltum will be run. Over this will be three or four inches of sand, or just enough to properly bed the paving stones and insure a uniform area of bearing surface. All wires and cables will be easily accessible from the junction boxes, and in consequences of their proximity to the surface, they can be readily inspected, inserted, or withdrawn.

BUILDERS' ITEMS.

Building and Real Estate Notes.

HIGHTSTOWN, New Jersey, is to have a new Catholic church.

$20,000 are to be expended for a new bridge across the Brandywine, at Market street, Wilmington, Del.

THE Camden, N. J. Homeopathic Hospital Association want to buy a lot suitable for a new hospital which they intend to erect at an early day.

MR. P. A. WELSH, architect, Walnut st., is busily engaged on two churches, but these are buildings which will not be started before next April. The plans are not sufficiently advanced to a description as yet.

COL. FLOOD intends to erect some thousand houses shortly, north of Diamond and running from Eighteenth to Twenty-second, and from Diamond to York, in the twenty-eighth ward.

T. W. MALTZ, lumber merchant, will erect twenty nine-room houses on Twenty-fourth street between Berks and Norris, on the west side, they will be fitted up in best of style and have all the most modern improvements.

JAMES P. MORNEU, 925 Walnut street, reports having made sale of from seventy to seventy-five lots of the Folsom estate, at one hundred dollars each, and further states, that next week they will commence the first building. Mr. Morneu is busy preparing his fall list of properties.

WILLIAM H. CRAVEN & SON, 1546 North Seventh street, real estate and insurance brokers, report houses renting freely and also the inquiries for houses to purchase on the increase, their conveyancing department is kept very busy.

MICHEL MELODY, builder, is erecting ten seven-room houses on Lawrance street, with blue marble base and ornamental fronts, and eleven on Lithegon street, of five rooms; also on the same street eleven others. The Lawrance street properties will be extended in like manner.

MR. J. R. MASSEY, Fifteenth and Green streets, in referring to real estate, says that things are looking much brighter and say that the prospects for a good fall is almost sure. Houses with him are now renting well and the demand for them has commenced much earlier.

BAILEY & SALTER, 2008 Columbia avenue, real estate brokers, report that within the last few weeks have made sales of several goodwills, stocks and fixtures of some good old established businesses, they say that with them that sales of properties are unusually slow, but report renting and collection as being very satisfactory.

MR. GEO. LODGE, real estate broker, Third and Federal streets, reports business generally very good, and for the season of the year has been very busy in conveyancing. He has lately made sale of six houses, three on Chadwick street and three on Bancroft street, for $1800 each.

JEFFERSON SQUARE is undergoing a thorough renovation. It is having the old iron rails taken down and fine coping stones of granite put in their place, leaving it open to the populace. New walks have been laid, the whole extent of the square thoroughly drained and resodded, with twenty-six new improved lamps added, such as those which are used in Franklin and other squares. This long wanted improvement will make a decided improvement to the neighborhood and place our down-town people on a par with those of the northern section. The cost of this alteration will be about $30,000.

MR. A. C. WOODRUFF, builder, of Norwood, has a contract to erect two ten-room houses for Mr. W. Calhoun. They will be of colonial style and have all modern conveniences.

MR. J. H. HUDSON, real estate and insurance broker, says business in the selling line is somewhat slow but thinks from indications that the tide will change and a good fall business will set in, his conveyancing and mortgage business still keeps up, as also does house renting, the demand with him being for large houses.

SAVAGE & SMITH, 1937 Columbia avenue, real estate and insurance agents report having made sales of several up town properties within the last thirty days, and also that the inquiries for houses, from $35 to $45 rental, both to purchase and rent Renting houses with them just at present is very active. This firm have one of the most complete offices on the avenue.

E. A. SCHEFFER, real estate broker, 180 Columbia avenue, speaks of properties renting well, the demand being for all classes, he has but one house to rent which is something that has not occurred to him for three years; he has just sold a property 2216 Darien street, for $1,800; he says that just at present buyers are scarce.

MR. W. L. THOMPSON, real estate broker, 579 S. 11th st., speaks of houses, having an unusual run on them. His inquiries for medium sized houses, both to purchase and rent, within the last two weeks, have been in excess of previous years. His sales of properties, which have not been large, show an increase over 85.

TWINING & SON, Columbia avenue, real estate and insurance brokers report the sale of a property 732 Grove street, for $3,300, they say that houses with them are renting freely, those being most sought after are seven and nine rooms. The business of this house within the last two years has quite doubled itself and they are of opinion that real estate up town looks very satisfactory.

S. P WRIGHT is erecting at the southwest corner of Passyunk avenue and Moore street, a three-story brick building, 25 feet front on Passyunk avenue by a depth of 60 feet on Moore street. The trimmings are of marble and the interior wood work of yellow pine. The first floor of the new building will be occupied by Mr. Wright as a drug store, while the two upper floors will be fitted up for meeting and society purposes, the entry to which is at the rear end of the building on Moore street.

MOSES & KING, architects, 226 Walnut st., are erecting a house for Mr. E. F. Thompson at Moorestown, N. J., it will be frame with shingle second story and slate roof, with all modern improvements and cost $4,000; also building 8 dwelling houses for Mr. T. J. Jeffries, at Twenty first and Bellevue street, Tioga; they all are of pressed brick with porch and balcony on second-story over porch roof and will cost about $16,000; also completing a cemetery for Dr. Green of Woodbury, N. J., on a tract of ground 43 acres; their work includes monuments, receiving vaults, chapel, large house and others; also an Episcopal church at Collingwood, N. J. of frame, 44 feet by 26, it will have memorial stained glass windows and slate roof.

CHAS. HARRY SHOWAKER, Twenty-first and Columbia avenue, has within the last 10 days made exchange of a fine country seat at Moorestown, N. J., for a block of five new houses, three-story, on Venango street, Tioga, to Mr. James B. Cavey; also traded a lot from Broad to Germantown ave for five houses on Seventeenth street below Venango street, also with Mr. J. B. Cavey, who intends to at once erect a block of stores on it. Mr. Showaker has just purchased two properties on Columbia avenue, 2007 and 2017 which he intends to alter into stores at once.

THE architectural profession at this season of the year are usually dull, but from the various reports from some of our prominent men it may be safely said that the anticipation for the fall is very bright, some of them saying that should all the work arrive as promised, there may be a slackness of draughtsmen.

B. F. BELYEU, 809 Columbia avenue, real estate broker says, that the demand for houses with them within the last eight days has been on the increase, they have been renting them from $25 to $45 dollars quite freely. Sales with them for the last month have been dull, but look forward from inquiries already made to a good fall trade.

MR. GALLOWAY has taken charge of the Rice properties, of 86 acres, at West Sharon Hill, which he has already cut up into 650 lots for building purposes, and he anticipates having ten houses started on them by September. The location of his estate is good; it stands high, and is within ten minutes' walk of the station. The P. W. & R. R. R. are considering the desirability of placing a station central of this place. Already five splendid ten-room houses are being erected.

J. L. GALLOWAY, Northwest corner Eleventh and Washington, reports that they have made sales of 141 of their choice lots, belonging to the proposed park land association, at premiums of from five to ten dollars cash, on which this fall they will commence to build. The total amount paid is $4580. Mr. Galloway has also sold five lots at Moores to G. W. Simpson for $1500; also, two lots at Norwood, 100 feet by 200 feet, to J. Harrison, for $750; also, a lot to Mrs. Marvel, 50 feet by 200 feet, for $850; also, two lots to S. A. Schnett, 100 feet by 200 feet, for $700; and other lots.

H. R. SHOCH, builder, Columbia avenue, is erecting seventy-eight houses between Twenty-fourth and Twenty-fifth streets on Berks and Norris streets (twenty-eighth ward,) their are five three-story ten-room houses with all modern conveniences, all of which have just been sold for $4,500 each; the remaining seventy-three are all of two-story (six-room and bath), thirty-nine of which are already sold for $2,000 each, they are filled up with all modern conveniences. He is also erecting thirteen ten-room houses on Twenty-third street, on the east side, between Berks and Norris streels, five of which have already been sold for $4,500 each; these houses are all being completed in the most improved style. He has also just completed twenty-six houses on Croskey street, between Norris on the west side, they have six rooms and bath with all convenienees, fourteen of them have just been sold for $3,000 each. Mr. H. F. Hoover, who has charge of the real estate department of Mr. Shoch's operations has his office at present at Twenty-third street.

COL. E. H. FLOOD, builder, is erecting twenty-two houses on Fountain street and Diamond with seven rooms and modern conveniences and of very handsome design. Willis G. Hale is the architect. He is also building thirty-five others on Van Pelt street above Diamond, seven rooms and modern conveniences for Mr. W. M. Singerly; Mr. Willis G. Hale is the architect. He has also just finished thirty-two houses on Uber place above Diamond, sixteen on each side, they contain nine and ten rooms each; also twenty-two houses on Page street of two stories, they are natural wood finish and decorated half fronts; Mr. W. G. Hale is the architect; also eleven three story houses on Norris street with ten rooms and modern conveniences; also eleven on Diamond, also ten rooms; Mr. W. G. Hale is the architect. The houses on Norris street are all sold and realized $4,500 each except the corners which fetched $5,250, he has also sold the Page street houses which brought $3,000 each and corners $3,300. The real estate portion of their business is done through Mr. F. A. Flood, 3118 Diamond st.

Late Labor Movements.

Street car troubles are greatly threatened on some New York lines.

Another switchmen's strike is threatened in Chicago.

The strike continues at the 42 Brockton shirt factories.

The Clothing Manufacturers' Association of New York propose not to employ any union men until a strike in certain factories is terminated.

The morocco strikers at Wilmington, Delaware, are as firm as ever.

A strike will take place among Cincinnatti switchmen unless wages are advanced.

A strike is threatened at the Cambria Iron Works, Johnstown.

The western window glass factories will not likely resume before October.

The western Pennsylvania nailers will likely have to accept the same rate of wages as is adopted on farther western mills.

The boss plasterers of Providence have conceded nine hours a day's work. This affects 250 plasterers and laborers, and the disaffected men have returned to work.

The Recorder of Deeds for Washington, D. C.

The following is an exact copy of the President's letter on file in the office of the Executive Clerk of the Senate reappointing Mr. Matthews to the position of Recorder of Deeds of the District of Columbia:—

"To the Senate of the United States:

"I nominate James C. Matthews, of New York, to be Recorder of Deeds in the District of Columbia, vice Frederick Douglass, who has resigned.

"GROVER CLEVELAND."

"Executive Mansion, Washington,
March 4, 1886."

The Washington, D. C. *Critic* speaking of Mr. Matthews' re-appointment says—"There are no 'conditions' accompanying the President's letter as to a vacancy existing, for he says Douglass has resigned. The subsequent action of the President in commissioning Matthews as Recorder of Deeds, was, therefore, to fill a vacancy which happened while the Senate was in session. This action brings both the President and Matthews under the penalties of Sections 1771 and 1772 of the Revised Statutes, and the conditions are aggravated by the fact of Matthews having already been rejected by the Senate. The continuance of Mr. Matthews to act as Recorder of Deeds under these circumstances is not unlikely to create as much commotion, if not some very serious real estate complications, as any other darky ever found in a woodpile."

Building Inspectors—Attention!

A correspondent in a daily paper says:—"In my walks in the southwestern part of the city I see buildings being erected on ground that has been excavated to the depth of 12 to 15 feet and filled up with all sorts of rubbish. The builders remove this rubbish to the depth of, perhaps, four or five feet, and build the stone wall on this foul, yielding mass, without going down to a solid foundation, and they use this rubbish instead of gravel for making mortar, by screening out the old shoes, tin cans, etc. What I want to know is, have these people a right to build in this way? Were not building inspectors appointed to prevent this very thing? I am told this is a common practice in this locality."

Let us have a bill of particulars. This sounds like the story of the boy and five thousand cats in the back yard.

To be Built.

Mr. McFadden, of Vineland, who claims to be a contractor for the Baltimore and Ohio Railroad Company, has just given out a contract for the erection of twelve booths for the accommodation of laborers who are to work on a new railroad which he says his company will build this fall between Camden and Cape May. Mr. McFadden says the charter and franchises for the new road have already been secured, and that agents have been along the proposed route securing the right of way. Hundreds of men, he says, will be put to work this fall making the road bed, and he expects the line will be open for passenger traffic within a year. Headquarters are to be established at Vineland and Millville for the direction of the work. The depot at Cape May will be located on a tract of land recently purchased between the Sea Breeze Excursion House and the Elephant, but the terminus at Camden has not yet been decided upon. Mr. McFadden, who is positive in his statements, thinks ground will be broken in September, contracts for grading and cutting have already been awarded. It is understood that other capital besides Baltimore and Ohio money is at the back of the enterprise.—*The Record.*

New Compound for Coating Metal.

American Inventor.—This invention relates to alloys for coating metal sheets, wire or other articles, its object being to form a composition by which these articles can be coated without pickling, as has heretofore always been considered necessary in coating with tin, zinc and like metals. It consists, essentially, in a compound formed of lead, zinc, tin and borax or biborate of soda, the compound being formed by melting the several metals together and then thoroughly intermingling with them the borax, the several metals being held together by the borax, and the compound, while heated, being spread, rubbed or pressed into the article to be coated, and forming a fine surface which efficiently protects the iron from oxidation and resists any ordinary friction or wear.

Before applying this improved coating composition to the surfaces of the sheet, wire or other article to be coated, the article is first passed between metal brushes, to brush or break off all the loose scale or oxide adhering to the article; or this loose scale or oxide is removed by other suitable mechanical means. Where the article is of irregular form, it can be brushed by means of metal brushes or scraped to break off this scale or oxide. The coating compound can be applied in different ways. The manner preferred in coating sheets and wire is to pass it down into the material and through suitable rolls within the material or at its surface, which will press or rub the coating compound into the surface of the metal. These rolls may be formed of metal, asbestos or any other suitable material. Instead of the rolls, a series of brushes may be employed, by which the compound will be spread and rubbed on the sheet or other article. The article can also be first dipped into the melted compound, and afterward the compound adhering to it be rubbed into its surface by suitable brushes, scrapers or other tools.

This coating compound enters into the metal to be coated, and apparently absorbs any oxide or scale left on the surface of the article, forming a smooth and fine finish on its surface. On account of the lead and tin in the compound, it efficiently protects the articles from oxidizing or rusting, while the zinc increases the hardness of the metal surfaces formed on the sheet or other article, so that when coated they will stand exposure without rusting, and, where a large proportion of zinc is employed, any ordinary frictional wear.

Fire-Proof Buildings.

The demand for fire-proof buildings is rapidly increasing every year, and at the present time a great variety of materials and methods are advertised in the architectural and building journals for accomplishing the desired results.

Among so many different methods and materials it is often difficult for the inexperienced architect to choose that which will be for the best interest of his client, and it is the purpose of the writer, in these few short articles, to offer such suggestions as shall enable him to choose intelligently from the numerous processes and materials urged for his adoption.

By a fire-proof building the writer has in mind a building that shall be proof against fire, whether it be a small fire in one of the rooms, or a general conflagration, or in other words, a building that fire cannot harm, beyond the door and window finish. There are *incombustible* buildings which fire cannot burn, but which, should the furniture and finish get on fire, would be completely *demolished*, owing to the warping and buckling of the iron which it is necessary to use in such buildings. Hence a distinction must be made between *fire-proof and incombustible.*

A fire-proof building generally is incombustible, but many incombustible buildings are not fire-proof.

In the city of Boston the building laws require that buildings over eighty feet high shall be built of *incombustible* materials; hence in such cases the use of wood for constructive purposes is prohibited. The New York building law requires that every building exceeding seventy feet in height "shall be built fireproof."

Marble, limestone and granite will not withstand intense heat, and should therefore be sparingly used in buildings in which there is much to burn. Terra-cotta is undoubtedly the best fire-proof material for the exterior decoration of buildings, although the best qualities of sandstone may also be safely used.

The above are the only materials which the writer would recommend for the absolute *protection* from fire and water (for the effects of a stream of water on a burning building must also be borne in mind).

With all the iron work in such a building, thoroughly protected with porous terra-cotta or fire-clay, there is no possibility of the building being destroyed by an ordinary fire, and if the brick walls are protected, the building cannot be destroyed by any conflagration. Experience has shown that the best method of constructing the interior vertical supports of a fire-proof building is to make them all of iron, of the simplest shapes, and protect them with fireproof material finished with plaster or cement. In this way one can be absolutely sure that his vertical supports can be depended upon to withstand the most severe conflagration.

There are various forms of tiles made for fire-proofing iron columns, each manufacturer having his special patterns.

Probably the best forms of columns for this purpose are those having a cross section with plain caps and no base. These sections are easy to cast and to protect, and the cross shape has the advantage that any defect in the casting can readily be discovered. Both of these sections are largely used in fire-proof buildings. The exterior of the column may be finished either with plaster of Paris, lime of teil cement, or Keene's cement, the latter being susceptible of a high polish and can be colored any desired tint. In business buildings, a cast-iron shell base and dado, four feet high, is recommended. The capital may be of stucco or terra-cotta.

The partitions should be constructed solely for the purpose of dividing the building into rooms, etc., and hence, should be as light as possible. The best materials yet found for this purpose are hollow terra-cotta blocks, or hollow fire-clay brick, which can be obtained three, four or five inches thick. The plaster is applied directly upon the surface of the tile, which is sometimes creased to afford a clinch for the plaster. In plastering on porous terra-cotta (which is made by mixing sawdust with the clay, and, in the process of burning, the sawdust is consumed, leaving the terra-cotta full of small holes), the plaster readily adheres to the tile, so that no creases are necessary. Porous terra-cotta also readily receives and holds nails, and may easily be sawn and cut.

The partitions should not be set until the floor tiles are in place.

—The property, corner of Parrish and Pennock streets, 155x112, sold for $11,800.

—The new County Prison at Holmesburg will cost $140,000. R. A. Malone & Sons will be the builders.

—S. David Page, Esq., has assumed his position of U. S. Assistant Treasurer, to which he has been recently appointed. About $27,000,000, which was in charge of ex-Assistant Treasurer Eyster, has been counted and turned over to the charge of Mr. Page.

—The appointment of General Newton as Commissioner of Public Works of the city of New York reflects very creditably upon the judgment and foresight of Mayor Grace, will the New Yorkers be able to keep him any longer than we kept Col. Ludlow.

—The 600 employés of the Reading Iron Works' pipe mill recently asked for an advance of wages, to date from the 16th inst. They were agreeably surprised to receive a reply granting an increase ranging from 10 to 20 per cent., and dating from August 1st. The company has a large number of orders on hand. This is the second advance in pay within five months.

—The Finance Committee of the Gas Trust got together long enough Thursday afternoon to hear how their finances stood. Cash in several banks, Trustees' account, $55,234.31; Sixth National Bank, sinking fund, $2,-633.31; Philadelphia National Bank, redemption of gas stocks, $1,836.96; in cashier's account, $16,903.18; total, $574,721 76. In order to make the $80,000 necessary for the payment of wages and emergency bills due next Wednesday, $63,096.82 was appropriated to the cashier's account.

—At a convention of stove moulders of the entire Schuylkill Valley, from Danville to Philadelphia, recently held at Spring City, it was decided to ask for an increase of 10 per cent. in wages, to take effect from Sept. 1st. Interviews with some of the proprietors develop the fact that the advance will hardly be granted, as the demand for stoves is not great enough to warrant an increase in the scale of wages, and a consequent advance in the price of stoves at this time. There are about two thousand moulders employed in the valley. The Stove Manufacturers' Association will shortly hold a special meeting to consider the matter.

—The public is warned by the postal authorities against negotiating any of the following described securities, which were miscarried or stolen from the mail on or about June 28th:—Thirty one eight per cent. Alexander county bonds of State of Illinois, of the following numbers: 78, 79, 80, 89, 91, 92, 83, 84, 95, and coupons of July 1, 1879, and subsequent, attached, $1000 each; Nos. 50, 36, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 81, 82, 83, 84, 85, 86, 87, 88, with coupons of January 1, 1882, and subsequent, attached, $1000 each; one $1000 3 per cent. State of Tennessee bond, No. 5730, with coupons of January 1, 1881, and subsequent, attached.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ACKNOWLEDGMENT.

In a deed of assignment of a wife's land, executed by her with her husband, where the certificate of acknowledgment does not set forth that the wife was examined separate and apart from her husband, it is null and void as to her. The wife is estopped by her acquiescence in a subsequent sale by her grantee to her husband from setting up her title.

ADVERSE POSSESSION.

Actual possession is necessary to acquire title under the statute of limitations; the payment of taxes upon another man's unoccupied land does not affect the latter's title.

CONTRACTOR.

In order to relieve a principal from responsibility for injuries occasioned by the negligence of a contractor in the performance of the work contracted for, the contractor must be given full control of the work.

DEED.

A deed is recorded in contemplation of law, when left for record in the recorder's office, and its effect as constructive notice to a subsequent purchaser is not invalidated by the fact that it is recorded in the wrong book, and omitted from the deed and mortgage indices.

DOWER.

Where a husband conveys by deed in which his wife does not join and afterwards reacquires title to the land and mortgages the same, a sale under such mortgage bars the wife's right of dower.

JUDGMENT.

A release of a particular piece of land from the lien of a judgment, which is neither recorded or noted in the docket, is inoperative against a subsequent bona-fide assignee of the judgment.

LANDLORD AND TENANT.

A tenant in possession under a valid lease, may hold against a subsequent purchaser, though no rent has been paid when the latter's right accrued.

MECHANICS' LIENS.

The claims of mechanics and material men take the precedence of all other liens, from the commencement of the building and share ratably amongst themselves.

MORTGAGE.

A mortgage unaccompanied by a bond imposes no personal liability which will sustain an action of debt, though it recite an indebtedness to secure which it was given.

SPECIFIC PERFORMANCE.

Where a suit in equity for specific performance of a contract for conveyance of real estate has proceeded to final decree, which has been complied with, the plaintiff therein is stopped from subsequently bringing an action at law to recover damages for an injury to the property which was the subject of the equity suit committed during the pendency of the equity litigation in which the question of damages was directly involved.

VENDOR AND PURCHASER.

A purchaser of land cannot maintain ejectment against his vendor while the latter is lawfully in possession, without making proof of (payment or) tender of the purchase money; and he must also maintain a tender by producing the money in court. Until he has thus put his vendor in default he has no cause of action.

F. R. SHATTUCK.

Bridge Building.

The probabilities are that next year will be a great year for bridge building.

The construction of a railroad bridge across the Hudson at some point easily accessible to the great lines and at the same time sufficiently elevated to insure non-interference with river traffic has long presented a problem for solution at the heads of the waters of transportation. South of Albany the pathway between New England and the country west of the Hudson has been through New York city or its harbor, entailing always increased expenditure and often times in winter awkward inconvenience and delay. As a manufacturing community the Central and Southern parts of New England are dependent upon Pennsylvania for fuel and upon the country beyond for raw material, as well as for certain articles of food, while the shipment of manufactured wares South and West from the Eastern States is subject to the conditions enumerated above. Peekskill is the site selected.

For several years the engineering skill of the country has been directed to the discovery of the most suitable point at which to place the structure. Within a day or two, however, facts have leaked out which indicate that the neighborhood of Peekskill has been selected as one which possesses in a pronounced degree the essential requirements both natural and artificial for the much-needed improvement. Peekskill being almost parallel with New Haven, itself a Southern terminus of the New England system, is peculiarly adapted to the establishment of a distributing centre for coal shipped through New Jersey from Pennsylvania and for wares coming from Eastern factories and work-shops.

It is now authentically stated that the special charter granted to the Hudson Suspension bridge and New England Railway Company several years ago has been availed of as a basis for proceeding with the work of constructing a bridge at the point indicated. Its validity, with especial reference to the proposed system of connecting tracks, having been determined, a syndicate of capitalists has been quietly arranging for entering upon the work. The connections will cost $10,000,000.

It is proposed to connect on the west side of the river with the Erie railway, the Lehigh & Hudson, the New York, Susquehanna & Western, the Ontario & Western, the Central railroad of New Jersey, the Pennsylvania railroad, the Reading, the Baltimore & Ohio, the New Jersey & New York, the Delaware, Lackawanna & Western, the Pennsylvania & Slatington and the West Shore railroads, and on the east side of the river with the New York Central & Hudson River railroad and the New York City & Northern railroad, thus giving direct communication with the New York elevated railway system and with the New York & Harlem,, the Housatonic, the Nangatuck, the New York, New Haven, Hartford & Springfield, and the New York & New England railroads, thus giving a direct, all rail connection between the great Western and Southwestern States and all New England, the western river counties of New York, and the city of New York.

The dimensions of the bridge are as follows:—Length from center to center of towers, 1,675 feet; total length, including approaches, 3,200 feet; clear span, 1,600 feet; height of roadbed above the water, 193 feet; height of towers above the water 310 feet; width of bridge, 36 feet; the roadbed to carry two railway tracks; strength of bridge 3,200 pounds to the foot run on each track. It would require a weight of 36,176 tons to break the structure, which will carry at one time sixty-five locomotives of seventy tons each, and 18,000 people. There will be thirty cables, each fourteen inches in diameter, to be carried across in four systems and to contain a total of 481,195,750 feet of steel wire. The weight of the steel and iron in the structure will be 26,435 tons. The masonry will consist of 258,165 cubic yards. In appearance the bridge will resemble the Brooklyn bridge.

PAPER DOORS.—These cost about the same as wood, and are said to be much better, because there is no shrinking, swelling, cracking or warping. The paper door is composed of two thick paper boards, stamped and molded into panels and glazed together with glue and potash, and then rolled through heavy rollers. It is first covered with a water-proof coating, and then with a fire-proof coating, and is painted and varnished, and hung in the ordinary way.

—Extensive repairs are being effected in the Catholic Church of St. John, Thirteenth street, above Chestnut. The interior is being repainted and frescoed and when complete the renovation will materially contribute to the adornment of the church. In addition to the repairs to the church it is proposed to substitute a substantial brick residence for the tumble-down parochial house that at present fronts on Clover street. This building will contain twenty-two rooms, replete with all modern improvements, and its erection will cost $20,000. The work was begun on Tuesday, and will be finished about the middle of December.

—According to an English paper the project of connecting Ireland and Scotland by a tunnel is being discussed, and a shaft is being sunk to test the strata through which the tunnel would probably run. From soundings made it has been ascertained that the greatest depth of the sea between the two coasts is 780 feet, and the roof of the tunnel, it is expected, would have to be 200 feet thick, thus making the total depth at which the tunnel would run nearly 1,000 feet. The length of the deep-sea portion, it is stated, would 21½ miles, and the total cost, including the land approaches, would be about £6,000,000, the building of such a tunnel would, it is stated, change the routes of travel very considerably, and the passage across the Irish sea in steamers would be rendered unnecessary. All the great passenger steamers and the mails, instead of being landed at Queenstown, would go by way of the tunnel and be landed on the northern coast of Ireland. The proposed tunnel would run from Donaghadee, on the northeast coast of Ireland, near Belfast, to almost an opposite point on the coast of Scotland at Portpatrick.

—Inspector Howell of the Health Board has reported having examined the sidewalks along the fences on the following streets: Fifteenth, from Wallace to Brandywine; Broad street, west side, from Spring Garden to Barclay; Mount Vernon and Wallace, from Broad to and above Fifteenth; Green and North streets, from Broad to Fifteenth; Spring Garden, north side, above Broad. All of these sidewalks, he says, are overgrown with rank weeds and long grass, which are harbors of all kinds of filth. The following lots were also found in the same condition: Fifteenth, between Mount Vernon and Wallace streets; southeast corner Fifteenth and Mount Vernon streets; on Broad street, below Green. Regarding the sidewalks, the Board declared them nuisances, and referred the matter to the Highway Department; and as to the lots, they were also declared nuisances, and the owners were directed to clean and fence them in. The House-Drainage Committee recommended that George W. Blabon be permitted to drain twelve houses at Twenty-second street and Hunting Park avenue into a sewer in the rear of the houses. Though in direct violation of the rules of the Board, in the opinion of the committee it was the only manner in which the drainage could be effected at present.

Building Permits.

One two-story store, 18 ft. by 29 ft., Lehigh ave. and Hancock st., to John M. Buchanan, 1618 Vienna st.

Thirteen two-story houses, 14 ft. by 40 ft., Hillary below Wharton st., to J. P. Leonard, 1402 S. Twentieth st.

Eleven two-story houses, 14 ft. by 51 ft., Somerset above Hutchinson st., to Amos L. Kennedy, 2100 N. Sixth st.

Twenty-four two-story houses, 14 ft. by 40 ft., Carey ave. and Smedley st., to Jas. B. Law, 1636 Venango st.

Ten two-story houses, 16 ft. by 43 ft., Federal above Twenty-first st., to Henry R. Coulomb, 731 S. Tenth st.

Six two-story houses, 15 ft. by 34 ft., Latona above Thirty-second st., to Matthew Fleming & Co., 2638 Poplar st.

Eight two-story houses, 12 ft. by 38 ft., Hart lane and Jasper st., to Abraham Ruth, 1800 N. Seventh st.

Four three-story houses, 17 ft. by 53 ft., Tioga above Fifteenth st., to Daniel MacNeil, 2038 Ontario st.

New front, 2020 Callowhill st., to Jos. Cooney, 2332 Lawrence st.

A two-story market house, 44 ft. by 125 ft., Girard ave. above Fifth st., to E. C. Shepherd, 522 W. Dauphin st.

A two-story house, 17 ft. by 50 ft., Spencer above Cresson st., to Cornelius C. Linahan, 3203 Ridge ave.

A two-story house, 17 ft. by 49 ft., 4839 Chestnut st., to Jos. Maginnis & Sons, 4015 Powelton ave.

Seven three-story houses, 16 ft. by 63 ft., Sixteenth st. and Montgomery ave., to Jos. W. Sharp, Berwyn, Pa.

A fifth-story addition, 20 ft. by 88 ft., Bread above Arch st., to Jacob Garber, 52 N. Thirteenth st.

Two two-story houses, 12 ft. by 44 ft., Ludlow above Thirty-fourth st., to L. W. Goodman, 3602 Sansom st.

Twelve two-story houses, 14 ft. by 37 ft., Forty-fifth street above Merion avenue, to John Bateson, Jr., 1002 South Nineteenth street.

One two story house, 18 ft. by 38 ft., 2879 Clearview street, to Anthony Lawless, 2533 Pine st.

A three-story stable, 35 ft. by 65 ft., Fifteenth st. above Montgomery ave., to Jas. E. Cooper, 1826 N. Broad st.

A three-story store, 30 ft. by 40 ft., Front st. above Susquehanna ave., to Wm. Steele & Son, 2141 Howard st.

Two three-story houses, 24 ft. by 50 ft., Gowen ave., near Mt. Airy Station, to Frank S. Riggs, Clifton Heights.

Two three- and one two-story houses, 18 ft. by 50 ft., and 16 ft. by 36 ft., Wellington, below Kensington ave., to S. M. Butler, 1522 N. Fifth st.

A three-story addition, 28 ft. by 60 ft., Niel above Barr st., to McLaughlin & McNamara, Clinton st., Nicetown.

Two two-story houses, 14 ft. by 42 ft., Merion ave. and Forty-ninth st., to Hy. Blithe, 2312 Market st.

Four two-story buildings, 11 ft. by 12 ft., Eighteenth above South st., to B. Harvey & Sons, 2119 Fitzwater st.

A two-story stable, 18 ft. by 40 ft., Third above Cumberland street, to Einwechter & Sons, 2037 Wishart st.

Addition to building, 33 ft. by 25 ft., Twenty-ninth and Gray's Ferry road, to Henry Bower & Sons.

A two-story building, 12 ft. by 12 ft., 418 Wetheral st., to James Jones, 126 South Fifteenth st.

A three-story house, 10 ft. by 45 ft., Thirty-third st. and Gray's Ferry rd., to John Hustenbeger, 1215 Ellsworth st.

Two three-story houses, with stores, 18 ft. by 52 ft., Fifth above Somerset st., to Joseph Keenan, 2811 N. Fifth st.

J. Magriner, 2128 Sharswood st., alterations.

A one story back building, 12 ft. by 12 ft., 1904 South st., to Thomas Bryan, 121 Dock street.

A mansard roof, 10 ft. by 34 ft., 1720 Delancey place, to same party.

Seven two-story houses, 18 ft. by 45 ft., Twentieth above Norris st., to Alexr. Wilson, 2106 Fitzwater st.

Kemp & Garrison, one-story addition, 300 Walnut st., 48x73.

J. A. Sloan, 2 N. Forty-first st., one-story store, 4108 Market st. 25x140.

A. Schnepf, 2731 N. Second st., two 2-story houses, Front street, near Allegheny avenue, 15x42.

G. G. Thompson, 1102 Willow st., 2-story factory and alterations, Third st., near Poplar, 40x75.

J. Zell, Fernwood, Delaware county, two 2-story houses, Maple ave., near Sixty-first st., 16x32.

J. Wanamaker, Thirteenth and Chestnut sts., addition to store, 312x38.

R. C. Dothard, 5122 Master st., 2-story stable and carriage-house, Peach st. near Media, 24x26.

A. Graloke, 720 S. Seventh st., one-story smoke-house, 10x7.

Lukings & Rhoads, 2113 William st., two-story house, Funk st. near Jackson, 16x40.

W. F. Charlton, 2720 Brown st., three-story store Twenty-seventh st. near Oxford, 18x50.

J. M. Buchanan & Brother, 1618 Vienna st., 2-story store, Lehigh ave. near Hancock st., 18x29.

J. Duncan, 905 Chant st., one-story back building, 674 N. Twenty-second st., 13x13.

T. Bryan, 121 Dock st., 1-story back building, 1904 South st., 12x12; also Mansard roof 1720 Delancey place, 16x34.

R. T. Mattson & Co., 341 Walnut st., three-story store, 239 South st., 20x58.

C. C. Moore, 1801 N. Broad st., fifteen 2-story houses, Fairhill street above Somerset, 15.6x42.

T. Bennett, 1017 Chestnut st., second-story bay window and repairs, Thirty-fourth and Walnut sts., 8x4.

J. F. Winner, Sharon Hill, Pa., four two-story houses, Wiota st. near Aspen, 12.10x32. Also four 2-story houses, Preston st. near Aspen, 12.10x42.

W. McCloskey, 3618 N. Third st., 3-story house, 3620 N. Third st., 15x28.

H. Koch, 559 Chatham st., store front and 2-story stable, Eighth and Jefferson streets, 18x16.6.

C. Schael, Eighth and McKean sts., 2-story house and stable, McKean st. below Eighth, 20x46 and 16x34.

A. McClay, 2702 E. Ann st., 2-story house, 2813 Edgemont st., 20x45.

J. Hook, 143 Sigel st., alterations and additions back building, 1417 Walnut st., 14x8.

A. T. Richards, 1512 Otis st., alterations, Huntingdon and Thompson sts.

C. E. Bartle, Thirty-third st. and Lehigh ave., 3-story house, Laurens st. near Righter, 18x33.

W. Ferguson, 1926 South st., bay window, 2115 DeLancey place, 13.3x6.

H. H. Buzby, 5258 Main st., Germantown, 3-story addition to Franklin Mill, Sharpnack st. near Musgrove, 52x100.

C. K. Merklee, 1339 N. Thirteenth st., five-story stone and brick wall, Broad street near Wallace, 42 ft.

A third-story addition, 52 ft. by 100 ft., Sharpnack st. and Germantown ave., to H. H. Buzby, 5258 Main st.

A three-story building, 40 ft. by 78 ft., Monastery ave. and Wissahickon Drive, to A. S. Tourison, 5541 Germantown ave.

A two-story house, 15 ft. by 24 ft., rear of 1512 Palmer st., to Wm. Keifer, 1514 Palmer street.

A three-story machine shop, 30 ft. by 90 ft., Adams above Coral st., to the Smith Machine Co., 510-20 Adams st.

A two-story building, 17 ft. by 47 ft., Carlisle above Dauphin st., to L. A. White, 2318 Carlisle st.

One two-story house, 16 ft. by 13 ft., Penn and Bread streets, to J. D. Brooks, 5 Patton avenue.

Two two-story houses, 15 ft. by 40 ft., Sixth above Brown st., to Hartman Grau, 655 Preston st.

A two-story stable, 20 ft. by 33 ft., Hope above Diamond st., to Geo. G. Parr, 244 Palethorp st.

A church building, 86 ft. by 64 ft., Forty-third and Chestnut sts., to Geo. F. Payne, 1211 Sansom st.

A seminary and chapel building, 60 ft. by 65 ft., and 35 ft. by 125 ft., Forty-third and Chestnut sts., to same party.

A two-story building, 12 ft. by 15 ft., Thirty-sixth and Baring sts., to Thos. Little & Son, 718 S. Eleventh st.

S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—a form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The latters D, M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Real Estate at Auction.

The following real estate was disposed of by Messrs. M. Thomas & Sons at the Philadelphia Exchange at noon on Tuesday:

Two-story brick lighthouse, situated at the mouth of Cohansey Creek, N. J. $80
Three-story brick residence, No. 1338 Franklin st 5,900
Country seat, 6 acres, Daman lane, Darby township, Delaware co., Pa. 12,000

Market Report.

The demand for building material continues active. More lumber has been received and distributed this week than during any week this year. Two days' receipts footed up 6,400,000 feet. The entire week's receipts are about 10,000,000 feet. Large orders have been placed in white and yellow pine markets, and wholesalers and retailers are once more stocking up in view of an active and continuous fall and winter demand. The impression has gained ground that lumber will be 50 cents to $1 higher when the active season is over. This is an opinion. If good reasons for it were apparent, it would create an upward tendency even now, when offerings are large.

The receipts of hard woods have been abundant. Prices are low. Manufacturers are anxious to handle as much stuff as possible, and to secure as much of the winter trade as possible, and are therefore agreeing to make winter deliveries on the basis of present prices.

CONVEYANCES.

PHILADELPHIA.

MONDAY Aug. 23, 1886.

—The handsome property e. s. of Franklin street, 150 feet north of Columbia avenue, 33¾x94½, sold for $10,000.

—A country seat and six acres, on Daman lane, Darby township, Delaware Co., Pa., sold by auction for $12,000.

—East Arch St. properties are in demand for stores; a dwelling n. s., west of 10th St. 25x170, sold for $20,000.

Defective House Drainage.

The old question of the responsibility of a landlord for the defective drainage of a house which he had let to a tenant came again before the High Court in the case of Bartram *vs.* Aldous, which was the first case tried before Mr. Justice Grantham. The case is specially instructive, as the fact of the house being in an unsanitary state was not disputed. Evidence, which was admitted to be accurate, was given to show that the waste-pipes from the bath-room opened direct into the main sewer, and that the house-drains were untrapped. The natural consequence was that sewer-gas escaped into the house, and the tenant's family became ill. Under these circumstances he refused to pay two quarters' rent which was due, and brought a counter claim for the damages which he had sustained through becoming tenant of a house which was uninhabitable.

By English law a landlord who lets a house does not ordinarily warrant that it is fit for habitation. The tenant is supposed to make inquiries, and ascertain the material facts for himself; and if he makes a bad bargain, so much the worse for him. The fact of the drains being defective, of itself, affords no answer to a claim for rent, and Mr. Aldous was obliged to rely on a representation which he alleged the landlord to have made at the time of letting the house, to the affect that the drains and water-supply were both perfect. On the question of this representation having been made there was a conflict of evidence, and the jury gave their evidence in favor of the landlord.

Special Notes.

SAM. KING wasn't such a bad Mayor after all.

THE 16,000 house-builders are not able to do all the work. Outsiders are finding employment.

THE architects are quite confident that they will have a busy autumn season. Draughtsmen who know a good deal that is going on say the same thing.

SEVERAL sites on Chestnut and Market streets have been squinted at by certain real estate brokers who have a speculative turn of mind, and who imagine it might be possible to induce capital to take a fly at some of them in a speculative way.

MARKET STREET, from Front to Broad streets, ought not to have an old-fashioned building on it. The quickest and best way to reduce rents on that thoroughfare is to duplicate the available floor space by erecting six- and seven-story structures back to the narrow streets in its rear.

THE statements made by real estate dealers this week indicate that business has been light. Big business is looked for. Money lenders are in some cases quite willing to put money in land rather than in bank vaults. Whether business will be of large or small proportions during the next 90 days depends to a considerable extent on the prices which holders will be willing to accept.

THE new iron steamship Cherokee, building at the ship-yard of Cramp & Sons for William P. Clyde & Co., launched Saturday at half-past 11 o'clock. The new craft is 290 feet long, 43 feet beam, and 29 feet depth of hold, and will register 2500 tons. The vessel will have triple expansion engines of the most powerful and approved type. The Cherokee is especially designed for the Southern coastwise trade, and will have accommodation for 100 saloon passengers. A sister ship, the Seminole, will be launched in about two weeks at the same place.

Miscellaneous.

—Roger Sherman, the well-known and universally respected printer, died at his residence, No. 311 S. Tenth St., on Wednesday, of a complication of diseases. He was 53 years of age.

—Charles and Edward J. Berwind, of this city, purchased a large tract of coal land in Westmoreland, Clearfield and Jefferson counties, with a number of valuable mines, for $125,000.

—The National Dredging Co, is reclaiming and improving one thousand acres of marsh land at Collins' Beach. The old dykes are being repaired and perfected so as to cut off tide water and transform the marshes into grazing land. A road is to be constructed to the beach.

—Elwood Jones, who was awarded the contract for the erection of the twelve-division school house at the Falls of Schuylkill, began on Monday to tear down the buildings now on the site. The delay in commencing the work was caused by the contractor being unable to have his sureties approved by Councils, which had adjourned before the contract was awarded.

—On August 28th the statement of the Treasurer shows gold, silver, United States notes and other funds in the Treasury as follows: Gold coin and bullion, $234,579,158; silver dollars and bullion, $185,104,468; fractional silver coin, $28,058,162; United States notes, $47,571,731; national bank notes, $341,350; national bank notes in process of redemption, $2,483,837, and deposits with national bank depositories, $18,959,257. Total, $512,097,951. Certificates outstanding—Gold, $77,589,177; silver, $88,614,592; currency, $12,315,000.

—There is more trouble among the Pittsburg nailers. The manufacturers at Pittsburg who have agreed to the 18 cent. card rate claim that they cannot compete with the 17 cent card rate manufacturers at Wheeling and other points are consequently refusing orders and shutting down.

—The receipts on account of the postal service during the quarter ended March 31 last were $11,538,631, or an increase of $554-982 over the receipts for the corresponding quarter of the preceding fiscal year, while the expenditures were $12,769,438, being $1,230,807 in excess of the receipts, and $224,591 more than the expenditures for the corresponding quarter of 1885.

—The weekly statement of the City Treasurer shows a balance on hand on Wednesday evening last of $6,145,403.99, of which $5,477,415.32 is in bank and $666,294.73 in the Sinking Fund. The large cash balance is explained by the fact that little money has as yet been drawn out on account of the large contracts for municipal improvements which will not be finished for some time.

—At a meeting of the Water Committee of the Camden City Council, on Monday evening, Superintendent Mines recommended that immediate action be taken toward the erection of a new reservoir and the construction of another pump at the Pavonia Water Works. He called attention to the city charter, by which the city was authorized to borrow money for the purpose, and urged that such a course be taken.

—The bonds thus far registered at the office of the Chesapeake and Delaware Canal Company amount to $2,516,864.43. Taking the defaulting ex-Treasurer's figures as a basis, this leaves $92,085.57 worth of bonds yet to be accounted for. Of this amount $50-000 is known to be held by a gentleman now in Europe, and the remainder by Philadelphians who are now out of the city. Both Wilson and his alleged confederate, Lesley, are still among the missing, and no tidings whatever have been received from them.

—According to the Director of the Mint at Washington, D. C., the coin in circulation in the United on July 1, 1886, is estimated as follows:—$548,320,030 in gold, $308,782,783 in silver. Of this amount, $235,527,250 is held by the Treasury, $157,459,874 by national banks, and $464,115,689 by other banks and individuals. The amount held by the Treasury is exclusive of $76,044,375 in outstanding gold certificates and $88,116,225 in outstanding silver certificates. The amount held by national banks includes $68,313,430 in gold certificates and Clearing-House certificates and $1,812,290 in silver certificates.

But our large stock of MEN'S BUSINESS SUITS is what we want you to see before you buy. Novelties constantly being received for BOYS' and CHILDREN'S WEAR. The Norfolk Takes the Lead this Season. We never before carried such a select stock in MEN'S FURNISHING.

Browning, King & Co.

910 & 912 CHESTNUT STREET.

THE

Day Sewed Shoes.

We wish to call the attention of the public to our principal object in opening the Day Sewed Shoe Store. The Day Sewed Shoe Manufacturing Co, was organized to introduce the Day Sewed Shoes, and this could only be brought about by getting the manufacturers to make them, and the quickest way to accomplish this was to give them this opportunity to dispose of their goods. We make our finest goods at our own factory, and are careful to have every pair perfect. We earnestly request that every pair of shoes purchased of us be returned for exchange if not as represented, whether they have been worn or not.

THE DAY SEWED SHOE MFG. CO.,

Under the management of W. W. Apsley,

No. 23 N. EIGHTH STREET.

Open until 10 o'clock on Saturday night, Sept. 4.

SPECIAL NOTE.—Do not forget that we make to measure for crippled and tender feet and make a specialty of all kinds of repairing at moderate prices.

Mr. H. S. BEEBE, No. 231 North NINTH Street, dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the *Works are under contract with us* to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under *this Brand or a Private Brand.*

PHILADELPHIA, NEW YORK, CHICAGO. **MERCHANT & CO.**

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 35. PHILADELPHIA, MONDAY, SEPTEMBER 6, 1886. PRICE 15 CENTS

Items of News

—Church street, Camden, is being repaired.

—Bridgeton, New Jersey, is to have a new M. E. church.

FLEMINGTON, N. J., is to have a new Methodist Episcopal church.

—The estimated expenses of Philadelphia County for the coming year are $17,523,711.-94.

—A special meeting was held on Monday of this week to act on the Market Street Bridge veto.

—NORTH CHESTER, Pa., is to have a new $15,000 Methodist church. Mr. P. A. Welsh is the architect.

—Philadelphia Burrough, who recently died at 4601 Chestnut street, left an estate valued at $8,000.

—The sale of the Bordentown and Columbus, New Jersey, turnpike has been postponed for ten days.

—Magistrate Baird on Wednesday paid into the City Treasury $516.15 as his returns for July and August.

—Joseph E. Temple's will bequeaths $185,-000 to charitable purposes. The remainder of the estate goes to relatives.

—Many of the green glass manufacturers will not resume operations unless permitted to engage apprentices as heretofore.

—The High School opened on Wednesday last, Sept. 1st, with 748 names on the roll, the greatest number it has ever had.

—Medical Inspector Taylor says that the Westminster Public School at Belmont and Westminster avenues is unfit for use.

—United States Inspector of Hulls Joseph R. Mershon, who was at one time a member of City Councils, died on Aug. 30th last.

—On the 15th of September, if not sooner the Treasury Department will redeem $10,-000,000 of the United States three per cent bonds.

—A good many Philadelphians are going to Camden to live, and Camden real estate people are beginning to feel quite elated over the prospect for real estate.

—The "Growler" (The complaint book at the Controller's office) receives daily many serious complaints against the Garbage contractors for neglect of duty.

—The revised course of studies for the grammer department of the Public Schools, which were adopted by the Board of Education last winter went into effect on Sept. 1st, instant.

—With 70,000,000 bushels of wheat California will have an income of at least $54,600,-000 The barley crop of 18,000,000 centals will bring in $16,000,000, as against $9,000,-000 last year.

—The personal estate of the late Luther Martin is appraised at $157,069 17. This does not include the decedent's interest in the firm of Luther Martin & Co., which has not been appraised.

—The work of laying the Electrical Subway in New York city was commenced on Monday last. Twelve conduits, 2½ inches in diameter, through which the wires are to run are to be laid in composition.

—The Citizens' Municipal Association has requested the Controller not to approve the bills of derelict contractors, about whom they have received many complaints, 110 being entered on Wednesday alone.

—The total funded debt of Philadelphia, Jan. 1, was $62,068,120.22. Of this about $2,000,000 has been redeemed, leaving a little over $60,000,000 yet due. There are nearly $25,000,000 worth of securities towards this.

—Some dissatisfied merchants of Philadelphia are signing a petition to be submitted to the President, asking for an examination to be made into the Post-office management of this city. There is a great deal of complaint.

—The Baltimore & Ohio Company, it is understood, have contracted with a Wilmington firm, for the construction of several transports to be made at once. They will ply between Constable, Hook and Staten Island.

—John Roberts, of Iowa, who claims title to about 16,000 acres of the most valuable land in Salem County, New Jersey, principally in Warrington township, has arrived in Salem and is engaged in making surveys.

The Board of Health has declared the open lot from Nos. 613 to 633 Tasker street, and the lot in the rear of houses on Seventh street between Moore and Pierce, to be nuisances prejudicial to health, and ordered the same to be abated.

—A strike is probable in the Hazleton coal regions, over the demand for a restoration of a 10 per cent. reduction made in January of last year. The operators do not think they can stand it, and should they refuse, it is probable a strike will take place.

—The interest on about $1,300,000, for the support of schools and public libraries, and for assisting the poor is the inheritance the towns of Wolfsboro and Tuftonborro, N. H., will receive by the will of a Mr. Brewster, deceased, who was formerly a Boston banker.

—James R. Howard, of the District of Columbia, has been appointed a special agent to make an allotment of lands in severalty to the Crow Indians in Montana, and Leonard H. Poole, of Maryland, has been appointed a special agent to investigate Indian depredation claims.

—Sharp, Flood & Machett are leading in the building operations in the northwestern section of the city. There are 200 acres of ground in danger of being covered with brick and mortar in that section within the next two years. Real estate is very firm in price in that locality.

—The Commercial Ice Company of Philadelphia are negotiating for a lease of the mill dam of D. M. Hunsicker, at Iron Bridge, this county, for the purpose of erecting ice houses and cutting ice. They propose putting in sidings, with facilities for shipping cars of ice daily during the cutting season.

—Five new resident physicians went on duty at the Almshouse last Wednesday, and the five who had completed their terms of service left. The new residents were received by John Huggard, chairman of the Hospita Committee, Superintendent Roney and Dr. McLaughlin, the physician-in-chief.

—The Wilmington glass blowers have formed a co-operative company, and will run a factory under the name of the Christiana Window Glass Company. The stocks of green window glass are very light in all parts of the country, and an early resumption of operations is probable in consequence.

—Special Agent William S. Waudy, of the Bureau of Labor, Washington, D. C., arrived in the city last week from the West, where he had been collecting labor statistics in the Territories of Utah, Wyoming and Montana. He will remain in this city for two months, and during his stay will fully investigate the convict labor system and collect data pertaining to all the strikes and lockouts that have occurred since 1881.

COLLADAY & HARTLEY, 627 Walnut St., real estate brokers and conveyers report real estate as looking far ahead of last year. They further report houses renting well, especially in the Northwest portion of the city. This firm have under their controle some eight to nine hundred houses and have but few empty, they report collections during the summer as having been a little slow. They are kept very activey engaged in conveyancing.

—The will of Jane Gailey, which was admitted to probate on Thursday, contains bequests of $1000 to the United Presbyterian Church, $1000 to the Board of Home Missions of the same church, $200 to the Presbyterian Home for Aged Couples, $200 to the Presbyterian Orphanage, and $100 to the Old Men's Home, of West Philadelphia. The estate is valued at about $4000, and of the residue all but $200 is bequeathed to William Stewart Gibbs, to be expended by him for the benefit of the First United Presbyterian Church, Broad and Lombard streets.

REAL ESTATE RECORD

AND

BUILDERS' GUIDE.

VOL. 1.—NO. 35. PHILADELPHIA, MONDAY, SEPTEMBER 6, 1886. PRICE 15 CENTS

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, SEPT. 6, 1886.

Owing to a change of ownership of the Printing Establishment, the present number of the "Real Estate Record and Builders Guide" is a few hours behind time. We consequently apologize to our readers and trust that in future there will be no just cause for complaint. Edt.

W. FREDERICK SNYDER, the well-known conveyancer of this city, is in Paris.

THE stove manufactures are disposed to have nothing whatever to do with organized labor.

NUMEROUS business troubles have occurred in different parts of the country, within the past few days.

REAL ESTATE never before had such a shaking up in this country as the late earthquakes gave it.

THE annual exhibition of the Pennsylvania Horticultural Society was opened last Wednesday evening.

THE public improvement association of the Twenty-fifth Ward met on last Wednesday evening at Sixth and Venango streets.

COUNCILS' Committee on Markets and City Property, Tuesday inspected the newly erected bath-house at Twenty-ninth and Master streets.

CHICAGO has an excellent paper called the *American Contractor*. It is full of news for Western contractors and is a live go-ahead paper.

THE Controversy over the Stewardship of the Blackwood Almshouse engaged the attention of a special meeting of the Camden Freeholders Tuesday.

THE new parochial school-building attached to the St. Vincent's Roman Catholic Church, Germantown, was opened with appropriate exercises Friday evening.

LARGE amounts of phosphate rock are being landed at this port of the Island of Redonda, British West Indies, consigned to the new phosphate works at South Camden, N. J.

A NEW bell, weighing 600 pounds, for the tower of the new parochial school-house of the Roman Catholic Church of the Holy Trinity, Sixth and Spruce streets was recently put up.

THE New York Electrical Sub-way job or no job—will at least have one redeeming feature it will place forever underground if honestly carried out—thousands of telegraph wires that have been an over-head nuisance for many years.

THE corner-stone of the Roman Catholic Church, at Ashland, was laid last Sunday by Archbishop Ryan, assisted by priests from Philadelphia, Reading and Pottsville, and was witnessed by about 10,000 people from all over the country.

THE official Boards of the three Methodist Episcopal churches of Bridgeton held a meeting on Monday night and decided to purchase a lot on South avenue upon which at once to erect a commodious chapel.

AND now the English capitalists have invaded Mexico, $25,000,000 it is said, will be expended in building a Rail Road from Tuxpam to the city of Mexico, this new rail road ought to afford a fine field for Mexican Suburban real estate operators.

THE Finance Committee of the Gloucester City Council held a special meeting last Tuesday when it was expected that some action would be taken in regard to the indebtedness of the late City Treasurer to the city. Nothing was done, however.

MR. WILLIAM G. HUEY, of the Stock Exchange, is out in a circular, on the question of removal. He criticises the action of the governing committee. Mr. Huey is decidedly in favor of removal and thinks it short-sighted policy to resist. The estate of M. Thomas & Sons, on Fourth street, is favored by quite a number.

THE Board of Health held a meeting on Wednesday of last week at which various matters of routine were disposed of. The Board has been very industrious during the summer months, and to its watchfulness and attention may be attributed our escape from what otherwise might have been serious dangers to the public health.

THE Traction Company are making nightly experiments with its Columbia avenue and Franklin Street Cable, all night long the grinding of the cable through the grooves keeps the wearied sleepers awake and the air is filled with anathemas loud and deep, misery long drawn out is the nick-name that has been given it and threats of removal are heard all along the line, rents may be lower in its vicinity if the racket continues.

THAT is a very nice piece of construction work which is being done in carrying the intercepting sewer from Shurs Lane to Valer's Hotel, on the south side of the Wissahickon. The 36-inch sewer has already been laid, which is to connect the intercepting sewer with the south side of the Wissahickon. Mr. J. H. Kennedy, the contractor, expects to lose a large amount of money, but he is doing his work thoroughly.

THE Methodists of North Chester will soon begin the erection at Eighteenth street and Providence avenue of a handsome new church building. It will be of Leiperville stone, with cornices of brick and a roof of slate and terra cotta. There will be a spire and bell-tower over the front gable seventy-seven feet high. In the interior the walls will be in sand finish for frescoing. The church will have a seating capacity of 500 and will cost about $15,000. It will be finished in the spring. Mr. P. A. Welsh, of this city, is the architect.

THE Committee on Sewers made a final report on the matter of a sewer in Clearfield street, and the association resolved to have introduced into Councils at an early date an ordinance providing for the building of a main sewer in Clearfield street, from Sixth to Germantown avenue, which would be a continuation of the Hart Creek sewer, and thus afford drainage to a very large section of territory about Nicetown, Rising Sun, Tioga and Franklinville. It was said that the lack of this sewer was greatly retarding improvements along the line of the proposed location.

A COMMITTEE of the citizens municipal association directed its agents last week to investigate a number of complaints regarding the non-fulfillment of public contracts. A resolution was adopted requesting the Controller not to countersign warrants for contractors until all their contracts are fully complied with. The committee on Wednesday received complaints from 110 citizens re-

garding the failure of contractors to clean streets and remove garbage in the First, Second, Eighteenth, Twenty-second and Twenty-ninth Wards, all of which were ordered to be sent to the Controller.

PROFESSOR WEBSTER WILLIS, of the Boston Institute of Technology, has invented a process for heating water by revolving a metal cylinder filled with water inside another, to be pressed together with more or less force as may be needed. Thirty-six square inches of friction surface will, it is claimed, heat a room of 10,000 cubic feet better and quicker than it could be done with steam. Two-horse power and a heater costing $100 would suffice for a room with 50,000 cubic feet. The heat will be especially useful where there is danger of fire. On the breezy prairies, with a windmill to furnish power, an ice machine for hot weather, and one of Prof. Willis' contrivances for evolving heat in the winter, one might be tolerably independent of the thermometer.

AN architect would be remiss now if he did not know the peculiarities and special advantages of the various locks. In door furniture alone many notable improvements have rendered specification writing yearly more irksome. The improved means of securing knobs to the spindle have, for instance, to be known. The same remark applies to the hundreds of new things in the way of window fastenings and fanlight-openers. To specify the most desirable invention is what an employer would expect his architect to do. The mechanism of hydraulic and balanced lifts, which is the safest and most economical in working, and which dispenses with unnecessary mechanical apparatus overhead, and the best safety apparatus are questions that demand consideration and study.

WE are to have the overhead wires buried before the end of the year. The Baltimore & Ohio postal telegraph and Cable companies have asked councils for permission to lay conduits on certain streets. The Baltimore and Ohio Company will possibly use one of the main streets, from Twenty-fourth street to the Delaware River, while the Postal Telegraph and Cable Company will use another street, from Third to Fifty-second street. The company has been using the wires of the Bankers and Merchants' Line, but wants to establish an independent underground service by the first of the year. Both lines run over the housetops, and if they go underground it will not decease the number of poles on the street. According to the new ordinance they are required to file plans and specifications at the office of the Highway Commissioners.

FIRE-PLACES, although greatly improved since the time of our forefathers, are always uncertain, because they are absolutely dependent upon the condition of the atmosphere; hence it often happens that upon days when effective work is most needed but little benefit can be derived from the fuel consumed in them. The stove, which succeeded the fireplace for general use as a heating agent, has passed through marvelous changes in construction, until now none are accepted for use in the better class of houses or offices that have not the "magazine," the "drop-flue," or the shaking and dumping grate; while all must be decked out in nickel-plated trimmings, in the hope of overcoming the objections to their use arising from the unavoidable dirt and dust created in caring for them (located as they are indiscriminately in parlor or office), by making them as attractive to the eye as possible.

WE learn from the *Architect* that the Municipal Council of Paris are in favor of having the proposed metropolitan railway constructed underground, like the London line. But the Government is opposed to this view, and is about to introduce a scheme in which tunnels will be absent. A journey through the London tunnels is not a pleasure trip, and we can easily imagine the discomfort endured by the deputation from Paris when they first made the experiment. But an underground line would have the great advantage of allowing Paris to remain in all its beauty, and the experience shows the difficulty of constructing viaducts that will gratify the eyes. Is it desired to have a repetition of what is to be seen at Ludgate Hill and on the Thames? The objections of the municipal councillors are deserving of approval by every one who is eager to uphold the amenity of the city. It should also be remembered that it is now possible to construct a subterranean line with better ventilation than exists in the Metropolitan Railway. The necessity of the new railway is not self-evident; but if it is to be constructed for the sake of giving employment, it should be laid out in such a way as to cause no regret hereafter.

A WRITER in *Building* says: "There are comparatively few architects who have studied with any detail the subject of warming, or are even prepared to recommend any particular form of grate. There are 'grates and grates;' the specification writer should, however, know the essential points of a good and economical heater, and whether any particular pattern is a proper one to specify. But more important is it to understand the requirements of warming large buildings by hot water, high or low pressure steam, or air. In writing the specification and preparing plans these arrangements must be prepared for to a certain extent, as we all know the consequences of allowing these things to arrange themselves afterwards; how needless expense is incurred for heating chambers, flues and other things, often requiring the pulling down of new work and alterations after the building is practically completed. We are constantly hearing of ill-considered plans in this regard by architects; how the question is shelved at first, or set on one side for after-consideration, or the subject is briefly dismissed in the followng words: 'Provide for and make all required cuttings and flues for the heating apparatus to be fixed in the basement.'"

A DAILY paper informs us that the old scheme of building houses on the bonus plan is being revived, particularly in the northwestern section of the city, where a large number of houses are now being built, on what is pratically the old bonus system. The usual way is, as is known, to secure the co-operation of the owner of a tract of ground who has some capital to invest. With the borrowed money, the operators buys material and hires hands. Each of the mechanics engaged in work, agrees to take a house as compensation for labor. Contractors and dealers in builders supplies are now pretty well protected by the law passed by the legislature some years ago, by which mechanics liens and liens of lumber dealers were constituted a prior lien to that given by the operator to the land owner or party, who advanced the cash. Previous to that time the operator had it in his power to do about as he pleased, and the liberality, with which he treated himself, at the expense of those who supplied material, and who frequently did work, brought the scheme into disrepute, and led to the protective legislation which now exists. A great many forclosures were the result of the bonus system, and buyers and workers suffered without redress. As it now is, it is not a safe matter for any land owner, to build houses where he is not likely to be reimbursed by a mortgage that will hold water. The scheme is now worked in a little different way. The land owner has a ground rent, instead of a mortgage. The The law distinctly makes the mechanic's lien a prior claim to the mortgage holders claim. This ought to certainly mean that it is a prior claim to the holders of ground rents. It is this question, which the courts will likely have to decide sometime soon. The evil is now only in its infancy.

IT would be a very interesting thing to know how many buyers of houses have their mortgages foreclosed, through an inability to pay according to agreement. A great deal has been said and no doubt much of it unjustly, as to the manner, in which owners of properties deal with their purchasers, after having made a few payments. Where buyers become unable to pay, the only reasonable and just course, is to retake possession. This has always been the law, and no other course can be pursued. Because a buyer becomes unable to continue his payments, it is no reason that the owner should be deprived of his payments, and no reason why he should become a dispenser of charities. The terms of payment are clear enough. It is a matter of simple calculation to any one who understands the simple rules of arithmetic. Very few buyers discontinue payment, because of miscalculations, at the outset. No doubt buying a house by paying a small amount down, and paying taxes, interest and repairs for 10 or 12 years, make a house cost in the long run a good deal of money. The system is a safe one to the builder and seller, and for that matter, it is safe also to the buyer. The interest of 5 or 6 per cent. and the taxes of $50 or $75, besides the inevitable repairing bills, makes the

ordinary three or five thousand dollar house cost a good deal more, than it could be had for cash. But what is to be done. As long as people are willing to buy in this way, houses will be built for them and sold to them. Houses are needed more rapidly than the building and loan association system will supply them. These associations are multiplying and are doing a good work. The system is good in itself, and is working out excellent results, and can scarcely be improved upon, but there are more people in want of houses, than can be supplied in this way. Therefore builders are called upon to build, and they will continue to build and sell, even if one in ten or twenty should make a failure in payment, and be obliged to surrender his partly paid for domicile.

COUNCILS has before it a very important duty, in the enactment of its preparatory legislation over the Bullitt Bill amendment. The bill goes into effect on the first Monday of April next. The joint committee of municipal government has partly prepared, but many difficulties will no doubt arise. A great deal of care will be necessary to do the work properly. Under the new rule, we will have nine city departments under practically one head, viz.: Public Safety, Public Works, Receiver of Taxes, City Treasurer, County Controller, Law, Education, Charities and Corrections and Sinking Fund. Six of these remain very much as the equivalent departments are now. Extensive changes, however, are brought about by the consolidation of many existing departments, so as to form the new departments of "Public Safety," "Public Works," and "Charities and Corrections." In Public Safety is embraced all matters relating to the care, management, administration and supervision of the police force, public health, fire service, police telegraph, fire escapes, inspection of boilers, buildings and markets and of the food sold therein. All these are to be in charge of, and under the supervision of, one Director, to be appointed by the Mayor. The department of the public works, is perhaps the most important. The director to be appointed by the Mayor to be the head of this department should be a citizen of integrity and force of character, sufficient to carry him through the obstacles, which politicians have been planning and nourishing, so to speak, for many years. The new Bullitt Bill amendment simply allows the city to govern itself in a wise and discreet way, but the difficult work to be done, is to find the men who will do it. The mechinery is already, but even the best machines will sometimes not work. We have not the sympathy of the old line politicians with us, but their quiet hostility. Their secret opposition will be felt, and every obstacle, which they can turn in the way will be turned. Nevertheless the people are in favor of it, and they will demand a rigid enforcement of the new system, and will not tolerate any open opposition, the politicians understand this and will not precipitate it.

THE directors of the Real Estate Exchange met on Wednesday last, and although no practical business was transacted, yet our extended interchange of views took place which will no doubt be productive of great good when the directory meet for final organization. The feeling that the charter must be sufficiently broad to meet all the requirements of a magnificent corporation is not only growing but those who at first strongly advocated its confinement to a sort of protective association now realize that it would have been a sad case of unmitigated fully had their ideas prevailed. The capital stock is to be increased to $250,000, at least it will ultimately reach that sum, although for the purpose of starting business at the earliest possible moment, a charter limiting the capital to $75,000 will be obtained as supplemental powers probably through legislative enactment (not special legislation) will be asked for when the entire capital is subscribed. A large part of the $250,000 is already promised and now that the organization promises to be greater in every respect than any institution of its kind in this country. Men of pronounced views have expressed their determination to aid it in every possible manner.

So great is the interest that the contest for the effice of President promises to be a warm one. An eminent real estate lawyer who has great political strength and financial prestige, is to be opposed by a well known and highly esteemed real estate broker. Either of the gentlemen named are not only fully qualified but either of them would fill the office with dignity and honor. The next meeting of the Board will be held on Wednesday next when an election of officers will probably take place.

GUNNER'S RUN has been declared a nuisance by the Board of Health. The heavy death rate in the Eighteenth, Twenty-fifth and Thirty-first Wards is attributed to its filthy condition. Typhoid and other low fevers are very prevalent in that section at present. The entire stream should be made into a brick sewer at the earliest possible moment.

BUILDERS are perhaps not to blame for paying so little attention to architectural requirements. They have gotten into the habit of building houses, like stationers make envelopes, 25 in a pack all alike, regardless of anything beyond the strictest utilitarian requirements. Here and there we find a builder who does give a little attention to architecture and to appearances. The great bulk think it only necessary to slap houses together like sardines in a box, and rent and sell them as fast as possible. Buyers and renters, if they were more exacting, might help change this condition of things. If the public insisted upon architectural requirements in the houses they purchased and rented, there would be more beauty in our city. The architects would have more to do; their services would be in greater demand. As it is, the architects are neglected, and builders fire block after block of houses up all alike, without regard to beauty, except a little facade trimming, with itself, is becoming a little monotonous. What is wanted in Philadelphia is a higher taste among renters and buyers; a taste which will recognize that architects have a part and parcel in the building interests of the city. There is no reason this should not be the case. It is however true, that where a block of houses are thrown together in a heap, that there is no room for display of taste. There is no reason why all houses should be built alike, inside or outside. It would be a great deal better if each house had a character of its own. Where larger houses are built, there is plenty of room for display of taste. It does not necessarily involve much increase in expenditures, but architects are ready with their suggestions and experience to beautify our dwellings. In the suburbs, where more space can be allowed each house, it would be well if builders would trke the hint and consult their architects, adopt their suggestions, and make a departnre in this matter. Houses architecturally consttructed would sell better than others. The public is a little derelict in this matter, but if some one takes a start, they will find their efforts appreciated. Of course, as long as houses are built as they are, and rented before they are finished, there is no inducement to make anything attractive about them. But sooner or later, we we hope a great deal sooner, an effort will be made to please the taste of the more exacting public.

A reputation for building good houses is worth having. A certain builder up town is credited with building houses better than any one else. Any house he builds will sell quicker and better than houses built by other contractors. At least, if the question as to workmanship is raised, this builder's houses pass unchallenged. They are all right, well built, and between them and other houses they will rent or sell better. We are not cursed with very much inferior work, but at the same time there are few builders whose work is spoken of in the highest terms. We are having no more bonus houses built, but a certain amount of building is going on which needs to be watched by the Building Inspectors. The active demand for houses is leading to a little carelessness in construction. Defects can be covered with wall paper, and attention to weak points can be diverted by the gas fixtures and the like. But after all, several hundred can be saved, even in small houses, by the builder who is careless and aims only at getting houses off his hands. There is a public sentiment against cheap houses in this city. We have no buddensieks. Some house building has been going on, intended to be used as collateral in the securing of mortgages. Money lenders had better look well that they are not caught in any traps.

IT may as well be set down as a fixed fact, the sooner or later, Philadelphia will have an elevated road. Property owners along the line may object, but it will come nevertheless. It is well known what the nature of the opposition is. It is selfish. No doubt some interests will be injured, but there are

advantages to be secured, which effect too large a number of our citizens to have them ignored. A bill is to be introduced into councils at an early day, authorizing the construction of an elevated railroad from the centre of the city, either to the northeastern section or to West Philadelphia, and probably to both. During the past five years, four bills have been introduced and lost. The usual confidence prevails among projectors. They think the public is with them. No doubt it is, but they have a strong opposition, which does not speak but acts in a way, which cannot always bear the light of day. One of the projectors says the time is ripe for the project. It will be riper before it is undertaken. There is no doubt whatever, of the present necessity of such a system of rapid transit in our city. The line would start at some point east of Eighth street, and run thence to the Delaware river, thence to Port Richmond, and beyond to Frankford and Bridesburg. The West Philadelphia line would take some convenient street, and branch in the direction of Market street and Lancaster avenue. It does not follow that either of these streets will be utilized, as too strong an opposition might be presented. The projectors of the enterprises have not expressed themselves in favor or any particular line, although they would prefer the most public streets. The summary of advantages to be secured, contains the following extract :

"There are in the City of Philadelphia 100,000 people who lose half an hour in the morning and half an hour in the evening of every day—one hour in a daylight day of twelve hours or one month out of every year. As it now is, this time is absolutely wasted to the citizen and to his employer. And this enormous percentage of waste must continue until Councils permit the building of an elevated road Then an elevated road will provide the workingmen with five-cent fares, a saving of 80 to each man using the street cars."

THE REAL ESTATE RECORD has heretofore expressed its opinion on this question, and there is very little to be added. Our street railways are utterly inefficient. That they have realized enormous dividends to their stock holders has nothing to do with the matter, except to urge the public to free themselves from these deficient systems of transportation, and encourage an elevated road, which will be cheaper and more rapid. The real estate interests of Philadelphia would be greatly benefitted. Land in the valueless sections, or comparatively so, would be immediately brought into market. Real estate values would be considerably increased in this city after the construction of such a system of roads. The only argument that can be brought against it is the inconvenience to those living along the line. New Yorkers have become accustomed to it and so can Philadelphians. The construction of such a road will be more easily accomplished now under our new Bullitt Bill amendment, than under the old feudal system, which we have been clinging to.

—A charter was granted at Harrisburg on Tuesday to the St. Thomas Building and Loan Association of Philadelphia, which has a capital of $1,000,000.

THE New York Commercial *Bulletin* speaking of the contemplated Steam ship line between New Orleans and Rio Janeiro says :

"If Congress has any settled policy at all upon any public question, it is that in future not a dollar of the public money shall thus be appropriated for the promotion of private commercial enterprises. It has made a record in that respect irrespective of political or sectional distinction, which it may as well be understood will have to stand. But, saying thus much, we are not to be misunderstood as desiring to discourage the Brazilian steamship undertaking of our New Orleans friends. The Government spoon in all such cases in times past has proved a delusion and a snare. It neither permanently extended our commerce nor enabled us to build up a prosperous mercantile marine. We have unlimited confidence of the succes which must attend a private enterprise of the kind if on a solid basis and in response to some ascertained business or economic, requirement but none whatever if it is to depend upon Treasury gratuities."

THE Philadelphia *Record* in speaking of the late heavy commercial failures in New England says that

Some singular disclosures have followed an investigation by a committee of creditors of the business methods employed by a number of lumber, furniture and hardware firms in Boston whose relations were such that the suspension of one house brought down the rest in a common and cureless ruin. It was the custom among these firms when one of them wanted to raise money for another, or perhaps two others, to act as indorsers of a note made by the needy house, and when this had been discounted the proceeds would be divided equally among maker and indorsers. This strikingly simple method of securing necessary funds could not last forever, because the very ease and celerity of its operations led to a correspondingly rapid exhaustion of profits and capital stock in the effort to pay interest and discounts and at the same time provide for notes becoming due from time to time. The extent to which the scheme was carried out is shown by a statement of one of the suspended firms, which shows liabilities of $528,544, as against assets of $91,637. Of the liabilities $132,716 is in notes and $356,121 is in the shape of indorsements. Similar results are noticeable in statements made of the affairs of the other bankrupt concerns.

Among the large number of important failures reported from New England cities of late years this feature of exaggerated responsibility on promissory notes and as indorsers has been the most conspicuous cause of the decay and downfall of the firms or corporations concerned. Industrial enterprises in the East are usually developed to such a high degree of efficiency as to be almost self-acting, and the great manufacturing corporations or mercantile firms of Massachusetts and Connecticut have long been held up as examplars and illustrations of the results that may be achieved by business sagacity when applied constantly to the attainment of a single object. The frequent failures and occasional heavy defalcations that have within a comparatively recent date become a part of the commercial news from the manufacturing sections of New England, presenting generally the same elements of reckless excess and apparent disregard of sound business principles, have not without reason been attributed largely to causes which could operate only in a settled country, with industries clearly defined and long established. The concentration of responsibility in families and the necessity for providing places in positions of the new generation, together with an avoidance by this new membership of the duty of mastering business details, form a distinct peril to the safety and solvency of many establishments whose genius otherwise might be as solid as that of the Government itself.

With successful firms or corporations the idea of lineal succession finds little favor. A great business enterprise, whether it be a railroad or iron works, or cotton mill or warehouse, cannot safely be handed down as an inheritance. Its managers must be selected especially because of their fitness for the duties they perform, and for their accurate knowledge of all that pertains to the business in which they are engaged. Commodore Vanderbilt recognized this truth when he set his sons and grandsons at hard and distasteful work in various departments of railroad management, selecting from among those who displayed quickest perception and soundest judgment the heirs who should handle the bulk of his collossal fortune. But in many New England families a contrary practice prevails. Young men fresh from college, where their mental training has usually been of a perfunctory character, are pitchforked over the heads of intelligent men into places of trust and responsibility merely because they are the sons of their fathers or the expectant son-in-law of some other fathers. These are the incapables who make ducks and drakes of noble properties and princely revenues, or who like young Gray, blow out their brains after shattering irreprrably a business concern whose growth has been the work of many years and of many skillful hands.

It is quite possible that the younger generation of New England business men are as attentive to duty and as skilled in affairs as are their commercial congeners elsewhere throughout the country. But nowhere else has business nepotism obtained such a firm hold upon the local fabric and tissues of trade It is chiefly in New England that the intelligent and expert man, conscious of his own powers, finds his way barred by worthless nephews or son-in-law. The result may be read in almost each day's record of commercial mishaps.

A NEW YORK building journal says : "The great contrast between the steadiness of real estate values and the fall in other securities must have a limit. While values have held their own, rents have been and are steadily decreasing. The inexorable law which cheapens the cost of living as a country grows older, in everything which it can produce itself, is and has been acting on rents in the same manner though not to the same extent that it has acted on articles of clothing and of food. While, then, property which rents for less retains its full value, this will only be until the mean between the return of real estate and other securities has been reached. So soon as this point is passed real estate will begin to go down *pari passu* with other securities. It is for this reason that articles to which we have alluded are regarded as an injury, inimical to the persons they are intended to serve, injuring the broker because they prevent sales, injuring the auctioneer because they prevent auctions, injuring the investor because they put property at fair prices out of his reach, and injuring the owner because they lead him to place a fictitious value on his property, which, in the event of forced realization, will be too palpably apparent.

The removal of Public Works Commissioner Squire has been received among real estate men with unqualified satisfaction. The disgrace which the whole affair has thrown upon municipal government under the rule of politicians reflects back upon ex-Mayor Edson and upon the ring of politicians by whom he was appointed. It is to be hoped that an era of better local government is in store for New York.

J. MCILVAIN, builder, Thirty-third and Spring Garden, is erecting for Mr. Howard Watkin, twenty-five three story houses with ornamental fronts and have ten rooms, bath, kitchen and summer kitchen, they have a frontage of seventeen feet and are one hundred feet deep and are situated on thirty-second street, north of Haverford Road. There will be ten on each side, also twelve on Mantua avenue which are built in blocks each having a frontage of eighteen feet 6 inches with side yard and are seventy feet deep with verendahs, and stand seventeen feet back from the building line. Dr. Filbert's pavements through the whole lots which cover eight and half acres from thirty-first street to thirty-third, and from Haverford Road to Mantua avenue, which is equal to six squares; the foot ways will be granolithic with a twenty-two inch granite coping, and the whole plot is set out with fine trees. The sanitary, water and gas arrangements are all layed for one hundred and fifty-four houses so that the construction of other properties will in no way interfear with or disturb the roads or side walks.

In a few weeks it is Mr. Watkin's intention to start erecting fourteen or sixteen more houses on the south end of Mantua avenue, and next spring to complete the whole number one hundred and fifty-four. Already some of these properties have found customers even in their unfinished state. They command a magnificant view of the city and park, and are filled up in the very best of style with electric bells and other modern conveniences. The architect and managing man is Mr. J. W. Matlack of 3109 Haverford road.

WITH an output of nearly 700,000,000 pounds of nails during 1885, and with nearly 1,700 nail machines at work in the western district alone, there does not seem to be much danger of a nail famine, nor is it likely there will be one, provided a sufficient amount of material can be had to make them of and the nailers continue at work.

Communication.

A Rejoinder.

PHILADELPHIA, Sept. 6, 1886.

Editor *Phila. Real Estate Record:*

In a communication which appeared in your issue of August 30th, headed "Hitting all Around" and signed J. C. Worthington, there appeared some criticism on two articles which appeared in the earlier issue of this same journal, having reference to Church Architecture and National Convention of Architects with other reference to matters of intcrest to readers of your journal. I find after perusal of the three articles referred to, that the last seems without meaning in that it attacks and contradicts nearly in every direction.

It refers to the Institute of Architects in flattering language. I will here ask what the self styled institute has ever done on this continent. Has it made any effort to educate the people at large in distinguishing an architect from a pretender?

Also, what has the *American Architect and Building News* done on its misssion as the institute organ in the way of educating the people at large or its patrons.

This same writer in his defence or attack as I know not what to call it, of Church Architecture seems lost to all principle in that he launches forth without any reference to his subject, except direct praise for brick fronts, pock marked and frescoed with what is termed red, black and white bricks (a few chiseled after desigus by the brick moulder) the whole the conception of the modern architects most likely those embued with the richly guarded privileges and advantages thrown around by this styled American institute of architects existing A. D. 1886. Again as per hitting all around the City of our habitation is singled out as a bad place to study Architecture and in the writer's own understanding of the subject cannot understand or believe there is anything Architectural worthy of admiration except what is to be seen in a brick front created A. D. 1886. Black bricks, white bricks, red bricks—pockmarked and frescoed. Well, if this is what the Institute of architects and its organ teaches, permit me to say I should want no further acquaintance with their influence. I will say regrettingly in one point made in this communication and that is that the men who possess the ability seldom or ever lead inpractice. The reason of this is not shrouded in mystery as the public are never capable of judging ability, for as long they are taught by "Hitting all Around" to admire these modern brick fronts—black, red, white, pockmarked and frescoed. While the Public buildings are condemned for their lack of this modern decoration and no praise given to thosemany beautiful buildings to be seen in our beautiful city and suburbs. Here I will say again to the modern architect, dont waste much time on the present brick front A. D. 1886, wait until A. D. 1887, as the fashion will change according to prediction and we may have instead of black bricks, red bricks and white bricks, corn cobs, cobble stones and cinders, dont waste your energy on the present, wait until the change as it certainly will come.

As regards the temple and its character and its introduction in general practice for church and general building, I desire to remind the author of the communication under the heading "Hitting all Around" that as we are now living in an age of progress which I guardedly concede to be true and as regards the improvement in architectural development, permit me to say that Philadelphia can only lay claim to as able architects, as fine buildings and as complete pretenders in almost any calling as any city on this globe.

Having trespassed on your pages through the length of of this communication, permit me to say I hope to hear again from "Hitting all Around."

Very Resp. Yours,
BRICK BAT.

Something New in Wall Papers.

Mr. D. D. Elder, of 422 Market street, is now introducing into the market a very handsome granite felt wall paper, which so closely resembles the original granite, that, unless a close inspection is made of it, it is almost impossible to discern the fact of its being paper. These papers are made up in all shades of natural stone, and are manufactured of a fine vegetable fibre. Its qualities are many. It is easily hung, and will not shrink, and may be easily brushed to remove any dust which naturally accumulates. This paper for churches, halls and other public buildings will be found very attractive. This paper we think will become very popular, and already some very handsome dwellings and institutions have been decorated with it.

These papers are decorated by some very handsome friezes and borders, of which Mr. Elder manufactures some hundred different designs, all of which are of the highest taste in both design and color. A few of our leading builders have already commenced the use of this granite felt paper, and are delighted with its effect.

—The latest from New York on the plumbers' strike there, is that eleven plumbers' shops locked out their men about 8 o'clock last Thursday, at the same time that printed notices were posted, notifying the latter that they only could resume their labors on condition that they acceded to the rules of the Master Plumbers' Association, instead of those of the Union, with regard to the apprentice system. "Walking Delegate" Farrell says he does not think the lockout will be general, though it is possible. In the event of a general lockout the building trades will be called upon for assistance. The whole number of journeymen plumbers in the city is estimated at about 1,600, and licensed plumbers 900. The "bosses," or Masters Plumbers' Association, talk very determinedly. They say they are resolved, come what may, to control their own shops, and one of the more prominent is quoted as declaring "he had $25.00 worth of work on hand, and would sooner throw it all up than submit to the dictation of the Journeymen's Union an hour longer." So, on both sides, the contest promises to be a stubborn one. Just now, when so many houscholders are returning from the country, there is a great deal of plumbing to be done, but this will have to wait.

Council Underwood at Glasgow has made a report to the Department of State, in the course of which he warns American workingmen, and especially American seamen, against going to Great Britain with the hope of finding employment. Every trade is overcrowded. Applications made to him by destitute American seamen for aid average about four or five a week. Men who are hired to care for cattle shipped from this country to Glasgow often come to serious want and suffering. They are usually possessors of certificates entitling them to a passage home on the vessel which took them out, but no provision is made for their sustenance while in port, and it frequently happens that the vessel, having discharged her cargo, sails for some other part of the world than America, in which course the men are helpless, since no other ship will receive their certificates, and, not being sailors, they can not hope to work their passage.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE late Joseph E. Temple willed about $185,000 to charitable institutions.

THE property south side of Callowhill street, west of Nineteenth street, 45x120, sold for $30,000.

THE corner-stone of the new Flemington, New Jersey M. E. Church was laid on Friday afternoon.

THE inquiries for properties west of Eighth to Broad and Arch street is daily increasing, both for stores and warehouses.

THE property at the N. E. corner of Fourth and Elm streets, Camden, N. J., (store and dwelling), has just changed hands, the price paid being $4000.

ADAMSON & LANDRITH, Builders, Thirty-second and Spring Garden streets, are erecting ten 3 story dwellings on the west side. They will be built of pressed bricks, with fancy fronts.

AT the opening of bids for the waterworks at the Merchantville on Wednesday the lowest bidders were Charles Tiffett, Harrisburg, on basin and pipes, and Elwood Tilton, Merchantville, on engine-house.

J. F. P. READ, real estate and insurance agent, 205 Market street, Camden, N. J., reports that houses never rented better than at this present, (of all grades) out of over 150 houses on his rent roll he has but two vacant.

H. D. JUSTIN, 516 Arch street, is erecting a handsome 3-story factory on the east side of Thirty-second street, north of Spring Garden street. It has a stone basement and archway in the centre of the building to court yard, the balance being of brick.

J. T. JACKSON & Co., real estate broker, 711 Walnut street, have just completed the sale of a 70-acre farm, at Jenkintown, for $20,000; also a country residence, the property of Mrs. Roberts, to Mr. Binder, for $7,600, at Cheltenham; also several small properties at Fair Hill.

Mr. Jackson is at present on a business tour to California.

A. F. BROWN, 125 Market street, real estate and insurance broker, reports business growing very rapidly, he looks upon the future of Camden as even being far beyond former anticipations, he further say that his collections are good, and that inquiries both for rent and purchase are very satisfactory. Mr. Brown has within the last fourteen days been doing a great deal in mortgages, but finds money for that purpose little short in supply.

MR. L. B. HUMPHREY, Third and Market streets, real estate and insurance broker, has just completed the sale of a property, (three-story brick house), 407 Friends avenue, for $1100; also one 884 Federal street, for $2850; also a drug store, (three-stories), corner Fourth and Linden streets for $6500. Mr. Humphrey looks upon the prospects of Camden in the real estate interest as being particularly bright, and so anticipating a good fall business.

D. S. RISLEY, real estate broker, 111 Market street, Camden, N. J., has within the last few days made sale of a property on North Fifth street, between Linden and Pine for $5000. He informs us in speaking of real estate for Camden, a bright outlook there has been noticable for some time, inquiries for houses and properties to purchase being almost continuous, beside which he reports large number of Philadelphians moving over amongst them.

CHAS. WRIFFORD, builder, Camden, is just commencing the erection of four, six-room houses at Liberty Park, Camden, N. J., which will cost about $1,500 each, and has prospects of many others adjoining of the same stamp. Mr. Wrifford's Philadelphia business address is 21 and 23 Hudson street.

ROBERTS AND COHN, real estate brokers and builders, Market street, Camden, have just completed the sale of twenty-two dwelling houses on Sixth and Hindoo streets for the sum of $134,000, also a store and dwelling on the corner of Seventh and Clinton for $2500. Mr. Cohn is the owner of an estate which is called Liberty Park, which is situated in the immediate vicinity of Camden proper, which represents some 660 lots, of which some 300 are already sold, and some thirty or more houses are built on them, principally mechanics' dwellings, of six and seven rooms, these lots and buildings are bought and erected on easy terms.

J. F. HOCTOR, bricklayer, Lancaster avenue, is erecting nineteen houses on Marion avenue and Fourty-fifth streets, they will have a frontage of 14 ft. 9 in. by 42 ft. deep, and will be of two-stories, and will cost some $1300 each. They are for Mr. Batesin, 1002 South Nineteenth street. Also building thirty-two houses between Twenty-ninth and Thirtieth, and popular streets for Mr. Shoemaker. Seven of which will be three-story, and cost $2500. The remaining twenty-five will be two-story, 16 ft. by 50 ft. deep, and cost about $1900 each. He is also building a house on Fifty-fourth-and-a-half streets below Westminister street for Mr. Ruess, to cost $1700.

JOHN M. SHARP, builder, 1929 Girard avenue, is building some very handsome dwellings on Park avenue, (late Diamond street) a fine block, on the north side between Fifteenth and Sixteenth streets with Edgely street in the rear; also laying foundations for a block on the south side between Fifteenth and Sixteenth streets; also 23 between Seventeenth and Eighteenth street on the south side; also 17 on Fountain and Eighteenth street. These buildings will all be finished in the most improved manner, and are meeting with buyers in many cases before the roofs are on them. This is caused from the fact that Mr. Sharp's operations in all cases are looked upon as being in every particular as substantial.

MR. DEERY has also under his care the New Philadelphia Base Ball grounds, which will cover the entire block from Broad to 15th street, bounded by Huntingdon and Lehigh avenue, and is approached by the Reading R. R. and the Pennsylvania R. R., and from the State Agricultural Exhibition. The pavillion has a frontage on Huntingdon street of 206 feet and 225 feet, 7 inches on 15th street which will afford seating accommodation for 5000 people. The roof is supported by iron columns with iron rafters. On the roof will be located 55 private boxes, beside directors, and reporters boxes. Accommodation is also provided for ladies one section being reserved for them, beneath the pavillion will be two large restaurant roons for visiting and home clubs, with lockers for each member of the club. Shower baths and so forth. Open slat work will be erected early in the spring, the grounds will be resodded preparatory to the opening games of the spring of 1887.

JOHN J. DEERY, architect, 328 Walnut street, is erecting the Assumption School house and church at 12th and Spring Garden. The school house has a frontage of 48 feet, 6 inches, by 70 feet deep, it is of brown stone, 6 feet above the grade, the balance being press and mortar brick and terra cotta. It contains 8 school rooms, which will accommodate from 450 to 500 children. It has a three story exhibition hall, with open timber roof. Proper and ample provision has been made for thorough heating and ventilating. The exterior design is on gothic, which harmonizes with the church.

The church will have a sacristy added and some alterations made in the sanctuary and the whole church frescoed. The brown stone front of the church will be scaled off and will be finished with a preparation to prevent disintegration. The church will be heated by. The ventilation is secured by metallic ducts, which lead into the louvred section of the spires. The cost of the whole will be about $50,000.

IN many cases, not only in Camden but in Philadelphia, a decided short sightedness on the part of owners of properties, is drawn to our notice, say for instance that, a property has been renting for $25.00 and that in consequence of delapidation, the tenants have left, the landlord then finds it necessary to renovate, which done they then ask $2800, which they fail to get, and rather than take the original rent $25 they allow the houses to stand empty for months, of this fact there is abundance of proof. So that taking it in any way we may, the owner is and must be a great looser for his short sightedness.

IN the construction of fire-proof buildings, says the *Firemen's Standard*, the greatest difficulty has always been to find a cheap but incombustible material for floors, iron and stone being necessarily very expensive. It has been recently suggested that this trouble would be overcome by introducing a layer of ashes two or three inches deep in each partition separating the stories. The ashes should be sifted and packed solidly between the wooden floors. These latter, so far as the planks are concerned, may be destroyed, but fire cannot be communicated from one story to another. The earthly mineral particles remaining after the combustion of wood form the best fire-proof of all substances, and, should the burning story be flooded with water, not one drop could pass through the layer of ashes to damage goods in the lower stories. Five to eight dollars per square of ten feet would cover the expense of rendering floors fire-proof in this manner.

Architects' Guarantees.

NOT long ago an architect of this city put the matter very frankly to an owner at the outset of a desirable job, and when there was a possibility that it would be given to someone else. Said the owner: "Now, if I employ you to superintend, you will guarantee that all these things will be done just as planned and specified, will you not?" "No, sir," was the frank reply. "I will guarantee nothing of the kind. I will look after your work as faithfully as I can, but I can not undertake to guarantee what anyone of several scores of workmen in the various trades may possibly do without my knowledge. That would be to promise an impossibility."

That this is the only correct position is further shown by the example of other occupations. The cashier of a bank is employed to direct its affairs, and particularly to superintend the employees and see that each performs his duties properly. That is what he is paid for, just as an architect is paid to superintend the workmen. Yet if a teller dishonestly embezzles a portion of the bank's funds, who ever thinks of making the cashier personally responsible, unless complicity or other malfeasance can be proved against him? This, too, although the cashier is with his subordinates all the time they are on duty, while an architect can give to the men on each building, but a very small portion of his time in a day.

A railway superintendent's duty is to superintend, and a competent one is none the less valued because here and there a switchman misplaces a switch, a brakeman forgets his duty, a conductor misunderstands an order, a bridge has a defective timber in it, and many another thing is done or not done, which the superintendent would have corrected if possible, and which it was his aim and province to correct. Indeed, a private watchman may be engaged for the single purpose of guarding a store at night, and yet if thieves enter so adroitly as to escape his vigilance, and rifle the contents, the owner will not be allowed to hold the watchman responsible unless negligence can be proved, although he failed to do the very thing for which he was employed, viz.: guard the store.

As to his superintendence, the architect must be competent and diligent. He must be able to direct the various contractors in their work, give all necessary explanations of the plans and supplement the practical knowledge of the workmen by his superior theoretical and scientific attainments; and further, he must give it such reasonable attention that it may not suffer from his absence or the want of necessary instructions from him. But never, and under no circumstances, can he assume to guarantee the minute and literal perfection of every particle of material and of every man's workmanship, for the sufficient reason that it would be an utter impossibility, and every reasonable man will acknowledge it at once.

A New Jersey Town to be Started.

A Syndicate composed of G. G. Green, Hon. John M. Moore, Joseph Parrish, John F. Hope, Martin Molony, Miss Stinson and Dicken Schoets and a Mr. Halstead, of the Delaware and Lackawanna R. R. Co., have just purchased from Mr. Geo. H. Barker, the Woodbury real estate agent, what is known as the Newbold tract or Wind Mill Farm, consistiug of 220 acres, situated on the Delaware river and Timber creek at Trestville, New Jersey, the price paid was $40,000.

The Syndicate intend laying out a new city, engineers and workmen are to be set at work at once.

A new hotel is talked of on the river front, with factories on the freight siding near the creek, while the residence portion will be near the station. The purchasers have not effected a permanent organization yet, but it is presumed that Mr. Barker will act as the general manager.

—The real estate value of Philadelphia is $618,059,987; personal estate, $10,619,325. The following are the tax rates and commissions that will be realized under existing valuations:

Tax rate.	Limit.
$1 80	$9,618,791 58
1 85	9,900,671 90
1 90	10,187,870 52
1 95	10,462,469 41
2 00	10,657,765 98
2 41	13,096,343 79

—A. A. Strull, recently employed by the Pennsylvania Railroad Company, has been elected Secretary-Treasurer of the new Commercial Title Insurance Trust Company.

—The Citizens' Municipal Association has requested the Controller not to approve the bills of derelict contractors, about whom they have received many complaints, 110 being entered on Wednesday alone.

—The Board of Health has declared the open lot from Nos. 613 to 633 Tasker street and the lot in the rear of houses on Seventh street between Moore and Pierce to be nuisances prejudicial to health, and ordered the same to be abated.

$12,893,476.48 is the amount which the Washington, D. C., Democratic Congressional Campaign Committee say have been embezzled by U. S. Government officials since 1861.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ADVERSE POSSESSION.

Though where a widow enters as tenant for life under a decree in partition, the statute does not begin to run in favor of her grantees until her decease; yet if the proceedings in partition were never consummated, and she took no title thereunder, an adverse possession of thirty years will bar an ejectment by the heirs.

COVENANT.

The covenant against encumbrances created by the words "grant, bargain and sell," extends to a municipal assessment for a street improvement, even though the purchaser had knowledge of it at the time of his purchase; the effect of such words can only be limited by express words contained in the deed.

DEED.

Where the seller made delivery of a deed in escrow, to be delivered to the buyer on his making payment of the price, he could not revoke the power given to the depositary to make delivery upon the ground that the payment had not been made, when he had himself extended the time.

A forged deed placed on record passes no title to an innocent purchaser from the grantee named therein who relied upon the record evidence of title.

LANDLORD AND TENANT.

The acceptance, by the landlord, of a surrender of the demised premises does not affect the liability of the lessee, for rent which has previously accrued.

The breach of a collateral covenant in a lease, does not suspend the rent, the party must sue for his damages.

MECHANIC'S LIEN.

Extra work may be included in the claim filed for that done under the contract; but the kind thereof must be distinctly set forth.

An inaccurate description of the locality of the premises is not necessarily fatal if there be sufficient in the general description of the property to identify it, and prevent mistake.

MORTGAGE.

To warrant treating a conveyance absolute on its face as a mortgage it must have been intended to pass the property as a pledge or security; it must be accompanied by a defeasance written or oral, for if the grantee is, by the transaction taken to have absolute power to sell the premises for the purpose of paying the indebtedness, the conveyance is a deed absolute or in trust, and if the latter, the trust attaches to the proceeds after sale and not to the property.

RENT.

Rent is a preferred claim only when the fund arises from a sale under an execution; on a sale by an assignee, the wages of laborers are entitled to preference over it.

VENDER AND PURCHASER.

The general rule of equity subject to some exceptions is that where a purchaser of real estate pays the purchase money, out of his own funds, taking the title in the name of another, the ownership of the money will draw to it an equitable interest in the land. He will be presumed to have bought for himself, and the beneficial title will be in him.

The intention of the parties is however, the true criterion.

F. R. SHATTUCK,
Attorney at Law.
58 *S. Third St.*

WITHIN the last thirty years important additions have been made to the architect's specification. His stock of special technical acquirements has extended much beyond that of his farthest anticipations; and whereas at one time he could confine himself strictly to the works of the different artificers engaged in building, he is now compelled to seek information beyond his own calling. And this is true of nearly all the trades connected with building. Improved machinery has changed the whole aspect of the trades. Let us glance at a few of the trades, and first of all let us consider the improved appliances in plant, machinery and scaffolding which the modern contractor is supposed to possess. Steam machinery, for example, is becoming daily of more importance to the contractor for large works, if a saving of cost is considered. Such machines as cranes, stone breakers, dredgers, and excavators, rock drills, overhead travellers, brick-making machines are required in many large works, and the importance of timber converting, sawing, moulding, and planing and drilling machines cannot be overlooked. Even the excavator is no longer confined to the old appliances. Dredgers and rock drills are now brought into request by the contractor in certain circumstances. Excavating machinery during the last few years has been developed to an extent which has quite revolutionized the art, and to American invention we have to look for many of the tools and machines now in use. The employment of machinery for excavating dates from about the year 1860, though it was quite another decade before these appliances were taken up by the English contractor.

Even in the trades of bricklayer and mason —those two very conservative handicrafts— considerable additions and improvements have been made to the plant. The use of travelling cranes or gantries has introduced a more expeditious mode of raising and placing in position heavy blocks, and has rendered it practicable to build with larger masses of material. The requirements of concrete building have rendered necessary to the construction of special apparatus, and the introduction of terra-cotta in large blocks has created the necessity for special mechanical facilities and appliances unknown to the architects of the old school. Only of late years in England, at least, have we noticed the employment of overhead scaffolds and hoisting cranes in the erection of buildings, a mode of handling the materials of a building which is both a saving of labor and of space, as well as being more scientific and less riskful to life. It may be said that these things belong rather to the builder than the architect, who cares not to trouble himself about the means employed to carry out his design. Such reasoning is delusive. The architect has lost much by this boastful ignorance of the technical means used by the builder, and what we aver is that it is impossible for him to write a good or intelligible specification without knowing the processes. —*Building.*

—Chairman McMurray, of the Committee to verify the Cash Accounts of the City Treasurer, on Wednesday last sent notices to all the heads of departments, calling their attention to the ordinance of December 23, 1872, which provides that on the second Monday of each month they shall furnish under oath to the committee "a statement giving the date and amount of payment to the City Treasurer on account of their respective departments for the preceding month; provided, that all such moneys shall be paid to the City Treasurer on the day of receipt by the said officer or department." The department heads are also requested to present a sworn statement each month setting forth whether they have received any money or not. The next meeting of the committee will be held on the 14th.

Building Permits.

J. Laughlin, No. 737 Spring Garden st., 1-story addition to No. 517 N. Eighth st., 7x22.

T. McCarty, No. 1925 N. Seventh st., bay window and interior alterations, No. 2222 Green st., 10x5. Also, front alteration, No. 342 New Market st.

M. Wilson, No. 1924 Fitzwater st., 2-story back building, Carpenter st., below Twenty-second, 12x16.

J. W. Kuhn, No. 917 South Fourth st., 2-story house, No. 2212 Passyunk ave., 16x53.

H. Guyer, No. 2769 Coral st., 2-story frame house, Gray's ave., below Seventy-first st., 32x41.

T. Waters, No. 4825, Melrose st., Frankford, 2-story house, Heggerman st., near Funk, 16 ft. 6 in. x42.

J. O'Donnell, No. 1161 S. Thirteenth st., bay window, Eighteenth and Pine sts., 15x5.

E. Davis, No. 3863, Rockland st., interior alterations, Haverford ave. and Thirty-seventh sts.

A. M. Myers, No. 252 Christian st., 2-story building, No. 324 Christian st., 12x30.

H. Hazlett, No. 1935 Columbia ave., bulk alteration, Thirteenth and Girard ave., 18 ft.

W. P. Davis, No. 4088 Lancaster ave., new front, Girard ave., below Forty-second st., 14x15.

T. McCracken & Son, No. 2504 N. Broad st., 1-story office, Seventeenth st., below York, 20x20.

A. Panhraz, No. 3033 Frankford ave., 2-story house, Bley st., near Hull, 20x40.

E. Cubberly, No. 811 Wharton st., seven 2-story houses, Ninth st., near McKean, 16x42.

T. & C. Kulp, No. 1520 Golfrey st., two 2-story houses, No. 1735 Marshall st., 12x16.

G. Hearst, School lane, Germantown, four 3-story houses, Phillelena st., near Upsal, 30x48.

C. O. Coop, No. 4 Herman st., Germantown, addition to 2-story house, Pastorius st., near Hancock, 16x32.

M. Hetzel, No. 45 Church st., Germantown, 2-story house with mansard roof, Mount Airy ave., near Township line, 14x44, also, 1-story library, Germantown ave., near Sedgwick st., 32x44.

A two-story stable, 18 ft. by 33 ft., Stillman above Twenty-fifth st., to John S. Connell, 2104 N. Twentieth st.

Four two-story houses, 12 ft. by 30 ft., Somerville st. above Germantown ave., to Chas. Bossert, 2114 Marshall st.

One story addition, 20 ft. by 85 ft., Broad above Race st., to A. Koenig, 234 N. Broad street.

Six three-story houses, 15 ft. by 52 ft., Thirty-second above Spring Garden st., to Landreth & Adamson, 132 S. Third st.

A two-story building, 14 ft. by 16 ft., 2342 Germantown ave., to Geo. F. Kurz, 3542 Germantown ave.

A three-story building, 20 ft. by 36 ft., Richmond above Huntingdon st., to Edw'd Fay, 2666 Richmond st.

Two two-story houses, 16 ft. by 40 ft., Twentieth above Dickinson st., to Patrick McCartney, 1258 S. Twentieth st.

A three-story house, 17 ft. by 45 ft., Mt. Pleasant ave., and Main st., to Walter Bowditch, High street, Germantown.

A two-story back building, 10 ft. by 12 ft., 1202 Columbia ave., to Teller Bros., 117 N. Third st.

Two two-story houses, 16 ft. by 40 ft., Tioga and Amber sts., to Catharine Wenrader, 2129 Philip st.

A two-story house, 17 ft. by 30 ft., Rush above Twenty-first st., to Henry Goodwin, Twenty-first and Clearfield sts.

A three-story house, 16 ft. by 47 ft., Hare above Twenty-fourth st., to James Gordon, Twenty-fifth and Hare sts.

One two-story house, 10 ft. by 24 ft., Orkney above Dauphin st., to R. B. Greween, 2335 N. Eighth st.

A two-story house, 15 ft. by 28 ft., Watkins above Fifth st., to Samuel H. Trickett, 336 Borden st.

Three two-story houses, 16 ft. by 32 ft., Main st. near Wissahickon, to S. S. Keeley, 350 Green lane.

A one-story kitchen, 10 ft. by 12 ft., Twenty-fourth above Jefferson st., to Wm. Smith, 1415 Dauphin st.

A one-story back building, 14 ft. by 30 ft., 1705 Poplar st., to J. C. Pharaoh, 1841 Girard avenue.

A two-story store, 30 ft. by 75 ft., Thirty-fifth st. and Haverford road, to Andrew J. Mosly & Sons, Fifty-first street and Florence avenue.

A one-story stable, 15 ft. by 30 ft. 916 Florence st., to Robt. Miller, 826 Scott st.

A two-story back building, 6 ft. by 12 ft., 2004 South College ave., to J. B. Rush, 1225 N. Eighteenth st.

Four two-story houses, 10 ft. by 38 ft., Twenty-first below Ta-ker st., to Wm. Seelburger, 2237 St. Alban's place.

Nine two-story houses, 15 ft. by 50 ft., Ninth above Cumberland st., to Jno. Loughran, 2544 N. Eighth st.

A two-story house, 16 ft. by 30 ft., Tioga above Seventh st., to Dudley W. Lance, Tenth and Tioga sts.

C. Bossert, 2114 Marshall st., four 2-story houses, Somerville street, near Eleventh, 12.6x30.

A. Koenig, 234 N. Broad st., 1-story rear addition, 20x85.

Landreth & Adamson, 132 S. Third st., six 3-story houses, Thirty-second st., near Rockland, 15x52.

M. J. McCloskey, 3612 Wallace st., addi-to 1-story back building, 2016 Fairmount ave., 18x22.

J. L. Kirkater, Frankford ave. and Paul st., 2-story addition to store on Paul st. near Frankford ave., 46x30.

G. F. Kurz, 3342 Germantown ave., 2-story warehouse, 14x16.

E. Fay, 2666 Richmond st., 3-story building, Richmond st. above Huntingdon, 20x36.

P. McCartney, 1258 S. Twentieth st, two 2-story houses, Twentieth st. near Tasker, 16x40.

G. W. Payne, 2103 Jefferson st., an addition to boller house, Beach st. near York, 42.8x70.

J. Walenburg, 1046 South st., repairs, 1048 South st., 24.6x23.

S. H. Trickett, 336 Borden st., two 1-story houses, Watkins st. near Fifth, 15x28.

S. T. Keely, 350 Green lane, three 2-story houses, Main street, near the Wissahickon, 16x32.

W. Smith, 1415 Dauphin st., 1-story kitchen, 1323 N. Twenty-fourth st., 10x12.

J. L. Pharoah, 1841 Ginnod st., 1-story back building, 1705 Poplar st., 4x30.

A. Hindle, 1522 N. Twenty-first st., addition to 1-story kitchen, 2009 Columbia ave., 13.5x8.

Steinback & Chestnut, 1616 Federal st., 28 2-story houses, Bancroft st., near Moore—two 18x10, remainder 14x28.

S. Chestnut, 1616 Federal st., two 2-story houses, Fernon st. below Twentieth, 14x28.

Kutz & Worthington, 1308 Wallace st, 1-story kitchen, Gratz st. below Berks, 12x9.

J. Myers, No. 1315 Sansom st., addition to church and bay window, twenty-second and Diamond streets, 10x40 and 14x5.

A. J. Morely & Sons, Fifty-first st., and Florence ave., 1-story store, Twenty-fifth and Haverford streets, 30x75.

R. Miller, No. 826 Scott st., 1-story stable, No. 916 Scott st., 15x30.

Atkinson & Pinker, Franklin st., below Unity, Frandford, two 3-story stores and front alterations, Main st., below Ruan, 14-x18.

J. B. Rush, No. 1225 North Eighteenth st., 2-story back building, No. 2004 South College avenue, 6x12.

W. Keegan, No. 1823 Fitzwater st., new front, 16x86.6

J. W. Howard & Sons, No. 1336 Pine st., 2-story office, Eighteenth and Tatlow sts., 28x21.6.

W. Seeburger, No 2337 St. Alban's st., four 2-story houses, Twenty-first st., below Tasker 18.8x38.

J. Loughran, No. 2448 North Eighth st., nine 2-story houses, Ninth st., above Cumberland, 15x50.

D. W. Lance, Tenth and Tioga sts., 2-story house, Tioga st., below Eighth, 16x36.

J. Parham, No. 1417 Lombard st., second story privy and bath-house, 9x5.

C. H. T. Charlton, No. 326 North Fortieth st., 1-story frame house, Sixty-eight st., near Jefferson, 13x15.

J. McNutt, No. 2320 Sepviva st., 2-story house, Thompson st., near Palmer, 18x32.

J. H. Young, No. 1804 South College ave., new front and interior alterations, No. 2017 Columbia ave.

Erickson & Michaelson, No. 3449 Lancaster ave.. 2-store and dwelling, Fairmount and DeKalb st., 18x44.

J. H. Carter, No. 30 North Seventh st., seven 2-story houses, Orion st., below Brown, 14x40.

Cox & Strickeler, No. 235 East Orthodox st., 2-story house, Ditman st., near Pratt, 14x28.

Sum C.—Summons in Case—a form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The latters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—Master Plumbers, John J. Weaver and William Harkness, Jr., have secured from Judge Finletter a preliminary injunction restraining George W. Blabon from violating a regulation of the Board of Health in connection with the plumbing of twelve houses which he is building on the northwest side of Hunting Park avenue, northeast of Twenty-second street. Last February the Board adopted a rule providing that "in no case shall a joint drain be laid in cellars or yards parallel with a street or alley." It is alleged that, in direct violation of this rule, and with the permission of the Board, the defendant is about to lay a joint drain across the yards of his houses parallel with Nicetown lane, connecting each house therewith, and making but one connection for all of the houses to the main sewer.—*The Record.*

—The Girls' Normal School has an excess of some 200 in regular attendance. Much opposition is made against the present system of admission, as it is claimed that the children of poor men, whose limited means prevent a regular attendance at school, and cause a consequent imperfect preparation, are excluded, but who under the old rule would be eligible if they obtained an average of 65. The present system admits applicants in the order of their average; this forces out all who cannot afford to wait another year.

Sheriff Rowan's lot is not a happy one. The expenses of his office exceed the receipts by a very large majority. The Sheriff has already commenced the cutting off of heads to reduce expenses. Deputies Chas. Algeo and William T. Brown, and Clerks Frank G. Walters and Joshua Bentley have been dismissed. These dismissals has necessitated a new arrangement of the office work; there are now four districts instead of six as heretofore. These dismissals save just $3,800 per year.

CONVEYANCES.

PHILADELPHIA.

SATURDAY, Aug. 28, 1886.

Bodine st., W. s., 80 ft. S. Oxford, Margaret Mahony to Jas. T. Mahony, 16 ft. by 50 ft..... nom.

The Lumber Trade.

The following lumber review for Chicago contains so much that is applicable to the East that it is reproduced.

The handler of lumber has now reached a point in the season's progress when he is balancing one against another several weighty considerations. There is a probability of logs hung up, of logs that will come down on late rises; there is the probable country demand, as affected by the crop outcome and the prices farmers shall realize for their crops; there is the railroad demand, the farmer's demand, and the prospects for building in the cities. Above all is the attitude of the manufacturers, which is one of firmness like unto a rock. Now is the crucial time of the season. The dealer in lumber is passing through a period of anxiety. Whether to buy unsparingly, or to go forward cautiously, is the burning question with the dealer, just now. To cease buying is to stop business; to go ahead, is to do it blindly and at a hazard. And yet the movement of lumber is increasing rapidly, especially in the northwest and southwest, and mill stocks are being absorbed at higher prices than prevailed last year in spite of any dealer's exigencies or fears. There is a demand for lumber in the country at large sufficient to absorb the cut of the mills, at advancing prices, whether the jobber be able to make a profit in his business or not. This seems to be a peculiarity of the situation.

All along the line, from Minneapolis, on the upper Mississippi, to Cleveland, on Lake Erie, there is a movement looking to higher yard prices. In this city there has been some success in the movement; in respect to other points we cannot speak from positive knowledge. Certain it is that if the jobbers save their interests they will have to take a decided stand for higher prices. A rising demand throughout the fall will help them in this effort, for without a requirement that shall be urgent and sweeping there can be no material rise in the value of yard stocks. The demand must reach that pitch that it will overcome the baneful influences of competition. So far as the jobber is concerned, all depends on this.

Reports from the east indicate a slight improvement in trade at nearly all the leading seaboard points. It is also noted that the distribution of lumber throughout the eastern interior is increasing, particularly in eastern Pennsylvania, and all over the state of New York. Old towns, that were supposed to have got their growth and gone to seed, are renewing their youth and building up anew.

Generally stated, prices in the yards have a firm bottom and a tendency upward. The period of weakness has passed. Owners of stock now have a price to name that they are not ashamed of, and do not hesitate to utter. Dealers make estimates on bills without trepidation. Having their hands full of business, an over-anxiety to secure orders does not bother them as much as it did. This attitude is conducive to firmness of prices. It cannot be said that there has been an actual advance of the entire list of dimensions, but some items are selling for a little more than formerly, while all are firm at the list prices.

The Chicago building department issued for the week ending August 21, 99 permits for 149 new buildings to cost $675,600, and to have a frontage of 3,798 feet, or more than two-thirds of a mile. Alterations and additions numbered seven, to cost $10,600. Included were a dwelling on North State street to cost $20,000; a residence on Prairie avenue to cost $30,000; a flat building at 1623 Wabash avenue to cost $25,000; a row of cottages on Oakley avenue to cost $30,000; six cottages on Idaho street to cost $30,000; a 5-story warehouse on West Monroe street to cost $70,000, and five dwellings, 3640 to 3648 Grand boulevard, to cost $60,000. It is noticeable that while not a single permit reached the $100,000 mark, the total cost represented was at a rate of $35,000,000 a year. The record of the previous week was of 92 permits for 117 buildings, to cost $626,700, and to have a frontage of 2,897 feet.

Health Notes.

—It was intended at one time to connect Gunner's run with Frankford Creek, by a canal two miles long.

—The Sanitary authorities are at a loss how to remove the complaint caused by the Gunner's run nuisance.

—During August, 153 vessels passed up the river; 145 visits were made outside of the channel, and only one vessel was detained. The number of passengers examined was 2360; of whom 2059 were foreigners.

—At the instance of district committees the Board declared the open lot from 613 to 633 Tasker street, and the open lot in the rear of the Seventh street houses, between Moore and Pierce streets, to be nuisances, which were ordered to be abated.

—There is not a sufficient flow of water through Gunner's run to carry off the foul matter emptied into it. The nuisance seems to the committee one so prejudicial to public health that it recommends the Board to call the special attention of City Councils to it, by submitting to Councils a copy of this report, with the suggestion that a brick culvert take the place of the open stream, or if that is unpracticable at this time, that the canal be dredged of its disgusting contents.

Miscellaneous.

—An educational committee in this city has under consideration, the question of incorporating the kinder garten system with our public school system. The matter is under consideration, though no immediate action is probable.

—N. Snellenburg & Co.'s new clothing house will have a frontage at Fifth and Passyunk avenue of 105 feet, depth 225 feet; width on South street, 48 feet. It will be four stories high. The building will have a mansard roof and four central towers 75 feet high.

—The Masonic Temple has been made absolutely fire proof. The recent improvements took 55,000 brick. The columns in all the corridors, and in the most of the lodge rooms, and the panels of the lower corridor have been freshly painted, adding considerably to the appearance of the interior of the Temple. The ventilation of the building has been also largely improved by adding more power to the fans. This necessitated cutting through the solid foundation six feet in thickness to supply more air from beneath the pavements, a work which took two weeks to accomplish.

—The report made to the municipal association in regard to the garbage contract states, "The collection of garbage has been very much neglected this year, especially in the northern and southern portions of the city. A number of persons have complained that no garbage has been collected from their homes this year, and many others that the streets are not properly cleaned, and in some localities not cleaned at all, add that they are now in a very filthy condition." The bulk of the report is taken up with specifications of the condition of unpaved roads in the First, Twenty-first, Twenty-second, Twenty-third, Twenty-faurth, Twenty-fifth, Twenty-sixth, Twenty-seventh and Twenty-eighth Wards.

—It seems the Traction Company, who had an opportunity to get a good grip, but

did not take it, because it cost too much money, have at last hit upon an entirely novel contrivance, in the way of a truck. Experiments were made a week ago. On Monday, of last week, the Traction Company placed car number 104, fitted with a new system of trucks, on the track, and it ran all week satisfactorily. It turns sharp curves without jerks. Mr. Brill says:—"The great difficulty in our experiments was the fact that the grip arrangement interferred with the use of a king-bolt, or centre-bearing. By this device we are enabled to dispense with a king-bolt and get a swing motion without the use of links. There are springs on each end of the bolsters, which take off all lateral thrust and jar of the car, instead of the king-bolt, we have a circular slot bearing, which permits the truck to turn easily in going around curves, and is better than a king-bolt in that the car does not tilt or rock. The company has for some time been considering the introduction of double-deck, open, excursion cars on their Market street line. What their conclusion will be I do not know but there can be no doubt that they would be a great improvement. The cars are much longer and have a seating capacity of sixty below and forty on the upper deck."

PAPER ROOFS.—A roof pronounced superior to that of slate, because of its lightness and other advantages, is now made of any fibrous pulp. From this material tiles of any shape desired are formed by pressure under machinery or by any other method which may suggest itself. Pressed into the designs wished for, the pulp tiles are partially dried previous to being subjected to a water proof solution. Thoroughly impregnated with the preparation to resist moisture, they are baked to harden them in the water proof mixture. After the baking the tiles are surfaced; to this is added a coating of sand, whereby the pulp is rendered proof against the action of heat or flame. By the use of different colored sands, a variety of tints may be imparted to the tiles, which, after the application of the enameling mixture and sands, are baked a second time, after which they are ready for use.

Besides the inherent lightness of the pulp tiles, which obviates the necessity of a heavy frame to support a weighty roof, the pulp tile being tough and not brittle like slate, is far less liable to be broken from blows, stones thrown upon them, or human footsteps. Again, slate tiles cannot be laid compactly together on a roof on account of their brittleness, which prevents their being drawn tightly together by nails. Through the fibrous pulp nails may be driven as close home as in shingles, thereby binding them closely to the bed and together without any possibility of lateral movement, or being blown away in high winds, as slates loosely fastened on roofs usually are. Nails penetrate the pulp tiles more easily than shingles, and lie closer together, being more elastic than wood.—*Boston Journal of Commerce.*

THE ARCHITECTURAL ASSOCIATION of Iowa at their recent semi-annual convention at Davenport passed the following resolutions:

1. That competition on private work is unprofitable and undesirable, and should be discouraged.
2. That the soliciting of work and offering to perform services when it is known that a fellow member has professional relations with the person whose clientage is sought is unbecoming and undignified conduct,
3. That offering to perform services for an amount less than the customary fees, in order to get work from a fellow member, is beneath the dignity of an architect, and any member who shall be proven guilty of such conduct shall be suspended from the association,
4. That speaking disparagingly of the character or manhood of a fellow member in the presence of contractors and builders, should be discouraged and discountenanced.
5. That unfriendly criticism of the works or abilities of a fellow member, in the presence of his clients is beneath the dignity of an honest man.
6. That each member should be ready and willing to lend assistance to his fellows, and help them professionally or otherwise.

THE demand for fire-proof buildings at reasonable cost, wherein expensive iron beams (which themselves have to be protected to render them serviceable in a fire) may be dispensed with, has led to many inventions for covering the ordinary wooden joists in general use or suspending fire-proof ceilings beneath them.

The attempts to fill up the spaces between the joists have not been successful. They add too much weight to the floors, and induce decay in the joists.

A continuous fire-proof ceiling suspended beneath the joists is the only practical device, and depends, for its usefulness in a fire, upon its integrity being preserved from wall to wall. This cannot be done by any combination of plastic materials with light iron work such as sheet iron lathing or wire cloth, covered with plastering. In the case of iron lath, being in long stiff sheets, heat causes it to warp and throw off the plaster; while with wire lathing, as the plastering applied to it contains plaster of paris, when heated water softens and washes it away. Any ceiling supported on long metal strips is subject to the same contingency as iron lath, whether it be of tiles or any other materials. But ceiling made of fire clay tiles, each attached individually to the wooden joists, locked together, and requiring no pointing up, forms a continuous surface of tiles, and is ready for plastering as soon as set. The plastering is clinched in the cross joints, which are made wide; and while the plastering, which should be of pure lime and sand, is less liable to be washed off than gauged mortar, such as is employed with wire lath, the clinch will hold and keep the joints full, even if the plaster should fall.

Under such circumstances it is as effectual in resisting fire as any of the other systems of filling between iron beams.

The ceiling, being the most vulnerable point in a building, must receive the greatest care in its construction.

It has been demonstrated, that even as a substitute for lathing, our tile ceilings are better adapted to fine plastering than any others. They show no uneven smoke stains or fine cracks, such as plastering on lath, and are therefore best adapted to fine dwelling house work which is to receive permanent decoration. For apartment houses they add the greater advantage of protection from fire where it is most needed, and at very reasonable cost.

Over 1,000,000 *feet of this ceiling has been put up within the past two years.*

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

Executes trusts of every kind, allows interest on deposits of money. Also, acts as Registrar and Transfer Agent of Corporation Stocks.

Summer Clothing.

We have a large stock of these goods new and fresh this season. Beautiful patterns in SEERSUCKERS, ALPACAS and SILKS. Foreign and Domestic manufacture. But our large stock of MEN'S BUSINESS SUITS is what we want you to see before you buy. Novelties constantly being received for BOYS' and CHILDREN'S WEAR. The Norfolk Takes the Lead this Season. We never before carried such a select stock in MEN'S FURNISHING.

Browning, King & Co.

910 & 912 CHESTNUT STREET.

THE

Day Sewed Shoes.

We wish to call the attention of the public to our principal object in opening the Day Sewed Shoe Store. The Day Sewed Shoe Manufacturing Co. was organized to introduce the Day Sewed Shoes, and this could only be brought about by getting the manufacturers to make them, and the quickest way to accomplish this was to give them this opportunity to dispose of their goods. We make our finest goods at our own factory, and are careful to have every pair perfect. We earnestly request that every pair of shoes purchased of us be returned for exchange if not as represented, whether they have been worn or not.

THE DAY SEWED SHOE MFG. CO.,

Under the management of W. W. Apsley,

No. 23 N. EIGHTH STREET.

Open until 10 o'clock on Saturday night, Sept. 4.

SPECIAL NOTE.—Do not forget that we make to measure for crippled and tender feet and make a specialty of all kinds of repairing at moderate prices.

MR. H. S. BEEBE, No. 231 North NINTH Street, dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

Items of News

—Beverly, New Jersey, is to have new water works.

—The personal estate of Mary Pearsall is appraised at $46,445.67.

—Apartment houses are to be erected in Pittsburg by Eastern capitalists.

—Apartment houses are to be erected in Pittsburg by Eastern capitalists.

—Gowen's plan for the reorganization of Reading will, it is said, require $42,000,000.

—The nail mill at Lock Haven is to be enlarged to accommodate increasing business.

—The Western Union's quarterly statement shows a decrease in net earnings of $250,000.

—They say that I. L. Miller's new house at Media is one of the handsomest in Delaware county.

—The personal effects of the estate of the late Anna J. Rutter have been inventoried at $31,706.58.

—Geo. W. Hancock has been mentioned in connection with the presidency of the Real Estate Exchange.

—The Riverside Glass Works, at Wellsburg, West Virginia, were burned on Wednesday. Loss $50,000.

—The new church at Buckingham Valley, Bucks county, has been completed and will soon be ready for dedication.

—It has become quite fashionable for Real Estate Brokers and Conveyancers to make extended trips through Europe.

—A lumber camp has been established on Younghomans Creek, Clinton county Pa., to cut 2,000,000 feet of pine timber.

—A new building, which is to cost $50,000, is being erected in South Bethlehem by the Lehigh Valley Railroad Company.

—A fire at Middlebury, New York, Thursday morning, destroyed several dwellings, stores and barns, causing a loss of $35,000.

—Mrs. Cleveland was greatly pleased when she learned through the Real Estate Record that James P. Mornen's new town is called Folsom.

—The interest due on the Glentworth and Hartmyer & Myer coal tracts will be purchased by the Receivers of the Reading Railroad at 5 per cent.

—There are now 1,000 ovens in course of erection in the coke region of this State, and all of them will be ready to put in blast before the close of this month.

—The stockholders of the Bank of America have voted to increase the capital stock of the corporation from time to time until the limit of 5,000 shares has been reached.

—The stockholders of the company organized to fish out the sunken treasures on the Spanish coast which were lost in 1788 expect to realize $10,000,000 in Spanish gold.

—Several Philadelphia capitalists have purchased the bluff on the Pensaukin Creek, near Palmyra, and are mining large quantities of kaolin and other clays used in potteries.

—An old dwelling on Front street, above Indiana avenue, occupied by B. F. Lippincott, for the storage of hay, was destroyed by fire Thursday evening. Loss $5000. Origin unknown.

—Hard baked fire-brick is said to be a success when properly laid for street pavement. It makes a splendid roadway, is easily kept clean, and should be tried in Philadelphia.

—The work of tearing down the old Market street bridge has at last been begun. The public has become sick of the sight of the old temporary structure. The work will be pushed without delay.

—The stockholders of the Gloucester and Salem Turnpike Company have agreed upon the 20th instant as the date of the formal abandonment of that portion of the pike between Woodstown and Swedesboro.

—William F. Alexander, President of the Commercial Ice Company, died at his late residence, 1510 Brandywine street, early Friday morning, of peritonitis. He was ill only three days. Mr. Alexander was born in Philadelphia in 1844.

—The Baltimore and Ohio Railroad Company has notified the Gas Trust that it is ready to lay its tracks through the Market street works property, and will begin the work in a few days. A 36-inch supply main will have to be removed.

—The number of cars of lumber daily passing over the Philadelphia and Erie Railroad for this city from along the line of that road during the past two weeks amounts to 100. It is expected that the number will be increased to 200 in October.

—The district south of South street and east of Broad street has been suffering for some time from a short water supply. The Chief says the trouble arises from the Broad street mains being entirely too small, and that the trouble will soon be removed.

—The Burlington county Board of Assessors met at Mount Holly, N. J., on Monday last and fixed the rate for school and county purposes at 75 cents on the $100. The total valuation taxable is $25,000,000, and the amount to be raised for all purposes is $190,000.

—The returns issued by the London Board of Trade show that the imports decreased during August as compared with those of the corresponding month in 1885, £1,490,000, and that the exports increased, as compared with those of the same month last year, £250,000.

—Walter Scott, Teller of the Manufacturers' Bank, has resigned from that position to become Cashier of the Tenth National Bank, on Columbia avenue. R. H. Rushton, Cashier of the Tenth National Bank, has been appointed to a similar position in the Fourth Street National Bank.

—The Cambria Iron Company, at Johnstown, has petitioned Governor Pattison for the appointment of 188 policeman, whose names have been submitted. The company does not anticipate any trouble, but its property is so widely scattered that such precaution is deemed necessary.

—The School Board of the Twenty-second ward has presented a resolution to the Board of Education asking for 7,200 from the unexpended $50,000 appropriated by Councils for new school buildings, to be added to $10,000 already appropriated to this ward, with which to erect a new school building at Coulter and Morris streets.

—The architects are divided as to the merits of an article, criticising their profession, which appeared in the columns of the Real Estate Record on August, 9th, Brick Bats rejoinder to Mr. J. C. Worthington's communication has excited considerable comment. Much more upon the same subject is promised at an early day.

—In the suit of the city of Pittsburg against Dr. Hostetter to recover damages for breach of contract on the part of Andrew Hartupee, contractor for the new city water works, a compromise has been effected yesterday by Dr. Hostetter agreeing to pay the city $143,000. Hostetter, who was surety for Hartupee, has paid to the city altogether over $400,000.

—At a meeting of the Building Trades' Council, Thursday evening, at Eighth & Locust streets, the following officers were elected: President, J. L. Duffy; Vice President, W. J. Ford; Recording Secretary, C. E. Burleigh; Financial Secretary, P. T. Purcell; Sergeant-at-Arms, Charles Knopf; Trustees, I. F. Heise, James Dey and Chas. Fritz.

—The will of General Lloyd Aspinwall, written on half a sheet of legal cap and dated May 1, 1886, was filed on Friday at New York. He directs that all his property, real and personal, with a few exceptions, is to go to his wife. To his son Wm. H., he gives $10,000; the same to his son Lloyd, Jr., and his grandson Lloyd Aspinwall. He bequeaths to his friend, General William T. McMahon, $2500.

—Messrs. John J. Weaver and Wm. Harkness, Jr., who as citizens obtained a preliminary injunction to restrain Geo. W. Blabon from laying a drain across the back yards of twelve houses on the north side of Hunting Park avenue, east of Twenty-second street, under a permit issued by the Board of Health, last Wednesday, withdrew their application, and suit was begun in the name of the Commonwealth.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, SEPT. 13, 1886.

THE architects speak encouragingly of fall and winter work.

THE servant girls now want to become Knights of Labor.

THE tearing out of house fronts and putting in stone continues.

AN unusual amount of repairing has been done in churches this summer.

EVERYTHING is quiet in the Building Trades. Country labor is attracted to some extent to the city.

THE academy of the Protestant Episcopal Church at Locust and Juniper Streets has been greatly improved.

THE Knights of Labor of Charleston have injudiciously advanced the rate of wages during the rebuilding period. Business is business.

THE slate quarries have been worked full time all season, except in a few cases where the location was not favorable for close competition.

IT is sad to contemplate that business is to be still further hampered with labor troubles. The outlook for Fall trade, outside of possible labor contingencies, was never better. The alarm felt at the outset of the labor troubles, and which continued during the Spring, naturally enough expressed itself in trade circles; but now that the alarm has subsided, and buyers are already in the market and feel justified in buying largely, it is too bad that differences between employers and workmen, even in isolated cases, cannot be permanently adjusted.

BUILDING is booming in the northwestern section of the city. There are rumors of important building enterprises to be undertaken next year.

THE roofers have had a large amount of work on hand all summer, and several large contracts have been placed within a few days for work to be done next month.

THERE is certainly a bad out-look for the glass workers of New Jersey. The manufacturers seem determined to keep their factories closed until they are allowed to employ apprentices. The rising generation may yet have a chance to become something better than tramps and editors after all.

IT seems difficult of explanation why two or three large fine structures for business and manufacturing purposes, should be permitted to stand almost without a tenant for months, in a business centre, while hundreds of little manufactories and shops, and office keepers are packed away like sardines in some old structure with narrow stairs and no light, no elevator and no accommodations worth speaking of. Such is the fact, There are two or three splendid equipped buildings of from four to six stairs, almost tenantless. Are the rents too high?

BY hook or crook the Traction company will squirm out of its pretended magnanimous agreement to bear the extra expenses the city will incur by the addition of a conduit to the new market street bridge.

A deficiency of "carbonate of lime," in the material of which the new bridge is to be built may not be offered as an excuse for the Traction company for not paying its share, as was the case in the pavement around the new City Hall, but the refreshing ingenuity of Mr. Widener will be equal to the emergency, and don't you forget it.

SOME one says rents ought to come down on the thoroughfares between Vine and Pine streets. What particular good will that do. What is more needed is, that the floor space in that business section be multiplied two or three times by more elegant business structures. There are a few creditable structures on Arch, Filbert, Market and Chestnut streets, but the great majority of them are remnants of a past generation. They ought to be torn down and when property owners fully understand their highest interests they will disappear. Property is and ought to be too valuable for the block after block of these dingy old houses that were built when old men were boys to occupy the grounds now.

TWO or three builders want to know who are building houses of the bonus pattern. We dont know. It would be a serious allegation to make. Workmanship varies in different houses and different jobs; as a rule good substantial work is done. Tenants and buyers of houses do more or less complaining about the multitude of repairs even in the comparatively new houses. Under mistaken notions of economy a good deal of infirm house building has been done in times past. The tendency is to improve in workmanship and to use better material. It is well it is so. Carelessness does not pay even the builder of cheap houses.

GUNNERS RUN was declared a nuisance by the Board of Health on the 4th inst. It seems hardly possible that such a palpable nuisance should have been tolerated for so long a time. In our issue of May 31st ult., we pointed out the filthy condition of the run at that time, and called the attention of the Board of Health to the fact that our reporter had counted six dead and rotten carcasses of animals, saw lots of filth of all kinds, dying vegetation, the water the color of ink, with a scum like oil floating at the top and a vapor arising therefrom that almost took away his breath, and that all this filth was emptying into the Delaware river a short distance from the Kensington Water Works. We have also quite recently referred to the prevalency of the worst type of typhoid fever in this vicinity, and yet our incomparable Board of Health has just found out that it is a nuisance, and have condemned it. It is this old fogyism that merits for our city the appellation of "country village."

REAL ESTATE prices in large cities have been subject to ups and downs, but it may be questioned whether actual values have changed much. Actual values are difficult to ascertain, experts often as widely differing as contractors differ sometimes, in their trials for work. Nothing has done so much to determine the values of properties in New Yore city and vicinity, as the existence of an exchange. It is a levelling machine. Individual notions and erroneous impression must give way before it. It is simply because one property is placed in competition with another property through the mediumship of an exchange, that the true value of each and all are ascertained. Under the old system, where each buyer sought each individual seller, the tendency naturally was to enhance values, or at least to encourage the asking of the highest price, which the seller imagines there is a probability of getting.

This has been demonstrated in several instances this year. There is to-day considerable business hanging fire in this city, simply because the right sort of competition cannot be had between the selling parties. Much money is no doubt lost to buyers, through not having the benefit of this controlling factor.

The opportunity for reflection on the subject of a real estate exchange has considerably enlarged the area of mental vision as to what a real estate exchange could and should do. The next meeting will develop more liberality, more comprehension of the needs and opportunities, and when the start is made, it will be made better than would have been possible last spring. The intention is to have an exchange worthy of the real estate interests and of the city of Philadelphia.

FAMILY pride if not decency's sake should have suggested to Mayor Smith's relatives the propriety of with-holding the publication of their family troubles until after the present investigation at least.

THE collecting of segar stumps from the streets and filthy gutters by Italian children is a matter that should be looked into at once by our Board of Health. Besides demoralizing the children through filthy associations, it is really a question that involves the health and safety, and perhaps the lives of a large number of people. It is well known that these stumps are collected as a source of profit. They are picked from the gutters while soaked with filth; they are then washed and sold to the manufacturers of cigarettes and smoking tobacco and put upon the market under fancy brands and are bought and consumed by thousands of people who have no idea of the risks they run. Many of these stumps are thrown away by men afflicted with the worst form of syphilis and other blood diseases, besides which it is not certain that other contagious diseases are not retailed indiscriminately as so much per pack. This is too serious a question to be trifled with, and should be stopped anyhow, if only for decency's sake.

THERE appears to be a little falling off in the demand for small houses among buyers. Renters are picking up everything offered. Buyers say prices are too high. Owners and agents show no disposition to shade their figures. A good many hundred houses have been and are being built to sell, and investors will be disappointed if they can not find buyers. A dearth of houses is not an immediate probability but a dearth of houses to sell is a probability. It may be supposed that houses would sell if only a reasonable margin were insisted on. It may be thought that the falling off in demand is due to the unreasonable prices asked. While these facts do not appear they may exist. Big margins on houses at the present rate of construction is an impossibility. Competition will control here as elsewhere. It only helps the renters to obtain tenants more easily and better rates, for owners to insist on extreme prices. As time goes on it will be more and more difficult to sell houses anyhow, because of the ultimate high cost under the instalment system. While there is no complaint that rents are unreasonable there is a possibility of a depression in rents from several causes, none of which, however, are operating at this time. Cheaper rents will discourage ownership. The Building and Loan Association will make steady progress in distributing ownership, while individual efforts will be discouraged. Those who can afford to stand out of their money for years can and will afford to sell. The margin credited by defaults is an important item just as live insurance margins are made considerably greater through withdrawals.

THE suggestion to loan Charleston or rather its property owners, five million dollars or so to rebuild is a good one, from a business standpoint. Charleston has gone back simply because its people of late years were too proud to work. "Trade," there, was almost as dishonorable as among the English nobility. Nevertheless, there is an element there that would take hold if the opportunity was presented. Charleston's young men have left for better opportunities elsewhere. They have found them in Atlanta, Columbus, Birmingham, and a score of other rising industrial cities in the South. Charleston can be made a new city, a strong commercial city, and capital can do it. Real estate now almost valueless could be greatly enhanced. The valuable shipping facilities could be improved, commerce could be increased, industry could be encouraged, Charleston can become the New-York of the South as it was in Anti-bellum days.

The attempt ought to be made because it would pay to do so. Chicago arose out of her ashes a mightier city. So Charleston can arise from the debris of her earthquake and become by the magic touch of capital and the inspiriting thrill of a new enterprise, a new city—an honor to the South.

WHAT rules should govern church architecture? Real originality, real genius knows no rules. Shakespeare made grammar, Napoleon established new war methods. Americans have followed too closely the European notions of art. If a religious enthusiast was an architect, and was able to build a church for himself, he would build it different from the average church. Our modern church is built too much with the idea and thought of death in view, whereas the idea should be that of life, for what is death but the gateway to a higher life. They are too gloomy, too grave-like, too suggestive of the darker side of religious contemplation. The church should suggest eternal facts, and future probabilities. It should be emblematic of future life. Its little bee-hive doors, down in one end of a massive stone structure are ridiculous. They have a "stay out" look and a "get out if you can" look when you get in. The inside looks like an immense stone coffin, with bespattered windows suggesting in a faint way that there is an outside world. About some of our churches there is the appearance of the remnant of a stone quarry having been dumped ont and piled up. The roofs are not in taste. The spires are simply spires. Let us pitch our church architectural notions out of the fifth story window and start anew.

STEPS are being taken for the formation of a company to move furniture from house to house. The projectors propose to obtain from each real estate agent from time to time a list of his tenants who will move shortly. The tenants will then be waited upon by the company and arrangements made for moving. The company will have printed forms to be filled up and mailed by the agents to their office, giving the names and addresses of occupants whose leases expire. There will be certain private marks to indicate the paying qualities of the tenants; whether they leave their houses in good or bad condition; whether they are desirable tenants, and so on. This information will be supplied regularly to all agents furnishing news. It will be strictly private information. The intended effect of this system is to enable an enterprising company in the first place to secure business, and in the second place to furnish landlords and agents with information which will do them some good. There seems to be nothing wrong in this, excepting that the present movers will look upon it as a monopoly. The intention is to have large, conveniently arranged vans, such as they have in London and some other foreign cities, by which the entire contents of a large house can be moved at once and with less danger of injury. There are a good many people in this town who live without paying much rent, dodging from house to house between two days. If this class of people can be caught it will be a service. The system seems to have some good features about it. Real estate men are being called upon to lend their assistance.

MR. JOSEPH L. CAVEN, who is now travelling in Europe, has favored the *Times* with a letter, describing the manner of street cleaning in Stockholm, Sweden. It seems, according to Mr. Caven's letter, that the owner of each property must provide for the cleaning of that part of the street in front of his premises. He can either clean it himself or employ a servant or an association to do it for him. The Philadelphia *Record* usually very practical and particularly sound on municipal affairs, recognises great merit in Mr. Caven's suggestions wherein he recommends the adoption of this system by our own city government, and the *Record* pleasingly points to the present clean condition of Chestnut street as an evidence of what individual enterprise can do. Individual enterprise is one thing and compulsory cleaning of street fronts is another. If the owners of property in this city were all Singerley's or Wanamaker's, suggestions of this kind would be needless, but the fact is a system similar to

that now in vogue in Stockholm might do on Chestnut or similar streets, but to apply it to our whole city is only to invite dirtier streets and greater dangers, for when it is borne in mind that it is only by the closest scrutiny and the most persistent efforts of the Board of Health that the occupants of these self same premises—many thousand of whom are owners of the property—can be made to keep their cellars from becoming little better than death-breeding pest holes, spreading contagion and pestilence right and left, it is a far fetched idea to suppose that they can be made street cleaners par-excellence compared with the contractors we now have. The fault is in our own weakness, municipal incompetence, the result of our elective system. The ring of contractors are beyond any question not only all-powerful from the prostituting influences of their money but this very power is derived from that worse prostitution of what should be regarded as a thing too sacred to be trifled with, but which, seeming ly, goes no farther in the minds of most men than allegiance to party and the consequent elevation of wire pullers who seek an office only for the sake of the shekels this self- same prostitution will bring them, to wit: the elective franchise.

So long as our citizens vote for the "regular nomination" without regard to qualification or respectability, just so long will contractors who shirk their duty grow fat and flourish.

A NEW class of men have appeared in trade and are making their influence felt. These men are the high-priced men. They do business on the merits of their work. They do only the very best work, and strive to build up the name of being a high-priced house. It requires some courage to do this class of business, but we find these firms are invariably prosperous. Many people are sick of cheap houses and botch work. The man who thinks price alone governs trade labors under a mistake. Price does govern trade with the poorest class of customers in the world, a disagreeable class to do business with, a class who want everything for nothing, and no amount of cutting in the world will satisfy them. They are often, too, the poorest paying class of customers in existence. We are glad the high-priced men are making their influence felt, and we have no doubt of their success.

AN important consideration in the use of stone for expensive buildings is that of having it quarried, stored and seasoned for some considerable time before being hewed, or at least before being placed in the walls By these means the water naturally contained in the stone is allowed to evaporate, and the stone is tested as to its quality. On breaking open a piece of the hardest granite or quartz the that has just been extracted from a point in earth below the permanent water-line, and often from much above that line, the several walls will be found to be completely saturated with water, and in quantity sufficient to moisten the hand or saturate a handkerchief. Seasoning adds to the cost, but the money so expended is well spent in preventing the otherwise rapid wasting away of the stone from rains, frost or other atmospheric influences, which last, especially in cities, soon acts upon the surface of newly-quarried stone.

Stone that is quarried one day and built into a wall the next day is in a green state and unfit for durability. It is at its weakest point of endurance either of pressure or of atmospheric influences. Its pores are open and ready to absorb not only moisture, but all the gaseous and disfiguring influences which tend to its destruction. Every stone mason knows that to get a polished surface on a stone the same must have laid for some time out of the quarry and exposed to the drying influences of the sun and weather. This is a sufficient hint to the builder to see to it that stone of which he would rear a permanent structure must be thoroughly seasoned before it is placed into a wall.

OUR New York contemporary states we are having an unprecedented movement in real estate—in building as well as buying. Under the head of buildings projected, our readers will see that the August of this year is far ahead of the August of last year and the year before. It will also be noticed that more money has been put into new structures for the eight months ending with August 31st, than for the whole twelve months of 1885. At the present rate of building, from sixty-five to seventy million dollars will be expended on new buildings this year against forty-five million dollars for the whole of last year. If this were an isolated fact it would simply show that New York was advancing in population and wealth with rapid strides, but the same activity in building is true of all cities of the country. There is a vast movement of capital into real estate, greater than ever before known in the history of the United States. The official record of conveyances tells the same story, for the eight months show some 9,500 conveyances against 7,600 last year, while the consideration for the past eight months is some $48,000,000 more than for the same period last year. Unfortunately the amounts paid for realty are not accurately given in the official list, and in 1,600 cases no sum is mentioned in the deeds; but it is safe to say that about $200,000,000 has been invested in realty purchased during the past eight months, which is about the amount expended during the twelve months of last year. Of course this did not require $200,000,000 of new money, as the transfer of property involved the assuming of the old mortgage obligations by the new purchasers. Philadelphia is trotting closely behind her big metropolitan cousin.

A NEW YORK letter states: A man who had been riding up town said to me yesterday: "I have never seen such activity before this in New York in the building business." And he was right, I presume. I know that it is the most wide awake time in building that has been seen during the past five years. Before that I was not interested in the growth or development of the city from year to year, although I remember the changes in general from the time the cattle used to graze in the pastures about Forty-second street.

The projections for new buildings and alterations for the past week numbered 269, and are a sure evidence of future operations. The permits for new buildings in both cities were phenomenally large for the season, almost double that of the same week last year, and altogether of a nature to please those who furnish lumber, as generally the buildings will require much lumber, only a few being of iron construction. Spruce and yellow pine timber are being extensively used, and the new buildings to follow will still call for large quantities.

The manner of buying at present in vogue with some builders, especially in Brooklyn, is rather vexing to the yard men. One day the builder will step in and take a few floor timbers and material for the outer work of the first story and have it delivered. Not another move will be made in buying until something else is wanted; then he will purchase enough for two or three days' more labor, and so on, buying piece-meal, thus securing himself from any loss by idle stock if there should be a strike. This is a positive proof of the want of confidence. Formerly the builder would prepare his schedule and order the whole at once. If a man came along who had not been a regular buyer he would have to pay an extra price for this peddling lot; but the yard men do not wish to go back on old customers, fearing that it would drive them to other yards.

THE *California Architect and Building News* reports a case involving points which have made trouble in other States. The story runs thus: Some year or more ago, a lady called on Mr. T. J. Welsh, architect, and entered into an arrangement for plans, specifications, etc., for two buildings, to cost $10,000. The agreement for compensation was fixed at five per cent. for full professional services, and two-and-a-half per cent. should the buildings not be erected. They were not, and the architect allowed his claim to remain unsettled; to save an "outlaw," suit was commenced in a justice's court for the sum of $250, being an agreed sum for plans, specifications, etc. Rather than meet the case in court, the lady, by her attorney, proposed a compromise, and the claim was settled for $150, and receipt in full passed. No demand at time of settlement was made by the client for possession of the plans, etc., but a few days afterward the architect was asked to surrender possession of the papers. This he refused to do upon the ground that all plans, drawings and specifications were the property of the architect producing the same, and that the client had no right to their possession beyond the uses to be made of them in case the work went on.

The lady client not being satisfied with this, upon the advice of her attorney, commenced an action against the architect to recover the plans, etc, and also the money paid him, claiming that he had not performed his contract with her. The case occupied about a full day of the time of the court, and the testimony adduced by the architect proving conclusively that by the rules of the architectural practice in this State, and generally throughout the United States and in Europe, the plans and specifications made by the architect are his, and not the client's, possessory property, beyond the uses for which they are intended to be applied in the progress of the work proposed to be done under them. Judgment was rendered in favor of the defendant.

PHILADELPHIA ought to be able to pay as good school salaries as any other city in the union. Its facilities are not inferior to any city in the country, not even Boston, which claims to have the best school system in the country.

The average pay of Philadelphia teachers for 1885, exclusive of what was paid to sewing and night-school teachers, and including the salaries paid in the High, Normal and Manual Training Schools, was $517 51. Contrasting this average pay with that given in the cities of San Francisco, Boston, New York, Chicago, Washington, D. C., Newark, Milwaukee, Minneapolis, St. Louis, Brooklyn, Kansas City, Detroit, Indianapolis, St. Paul, Providence, Louisville, Cincinnati, Buffalo, Baltimore, Nashville and Pittsburg it will be found that the cities named pay on an average $129 86 or 25 4-7 per cent. more per year to a public school-teacher than is paid by Philadelphia.

Contrasting our city with the first four cities in the above list we have the following results: San Francisco pays her teachers on an average 89 9-10 per cent, Boston 80 3-5 per cent, New York 37 1-10 per cent and Chicago 36 4-5 per cent more than Philadelphia pays to her teachers.

A CITY contemporary lately contained an article in its farm department, which argued that the time would soon come when brick would have to be substituted for wood in the building of houses and barns on farms, because lumber would become so scarce and high. That time may come, but it will be in a future so dim and distant, that is scarcely worth while talking about it now. Pine lumber for farm building can be now bought as cheaply as five years ago. It has been higher within that period than it is now. There certainly has been no visible sign of a lack of supply. When we consider the new sources of lumber that are being developed in the south and on the Pacific coast, there does not appear to be any reason why farmers should go into the brick business for the purpose of obtaining building material. Farmers will be able to build wooden houses and barns to their hearts' content for many years to come.

REFORM has been started in the City Controller's office. The Controller, under date, of September 9, called the attention of department heads to this ordinance of Councils approved November 28, 1868: "That on the receipt, by any of the departments, of money due to the city, it shall be the duty of the person receiving the money to obtain a signature of the person paying the same to the memorandum of payment on the books of the department. The said memorandum of payment to be dated the day the money is received, and to be attested by the clerk or other person receiving it."

The provisions of the ordinance will be brought into effect by this order of Controller Dechert: "Hereafter the auditors of this department, in auditing the accounts of the several departments of the city, will require a strict enforcement of the provisions of the ordinance." The circular was mailed yesterday to each officer having at any time the funds of the city in his hands prior to their final resting place in the municipal treasury.

The U. S. Treasury Balance.

The United States Treasurer states that on the 10th instant the balances in the Treasury were as follows:

Gold coin and bullion, $239,532,145; silver dollars and bullion, $185,203,739; fractional silver coin; $27,701,485; United States notes, $44,833,165; national bank notes, $284,907; national bank notes in process of redemption, $2,021,916; deposits with national bank depositories, $13,716,668; total 513,297,-025. Certificates outstanding—Gold $83,052,-137; silver, $89,636,522; currency, $9,200,000.

Landlord and Tenant.

A rather novel suit has just been closed in the Camden District Court. Mrs. Sarah A. Peacock rented a house on Kaighn avenue of Casper Grant, who agreed to make certain repairs. He subsequently refused to comply with his promise, and the tenant then brought suit to compel him to do so, and the jury returned a verdict for her in the sum of $162.50, being the estimated amount of the cost for the repairs.

A New Combination.

We are informed on good authority of a combination being formed in connection with the manufacture of whiting and English cliff stone, and Paris white, which combination will take in Philadelphia, New York and Boston. The reason, as ascertained, this action as taken is from the fact that manufacturers are losing money (say one dollar on each ton), and it is the intention of this combination to fix the prices as follows, so as to enable them to make a living profit: Commercial whiting, 40 cents; Gilders whiting, 65 cents; American, 75 cents: and English cliff stone Paris white, 75 cents. This change has been found by manufacturers to be compulsory. The consumption of this material is not so great in the Eastern States as in the Western by a big majority, the reason shown for this being very plain: in the West soft coal is greatly used, if not entirely, which naturally blackens the walls, and is the cause of wall papers being less used, and calsomining taking its place, while in the Eastern States hard coal is used, which allows of houses being handsomely decorated with wall papers. In 1856 Philadelphia had but one manufactory of this kind, which was Mr. Chas. Hasse, who at that time was making some hundred barrels weekly, while to-day the same firm, which is carried on by his son is manufacturing. The production in this City instead of 5,000 as formerly 75,000 annually. A few figures will at once go to show the necessity of this combination now organizing. In 1856 manufactured material was fetching exactly the same prices as to-day, but as a contra account, we find that in 1856 chalk was worth 25 cents per ton, while to-day it realizes $3.00; and again, labour at that time for this particular work was worth $4.00 weekly, against (at the lowers), $12.00 to-day. So that under all these circumstances none can, we think, but agree that this combination is a correct one, and should have been organized sooner.

Charters Granted.

Honesdal Electric Light, Heat and Power Company; capital, $15,000. Philadelphia and Conshohocken Stone Quarry Company; capital, $100,000. Bridgewater Building Association, of Beaver county; capital, $208,000. Schuylkill Valley Knights of Labor Stove Manufacturing Company, of Spring City, Chester county; capital $30,000. Renovo, Gas and Oil company; capital, $5000; to mine gas and coal in Clinton, Lycoming and Centre counties, and to supply consumers in Lock Haven, Renovo, Jersey Shore, Williamsport and Bellefonte. Excelsior Oil Company, of Oil City; capital, $500,000; to refine and manufacture petroleum and transport it by pipe line; T. D. Cummer, of Cleveland, is Treasurer. Excelsior Pipe Line Company, of Oil City; capital, $10,000; to transport and ship petroleum in Venango, Clarion, Butler, Washington, Forest and Warren counties. Bellevue and Davis Island Incline Plane Company, of Pittsburg; capital, $25,000.

—The Chicago and Connellsville Coke Company, of Scottdale, Westmoreland county, with a capital of $300,000.

Charleston Damages.

The City Appraiser publishes the following estimate of the damages by the earthquake. The assessed value of the real estate for the year 1885 was $16,753,760. The reassessment completed August 31, 1886, on a basis not exceeding 90 per cent. of the market value, was $20,000,000. This does not include Government, State, county, city and other public property, nor churches, schools and other charitable property exempt from taxation, which willamount to at least $6,000,-000 more. A careful estimate of the damage done by the cyclone of August, 1885, was made amounting to about $1,500,000. Of this about $1,000,000 had been expended during the past year to replace the damage by the cyclone, in addition to which permits have been issued from this office since August 1, 1886, for new buildings and improvements, the actual estimated cost of which is reported at $486,975, which from experience does not represent over three-fourths of the actual cost.

—Peter Herdic has leased the water works at Canton, Bradford county, Pa.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE real estate interest in Media, was never so prosperous as at the present time, says one of our prominent real estate brokers.

J. T. THORNTON, builder, South Fifth street, is erecting forty compact two-story dwellings with ornamental brick fronts and brown stone trimmings.

LYON & HENRY, 737 Walnut street, have just completed the sale of twenty three-story houses, situated on Twenty-fifth street and Brown, between Brown & Parish, for $8400.

GEO. W. CARSON, 1916 Columbia avenue, reports renting of houses over the usual demand for this season of the year and collections good. Within the last few days has just completed the sale of a property 1541 Page street for $2800.

WM. S. RINGGOLD & Co., 629 Walnut street, real estate brokers and conveyancers, report prospects in real estate as being very encouraging, and that within the last thirty days considerable business in mortgages and transfers has been transacted.

AT A meeting of the Board of Directors of the Commonwealth Title, Insurance and Trust Co., held August 20th, the following resolution was adopted: That an additional 15 per cent. (the second installment) of the stocks of this company payable November 1st, to the Penn National Bank.

GEO. F. GIBSON is erecting fifteen houses on Berks, Seventeenth and Monument avenue. They will have a three-story front and two-story back. The steps and trimming will be of brown stone. The sanitary arrangements which are of the most improved, will be carried out by L. O. Howell, Jr.

J. R. MASSEY & SON, Thirteenth and Green streets, real estate brokers, has just completed the sale of a three-story front dwelling at Thirty-first and Page street for $1400. Mr. Massey looks upon the prospects of the real estate interest for this fall, as being bright, they report medium size houses as renting freely.

WENDELL & SMITH, 1430 Penn Square, builders and contractors, are erecting five cozy two-story brick dwellings on Thomas street, Frankford, for Mr. Thomas Gilmour. They report the building interests as being very satisfactory and the inquirers for houses to purchase, numerous, but the results so far are somewhat slow.

F. KLEMM is building ten houses on Ontario street, below Twenty-second street. They will be three-story back and front, and set back from the building line. They will be finished in the most approved style. The sanitary arrangements will be executed by L. O. Howell. The builder is Mr. B. M. Walker, 3869 Girard avenue.

FRANK HESS, 205 South Sixth street, reports that he never knew more houses renting than at the present, and, as far as his experience goes, never fewer buyers, he reports inquiries as being numerous, but speculators are looking for properties for less than cost. He has on his books some very desirable properties which he will dispose of on easy terms.

C. G. Henderson, 1428 Columbia avenue, real estate broker, has completed the sale of one of his new houses, situated on Nineteenth and Berks streets. They are three-story with fine white marble fronts, for $5500. This row consists of nine in all. Mr. Henderson will shortly build five others on Nineteenth street, south of Berks. The corner to be a store.

JAMES SADLIER, 605 Walnut street, real estate broker, reports that house renting with him is all that can be desired, he not having an empty house on his list, and the demand for them is still increasing, more especially central. Mr. Sadlier, in reviewing the real estate market, is of opinion that it never looked more flourishing than at the present time.

DR. WARDER is making extensive alterations to his house on the N. E. corner of Sixteenth and Master streets, for the purpose of making it into a Homœopathic Hospital. Mr. L. O. Howell, Jr., is putting steam heaters, perfection water closets, wash tubs and trays all over the establishment. The reconstruction of this building is under the doctors own supervision.

HARRY R. SHOCH, Builder, is erecting a fine stable on Montgomery avenue, east of Ridge avenue, it is being fitted up with handsome box stalls, the flooring will be laid on concrete and granolethic pavements, each stall will be severally ventilated which is governed by house drainage, it will be fitted up with water closets, wash stands, self feeding iron troughs The carriage house will be drained from the centre. The building will be two-stories, with ample accommodation for coachmen and hay loft

C. E. WILLIAMS AND R. E. WILLIAMS, now successfully carry on the business running under the title of Chas. Williams' Sons. This house since the 1st of June has been doing a very heavy business, employing over 50 hands, and are still being kept fully employed, and from business already done, and orders ahead, they feel safe in saying that, they will turn out some 400 "heaters," and some 2000 slate mantels. Amongst their specialties is a fine make of tile work, both of home and foreign production, for which they are having an increasing demand.

MESSRS. RICE & GILBERT, 2150 Ridge Road, Real Estate and Insurance Brokers say that they for many years never saw it brighter than at present, with them inquiries for properties are much on the increase, but complain that purchasers do not feel disposed to pay the demand made for them. They have just made a sale of two lots, at Twenty-seventh and Huntingdon streets, to Mr. J. D. Hevener who will shortly erect two dwellings on them, the cost of the lots was $800. Messrs. Rice & Gilbert will this season put up eleven two-story houses in the north west section of the city. With them properties are renting well, and have no complaints as to collections.

PAGE BROS., owning properties on the north side of Page street, below Sixteenth and Seventeenth streets, are making extensive alterations in the sanitary arrangements of these houses, by taking out the old privy wells and houses, and replacing them by thoroughly ventilated hopper closets, and thoroughly ventilating the whole sanitary arrangements through the house, making them equal to new properties. Each house will be severally drained to main sewer on Page street. The action of these gentlemen is a note-worthy one, and should be followed by other owners of old properties. We think that if this was made more general, our fine old dwellings would not stand empty many days. Mr. L. O. Howell, Jr., has the management of this work.

DORSEY & SMITH, 111 North Seventh street, are large manufacturers of heaters and ranges and also carry on an extensive business in bricklaying. They have just completed the Catholic Home, at Eighteenth and Race streets; also the digging, stone and brickwork of Holy Trinity Church on Sixth and Spruce streets; also the digging, stone, and brickwork of ten houses for Mr. John Forepaugh, and putting in heaters and ranges. They are at present engaged on the brick work of the Lasalle College, on Broad and Stiles, also building a fine stable for W. S. Frank, of which, Mr. Hewett is the architect; also making additions to St. John's Orphan Asylum at West Philadelphia. Mr. D. F. Durang is the architect. Mr. Smith in referring to the general outlook of the building trade reports it as being very encouraging, more than has been noticeable for some years past.

CHARLES WILLIAMS' SONS, manufacturers of heaters, ranges, grates, slate and marble mantels, 1132 Market street, will, on the first of next month have reached their 50th year on the one stand. In 1836 the firm was started by Mr. Samuel Lloyd, and was carried on by him until '45, when he took into the business Mr. Feltwell, and in 1850 Mr. Lloyd retired and was then replaced by Mr. Baker in 1851. The house again changed its name to Baker & Williams, the latter gentleman having been with the firm from its commencement, starting as an apprentice, and in 1857. Mr. Chas. Williams bought out Mr. Baker and run the firm under the style of Chas. Williams, which he continued to do until 1872, when he took into the firm his sons, styling the firm Chas. Williams & Co., and in 1878 retired from the active portion of the business, leaving the entire management to his two sons.

HEROY & COMPANY, 56 North Seventh street, are extensive importers of French and English plate glass and window glass. This firm have at present some very extensive contracts. One of the most important being from Messrs. Carlyle & Joy, painters and decorators on Chestnut street, to supply three of the largest French plates that were ever imported into Philadelphia, to be used in the building now in course of erection for Messrs. Hersh & Co., umbrella manufacturers on Market above Thirteenth street, on the north side. The size of the plates will be 13 feet by 10 feet 8 inches. The experience of this house is that within the last five years the demand for plate glass has increased at least 50 per cent. The demand in the Western States for plate is fast increasing, so much so that they are unable to meet the demands made upon them. The plate used principally in the Eastern States is for the most part imported, in consequence of our own manufacturers being unable to keep up with the demand.

New York Notes.

RENTALS during the past week have been fairly active, although up-town sales are few, and those of no special importance.

IN the tenement districts in and about the central part of the city values continue much about the same as at this time last year.

STORES in good localities on both sides of the city are difficult to get, and those only at advanced figures, with an increasing demand.

FLATS and apartment houses between Forty-second and Fourteenth streets are holding their own—the figures being about the same as last year. On the west side, however, above Forty-second street, there is a slight reduction, while on the east side the reduction is still more noticeable.

THE New York trade schools open their sixth season on October 25. There is an attractive display in the window of a New York plumber, of specimens of plumbing work made by the class in the plumbing department. The advantages offered by this benevolent and practical scheme of Col. Auchmuty are too well known to require elaboration.

IN the suburbs, particularly in New Jersey along the lines of the New York & New Jersey and the Northern New Jersey Railroad, there is a noticeable increase in the number of small cottages that are being erected, particularly at Carlstadt, Rutherford, Woodridge, Corona and other points where there is a marked influx of thrifty Germans who, on favorable terms, extending from periods of from three to five years, can purchase their dwellings from $2,500 to $3,000 apiece. The same feature, on a smaller scale is also true of some parts of Staten Island.

Western Notes.

THE call for brick during the present month has been greater than during the corresponding month in any previous year in the history of Chicago. The output to date from the yards in and about the city has been 240,000,000 bricks, against 200,000,000 for 1885, or an increase of 20 per cent. The price of bricks also shows an advance, and it is now selling at $7 to $7,50 per 1,000, according to quality, or from 50 to 75 cents above last year's figures.

THE Chicago Warehouse and Manufacturing Company is about to proceed with a building enterprise which will be of no small importance to the manufacturing interests of Chicago. This company lately leased the property at the southwest corner of Washington and Market streets which was sold to Jake Relm for $200,000 not long ago. It is intended by the company to construct thereon a six-story building which will be a centre for the lesser manufacturing industries, as it will be sublet with power to makers of small wares.

FOR the week ending August 28 the Chicago city department of buildings issued 93 permits for 145 new buidings, to cost $560,600, and to have a total frontage of 3,453 feet, or nearly two-thirds of a mile. Included were a six-story wholesale building, to cost $60,000; a block of flats on North Clark street, to cost $26,000, and a warehouse on West Lake street, to cost $60,000. During the month of August 399 permits were issued for 545 new buildings to cost $2,575,050, and to have a frontage of about 14,000 feet. It is worthy of note that the above record was made without the aid of any million-dollar permits. Only two structures were included which were scheduled as high as $100,000.

A Population of 973,641.

Accepting the basis of four voters for every seventeen of our population, which was the proportion that prevailed when the United States census of 1880 was taken, it would appear from the return of assessed taxable voters which was completed yesterday, that the total population of the city of Philadelphia is 973,641, or within less than 27,000 of a round million. The same computation indicates that the increase of our population since 1880 has been 126,661, or an average yearly increase of 21,110. In view of this large annual addition to our numbers it is not surprising that there is a constant demand for the new dwellings that are being built in outlying districts at the rate of 4000 a year. The average yearly increase of population in the decade from 1870 to 1880 was 17,295, so that if this deduction from the Assessors' lists correctly represents our growth we are moving forward with accelerating speed.—*Phila. Record.*

—The Atlantic City Council has appropriated $86,627.90 to run the city government for the coming year. The revenue is derived principally from taxes and licenses. Owing to the large increase in the assessments the tax rate has been reduced from 2½ to 2 per cent.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

BUILDING CONTRACT.

One who with knowledge of the facts enters into a contract to erect a building upon property which is subject to a prexisting mortgage cannot create a mechanic's lien upon such property to the prejudice of the mortgagee.

DEED.

A conveyance of a lot calling for the side of an unopened street, but which is laid out by law, as a boundary carries title to its centre; and on a subsequent opening of the street, the grantee is entitled to damages for the taking of the land.

EASEMENT.

A right of way by necessity arises not from mere necessity, but from a presumption of law, in the absence of any expression on the subject, that the parties did not intend that land to which the owner had no access should be retained or conveyed.

LEASE.

M. hired certain premises and entered into and occupied them under the terms of the lease. The lease was signed with fictitious name of E. as lessee. In an action of ejectment to recover possession of the premises. Held 1. That M. was estopped from denying that he signed the lease. 2. That plaintiff was entitled to recover although the proceedings were instituted against the fictitious person E.

MECHANICS LIEN.

A claim against the real estate of a married women must aver not only the contract of the wife, but that the work was done or materials furnished for the improvement or repair of her real estate, and substantially that the application was so made. The claim must also show upon its face that the work or material was necessary for the proper improvement or repair of her separate property. A mechanic's lien may be obtained for machinery furnished under a contract, though the work was not done upon the ground, but at the shop of the mechanic.

SALE.

By the sale of a lot bounded by a street, title passes to the centre thereof, if the street is not expressly or by express implication reserved.

VENDOR AND PURCHASER.

If a vendor who cannot in some material particular perform the covenants on his part, brings ejectment to recover the premises from the vendee for failure to pay the purchase price, he cannot recover until he has refunded the purchase money already paid and compensated the vendee for his improvements. If at an assignee's sale of real estate it is stipulated that if the vendee does not comply with the conditions of the sale he shall forfeit the amount of his deposit, that the vendor shall then be at liberty to resell, and the vendee shall be liable to make good any deficiency and the expenses of such resale, if in such case the vendee fails to comply and the vendor rescinds the sale and the premises are resold, the former may recover back all money paid by him above the actual loss sustained by the latter by reason of his default.

F. R. SHATTUCK,
Attorney at Law,
58 S. Third St.

—Camden, N. J., is to have a new $13,000 school house.

Gas Trust Business.

THE Committee on works of the Gas Trust directed the Chief Engineer to have excavations made and windows put in the retort house of the Ninth Ward Works for the purpose of furnishing light and air to the lower floor, West end of the retort house. The bill of Floyd & Kreischer for $72,000 for work done at the Ninth Ward Works was favorably reported to the Finance Committee. The Chief Engineer reported that the officials of the Baltimore and Ohio Railroad were ready to cross one of their mains with their tracks and offered to pay for all work if the the Gas Trust would remove the main at once. The matter was referred to the Trust.

THE Finance Committee reported Floyd & Kreischer's bill for payment. An appropriation of $192,419 70 was made to the cashier's account for the payment of bills, and an additional appropriation of $86,110 45, which, with the amount already to his credit, makes a total of $80,000 for the payment of wages due September 15 and all emergency bills.

THE Gas Trustees met last Friday and disposed of some accumulated business.

Chief Engineer Park recommended that the Board change the route of the new main to Germantown and Chestnut Hill, so as to avoid Washington lane, using Tulpehocken street from Wayne to Green instead, an account of the amount of blasting that would be required in Washington lane, the distance being about the same. The Board agreed to the change.

Mr. Park also reported that the Schuylkill River East Side Railroad Company was ready to lay its tracks through the property of the Market street works. He was authorized to do all the work necessary to allow the tracks to be laid, at the expense of the railroad company, according to an existing agreement.

Chief Walker, of the Electrical Department, submitted a list of gas lamps superseded by electrical lamps, and Superintendent Boon was directed to discontinue the use of such gas lamps. Communications were received from the Southwestern National Bank and the Bank of America asking to be made depositories of moneys of the Trust, which were referred to the Finance Committee.

Across the River.

—A large number of houses will be erected at all the watering places this fall.

—A number of new buildings will be erected in the grove before next season opens.

—A company has been organized at Ocean City to build an excursion house at a cost of $20,000.

—Hammonton has decided to purchase a hook and ladder truck and a small fire-engine.

—Owing to a large increase of the valuation of the property in Atlantic City, as shown by the assessors' returns, the tax rate has been reduced from $2 50 to $2 on the hundred dollars.

—The following appointments have been made by the Superintendent of the Philadelphia division of the Baltimore and Ohio Railroad: W. P. Savage, agent at Philadelphia; Perry S. Shaffer, cashier; L. R. Geisenhainer, acting assistant agent east side of the Schuylkill; G. H. McCully, assistant agent at pier 62, Dickinson street wharf; George W. Rutter, assistant agent at pier 35½, Brown street wharf. A. J. Benjamin has also been appointed acting agent at Chester.

—The Westminster School House has been vacated.

S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—a form of action invested to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S, September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—Of the $10,000,000 of the 3 per cent. bond case, about $1,000,000 up to the 8th inst., has been presented for redemption. The purpose of the new departure was to obtain bonds for redemption from individuals and corporations willing to convert them into cash to use in more profitable investments, and thus obviate the necessity for calling bonds held by national banks, thereby forcing a surrender of national bank currency. The bonds redeemed under the Treasury invitation were surrendered by parties other than national banks. It is not expected that the entire $10,000,000 will be surrendered within the time specified, but whatever amount is thus presented will save the bonds of the banks to that extent.

Book Reviews.

Seaside and Southern Houses. Price $1.00. Sent by mail free of postage to any part of the world. Wm. T. Comstock, Publisher, 6 Astor Place, New York.

This is a series of twelve 11x14 plates, each giving plans and elevations, with some suggestions of detail, mostly for inexpensive frame cottages, estimated to cost $1,500 to $2,000 each. The designs are furnished by New York architects, whose names are attached in each instance. In general, the plans seem to be well arranged, and the exteriors are quite picturesque, while showing a simplicity of ornamentation which harmonizes properly with the aim to provide for cheap cottages. The authors' addresses being given in full on each plate, it is easy to apply for further information as to any design which might be selected for adoption. No definite estimate of cost is given for any individual design, the variation in prices in different localties rendering such estimates unreliable.

Specifications for Frame or Brick Buildings Costing $1,500 to $10,000. Palliser, Palliser & Co., New York.

One of the most difficult parts of the architect's task is the preparation of the specification, so that the particulars of his work shall be clearly presented and nothing be lacking. It is a document which is to specifically—not generally or according to an "*intent* or *meaning*" more or less perspicuously expressed—include the details of all parts of the construction and finish which go to make up the perfected building. For this end is required a logical and orderly mind, perfect familiarity with all the details of construction, the nature, production and conversion of materials, the methods of workmanship common to the many hardicrafts which have their part in the building, and clear and concise expression. That these qualifications are universally possessed by architects is very much to be doubted. The average specification is not only very general and vague, but is also defective, so much so that it has become almost an axiom that "one cannot build without having a bill of extras." That these extras come only because of changes in, and additions to, the work as originally planned, is very seldom the case. They most frequently arise from positive omissions in the specifications, and are most vexatious, both to the architect and client.

The intention of the revised edition of the specification before us, is that, by thoroughness and conciseness, while at the same time it is a labor-saving device, it shall commend itself to practitioners as a valuable aid in the routine of office work.

In general scope the specification is thorough and well covers all points; it is fully abreast of the times, while in many details it shows the results of careful study and a mature experience. In these especially, it may be followed advantageously.

The chief difficulty of the specification is that it is intended to serve equally well for buildings varying in cost from $1,500 to $10,000. Experience will readily show that the specification for a first-class house to cost $1,500 is essentially different from the specification of one to cost $10,000. The same specification can only be *made* to apply by restricting the former to a size that would fail to give the average minimum accommodation one must always assume to be required for the usual domestic features. The limit of least size is quickly reached, and the effort to bring this within the low price results in economizing in labor and workmanship. A larger building naturally carries with it better workmanship.

The specification as printed, therefore, would have to be materially modified to meet the exigencies of the class of buildings known as "small and inexpensive cottages."

As a form or skeleton on which to model a specification, the publication is most excellent. If all its stipulations and requirements were lived up to, a most thoroughly built house and one very superior to the average production would be the result. Many of the details mentioned are in the line of the best workmanship. Of ordinary brick-work the specification is very concise, while at the same time it involves the vital principles for a thoroughly good brick walling. The carpenter's specification is very full in items, and the requirements of most of them exact and exacting; as for instance, "Mantels," "Pantries," etc.

The "Painter's" specification, as a general document applicable to houses of a broad range of cost, is highly to be recommended. The same may be said of both that for "Slating" and "Tinning." As these three handicrafts have a relative degree of uniformity for all houses of the same class, they are consequently among the most valuable portions of the publication, and are capable of being used more often in their entirety.

The "Plumber's" specification while being a good model, does not have the same universal application as those just named. Slightly differing requirements in this department of building entirely change the character of the specification.

In general form the specification is well presented, and but few suggestions could be made for its improvement. One of these would be, to print the several subdivisions so that they could be detached from the main body of the paper and consequently be more conveniently used both in obtaining subestimates and in the prosecution of the work. For instance, in the mason's specification, brick-work, stone-work, iron-work, plastering, etc., should be practically printed separately; the new subject beginning a new page—never commencing in the center of the page. The same suggestion would also obtain in respect to the carpenter's specification, where separate divisions would be made for framing, doors and windows, stairs, hardwood or interior finish, etc. This method, while it might increase the number of pages, would give enlarged space for interlineations and additional clauses, and tend greatly to a more distinct understanding of the work. The process has as good an effect on the architect as it does on the building. Experience has proven that seeming trifles like this, whose object perhaps is only a greater clearness of presentation, produce, remarkable results in the subsequent work. Another suggestion is the use of a tougher quality of paper that will bear the rough usage incident to building operations.—*Building, N. Y.*

We have a large stock of these goods new and fresh this season. Beautiful patterns in SEERSUCKERS, ALPACAS and SILKS. Foreign and Domestic manufacture. But our large stock of MEN'S BUSINESS SUITS is what we want you to see before you buy. Novelties constantly being received for BOYS' and CHILDREN'S WEAR. The Norfolk Takes the Lead this Season. We never before carried such a select stock in MEN'S FURNISHING.

Browning, King & Co.

910 & 912 CHESTNUT STREET.

THE

Day Sewed Shoes.

We wish to call the attention of the public to our principal object in opening the Day Sewed Shoe Store. The Day Sewed Shoe Manufacturing Co. was organized to introduce the Day Sewed Shoes, and this could only be brought about by getting the manufacturers to make them, and the quickest way to accomplish this was to give them this opportunity to dispose of their goods. We make our finest goods at our own factory, and are careful to have every pair perfect. We earnestly request that every pair of shoes purchased of us be returned for exchange if not as represented, whether they have been worn or not.

THE DAY SEWED SHOE MFG. CO.,

Under the management of W. W. Apsley,

No. 23 N. EIGHTH STREET.

Open until 10 o'clock on Saturday night, Sept. 4.

SPECIAL NOTE.—Do not forget that we make to measure for crippled and tender feet and make a specialty of all kinds of repairing at moderate prices.

Mr. H. S. BEEBE, No. 231 North NINTH Street dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the *Works are under contract with us* to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under *this Brand or a Private Brand.*

VOL. I.—NO. 37. PHILADELPHIA, MONDAY, SEPTEMBER 20, 1886. PRICE 15 CENTS

Items of News.

—Roger Sherman, the printer, left an estate of about $400,000.

—The Fourth Street National Bank begins business with $1,500,000.

—About $45,000 have been subscribed for the Charleston, S. C. sufferers.

—A house and lot, 25x100, on Locust Street, east of 39th, sold for $10,500.

—A handsome property, w. s. 42d Street, near Walnut, 23x125, sold for $12,500.

—The property N. E. cor. Front and Almond Streets, 20x63½, brought $10,000.

—There are 100,000 buildings in Philadelphia, with an average valuation of $3,250.

—A fine dwelling, w. s. 15th Street below Columbia Avenue, 20x100, sold for $10,000.

—The Government has made its final payment for the Dolphin, to John Roach's assignees.

The Public School Teachers are asking for an increase of twenty-five per cent. in their salaries.

—The proposed Elevated Passenger Railway on Front Street with branches will cost $6,000,000.

—The price of gas in Norristown will be reduced from $2 25 to $1.60 per 1000 feet after October 1.

—At a public sale of the Bordentown and Columbia turnpike it was purchased by a syndicate for $200.

—Bridgeton N. J. is to have a new Baptist Church. A Philadelphia architect has had his plan accepted.

—The will of Abraham Kahn, bequeaths $1000 to the Jewish Hospital Association and $500 to the Foster Home.

—The Standard Oil Co. is endeavoring to secure the control of the natural gas supply in Western Pennsylvania.

—Ground was broken for the Third Regiment Armory, Broad street, above Wharton street, on Saturday morning.

—There is a strike in five of the largest stove foundries in the city. Fifty stevedores have asked for an advance from $3 to $4 per day.

—A company has been formed at Chattanooga, Tenn., with a capital stock of $175,000, to erect a new 100-ton blast furnice there at once.

—The ten locomotive engines recently purchased by the Reading Railroad Company are built to make a mile in forty seconds, if equired.

—Building activity in Brooklyn is steadily increasing. The number of permits taken out during August was 415, against 376 for August last year.

—Chicago is to have a public hall capable of seating 5000 to 8000 people. The building, which will be nine stories high, will also contain a hotel with 500 rooms.

—Thirty-two complaints from householders regarding the non-collection of garbage were entered in the "growler" at the Controller's office on Wednesday last.

—New York city has about 33,000 street lamps, the price of which varies from $17.50 for light to $30. The Consolidated Gas Company has 17,570, and charges $17.50 apiece.

—The Building Inspectors have issued a permit for the Mary J. Drexel Home on the German Hospital grounds. In dimensions it will be 245 by 195 feet and 3 stories high.

—It seems we are to have badly paved streets, poor water supply, poor school accommodations, and impure water for another year. Let us be thankful that it is no worse.

—The Southern Maryland Rail Road Company has had an execution issued against it as guarantee for its former President, S. S. Smoot, by John M. Moyer, a lawyer of this city.

— It is estimated that New York will spend nearly $70,000,000 in the erection of new buildings this year, this is an increase of about $25,000,000 over the amount expended last year.

—The *Railroad Gazette* reports the construction of 476 miles of new railroad, making a total of 3439 miles thus far reported in 1886, against 1627 miles at the corresponding date in 1885.

—Corner properties are in demand; the N. E. cor. of 46th and Chestnut Streets, lot 125x225, sold for $7,400; and the property S. W. cor. Fitzwater and Juniper Streets, 94x128, for $7,400.

—The Philadelphia and Northwestern Railroad Co., with a capital of $140,000, was chartered last Thursday by the State Department. It will run from Jenkintown to Greenwich Island.

—It will be a good thing if the Law and Order Society will succeed in having the fire escape law properly enforced. It requires very little looking around, to see where the law is not observed.

—The new school buildings at Westtown, in Chester county, under the care of the Yearly Meeting of Orthodox Friends, are about completed. They cost in the neighborhood of $200,000.

—The Board of Health has declared Grant street, between Ninth and Tenth, a public nuisance, owing to its ungraded and unpaved condition, and referred the matter to the Highway Department.

—A number of gentlemen of means, residing in Chester, are considering the feasibility of organizing a stock company in that place to manufacture cotton, woollen, silk and other materials into textile fabrics.

—From the last statement issued by the Mint Bureau it appears that the silver dollars coined under the Bland act have reached a total of 239,000,000, which is about equal in amount to the gold coin and bullion held by the Treasury.

— One hundred and five families of French Canadians who have settled in Lawrence and Lowell, Mass., have returned to the province of Quebec, 50,000 acres of land having been secured in the Ottoway district on which to found a colony.

—A steam barge has been built at Suffolk, Va., which is 167 feet long, 22½ feet beam and 8 feet depth of hold. It will carry 200,000 feet of lumber on six feet draft, and has two masts, schooner-rigged, to be used as auxiliary power when wind is favorable.

—The Wood Manufacturing Company of Camden, is building a marine railway 800 feet long and 50 feet wide, at the old Cooper's Point dry docks. It is to be built in two sections of 400 feet each, and will be able to float the largest vessels that come up the Delaware.

—The Franklin Institute has adopted amendments to the by-law providing for the establishment of a Board of Trustees, in whom shall be vested all the real and personal estate of the Institute, and also for the election of a Committee on Science and the Arts of 45 members.

—The departments of Sewerage and Boiler Inspection, Port Wardens and Managers of the House of Correction have been requested by the Committee from Councils to verify the City Treasurer's cash accounts to swear to the returns of their respective departments before the City Controller or the City Treasurer.

—The new bank, to the Presidency of which rumor some time ago accredited President Roberts, of the Pennsylvania Railroad Company, was on Wednesday authorized by the Secretary of the Treasury to commence business with a capital of $1,500,000. The bank will be known as the Fourth Street National Bank.

—The New York *Star* publishes some interesting trade statistics. Bricklayers are paid $4 per day; bricklayers' laborers, $2.50, carpenters, $3.50; granite cutters, $4; painters, $3.50; plasterers, $4; plasterers' laborers, $2.75; plumbers, $3.50; tin and slate roofers, $3.50; stone masons, $4; cabinet makers, $2.75; electric wire men, $3.50. The state of trade is reported brisk in all branches.

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, SEPT. 20, 1886.

CHAMBERS BRO. & CO., of Philadelphia, will have an exhibit of brick machinery at the Cincinnati Industrial Exposition.

OUR correspondet "Brickbat" if we understood his recent letter, had no intention of castiag reflections upon the paper referred to in his communication.

GLAZED PIPE is the best material for sewer pipe. Well glazed pottery will resist the leakage of gas much better than even cast iron, and is nearly equal to glass.

THERE will be a national convention of brick manufacturers in Cincinnati this week on Wednesday and Thursday. Nearly all the prominent brick manufacturers in the West will be present. The organization will be completed.

ONLY four Pennsylvania brickmakers have agreed to be at the brick manufacturers' convention: Thomas Carlin, of Allegheny; J. George Stann, of Butler; H. C. Dunn, of Erie, and Jos Sweester, of Scranton.

CHARLESTON brick-layers insist on $5.00 per day, they are said to be very inefficient; this should make a good opening for a large number of competent workmen. Steady work during the entire fall and winter months at good wages should tend to attract northern brick-layers by the thousands.

THERE are two miles of streets in Bloomington, Ill., brick-paved. The bricks are burnt to flint hardness. Cobble-stones are barbarous and destructive; wooden blocks are expensive, and wear out; stone pavements are unnecessarily expensive. Flint-hard brick is said to be the best. A big demand could be opened up for the brick for street purposes, and the recommendations made are deserving of attention.

THE ordinance for the projected elevated railroad provides that 5 per cent. of the gross receipts from traffic carried within city limits, shall be set aside each year, and paid into the city treasury. Not less than thirteen feet headway is to be left clear beneath the elevated trains. The Company will have authority to construct bridges and viaducts over streets, alleys and public ways, and to erect stations and all appliances necessary for the proper conducting of the business.

A SUIT is pending in the United States Circuit Court at Chicago in which the Bell Telephone Company is the complainant and the American Cushman Telephone Company, organized a short time ago for the purpose of manufacturing telephones, defendant. The company antedates all previous claimants to telephone patents, claiming that Cushman, the inventor, constructed and publicly operated a telephone identical with the Bell instrument at Racine, Wis., in 1851.

ROOFING TILE is coming into much more general use. One objection to slate is that it is a conductor of heat, making houses warmer in summer and colder in winter. Slate often cracks, and when the atmosphere is full of moisture slate roofs are liable to condense the moisture on the under side, which gathers in drops, runs on the timbers, and causes decay. Roofing tile made from clay is, in large part, a non-conductor of heat, and lasts a long time. A roof can be put on at from $8 to $10 per square. The reduced rate of insurance makes it desirable, other things being equal.

WHAT a splendid opportunity for a bald-headed monopoly the franchise asked for by Messrs. William Wharton Jr & Co. for a Gravity Road in the Park will present if granted by the Park Commissioners, and the purely disinterested motives of this firm in stipulating that the fare shall not be over three cents per mile is sufficient to entitle them to be enrolled among the noblest philanthropists of the Century. If the park commissioners want to do a good thing for the hundreds of thousands of our citizens who are entirely dependant upon the park for the breath of fresh air that the wealthier classes can enjoy at the sea shore or country, they should entertain no scheme that proposes a greater fare than five cents for the entire trip, whether one mile or twenty.

NOT long ago, a fire took place in a church, in which fifteen persons were burned and crushed to death, and nearly 150 more, were more or less seriously injured. The reason of this was, that they could not get out in time. The little hole at the end of the church called a door was not big enough. Narrow passages and crooked stairways are dangerous. Theatres and public buildings are amply provided with means of exit, but our churches are built upon the idea that there is no possibility of fire. It is very true that they are comparatively safe, but this does not relieve the architect from the responsibility of supplying more ample facilities for ingress and egress.

WE observe that a great many building patents, of one kind or another, are being taken out. A patent has been granted to Wm. L. Gregg, of Philadelphia, for an apparatus for burning brick; to Wm. Horrocks, to spiral stairways, and Wm. Stevens, for an elevator. A great many patents are being granted for combined furniture, such as winpow-seat and bedstead and couch, and window-seat and couch. A good many patents are granted for plumbing improvements. A patent has been granted to an Illinois man, to manufacture ornamental bricks from different colored clays; another to an Iowa man, for the manufacture of artificial stone; another to a Boston man, for ornamenting stone, etc. etc. A book published, showing all these improvements, would be very interesting reading for architects and builders.

THE elevated railroad builders are pursuing the only wise and sensible policy. They know a scheme to build a railroad east and west would arouse vigorous, but at the same time, selfish and unworthy opposition. They therefore propose to build a railroad along the river front, or near it, from the extreme northern limits of the city, to the extreme southern. After this road is built, it would be a wedge for the construction of another road, east and west. No doubt, strong opposition will be made to it, in an underhand way. If a ring of a half-dozen men can control the city, by preventing the construction of such an elevated road, as now projected, it is well for the city to know it.

A very sensible ordinance has been proposed to prevent street cars on double tracked streets from approaching too close to each other at street crossings.

THE Simpson Brick Press Co.'s machine is a Western machine, designed to make bricks

by the semi-dry process. It receives the clay through a hopper situated just back of the upright guides between which the pressing is done. Four bricks are made at a single pressure, which is said to be 400 tons. The loss, by plucking, in some Western yards is said to be fully one-third of the entire outfit. The manufacturers of this machine guarantee that there will be no plucked brick where this machine is used.

There is another machine out West which is attracting a good deal of attention. It is manufactured by Jonathan Creager's Sons. It has a new cam movement for instantly raising and lowering the mold table. It consists of a pair of eccentrics that work on a solid bearing, which bearing is adjusted by an iron wedge to suit molds of any depth.

A WORSE state of affairs could not possibly exist anywhere than those depicted in the *Philadelphia Record* on Monday last in connection with the management of Moyamensing Prison. If animals were treated to but a tithe of the cruelty and consequent misery and suffering that is imposed upon the poor devils who are so unfortunate as to fall into the clutches of the law, the indignation of the people of this city would be expressed in a manner not to be soon forgotten. What has become of the Samaritarian Societies whose long and euphonius names have such a beguiling influence upon a charitable public, why so much profession and so little practical good? Surely the society for the amelioration of the condition of the prisoner must have forgotten its title as well as the purpose of its organization, or this beastly condition of the city prison could not have existed, surely the condition of affairs will not be tolerated longer than it will take to remedy them, the fact that they exist is shame enough for Philadelphians to bear.

BY way of reply to our correspondent "Two Seas," we may say that we do not condemn the whole system to which he refers. When some of our present wealthy builders made their first start, with financial assistance, they did the very best work, better work than is now done by those who obtain a start in a similar way. It is not the dishonesty which is to be condemned, but the system which is calculated to breed dishonesty There is an abundance of money within the reach of responsible contractors and builders. Industrious but impecunious builders have the same right to obtain assistance, as others, and, other things being equal, they should be encouraged to do so. The only thing to be condemned is, the encouragement of a system whereby dishonest building can prosper. No doubt, our Mechanics Lien Law is not perfect. Numerous instances could be cited, wherein injustice has been done under it. The evil caused by bonus operators has worked itself out. Instead of repealing the Mechanics Lien Law, an improvement of it would be better, and we respectfully refer this defective law to the attention of the legislative committee which will no doubt be appointed by our coming Real Estate Exchange.

No profession is more ably and conscientiously served with good newspapers, than American Architects. From the great American Architect of Boston, down to the newest Chicago enterprise in journalism, there is a demonstration of ability, energy and enterprise, which is deserving of much more than a passing mention. Our architectural and building papers constitute a school and a library in themselves. The architect who keeps pace with current architectural and building literature, will be well informed. It is casting no reflection on our British cousins to say that we are leading them, in special journalism, at least. We utilize their best ideas and supplement them by boundless originality. Invention follows up with a thousand and one suggestions in the way of improvements and additions for house and office. New York is ably represented in this field. Cincinnati and St. Louis papers are creditably edited, and are fast securing the attention and patronage of architects and builders. Philadelphia, true to its conservative instincts, comes to the support of the pioneers in special journalism, with halting steps.

THERE is a great deal of activity in real estate along the line of the P. W. & B. Out of 726 lots laid out in the Suffolk Track, 500 have already been sold. The Mutual property comprises 650 lots, of which 400 have already been sold. The Elwood Tract comprises 850 lots, of which 841 were sold up to Saturday, to 700 different purchasers. The Leacock plot of 200 lots will probably all be absorbed in thirty days. These lots are sold at reasonable prices, on easy terms of payment. Perhaps it would not be saying too much, to say that never before has there been such a demand by individual lot purchasers as at this time. Building and Loan Associations are finding a wide field for profitable investment in this direction. We hear it stated that several other schemes of no small magnitude, are in hand, by which large tracts of land, now in meadow and woods will be converted into building lots next spring. The purpose of the bulk of the purchasers of the lots referred to, is to build within twelve months. This is one of the most encouraging indications of the times. Real estate speculators, it was mentioned in this paper some months ago, were looking along this line, with a view of making large purchases. They have since bought, and are now looking for further purchase, stimulated by their success in disposing of their property at good prices. The new Baltimore and Ohio Railroad will impart a stimulus to real estate and building operations in that section. There are quite a number of fine building sites still available.

A LEADING Real Estate Auctioneer stated a day or two ago, that he expected to handle an immense amount of real estate during the coming three or four months. This is putting the case pretty strongly. So far as we can learn there is no probability of any unusual movement in real estate, either among railroad buyers, or builders. The leading builders spoken to recently on the subject said they had most of their arrangements made for the coming year, but would, in all likelihood, buy more or less in the way of small plots and lots, where they could be had at a reasonable figure. The fact that auction sellers expect to handle a good deal of property, is a reason why our real estate people should, as soon as possible, put themselves in shape to do business. The real estate interests of this city need to be centralized. All recognise this fact. People are obliged to go to auctions, but would go to elsewhere, if they could do better. There is a good deal of property selling under orders of court every year, which could and would come to an Exchange. A little shading in prices of property would lead to a good deal of business. In some places, values are advancing nominally, in other places, they are at a stand-still. There is no reason why a good deal of property should not appear on the market for sale, during the next two months. Owners are slow to crowd their properties for sale, feeling that there is something to be lost by so doing. When our Exchange comes into existence, this reason for witholding property will not exist. Property can then be offered for sale, or withdrawn quietly, if offers do not suit.

NEWSPAPERS are lending their acclamations to the general rejoicings over the improving condition of trade and business. From one end of the country to the other, business men, manufacturers, and builders are rejoicing over the immense amount of traffic and transactions and operations of one kind or another. We have built 4,000 miles of railroad, or nearly so, and will probably finish 2,000 miles more by the end of the season. Manufacturers in every branch of industry are pleased with the amount of business coming in, and better pleased with the prospects before them. Prices seem to be improving, and there is abundant encouragement for larger production. While all this is true, it is very necessary that the producing and transporting interests should avoid the mistakes which have been made previously. It is as possible now to overdo, as it was then. With our immense productive capacity, trade channels could be gorged, and enterprise checked, and a downward tendency imparted to prices. Prosperity depends upon the exercise of the wisdom which we have learned from the mistakes of the past. There is a disposition to go slowly, and to perpetuate the healthful influences now surrounding all industries and markets. The iron and steel makers are pleased with the amount of business they are doing: the bridge builders have been in the market within a few days, for several thousand tons of material for bridges; the nail factories are nearly all running full time; our blast furnace production is all absorbed, as fast as turned out; our steel makers have sold over 150,000 tons of rails to be made next year; our car builders all over the country have, within

thirty days, gathered up enough business to keep them busy for two months; the locomotive builders are busier now than they have been for three years; the distribution of lumber has been greater than ever before in the history of the country, and the outflow of capital has been more rapid in general. These are all granite rocks upon which the trade of the country is resting, and with prudence, the volume of business will increase.

EMPLOYERS in every department of industrial activity are more or less disturbed on account of the labor question. Never before this year, was the possibility or probability of the mighty organization of labor contemplated. Employers have found themselves obliged to yield, and make the best of it. The demand for labor left them no other course. They regard the future with a good deal of concern. High prices for labor, means high prices for material, and a general increase in cost of products of labor of all kinds. This increase in cost discourages investments sometimes,—not always. The only thing which determines investments is, whether satisfactory dividends can be obtained from investments. Cost of material and labor, is a secondary matter. The year 1886 has been a satisfactory one, even with all our labor troubles. An adjustment has been quietly going on. Building labor has been especially in good demand. Contractors and builders have been greatly encouraged. Investments have paid well. Rents are satisfactory, and very little house room is on the market. There are inducements to continue this activity. Real estate has not advanced to prohibitive limits. Thus far, we have escaped any serious consequences from the labor agitations. The workmen have been gratified at their success in forming national organizations. No less than 20 trades have this year formed organizations of that character. Other branches will pursue the same course. The objective point is, to equalize wages, prevent competition sections, and prevent labor on strike from being supplanted by labor from a distance. These organizations will grow in number, power and influence. Labor may be encouraged to repeat next year, the experiment it tried last Spring. Employers are asking themselves this question: "Will labor do this?" The original labor programme was, to strike for an eight hour day. A compromise was had, on nine hours. If a renewed attempt should be made to establish eight hours, as a day's work, it will result seriously;—provided of course, the present active demand should be continued. Labor is acting in a conservative manner. It is seeking for relief and protection in political action. The Knights of Labor will, in all probability, pursue a conservative course, and avoid an eight hour strike, while encouraging organization and education.

AMONG the city improvements proposed are a sewer on Susquehanna avenue, between Third and Orrianna streets, the paving of Locust street from Eighth to Twenty-second streets, electric lights in the Third Ward, a station house for Manyunk and Roxboro, and three fire hydrants in the Twenty-fifth Ward.

Common Councils passed bills appropriating $19,796 for a school house in Germantown, $35,120 for one at Falls of Schuylkill, $8,333 to purchase a school at the corner of Marshall and Somerset streets, $19,979 to build an addition to the school house at Twenty-sixth and Jefferson streets, $9,375 for a lot at Sixteenth and Moore, $135,000 for excavating and masonry under contracts with R. A. Malone & Sons, at Holmesburg Junction. $1,500 for eight Siemens Regenerative Gas Lamps around the Dock Street Market; $7500 to pay architects and engineers for plans and specifications for the county prison.

Common Councils want the City Solicitor's opinion on the resolution passed by that body on November 5th, 1885, concerning the appropriation of money for school purposes. The Board of Education has asked $2,000,000, and Councils feels unwilling to appropriate that large sum of money under the circumstances. Archbishop Ryan states that 38,000 children are being educated in Roman Catholic schools in this city. Besides this, 30,000 children are being educated in other private schools. Members of Councils have raised the question whether it was the proper thing to spend so much money on the higher branches of education, while so many children were seeking education under other systems.

Among the bills introduced in Common Councils last week, were, one to erect electric light on Vine street, at Eleventh, Twelfth and Thirteenth streets. One to grade Frank street from Green street to Wissahickon avenue; to lay water pipes in Passyunk Road, between Carpenter street and Washington avenue; to grade Twenty-first street from Reed to Long Lane; to appropriate $28,581 to erect a school house on Sansom street between Thirty-fifth and Thirty-sixth; for a sewer in Cumberland street from Jasper to Emerald; to reduce the width of Pacific street from Twenty-second to Hunting Park, from 50 feet to 40 feet; to lease the Second Regiment a patch of ground at Thirteenth and Spring Garden streets, with the privilege of removing the building now there; for a sewer in Seventh street from Norris to Diamond; an electric light at Seventh and Race streets, and another at Sixth and Spruce streets.

THE tax on money at interest in this state shows that nearly three times the amount returned in 1885, has been returned this year. The new law is developing a great deal of loanable capital. The assessment for 1885 was, $145,286,762, upon which the 4-mill tax netted $581,149.06. The present tax is only three mills, and the result of the first year's workings of this law, increased the assessment to $390,749,556, or nearly three times as much. The amount realized by the State is, $1,172,248, or more than double the amount realized under the four mills taxation. The secret of the increase is, the fact that an oath is demanded, and it is made dangerous to report incorrectly, because a check is placed upon money lenders by the search for mortgages, judgments, and other liens.

MR. PILLSBURY in his speech at Lewiston said:

> At least three-fourths of the men employed in these lumbering operations in Aristook and Penobscot counties come across the line from the provinces beyond. Many of them take their teams across, giving bonds at the Custom House for their return, work during the winter, take their money and return home in the spring; others remain to work driving the logs down the stream, and some work at sawing in the mills for the season. These timber-owners are shrewd fellows. They work the protection racket at both ends. They make every man who buys a thousand feet of lumber pay this tax on it under the claim that it is done to protect us from the product of cheap labor in the provinces. After they have made you pay the tax for that purpose they go over the line and get the cheap labor itself and bring it over to do the work for them. Thus they make money at both ends, and the poor American laborer loses at both ends. You are obliged to pay the taxes on every stick of lumber you buy, and then the cheap labor of the provinces is brought in to work in the camp, upon the streams and in the sawmills, and thus force wages down to their standard, so that the American laborer is obliged to work at the same rate or not work at all. And so he loses both ways, and yet it is all done in the interest of the poor laboring man.

A BILL was introduced on last Tuesday afternoon in Select Councils, by Thos. Green, to permit the Philadelphia & Northeastern Railroad Co., to construct an elevated railroad on certain streets in this city.

It is proposed by the company to build a double track road from Jenkintown to Front and Westmoreland streets, either wholly or partly elevated, according to circumstances now unforeseen. Thence along Front street to Snyder avenue, at the southern end of the built-up portion of the city, it is proposed to construct a double-track elevated road. A branch elevated road, double track, is projected along Emerald street, from Front to Frankford suburb, and thence a double-track road, surface or otherwise, is planned to Tacony.

It is said that the entire road, equipped and ready for operation, would cost $6,000,000.

A meeting was held at Twenty-eighth South Third street, on Wednesday, and an organization was effected: George H. Boker was elected President; Frederick B. Esler, Vice President, and Ford C. Stevens, Secretary. The following were elected directors: George H. Boker, Charles B. Wright, Henry C. Gibson, James A. Wright, Frederick B. Esler, Samuel R. Shipley and Walter Wood.

THE finance committee, in recommending the tax rate at $1.85, has obeyed what it believed to be public opinion. Some are inclined to think that this is a narrow and unprogressive policy. If the people could be assured that an addition of five, ten or 15 cents would bring them certain needed improvements, they would put up with the additional taxation, for the prospective advantage. There is a vast field for municipal statesmanship, but we have very few promising candidates for public favor. Admission to Councils is controlled by a cable of politicians, who have not the good of the city at heart. And while this is the case, we cannot expect a broad and liberal municipal management. The people are tired of paying heavy taxes and have no confidence, or very little confidence in a thoroughly honest administration. Under the Bullitt Bill management, the people will be more willing to pay high taxes, and it will be found possible to put the next rate at $1.95, as well as $1.85. The Committe reported the following additional allowances over last year's expenditures, in the departments named:

Electrical Department	$30,000
Board of Education for new teachers	25,000
Fire Department	94,000
Highways	50,000
Law	8,050
Markets and City Property	40,000
Receiver of Taxes	4,500
Public Buildings Commissioners	100,000

TAXATION should be uniform. When the city authorities find themselves unable to secure uniformity or thoroughness, in the assessment of any subject, they should abandon it as an undesirable medium for the diffusion of taxation. Household furniture comes within this category. It is not completely assessed, only 11,000 property-owners in Philadelphia paying any tax on that subject, and the amount of the appraisement—less than $8,000,000—is ridiculously small when considered in connection with the number of dwelling-houses in Philadelphia and the value of the property that is furnished. The tax is an unjust one, because it is borne almost entirely by that comparatively small number of taxables who make honest returns of their property. To continue this tax would be to continue a premium on dishonesty. Unlike real estate, there are no established standards of valuation for household furniture which will equalize its burdens. The value of a house and lot may be very accurately and easily ascertained The value of the furniture in the house can only be approximately fixed by the Tax Assessors. At the best the rating is a matter of guess-work, and should be stopped. If questioned on the matter the Board of Revision of Taxes will probably admit that it is absolutely impossible to uniformly assess personal property. Why persist in maintaining this admitted inequality? A tax on household furniture is a tax on conscience. Abolish it and we will have taken a step that will put Philadelphia far in advance of most American cities.—*Philadelphia Record.*

THE Stock Exchange will shortly vote upon a proposition to purchase a large block of property at the Northwestern corner of Third and Chestnut streets. Since the withdrawal of the proposition of Drexel & Co. to sell the property at Fifth and Library streets a number of the members of the Exchange have been industriously looking about for a site that would suit. The frontage of the projected site is, 62 feet on Chestnut street, and 134 feet on Third street. The property will cost somewhere in the neighborhood of $300,000, on which it is contemplated to erect a building that will cost about as much more. The site includes the property now occupied by B. K. Jamison, R. Glendining & Co., and C. T. Yerkes & Co., and a number of offices north on Third street. All of the property owners, with a single exception, have given the snydicate a refusal of their property. This snydicate is composed of those brokers who were accused of having no public spirit and being opposed to any change whatever. The following prominent brokers voted against removal to Fifth and Library streets: —Barker Brothers & Co., R. Glendinning & Co., Sailer & Stevenson, C. K. Yerkes & Co., F. Smyth & Co., DeHaven & Townsend, E. W. Clark & Co., Charles Smith & Son, T. L. Lawson, C. & H. Borie, Elliott, Sons & Co., C. D. Barney & Co., George S. Fox & Son, P. H. Brice & Co., Collis & Levy. H. L. Graw & Co., B. K. Jamison & Co., W. W. Kurtz & Co., and many others.

Those having the scheme in hand, figure out an annual rental from all sources, of $35,000 per year which they consider would be a good dividend on the investment of $600,000. The architects plans have been completed, and are satisfactory to all who have seen them. The Stock Exchange will occupy the second floor, at a rental of $8,000. It is expected that the Exchange will subscribe $75,000 to the capital stock. and the snydicate, which is composed of members of the Exchange, and non-members, will take the rest. Some canvassing has been done among prospective tenants, and a guaranteed rental of $12,000 has been secured for the rooms on the first floor. The Exchange will shortly be called upon to consider the matter. It is a very cheap and convenient way out of the difficulty. Third street is the proper place for the Stock Exchange, and it is not likely that any proposition would be favored, which looked to leaving it.

Councils' Doings.

AN ordinance was submitted for electrical light on Broad Street at Dauphin and Lehigh avenue.

IN the Committee on Distribution the subcommittee to which was referred the resolution of Councils relating to the erection of Siemens lamps in the public squares, reported that they had decided to erect ninety-four lamps as sollows: Independence, 21; Washington, 23; Norris, 18; Jefferson, 16, and Passyunk, 16. The contract for lamps was awarded to Siemens, Lungren & Co., at $75 per lamp, and the posts to Morris, Tasker & Co. It was reported that the main running along South street had been tapped so as to supply the houses 831 and 833 South street with gas, which did not register on the meter. Mr. Fanning, the owner of the houses, was present, but denied all knowledge of the affair It was referred to the Sub-committee on Complaints.

THE Water Committee of Councils, at its meeting last Tuesday, passed ordinances for laying water pipes in the following streets: Emory, Ontario, Mifflin, Elizabeth, Washington avenue and Haverford street. The attention of the Board of Health was called to the unclean condition of the Mount Airy reservoir. The charges of neglect of duty preferred against Joseph Robinson, watchman at the Roxborough reservoir, were proven to be entirely without foundation. William Hyde, of Newark, and Mr. Williams, of Boston, were present and submitted plans for new filtrating machines. The matter was referred to the Chief Engineer and a committee of five, to be acted upon at the next meeting. Bids on pumping engines were received from various manufacturers and tabled for future consideration.

THE Council Committee on municipal government, considered three ordinances at its meeting, last Wednesday evening, intended to carry into effect the amended city charter.

It was decided to refer these bills, together with any other bills or documents connected with the matter, to a sub-committee composed of the chairman of the General Committee, the chairman of the sub-committees appointed some time ago, the Presidents of Councils, and Messrs. Grace and Etting. The sub-committee is, therefore, composed of Messrs. Clay, chairman; Bardsley, Maloney, Smithers, T. M. Thompson, Green, Anderson, Patton, Gates, Lawrence, Grace and Etting. The sub-committee will use the material committed to it in the preparation of one or more bills for the reorganization of the departments under the new law.

A NUMBER of petitions were presented in Common Councils and the following bills were introduced: By Mr. Welsh, for a sewer in Church street, from Frankford avenue to Tacony creek; by W. A. Miller to grade and pave Otsego sreet, from Moore to Mifflin; by Mr. Taxis, to change the voting place of the 16th division of the Twenty-ninth Ward from the northeast corner of Twentieth and Master streets to 1403 Forth Twentieth street; by Mr. Wilde, for water pipe in Ripka avenue, from Mansion avenue to Hamilton street; by Mr. Wisler, for a sewer in Orrianna street, from Dauphin street to Susquehanna avenue; by Mr. Kenton, for a sewer in Third street, from Stamper to Union; and by Mr. Weidner, a resolution, which was referred to the Gas Committee, to request the Gas Trust to light Fairhill Square with Siemens regenerative lamps.

COUNCILS have under consideration, ordinances for the laying of a great deal of water pipe in outlying sections of the city. Ordinances were introduced at the last meeting, granting permission to the Postal Telegraph Cable Company to lay underground conduits and cables from Third and Chestnut streets to Fifty-fourth street and Lancaster avenue; also, to the Bell Company of Philadelphia, to lay an underground service in the territory bounded by Vine and South streets and the Delaware and Schuylkill rivers; and also to the American Bell Company, of Pennsylvania, to lay underground conduits and cables along Walnut street and Lancaster avenue, between the Delaware river and the county line. This is said to be the first action of this kind taken under the General Underground Telegraph ordinance. The ordinances were accompanied by plans of the proposed construction and route.

AT a meeting of Councils Finance Committee last week, Chairman Bardsley presiding, a report, signed by Messrs. Clay, chairman, Green, Hammett and Iseminger, members of a sub-committee, was received, favoring the fixing of the tax rate for the year 1887 at $1.85.

Mr. Clay moved the adoption of the report, and said that the Controllers' communication to Councils showed that this rate would enable Councils to appropriate to the departments $1,132,932 more than was given to them for this year. Mr. Clay said that by allowing certain departments all that they asked for there would remain $900,000 from the tax levy for distribution among certain other departments, which, in the opinion of the sub-committee, should not get all they asked for. Besides this there would be a surplus from this year's account, estimated by the Controller at over half a million dollars, but which the sub-committee, in order to be on the safe side, had put down as $300,000.

Mr. Clay said it was proposed to give the Board of Education an increase over this year's appropriation of $25,000 for salaries of additional teachers. For the Police, Park, and Survey Departments no increase was contemplated. Increases of $30,000 for the Electrical, $94,000 for the Fire, $7000 for the Poor, $30,000 for the Markets and City Property, $50,000 for the Highway and $100,000 for the Public Building Department were proposed. The Water and Health Departments were "passed for the present."

Mr. Freeman moved that the tax rate be two per cent., and argued that a $1.85 rate would not produce all the money needed. By way of illustration, he said that building the county prison by slow degrees would cost more than if a contract or contracts for all the work were given out at once. Mr. Freeman's motion was defeated.

There were also other small items allowed on several accounts.

Chairman Clay, of the sub-committee, explained that with the tax levy at $1.85 and the estimates agreed upon as reported there would still be a surplus of $1,250,000 to be divided between the Highway Department, Board of Education, Water Department, Surveys and Electrical Department. The sub-committee's report was signed by Henry Clay, chairman; Thomas Green, Thomas M. Hammitt and Charles F. Iseminger.

Mr. Freeman moved to amend the committee's report by recommending a levy of $2. Lost by the following vote: Ayes, Claghorn, Freeman, Matthews, Patton and Thompson—5. Noes—Clay, Gates, Graham, Green, Hammett, Horn, Iseminger, Monroe, Reinstine, Rose, Shoch, Smithers, Webster and Bardsley—14. It was then agreed to report in favor of a levy of $1.85, and the committee adjourned.

Municipal Doings.

—Siemens regenerative lamps are to be placed in Independence, Washington, Norris, Jefferson and Passyunk Squares.

—About four and a half miles, or one-half of the new gas main from Ninth and Diamond streets to Germantown and Chestnut Hill, has been laid.

—The Controller says that the $1.85 rate will give the City departments $1,259,000 less next year than they received this year, counting in the Gas Trust surplus of $1,771,408.

—There is an urgent need for a thorough reorganization of the water facilities in the older section of the city. Some day a conflagration will spread because of the deficient water supply.

—The Board of Surveys have approved a plan for the extension of the tracks of the Thirteenth and Fifteenth Street Railway on Fifteenth street, from Dickinson to Jackson street, and thence to Broad street, and on Mifflin, from Fifteenth to Broad street.

—Callowhill street, from Twenty-fourth to Twenty-fifth, has been reported to the Board of Health as being in a very unsanitary condition. The names of twenty physicians who had failed to report the existence of contagious diseases were also given to the Board.

—Chief Engineer Smedley has appointed Frederick J. Amweg Assistant Engineer at $125 a month, Mr. G. Davis, leveler, at $60 a month, and Jules T. Jollivet, rodman, at $20 a month, John A. Wilson and J. H. Linville as consulting engineers to report upon the foundations of the Market Street bridge.

THE business men of Ninth street between Race and Vine streets, with a view to diminishing the number of disreputable characters who nightly loiter about that locality, have made arrangements for the hanging of eight electric lights upon alternate sides of Ninth street. They propose to defray all expenses.

—Chief Commissioner of Highways McDonald annulled the contract of Michael Daly, of the First district, and Arthur West, of the Fourteenth district, garbage collectors, for continued neglect to comply with the specifications of, or to execute their contracts. The contract of the First district was for $2000 and the other was for $1500. Both were dated from May 20 to December 13, 1886.

—The Almshouse hospital has 833 patients, a decrease of 55 over the same time last year. A new set of rules for the government of the training school was ordered to be printed prior to consideration. The Committee on Buildings had before them the subject of heating the insane wing now being rebuilt, and Engineer Ogden was instructed to act with Superintendent Roney in carrying the system into effect. There was no change in the number of inmates of the insane department.

—Deputy Attorney-general Snodgrass has asked for a rule against the following mutual insurance companies, citing them to appear in court on November 30 and show cause why their officers should not be removed and their business closed because of their failure to make a report to the Insurance Commissioner, under the act of 1873:

The Odd Fellows' Mutual Life Insurance Company, of Montrose; Mutual Life Insurance Company of Pennsylvania, of Harrisburg; Mutual Benefit Association, of Easton; Pennsylvania Mutual Aid Society, of Harrisburg, and the Pennsylvania Mutual Protective Association, of Pittsburg.

THE Board of Highway Supervisors, at a special meeting approved of the routes and plans submitted by the Bell Telephone Company, the Postal Telegraph and Cable Company, and the American Telegraph and Telephone Company for entering the public streets and laying conduits for telegraph and telephone wires. The routes proposed by these various companies are as heretofore published, except in the case of the latter company, which instead of going west on Chestnut street, continues from Fifteenth street out Walnut to Twenty-fourth street, and thence out Chestnut. Ordinances, covering the privileges asked by the above companies, were ordered prepared. The Penn Electric Light Company applied for permission to enter certain streets south of Chestnut street, for the purpose of supplying electric light privileges in stores and private houses. The general plan was approved, but action postponed until the detailed plans should be submitted.

THE lease of the Gas Works occupied the attention of Councils, at the last meeting The American Gas Co. desires to be a bidder. The President of that Company, in a communication submitted, desired that the Finance Committee should decide the length of time for which the lease shall be made, the amount of security required, the amount to be expended on improvements and the time in which it is to be expended, the rate per annum at which gas is to be furnished each street lamp, and the candle power of the gas required, leaving the bidder to make his tender at the rate per annum, payable in advance, at which he will lease the works. The communication was referred to the special committee having the subject in charge.

A number of appointments in the various departments were confirmed. Steps were taken looking to the removal of the market sheds from Callowhill Street. Mr. Hammett presented a communication from Hance Bros. & White, manufacturing chemists, Marshall and Willow Streets, in which they state that, having read in yesterday's Ledger that an effort was to be made to abolish the market sheds in the half square named, they desire to make known the fact that the objections to one square act on all other parts, and they ask Mr. Hammett to exert his influence to have all the sheds removed. They declare that their usefulness is limited; that they have become nuisances from dilapidation and offensive odors, and that they have become harbors for rats "hoodlums," "bummers," and other depraved characters. In conclusion, they say their presence retards the progress of the business interests of Callowhill and other streets more than can be easily estimated. The communication was referred to the City Property Committee.

Another Bond Call.

The Acting Secretary of the Treasury on Wednesday afternoon issued the 142d call for the redemption of bonds. The call is for $15,000,000 of the 3 per cent. loan of 1882, interest to cease October 16, 1886. Following is a description of the bonds called, the numbers being "original" and inclusive in each case:

$50—Nos. 56 to 103.
$100—Nos. 777 to 1521.
$500—Nos. 341 to 646.
$1000—Nos. 2835 to 4206.
$10,000—Nos. 8811 to 10,247.

—City Solicitor Warwick sent an opinion on Thursday to Chief of Police Stewart, in reply to an inquiry as to whether it is the duty of policemen to prosecute for breaches of market ordinances, or whether such actions come within the province of the Clerks of Markets. The Solicitor replied that both classes of officers should prosecute for all such breaches.

BUILDERS' ITEMS.

Building and Real Estate Notes.

MR. LOMAX is erecting 2 houses at 11th and Somerset Streets.

THE Plasterers Union has initiated 200 members since last May.

PHILADELPHIA has escaped serious fires during the past six months.

MESSRS. Puckett and Brown architects, will erect 6 houses on 22nd and Ontario St., Tioga.

MR J. KNOCH architect, will build two cottages to be an addition to the German Hospital.

MR. GEISSINGER architect, is making additions to Carey Bros mill, 10th and Susquehanna ave.

MR. F. A. CALLAMER is building eight houses on west side Germantown Road north of Somerset Street.

THE Holy Trinity P. E. Church at Twenty-second and Spruce streets, it is said owns $500,000 worth of real estate.

MR. JAMES A. MUNDY & BRO., 213 South Ninth Street, plumbers and sanitary engineers, are being kept very busy, and are under contract for the work at the undermentioned houses.

EXTENSIVE improvements are being made in the Kenderton Presbyterian Church, on Tioga near 16th Street, at a cost of $6,000. The art work is by Karl Kehrweider, and the building is superintended by Frank W. Tweed.

MAY & BRO. will rebuild their store lately destroyed by fire, on Arch below 8th Street. W. H. Geissinger is the architect. Mr. Geissinger will also build a factory for Mr. James Whittaker, at the corner of Trenton avenue and Sargent Street.

THE Building Trades Council met last Thursday evening, and instructed all organizations connected with the Council, to notify the Secretary on the last meeting night in January of each year, of the rate of wages that will be asked for the current year.

MR. PRICE will build 6 houses on 13th Street below Diamond, and five on Park ave. below Diamond. Fifty-four houses for John M. Shoch, on 25th and Swain Street, also 12 on Park ave. below Berks, and 6 on west side 13th below Berks, also 50 houses for Mr. J. M. Shoch 17th and Diamond also 45 houses 15th and Cumberland and 26 for Mr. McIlvain builder, owned by Mr. Howard Watkin 32nd and Haverford Road.

A PLOT of land has been secured by the Trustees of the Gorgas Home, for indigent women, on East Leverington avenue, Roxborough. A suitable building will be erected out of funds provided by Samuel Gorgas, who died several years ago. It is a high piece of land overlooking a large extent of country. Furness & Evans, the architects, have prepared the plans, and will superintend the erection. Sylvester Yardley is the builder. The building will be three stories high, built of Roxboro stone, to the middle of the second story. The building will be 71½x73½ feet, and will have a wing 28 feet deep. The entrance will be 10½x14 feet. The building will be fire proof, will be supplied with elevators and open fire places. The roof will be shingled.

KLINE BROS., 430 North 12th Street, plumbers and steam fitters, report business with them above the average, and are employing more hands than ever. This house is heating the following establishments with Williams patent system of exhaust steam. They claim that these machines will save at

least 33 per cent in fuel. This house makes a practice of putting them up on trial for 30 days, and if not satisfactory they take them down without cost. The following is a list of a few first supplied :

The Keystone Watch Case factory, 19th and Brown Streets; Geo. S. Harris, new building on Cherry above 8th Street; Haines Jones & Cadbury, Ridge Road above Buttonwood Street; Cooper & Conard, dry goods store 9th and Market Streets.

MR. EVANS, Market Street, Camden, N. J., has within the last ten days disposed of $17,900 in mortgages, and reports the real estate interests of Camden as looking bright.

R. S. REED, real estate broker, 33d and Chestnut Streets, reports houses selling slowly, but house renting as being unexceptionally good. He gives it as his opinion that as soon as the summer ends that properties will commence to be in demand.

MR. J. M. CURDY, 721 Walnut Street, real estate broker and conveyancer, reports houses renting very readily and collections good. Mr. Curdy is being kept very actively engaged on conveyancing, and reports the outlook for the fall and winter being bright.

ROBERTS & COHN, real estate brokers and builders, Camden, are erecting twelve two-story houses on Rex Street. They have Philadelphia brick fronts, low down grates, hot and cold water, and all modern conveniences. This firm build on an average some two-hundred yearly, and find no difficulty in making sales of them. They report Camden real estate business as being very active.

GEO. LAYCOCK & Co., 914 Walnut Street, real estate broker, is building ten seven-room houses with front porch, yards and flag pavements, on Buist Avenue, between 62d and 63d street, in the 27th ward, two squares from Mt. Moriah Street. They will all be fitted up in the most modern style. Mr. Laycock has purchased a farm, situated eight minutes walk from Paschal station on the Island road, which he will lay out in 200 building lots, plans of which will be ready in a day or so. These lots are adjoining the Suffolk lots, also under his care. They will be 25x100 feet, and sell from $150 to $200, according to location. Eighteen inches below the surface is a fine gravel and sand, which adds greatly to the health of the neighborhood.

BENJAMIN F. Ashwood, 19 South Nineteenth Street, real estate broker, is the secretary for the Elmwood Mutual Land and Improvement Company, which is situated in the 27th Ward, on the old Philadelphia, Wilmington & Baltimore Railroad It is laid out in 850 lots, of which over 800 have already found customers, being purchased by 700 individuals. These lots have all been purchased within the twelve months. So far, some workmen's houses have been erected and others are already started. Attached to this company is a building association, which they hold at the S. W. Corner 12th and Filbert. The neighborhood surrounding Elmwood is rapidly growing as may be seen from the following estates just opened out, all adjoining one another. The Suffolk has 726 lots, over 500 of which have been sold. The Mutual, 650; Elmwood, 850; and 200 new lots which Mr. Laycock has just opened out adjoining the Suffolk. The size of the lots are 50x100 feet, and are sold on monthly payments. The P. W. & B. R. have been petitioned to offer more passenger accommodations, which they now have under consideration. The petition was signed by over 500 investors.

—A company has been organized at Ocean City, N. J., to build, an excursion house at a cost of $20,000

Recent Decisions in Pennsylvania In Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

DAMAGES.

The measure of damage for taking land in widening a street is the actual difference in the market value of the remaining property, between what it was prior to the widening of the street and what it is immediately subsequent thereto; and for ascertaining such damages consideration must be had not only of the injury sustained, but also of any benefit that may have accrued to the property by such change.

Since the adoption of the Constitution of 1874 the right to bring such action is not barred until six years from the time of the actual widening of the street, and taking of plaintiff's property.

DEED.

Where the estate or interest granted by a deed is determined in the premises, the habendum clause may lessen, enlarge, explain or qualify, but cannot wholly contradict or be repuguant to such estate. If it is so repugnant it is void. The words used in a deed to pass the estate is of no consequence, as if it is "lease" the contest will show whether it is used to vest an estate for years, for life or in fee simple.

LANDLORD AND TENANT.

Though a building be demised for a special purpose without any covenant by the tenant to repair, the lessor is not bound to keep it in tenantable repair for the such purpose.

Where a lease contains an express and unconditional covenant to repair, the tenant must do so, though the premises be destroyed by fire.

Where a lease provides that a violation of any of the covenants therein contained shall be cause of forfeiture, the less ormay re-enter for the breach of any of them.

A mortgage of the leasehold is a breach of a covenant not to assign without the written consent of the lessor.

MECHANIC'S LIEN.

A period of six months between different portions of a building operation is sufficient to break the continuity of the work, so as to prevent both operations from being connected.

Under the Act of 17th February, 1858, a claim is incurably defective unless restricted to the particular articles on which the work was done or materials furnished.

MORTGAGE.

Though an equitable mortgage cannot be created by a deposit of the title deeds, yet the Court will not enforce a return of them without a performance of the condition whereby agreement, a deed absolute is made to the lender of a portion of the purchase money, with the understanding that the land is to be conveyed to the real purchaser In repayment of the loan, that is but a mortgage.

VENDER AND PURCHASER.

The consummation of negotiations for the sale and purchase of land by a question in behalf of purchasers. "Will you take our check for $12,000?" and the vender answering "I will" and the delivery of a deed of the property without the exaction of any kind of promise for the payment of a further sum, constitute conclusive evidence that the vendor did not expect any further payments

Communications.

WISSAHICKON, Sept. 15, 1886.

Editor REAL ESTATE RECORD & GUIDE.

DEAR SIR:—In response to your correspondent signing himself "Brick Bat." I would state that the American Institute of Architects ("self-styled," as our facetious friend will have it), has accomplished good for the profession of architecture in more ways than one. It has very perceptibly raised the standard of the profession in this country, and helped to teach the public that an architect is worth somewhat more than they would have him in past times, and that when he does his work he is not to be cheated and defrauded of his pay, while the very existence of the body has been a protest against the charge of obscurity to the profession. Springing directly from the Institute, and its legitimate children, are the state and city associations, which in many places have been beneficial to the workers, and have helped to create the spirit of fraternity. To go more directly into the abstract work of the A. I. A., would be impossible in a letter like this. If the editor of the RECORD AND GUIDE will allow me the space, I will endeavor at some future time to give a brief sketch of the Institute. Meanwhile, as "Brick Bat" is an architect, let him look at the published proceedings of the A. I. A., and regard the significant fact that architecture has made more rapid and intelligent progress in the decade since the establishment of the Institute than ever before.

As to the *American Architect and Building News*, it is leading the public mind into appreciation of better work by its illustrations and large popular circulation. If "Brick Bat" cannot find the valuable matter contained in a bound volume of the paper, and of direct interest to the profession, it is neither the publisher's fault nor mine.

Finally, Mr. Editor, I defy "Brick Bat" or anyone else to find in my letter any direct praise for the abominable modern brick front as exhibited in its richest and nastiest development all over the northern section of our city. The Public Buildings were *not* condemned for their lack of this kind of decoration, but simply on the grounds given in my letter, saving the fact that "bold massiveness" was printed erroneously for "*bald* massiveness." I repeat and maintain that Philadelphia *is* a poor field for the study of architecture, and that one may walk a dozen blocks in most any section of the city without counting half a dozen buildings that have the elements of beauty or fitness in them; while in Boston or New York the good work is dotted over the cities in a very fair proportion. There *are* really good and beautiful buildings in Philadelphia, but they stand far apart in most instances, and the weary monotony of the other buildings throws them into painful relief. The only thing that saves the city from disgrace in its architectural pretensions are the suburbs. There the good work is gathered more closely together, and surrounded by the natural beauty which seems to be a birthright of the city.

I recommend "Brick Bat" to read my letter carefully once more and see how his mistakes have made the main portion of *his* letter a blind blunder; and I trust that in the future he will neither be too timid nor too much ashamed to use his own name.

Very truly,
J. C. WORTHINGTON,
735 Walnut St.

MR. EDITOR:—We have been subscribers to the REAL ESTATE RECORD from the start, and have been much gratified with reading your common sense views on real estate matters in general, but were somewhat astonished at your adverse comments on

advance money ground rents, (page 419, September 6).

Some or in fact, nearly all of our good house builders of the present day got their first start under this very system that has added thousands of houses to the city, and because a few builders were dishonest you condemn the whole system, The whole operation is well understood by every material man who enters into it, and he takes into consideration the risk and charges accordingly.

What good reason can you possibly advance why an industrious but impecunious builder should not be able to buy ground and have money advanced to assist him in the operation when the price of ground and amount of advance are well understood by all concerned?

There have been ten times the number of innocent partirs swindled by that miserable Mechanics' Lien Law than by bonus operators and you had far better advocate its repeal as a complete settlement of the whole controversy. Then the ground owner and material man would both look further into the character of the men with whom they deal, the same as other merchants do.

Yours truly,

TWO SEAS.

Philadelphia Architecture.

PHILADELPHIA, Sept. 16th.

The Old Philadelphia order of house architecture has been criticised with more severity than it deserves. I will here describe the front of an eighteen foot front house, with three steps, platform and sill to in height; three stories, respectfully eleven, ten and nine feet. The cross sizes will be as follows: it will require 25½ pressed brick to stretch across the front, one-half length of a brick from party wall to door frame; six and a half lengths for door and frame; two and a half lengths for pier between door and window nine lengths for the two windows; four and a half lengths for middle pier; two and a half lengths from window to party wall. This arrangement will require the eyes of the several hinges to be turned in toward the window, and will secure a perfect bond for the brick work, so that each perpendicular joint may be over those below, and by looking upwards, you see where the bond was perfect, a perfectly straight line. Few fronts attain to this excellence. James Evans house on Broad street near Ellsworth is perfect in this particular. Being a brickmaker he collected bricks an entire summer for perfect color, size, &c. They have means of jumping the bonds in places and none but an expert would detect it. I have thus given the cross section; door frames and windows made accordingly. I will now begin at the top of the pavement next to the building, the payment is twelve feet in width, including fine cut granite eight inch curb. Slope of pavement, according to law must not exceed six inches; the steps to top of sill of front door being five risers high, set with eight inch rise, one eighth inch was, to the foot; steps twelve inches in width; the platform two feet six inches, each lapping upon one another, one inch making 42 inches.

Commence with base course being set one-half inch above the level outside of the steps, which have sloped to meet the pavement two inches. This base course is to show five inches being equal to two courses of brick work of white marble. The ashlar sets upon the Base they are left open under the parlor window for cellar windows.

The ashlar is made thirty-four inches in height, set one inch beyond brick work, upon which rests the water table, twelve and a half inches wide and one-half inch champer at the top which projects two inches, upon which is placed a string corse two and a half inches in height, and is flush with the pressed brick work. Upon this the brick layer lays his brick. He lays nine courses in height when the marble sills five inches in height equal to two corses of bricks upon which are set the first story window frames, sets upon them in such a manner that the box lays against the pressed brick. The gothic mouldings leaving one and a half inches for the reveal shutter rabet, the frames being made eighty-five inches high, upon which is set a seven and a half inch window head of plain rubbed white marble, upon which build twenty courses, and set the second story sills five inches high, make second story window frames seventy-seven and a half inches high, and put upon them a seven and a half inch head of white marble as below. From whence raise eighteen courses and set the third story sills five inches as below. Make the third story frames seventy-two and a half inches high, put upon them a seven and a half inch head same as below. Put on above the head, four courses or ten inches of brick work. Put a two and a half inch moulding above a twenty inch high frieze. Give twenty inches projection to plancier. Put brackets seventeen and a half inches apart five inches thick, and eighth and a half inch ornamental brackets under each end as division. Make Fatia five inches and put above it a ten inch moulding to be at right angle to a line turning to a point raised four feet, six inches high in the middle of side walk opposite. The door frame should be made that its head sets two courses above the window heads, and be ten inches high; all sills project two and a half inches front and ends; all heads have a bearing four and a half inches in the brick work. The second and third story frame, it was the practice to make them four and a half inches wider than in first floor, and leave a pier fifty-one inches high in centre between the two windows in the second and third floors.

I have herein attempted to give a receipt to build a first class brick row, Philadelphia house, of which we have many valued samples got up by builders. Yet we have some that the æsthetic mind can contemplate with pleasure and instruction. Stand in front of one scrupulously clean, neat and rich, with a well cut granite curb, a beautiful pressed brick pavement, with superb white marble steps and trimmings, a highly ornamented suitable grill to the cellar windows, highly gilt, with the glass of pure crystal plate, the sash painted of bright mahogany colour, its cornices and brackets well drawn, with pure snowy white shutters and incomparable brick work. None in the world its equal; simply plain, dignified in its lack of pretentious gewgaws. Let those who croak make some new style that equals it in simplicity, which can be as well and equally built at the same cost. When buildings are built in rows they necessarily gravitate to sameness. I do not allude to that class of structures that are surrounded by flowers and subject of full design; structures only possible for those of influence and favor, yet how many of those costly designs are there, who do not break down in that all essential quiet, that Norman Shaw obtained in the Queen Anne times. To try to do a big thing and fail is more hummiliating than a simple success. Philadelphia did make an order of architecture. I have herein given the law, and a quiet and beautiful evolution it is fully equal to that which gave value to the period of Queen Anne. It was Shaw's simple and correct proportion in doing every day common things, that brought to notoriety the period. The present structures that are now being built in rows by the hundred, I have failed to see much improvement in them. To make a general design of a row differing in accordance with effect and have the appearance of being owned by a master. The whole effect may be good. You see them agreeable to the sight, but lack the flavor and savoury essence of do-as-you-please. A city house should be tidy, cleanly and homelike in effect, and when they are built with side yards on twenty-two feet lots and varied as a good architect can design, I would give a well designed Philadelphia house the preference.

Building Fermits.

H. Sague, two-story back building, Mather st., near Venango, 14 ft. by 30 ft.

Mrs. Hevener, Twenty-sixth and Huntingdon sts, two-story house, Twenty-seventh st., above Huntingdon, 16 ft. by 36 ft.

Philadelphia Traction Company, brick building, Walnut st, below Ninth. 60 ft. by 127 ft.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—a form of action invested to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S, September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

The Mary J. Drexel Home.

A HOME for aged Germans, both male and female, and a school for Protestant Sisters of Charity to be called the Mary J. Drexel Home, is to be erected on the grounds of the German Hospital on South College avenue. Work has been commenced on the foundation. The building will be 3 stories high and will have a frontage of 245 feet with wings at each end extending back 235 feet from the front wall. The architecture will be Gothic in design, with three towers, the one over the entrance to be 200 feet high and one at each end 150 feet in height. The second story of the main building will contain a chapel in the centre, with a picture gallery and library at opposite ends, the sleeping apartments and dining rooms being situated in the two wings. The main staircase will be of stone and the others, as well as the ceilings, will be of iron, rendering the Home essentially fire-proof. It has not yet been decided of what material the building will be made, but it will probably rest on a foundation of broken-range stone, with brick walls and yellow stone fencings. The Home will be one of the handsomest specimens of Gothic architecture in the city, and will cost nearly $400,000.

—Friedrich Siemens, of Dresden, has succeeded in casting glass in the same way as metal is cast, and obtaining an article corresponding to cast metal. The hardness and resisting power of this cast glass are so great that experiments are being just now carried out at the Siemens Glass Foundry at Dresden, with the purpose of ascertaining whether the material could be employed for rails on railways.

News Items.

—A meeting of Yellow Pine manufacturers of Alabama, Florida, Mississippi, and Georgia, was held in Birmingham, Ala., August 25. The officers are W. W. Wadsworth, President; Richard Coe, Vice-President; J M. Bivins, Secretary and Treasurer, and Board of Directors; B. B. McKenzie, Richard Coe, W. T. Smith, J. F. Miller, R. B. Kyle. The delegates present represented $2,000,000. The meeting was held for the purpose of perfecting an organization of lumber dealers in the South. It is expected that there will be a heavy advance in lumber.

—Jane M. Peart, widow, who died on August 28th, left an estate of $8000, and a will containing the following bequests: To the Methodist Episcopal Church at Marlborough and Richmond streets, $1000; to the Sunday school of the same church, $1000; Young Men's Christian Association of the same, $1000; endowment fund of the Methodist Episcopal Home at Lehigh avenue and Thirteenth street, $1000; Penn Widow's Asylum at Belgrade and Otis streets, $1000; Rev. Wm. Ridgway, of the Philadelphia Annual Conference, her executor, $1000.

—Cornelius Vanderbilt, Joseph M. Gazzam and Martin E. Ohnstead have purchased the property of the Clearfield Bituminous Coal Company, located on the line of the Beech Creek Railroad Company. The capital stock is to be reduced, and the number of Directors reduced from thirteen to seven. The purchase was made, it was stated yesterday, permanently to secure the tonnage of the mines to the Beech Creek Railroad, as it was understood that the friends of the Pennsylvania Railroad Company were endeavoring to purchase a controlling interest in the company.

—Another electrical problem solved—the transmission of force. For ten years M. Marcel Deprez has been experimenting in this direction at the expense of the Rothschilds, and it is now announced that he has at last completely succeeded. Translated into terms of common life, what M. Deprez is prepared to do is to transmit, with one generating machine and one receiving machine, a force of 50 horse power round a circle of seventy miles, or thirty-five miles in a straight line, so that it is available at any point. At present the apparatus costs $25,000, but the price will of course soon be much reduced.

Our Municipal Statesmanship.

The policy which Councils are pursuing in relation to public improvements is due to the selection of narrow-gauge Councilmen. Political expediency is their guide and log-rolling their method. It will never be possible with such people in control of our finances to put Philadelphia in a presentable condition with well-paved and clean streets, plenty of pure water and thorough drainage. Mr. Bardsley and his followers in Councils act on the theory that it is good policy to put off till to-morrow that which ought to be done to-day. That is costly economy, and will simply increase the burden which will ultimately fall on the taxpayer.

Instead of improving the water supply and helping productive interests, our small-fry statesmen pursue an opposite policy and utilize two-thirds of the water-rents to contribute toward current expenses. They apparently imagine that by making the users of water pay $1,000,000 more than the water costs the city, and by turning this surplus million into the Treasury to be applied to ordinary expenditures they are thereby lessening the burdens of taxation. They lower the tax rate, but maintain a high water-rate, and congratulate themselves on their economies. This is the size of our municipal statesmanship.—*Phila. Record.*

—The receivers of the Reading Railroad Company have been compelled to abandon placing the car-trust certificates they were given authority by the United States Court to issue. They state that their inability to place them at par was due to the rate of interest they were to carry—5 per cent.—and the fact that they were not made a Receivers' obligation. The new equipment now being secured is paid for out of the revenues of the company.

THE

Day Sewed Shoes.

We wish to call the attention of the public to our principal object in opening the Day Sewed Shoe Store. The Day Sewed Shoe Manufacturing Co. was organized to introduce the Day Sewed Shoes, and this could only be brought about by getting the manufacturers to make them, and the quickest way to accomplish this was to give them this opportunity to dispose of their goods. We make our finest goods at our own factory, and are careful to have every pair perfect. We earnestly request that every pair of shoes purchased of us be returned for exchange if not as represented, whether they have been worn or not.

THE DAY SEWED SHOE MFG. CO.,

Under the management of W. W. Apsley,

No. 23 N. EIGHTH STREET.

Open until 10 o'clock on Saturday night, Sept. 4.

SPECIAL NOTE.—Do not forget that we make to measure for crippled and tender feet and make a specialty of all kinds of repairing at moderate prices.

Mr. H. S. BEEBE, No. 231 North NINTH Street dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

Fall Clothing

We have made an unusual large stock this season which is already meeting a ready sale. In MAKE, STYLE and FINISH our goods excel all others, and prices defy competition. We fit you equal to the best tailor-made garment at about one-third less price.

SCHOOL SUITS FOR BOYS AND CHILDREN in new designs, and we only have what we can recommend.

The NEW FALL FURNISHINGS already in are much superior to the usual stocks found around town.

An early call solicited.

VOL. I.—NO. 38. PHILADELPHIA, MONDAY, SEPTEMBER 27, 1886. PRICE 15 CENTS

Items of News.

—Merrick street is to have its name changed to Broad street.

—The personal estate of Thomas T. Child is appraised at $35,770.

—The personal estate of Matthias Powers is appraised at $32, 376, 70

—A dwelling on n. s. Race St., above 16th, 17½ x 140, sold for $10,000.

—The property S. W. cor. 17th and Sansom Sts., 54x90, sold for $59,000.

—The corner stone of the new Park Avenue Church was laid last Saturday.

—The house and lot, 20x66, S. W. cor. 15th and Cumberland Sts, sold for $8,000.

—The master Builders of Albany N. Y. have locked out about 3000 workmen.

—Spring Garden St. properties are in good demand; No. 1205, 20x100 sold for $10,000.

—Clark & Co.'s green glass works at Bridgeton have started up with non-union men.

—One-third interest in the property No. 727 Chestnut St., in Swarthmore College, sold for $33,333.

—Lawrence S. Pepper left an estate of $300,000, of which $22,000 went to charitable institutions.

—Moses A. Dropsie, Esq., has purchased a dwelling on w. s. of Broad St., above Thompson, for $17,500.

—The Baltimore and Ohio Railroad Company are going to build a locomotive house at Fifty-ninth street and Woodland avenue.

—Messrs. D. Klein & Bro., the clothiers at 918 Market street, carried off the contract for winter clothing for the employees of the Gas Trust.

—The Chief of the Bureau of Statistics reports that 33,366 immigrants arrived at the various ports of the United States during August.

—The Treasury Department has decided that the valuation of the Mexican silver dollar for custom purposes, as legally proclaimed on January 1 last, cannot be changed during the year.

—A caveat has been filed by Mrs. Elizabeth Rafferty against the will of her father, Benjamin Harmer, who kept a hotel for years at Frankford avenue and Haydock street and left an estate of about $40,000.

—William Feeny, a New Orleans politician, lately intrusted with the superintendency of street paving in that city, was arrested at Chicago on Wednesday last upon the charge of having committed forgeries at New Orleans amounting to $2,800.

—Chief Inspector Martin reported to the Health Board that the surface drainage of twenty houses on the south side of Cambridge street, west of Twenty-ninth, was creating a nuisance. Councils will be requested to authorize the construction of a sewer.

—The will of the late Agnes Lennig, disposing of an estate of $150,003, has been admitted to probate in this city. Mrs. Lennig was the widow of Charles Lennig, the founder of the Bridesburg Chemical Works, and died last April at Frankfort-on-the-Main, Germany.

—During the past fiscal year the receipts of the Patent Office from all sources were $1,206,167, as against $1,207,974 during the preceding year, while the expenditures were $992,249, leaving a surplus of $213,918. The surplus for the preceding year was $140,851.

—The will of Dillwyn Parrish, the retired druggist, contains bequests of $1,000 each to the Home for Aged and Infirm Colored Persons, Home for Destitute Colored Children, and to Swarthmore College for the purchase of books for the library. The estate is valued at $150,000.

—In making gas and water connections for Hood, Bonbright & Co's new building on Market street, the workmen in digging down cut through one of the old wooden water pipes that was used many years ago to furnish the city with water. It was in a good state of preservation.

—A powerful company of English capitalists, with headquarters in London, has got possession of an old concession for a railroad from Tuxpam to the city of Mexico, and will build a road which, it is calculated, will involve the expenditure of at least $25,000,000. This is the most important investment of English capital ever made in Mexico.

—The lowest bidders for the repairing work on the Schuylkill Arsenal are: Paving with the best granite Belgian blocks 1000 square yards of roadway, D. & P. McNicol. Pointing building within arsenal grounds and resting and pointing chimneys, Joseph A. Augustine, furnishing and setting two "Artisan" hopper closets, Hayden & Berkowitz, of New York.

—The Western window-glass workers' strike is at end, and work has been resumed in every factory west of the mountains. The basis of the settlement was last year's wages, the workmen withdrawing their demands for an advance and signing the old scale. The factories have been closed since last June, and the resumption of operations will furnish employment to over 3,000 men.

—The gross earnings of the Northern Central Railway for the month of August were $202,027.42, and the net earnings were $198,731.47, an increase in net earnings over the same month of last year of $18,246.92. The gross earnings of the company for the first eight months of the year were $3,533,888.85, and the net earnings $1,219,868.91, a decrease as compared with the same period of last year of $114,853.85.

—Articles of merger and consolidation have been filed at the State Department between the Hanover Junction, Hanover and Gettysburg Railroad Company and the Baching Valley Railroad Company, the name of the consolidated corporation being the Baltimore and Harrisburg Railroad Company. The President is G. W. Eychelberger. The office of the company will be at Hanover. This is said to be a part of the Baltimore and Ohio Railroad Company's scheme to reach Harrisburg.

—The statement of the United States Treasurer of the 24th instant, shows gold, silver, United States notes and other funds in the Treasury to-day as follows: Gold coin and bullion, $242,209,455; silver dollars and bullion, $184,366,033; fractional silver coin, $27,093,119; United States notes, $45,144,876; national bank notes, $241,437; national bank notes in process of redemption, $2,013,017; deposits with national bank depositories, $13,787,897; total $515,355,834. Certificates outstanding—Gold, $86,030,347; silver, $93,387,632; currency, $8,030,000.

—Section A of the large bonded warehouse of Fitzpatrick & Pemberton, Front and Lombard streets occupying the site of the Patterson stores, destroyed by fire in August, 1869, was partially burned out on Sunday night, causing a loss on merchandise, belonging to many different parties, estimated at $30,000, and a loss on the building belonging to the Pennsylvania Warehousing Co. of about $20,000. The latter loss is covered by insurance, and it is supposed that of the consignees is also covered. The other four sections of the block, which cost $300,000 to build, were only saved from destruction by fireproof walls and metal-sheathed doors, shutters and roof.

—On Friday last Wm. H. Kemble testified before ex-Governor Pollock in the Reading foreclosure proceedings that he was the owner of $400,000 of the first series 5's bonds of the Reading Railroad Company. The other signatures and amounts in bonds signed to the petition for foreclosure were as follows: Joseph Wharton, $320,000; Barker Brothers & Co., $97,000; Wm. H. Kemble, $350,000; C. L. Borie, executor, $30,000; C. L. Borie, $150,000; C. & H. Borie, $55,000; James McManes, $43,000; Geo. W. Colket, $105,060; J. Wesley Supplee, $35,000; E. C. Knight & Co., $100,000; J. Wharton, $80,000; Wm. McIlvain & Sons, $17,000; Robt. Glendinning & Co., $85,000; R. P. Morton, $3,500; estate of J. B. Lippincott, $70,000; L. H. Taylor & Co., $47,000; H. P. McKean, $265,000. Total, $2,168,000.

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, SEPT. 27, 1886.

THE 24th ward people want that new school house built.

IF the cable car people can charge six cents, then, law is not law, and trickery rules.

THE coal oil lamp keeps on getting its work in, in manufacturing angels big and little.

WITH a $54,000,000 wheat crop, California has certainly a good chance to get through the winter comfortably at least.

$11,000,000 of liabilities, $1,000,000 of assets; this is the record that a dozen recent failures leave to the contemplation of the business community of this country.

BI-METALLISM is growing in favor in European countries as it should and must, and the great powers will no doubt soon agree to recognize bi-metallism as a fixed fact.

WHAT has the Board of Port Wardens done to make our slips on the Delaware river front, more suitable for the unloading of deep draught vessels? Nothing.

THE new building of the Hahnemann Medical College, on the West side of Broad street above Race street, has a frontage of 70 feet by 100 feet and is four stories high, and is heated with steam.

NOW that the starting of stoves and heaters will soon be necessary in home and work-shops, great care should be taken in providing against fires, precautionary measures on the start, will insure a greater degree of safety than any subsequent vigilance can possibly afford.

VERY few old houses are for sale in the central portion of the city. People have an idea that every year their property will be more valuable for business and store purposes.

A LITTLE of this self same councilmanic impeachment energy if properly directed might possibly unearth much of the rascality which has been perpetrated in many city departments during the last ten years.

THE stove manufacturers propose to run with apprentices and whatever non-union labor they can pick up. The President of the Eastern Stove manufacture Association says ten out of fourteen outside foundries are in part operation.

THE down town real estate people are very busy. Properties are in good demand for rent and for sale. Everything is quickly picked up. Business is booming along quietly. A great deal of new building is shortly to be undertaken in the section west of Broad, south of Washington avenue.

IF Mr. Wm. M. Singerly could be induced to accept the position made vacant in the Park Commission, by the death of Mr. Remak, his tireless energy and practical business methods, would soon be expressed in many different ways, to the satisfaction and gratification of the many thousands who visit the park.

IT is interesting to observe the steady growth of the Building and Loan Association idea in the South and West. Philadelphia gave birth to the gratest labor organization that ever existed, and to the greatest scheme for house building on the mutual assistance plan. It gave the world a century ago a new political system. Philadelphia may be conservative, and "pokey" and all that, but we manage to start some big things.

THE communication on "The Equipollent Arch," in our correspondence department, reads like a discreet attack on our entire system of arch construction, which is a vital subject with architects and builders as well as with engineers. The subject is deserving of much more consideration than has heretofore been accorded it. If our system of arch building is wrong it should be shown. If it is right, the attack on it ought to be boldly repulsed. What have the architects and engineers to say?

THE *Evening Star*, whose bright and cheerful rays have for many a year been a welcome visitor to the home circles of our city, has arrayed itself in a brand new full dress suit of type. Always reliable and entirely free from political demagogism, it justly merits its years of prosperity, and must in the future as in the past, command the respect and patronage of those who love to see it shine.

It was an oversight that the name of Mr. Isaac Hobbs, the veteran architect, of Philadelphia, was omitted from the well written communication on "Philadelphia Architecture" on page 439 of last week's issue. Valuable as is the article without any signature, it would have possessed additional value to all who know Mr. Hobbs, had his name appeared under it as it should.

THE total amount of fees received at the Recorder of Deed's office, for the first six months of the present year, amount to nearly $55,000 while the total amount received for the whole of 1885, amounted to a trifle over $38,000. During the first six months of this year 4504 mortagages were satisfied, amounting in the aggregate to $20,265,309,97 there were 9812 Deeds recorded during the first half of this year, and 5412 mortagages amounting $27,190,474.

PREPARATIONS and negotiations are being entered into for the erection of a new industry in Philadelphia which is that of making "Lumber" out of straw. In New York it has been successfully carried out. The manufacturers claim that they can produce by their process lumber equal to pine, at a far less cost. The Company have already had plans drawn out by Mr. C. F. Collom, who anticipates daily the instructions to forward them.

T. B. M. ADDIS agent for the citizens municipal association does not believe in having the bed for the stone pavement on Moyamensing ave. West of Broad street, filled in "with ashes, tin cans, street dirt, and other refuse matter" and has accordingly complained to the Highway commissioner against M. C. Hong the contractor, whom he says has not given the proper security. Certainly "tin cans, broken bottles, cast off shoes, hats and other garments" do not make very good foundation. The work was examined by several citizens who corroborated the agents statements. This Municipal association is making itself very annoying to tin can and old bottle contractors. Why will you, gentlemen!

DURING the first six months of this year, 5412 mortgages were recorded representing $27,190,474. Last year the total number of mortgages recorded was 9,574 for the entire year, representing $31,147,807, or only $13,435,379 for the first half of last year. December and January are the busiest months, the total being over eighteen million dollars in amount. The follow statistics will show the results month by month.

MORTGAGES RECORDED IN 1885.

January	$2,124,810.49	August	$1,593,852.68
February	1,664,407.23	September	1,844,131.44
March	2,244,463.21	October	2,744,160.83
April	2,459,658.17	November	2,728,418.20
May	2,381,486.38	December	5,969,323.45
June	2,560,555.25		
July	2,832,536.88	Total	$31,147,807.21

MORTGAGES RECORDED IN 1886.

January	$12,408,175.37	May	$3,570,271.44
February	2,203,301.50	June	2,803,498.39
March	2,986,398.41		
April	3,218,829.45½	Total	$27,190,474.56½

THE New York *Sun* hit the nail on the head when it remarked the other day, "to expect the laboring community to vote unitedly upon any question directly affecting the interests of labor is futile." The workmen never have united politically, and it will be saying a good deal to say now that they ever will. That there should be more unity of action among them, none will deny. This failure to unite politically must be based on some good reason, though unexplained. Political parties exist in order that the great principles of government can be maintained. The apparent objective point of a labor party is to increase its share of wealth. There are many evils to overcome in which business men, and in fact forty-nine fiftieths of the community, are as much interested as the workingmen themselves, and if there is to be a new party, it will have other limits than simply the getting of higher wages.

PHILADELPHIA is put in a nice fix by the street car people in regard to street pavements. The city solicitor says the city cannot make the necessary improvements, and the street car companies wont. So there we are. And what is worse, if Mr. Bardsley knows any thing about it, we will be obliged to wait a year or two while our miserably slow courts are deciding who should pay. There is another illustration of our cumberous legal system. A case of this kind ought to be decided in sixty minutes. Strictly speaking, there ought to be nothing to decide. Our whole legal system is next door to a farce; it is inefficient; it is built to make lawyers fat, and give courts business. The interests of a million people must be trampled upon and ignored a year or two, just because of defective legal machine, and old worn out system of deciding things. We need another Justinian, who would sweep away nineteen twentieths of the legal cobwebs that are darkening the windows of our so called temples of justice. The masses of the people feel a contempt for law methods. If the mechanics of the nineteenth century had made no more progress than the lawyers have in getting out of old ruts and adopting new systems and new ideas, we would be still riding in coaches and canal boats, and reading by tallow candles.

THERE are some very quiet real estate operations going on in this city in the interest of the Baltimore and Ohio Railroad Company looking to the acquirement of real estate all along Sansom street, from the Schuylkill River to Broad. Rumor also has it that quite a number of purchases have been quietly made and that numerous negotiations are now pending. It is also rumored that the Lafayette Hotel property is under negotiation and that it will be remodeled into a South Broad Street terminus for the Baltimore and Ohio. Something is in the wind, but the operators do not care to have the details set forth as yet.

A new hotel is to be built in this city not many blocks from Walnut and Broad Streets. Real estate operations have been quietly going on for some time by Tom, Dick and Harry, apparently acting independently and without any knowledge of each others movement, but really acting together under one head that knows how to do it. All the real estate has been bought up at low prices. The plans have been completed and accepted, and the work will soon begin. We suggest that one of the dailes now work up a "beat" on the rest.

The Bullit bill makes no provision for the election or appointment of the Board of Port Wardens, this is certainly a very wise omission and Mr. Bullitt no doubt had in view the conditions of our piers and the fact that there is not a sufficient depth of water in our slips to accomodate even the few deep draught vessels that come here to unload, when he drew the bill.

THE prospertiy of Philadelphia depends largely upon railroad and water facilities. The B. & O. Railroad increases our power in one direction. The proposed expenditures in channel improvement will do much in the other direction. Colonel Roberts in speaking of the improvements opposite Market street says :

There can be no question as to the necessity for an improved channel which will afford direct and convenient connection between the deep water in front of the two cities to the large inter-state commerce affected thereby. The appended report considers the plan for the formation of a channel 200 feet wide and 10 feet deep at mean low water at a point directly above the upper end of Smith's Island and at the lower end of the bar. The general direction of the bar is such as to place any channel through the bar more or less across the line of tidal flow. To provide as far as possible against the liability of such a channel refilling its axis is proposed to be placed quite oblique to the line of the bar, and its sides protected by a revetment. The estimated cost of the work is $40,000, of which $20,000 is for dredging and the remainder for the revetment.

THIS will do very well for travel between this City and Camden, but what is really wanted, is, the formation of a channel from a point in the river near the upper part of Philadelphia, to deepwater in Delaware Bay, with a least width of 600 feet and a depth of 26 feet at mean low water. To do this will require an outlay of $2,425,000.

Last year the revenue collected from the districts contributary amounted to $13,812,764.54 The total amount thus far expended on improvements foot up $1,500,000 in round numbers.

The tonnage for the river calls for extensive outlays. Last year 473 American vessels entered at Philadelphia, and 851, foreign. Our Real Estate Exchange can be heard to advantage in the matter of harbor improvements. It is not alone the commercial element that is to profit by a good harbor.

COMMON COUNCILS adopted the $1,85 tax rate. It ought to have been $1,95. It is shortsighted statesmanship to put it so low. The property holders of Philadelphia want improvements to be made and are willing to pay for them, niggardly economy is not the thing. The $1,85 rate will buy, it was stated $1,132,932 more than last year. The Board of Education wants more, the Fire Department wants $80,000 more, the electrical Department,$3,000 and $50,000 is wanted for gradings and intersections. The Building commission must have $100,000 more. Mr. Bardsly said the Electrical Educational, Highway, Survey, and Water Departments could not have all the money they wanted. The Park Commissioner could have some of the $268,000 they asked for, but the Police Department would have to get along with what it had. The 25th street damages are not provided for, and it will be some time before they are ascertained, various members advocated a higher rate, one member, Mr. Mehan, of the 22d ward, said the low tax rate encouraged building, which would otherwise go to Montgomery County.

B. F. ASHWOOD Secretary of the Elmwood Mutual Land and Improvement Company which owns a track of land that has been nearly all disposed of in building lots this season, suddenly disappeared an alledged defaulter for an unknown amount. The annual meeting was held at 12th and Filbert streets on Thursday evening last, when the affairs of the company were gone over. The Society gave a bond for $1,000 by the American Surety Company. He invested $500 in another land company which will probably be refunded. A warrant for his arrest was issued, but the man has flown, no one knows where. He is still retained as secretary but his successor will be elected as soon as the formalities necessary can be gone through with. He was paid $40 per month. Better wages would be something of a guarantee against filching. Other similar associations had better make a note and besides demanding proper sureties and watching their business closely, pay decent salaries.

IT will be a sad day for Pennsylvania if the prediction that her iron interests will gradually slip away becomes verified. It is claimed that many of the Pennsylvanian iron manufacturers are buying coal and iron lands in the South and West. If this be true it can be justly taken as an indication of want of faith in Pennsylvania's continued supremacy in the manufacture of irons ; and yet it seems plausible enough that the mines and dis-

tricts where mountains of iron are known to exist should be gradually opened up and made to yield to the enterprise of the present century. South-western Missouri, a district of country but little known at present, is said to contain billions of mineral wealth, wanting the coming of railroads to make it marketable. The next decade may bring many radical changes that are little dreamed of at present. But there could be none more astounding than the loss, or even the depreciation of our iron interests.

WHILE the Councils Committee are actively preparing for the new form of government the politicians are preparing to elect men to the Legislature who can be relied upon to vote for a repeal of the new charter. The ordinances drafted by Mr. Bardsley, Mr. Ridgeway and Mr. Miller, were considered at a meeting held on Wednesday last. The intention is to embody all the essential points and features of the three in one ordinance. The sections passed upon related to the powers of the Mayor and the Department of Public Safety, and to the Department of Public Works. Questions which arose as to the jurisdiction of Councils under the act over the Board of Port Wardens, and as to the provisions of the act forbidding the reception by public officials of fees or perquisites, as applied especially to the delinquent tax collectors, were referred to the City Solicitor.

ELSEWHERE we refer to the steps taken by the elevated railroad syndicate to secure the right to build its projected road. On a popular vote the enterprise would go through. The real estate interests of that beautiful section of country along the Delaware at the upper end of the city would be greatly benefitted. There would be "millions in it" for that section, even with the partial steam accommodations and deficient street car facilities. That end of the county has progressed rapidly, and at this time extensive building operations are in progress. Real estate transactions of recent date show that desirable building sites can be had at quite reasonable prices. It would be well for real estate operators to get behind the scenes and find out which way the elevated railroad cat is going to jump and act accordingly.

PHILADELPHIANS will shortly be called upon to give more attention than they have yet given to the disposal of sewerage. Dr. Wyman in the Herald of Health refers to plans adopted abroad as follows:

The system of sewerage in Berlin begun in 1876, has been in full operation for nine years, and now includes seven of the twelve districts into which the city has been divided for sewerage purposes.

The plan contemplates in each district a pumping station, where all the sewage is pumped to the irrigation-fields, some fifteen miles distant. Seven pumping-stations are established. The irrigation-fields are four in number, located to the north, north-west, south and south-east of the city. The four fields contain 14,666 acres of land.

Of the stations which I visited, it will be more interesting to describe the one which operates the drainage from the middle section of Berlin, which includes the Unter den Linden with its palaces, and a densely populated district as well. One might suppose that its location would be in some out-of-the-way place, but we found it in a desirable portion of the city, not specially removed from other buildings, and only three minutes' walk from one of the finest railway stations in Europe. The buildings and grounds had a neat and orderly appearance.

In the yard I was first shown the large cistern into which is poured, and through which is strained the sewage of the whole district, including the flush and rain waters. The district has a population of 130,000, and the quantity of sewage pumped here is about 16,000 cubic metres daily. On Saturday it is increased to 20,000 or 30,000.

It requires but an hour-and-a-half for all excrementa and other sewage to get from the place of deposit to this cistern, and so great is the quantity of water that by the time it is reached the excrementa are in thorough solution. The water dilutes and renders them inoffensive, and they are pumped away before putrefaction begins. It has been shown that in 500 cubic metres of the fluid there is but one cubic metre of solid matter; and in fact this fluidity of the sewage and its very rapid removal appear to be the two features which make this system successful.

The cistern has a capacity of 5,900 cubic metres. Its location is but a few yards distant from a busy street, and not more than twenty steps removed from the front entrance to the local manager's residence. It is covered with boards an inch apart, and upon stepping upon the platform we failed to notice any odor. No sickness has been caused by it either in the manager's residence or among the laborers. Occasionally it is necessary to flush it with water.

It is distributed in fields concerning which the Doctor says:

On going into the fields after noting the absence of odor, and the day was mild, our next surprise was the entire absence of machinery. The pumping force of the engines in Berlin is sufficient to throw the fluid to two central distributing points through channels measuring respectively one metre and sevety-five centimetres in diameter. From these two central points distributing pipes radiate in every direction for a certain distance, connecting with the open courses or ditches which extend through the fields. At the point of junction of the pipes with the ditches, valves are provided for regulating the flow.

There is no reservoir, sewage being distributed as fast as it is received. But it sometimes happens that valves of a number of the distribution pipes are closed and at the same time an unusual amount of pumping is necessary at the station in Berlin, thus causing a sudden excess of sewage. To relieve this, at each of the two central points just named there is erected a stand-pipe provided at the top with ad overflow which discharges into neighboring shallow basins, sixteen in number. These stand-pipes have the appearance of small towers, their tops being twenty-one metres above the city. The plain around Berlin is thirty or forty feet above the city, and these pipes are about thirty feet above the level of the plain.

A watchman is on duty at each tower to give notice of an overflow by means of a bugle, calling the workmen to open the valves. An automatic arrangement gives the same notice by a flag, or at night, a lantern.

The fields over which we were looking contain 3,333 acres. They receive the sewage from sections 1, 2 and 3 of the 12 sections into which Berlin is divided. Five thousand cubic metres of liquid are distributed into them every twenty-four hours, of which twenty-five per cent remains as deposit and seventy-five per cent flows off as water. We were informed that for every 500 persons there is required about two-and-two-thirds acres of land, and that the area of irrigation required is about one-and-a-half times the surface of the city drained. The fields are very level, and are divided by avenues lined by small trees and by ditches and furrows. The sections are of two sizes, the larger called meadows for raising grass, and the smaller called beds, for the growth of vegetables.

THE high handedness of the Traction people was once more exhibited in their refusal to produce the leases pertaining to that company and the Market Street lines and other lines. Another hearing takes place on Tuesday of this week. Denunciation of such conduct is cheap and fruitless. It does seem a short-sighted course for the Traction people to pursue.

THE communication submitted by the president of the company proposing to construct an elevated railroad in this city lifts the question a little higher up where the proposition can be fairly considered. The first objection made was that legislation was necessary to secure property owners. The President of the company in his letter said:

"Since the last elevated railroad project was before Councils the Supreme Court of the State has decided that railroads under the provisions of Article XVI, Section 8, of the State Constitution, which reads, 'Municipal and other corporations and individuals invested with the privilege of taking property for public use shall make just compensation for property taken, injured or destroyed by the construction or enlargement of their works, highways or improvements, which compensation shall be paid or secured before such taking, injury, or destruction,' are liable to damages incidental as well as direct, and must secure or pay any property owner who thinks his property is damaged. This decision absolutely secures property owners, and therefore, there is no further argument required upon the subject."

The letter then referred to the "rate of fare," a proposed "bonus to the city" and the plans and specifications as follows:

"The ordinance requires that during those hours of the day in which necessity of business compels riding, viz., from five to eight o'clock in the morning, and from five to seven o'clock in the evening, no more than five-cent fares should be charged. This restriction makes it possible for a passenger to ride fourteen miles for five cents, or but little over one-third of a cent a mile—the cheapest riding in the world. And the magnitude of the gain to the citizens is made apparent when it is considered that a saving of one cent on each of the 117,171,681 riders in the street passenger railways of Philadelphia last year would amount to $1,171,716 81.

"In response to a very general and proper public demand that valuable franchises should be granted by cities only upon condition that the tax payers should annually share in the increased value of the franchise, the Philadelphia and Northeastern Railroad Company offers to pay annually into the city treasury five per cent. of its gross receipts. The full effect of such provisions is best shown by the following quotation from Poor's Manual for 1881, page 879, under the caption of "State Debts:', Illinois—In the last two years, $521,253 48 was paid off, leaving the public debt, October 1st, 1880, $281,059 11, all of which was called in for payments January 1, 1881. The debt, originally a large one, has been gradually paid off from the income derived from the 7 per cent. gross earnings tax of the Illinois Central Railroad.' Since 1862 the Illinois Central Railroad Company has paid, under this act, $7,775,000 to the State.

"Under the ordinance the plans and specifications are to be submitted to the Chief Engineer and Surveyor of the city, who must approve the same before the road is constructed."

The matter was postponed until Tuesday afternoon of this week.

A STATEMENT has been issued by the Directors of the Chesapeake and Delaware Canal Company, in which they legalize, the over-issue of bonds by J. A. L. Wilson, the absconding treasurer. The statement says:

We are advised by council that the company is liable to all innocent holders for this over-issue, and also that such holders are entitled to the security of the mortgage.

We therefore propose to pay the interest due July 1, 1886, on October 1, and to ask the present holders of the loan to surrender their old certificates and to take in exchange, as soon as they can be prepared, new certificates in even sums of $500 and $1000 respectively, negotiable by transfers upon their backs, and registered at some reliable trust company; and scrip certificates for the odd amounts, convertible into bonds in sums of $500 or $1000; said loan to run for a term of thirty years, drawing interest at 5 per cent. per annum from July 1, 1886; but the scrip certificates not previously converted to be redeemable, at the option of the company, in five years from date.

It further states that all the earnings of the company, after paying current expenses and a moderate reserve for contingencies, exceeding 5 per cent. interest, will be used in the reduction of the loan and its extinguishment, until it shall amount to what it would have been had no over-issue been made. The report states that the net earnings since June 1, are 10 per cent. greater than last year.

Proposed Gravity Road in the Park.

The starting point of the proposed Gravity Road in the Park will be at Belmont and Elm avenues, and will pass the Centennial concourse underground and thence run along the face of the hill east of Horticultural Hall. At a point near Belmont Glen the cars are carried up the old inclined plane to the top of the hill at Belmont, by either a traction road or an electric railway, thence along the northwest boundary to Chamouni, thence turning southward along the east face of the hills to the base of the inclined plane, thence again to the summit, thence crossing Belmont avenue by a bridge passing along the northwest boundary to George's Hill, thence along Fifty-second street to the place of beginning. The route covers a distance of six and a half miles, all of which can be traveled by gravity excepting 3500 feet at the inclined plane.

Philadelphia Brick Interests.

Not far from 200,000,000 brick are annually made in and near this city, the great bulk of which are used at home. The industry has expanded rapidly and is now one of the best organized and most successful. The old time method of making brick by hand has disappeared, and in its place we have enormous machinery for the production of brick at the rate of thousands per day. The old brick-maker remembers how the clay was tempered by the spade in the old "ring pit." The process then was slow and clumsy. The material was loaded from the pit into a barrow, wheeled to moulding floors, where each brick was moulded by hand and carried, one at a time to the drying floors, and then exposed to the sun or rain as might happen. After sufficiently dried, they were "turned up" until spoiled by the rain. In that case they were shoveled back into the pit to be retempered and made over again.

After the bricks were sufficiently dried, standing on their edges, they were loaded on barrows, wheeled under sheds, and then piled in rows or 'hacks,' where the process of drying was completed, before they were made for the kilns.

Many attempts have been made to produce a perfect brick-making machine, and much time and capital has been expended but without much practical result; the most common process is known as "the dry clay process." The main reason of the almost universal failure of inventions to produce practical brick-making machinery, is not that they (the inventors) lack mechanical skill, or a knowledge of the principles of mechanics, but for the reason that they did not make themselves familiar with the materials they had to work in their machines.

Many machines have been constructed to make what was to the naked eye a perfect brick, but, when submitted to the action of the fire, in the process of burning, to the hardships of transportation, to the action of the hammer and trowel, to the pressure in the wall, adherence of the mortar, and the action of the weather, it was found wanting in some one of its qualities to stand the tests. They would either crack or fall in the burning, break in the transportation, refuse to cut at any particular point or in any particular direction, crush in the wall or or fall to powder by the action of the frost.

The machinery by which they attempted to produce these bricks was usually composed of steel-lined moulds and plungers, and steel-faced caps; all subject to great wear by the gritty material continually being forced between them.

So far as practical results testify, that class of machine known as the "tempered-clay machine," has been by far the most successful, and the only process that has come into general use, or meets the approbation of the practical and scientific brick-maker and architect.

Chambers Brother & Co's process of making brick is that of tempering and expressing the tempered clay in a plastic condition through a die (not moulds) sanding the bar of clay, and then severing it into brick lengths.

These machines belong to the class known as "Tempered-clay machines and were invented, principally by Cyrus Chambers Jr., who is well known as a mechanician and inventor. They mix and temper the clay with water as they use it, without any additional handling, or without previously drying, rolling or any other preparation whatever for ordinary clay, taking them just as furnished by nature. The machines first, after tempering the clay, form it into a parallel bar the proper width and thickness for a brick, sand the surface, cut the bar into uniform lengths proper for bricks, and then delivers the bricks so moulded and sanded, at any convenient distance from the machines sufficiently stiff to be immediately wheeled and packed in the sheds or on the drying cars.

Chambers Bro. & Co. are the largest manufacturers of brick-making machinery in America. This firm within the last two years have been kept very busy sending their machinery all over the country, and within the last month, have forwarded one of their B-CD. to Agusta Georgia, it has a capacity of 50,000 per ten hours. Also just filled up for the Pullman Patent car Co. Pullman, two of their B machines elevator, clay Rolls &c. Some 5 B machines in charge, Cleveland, Ohio, Pittsburgh, Washington—also put in for Messrs. Lloyd & Russell a C-CD. machine. Which has an automatic wire Cut-off with hopper duster, two dies, and 6 feet of off-bearing apron it has a capacity of 25,000 per ten hours, also pulling one of the same machines, set of rollers, elevator and complete plant and many other very extensive operations, one of which is at the Croton New York, which will have a capacity of 500,000

Messrs. Chambers have just started a new dryer, which is an improvement on the old plan of tunnel drying. The bricks are packed on rough iron pallets which are loaded on cars and then run into tunnels, which are fired at one end. It has been successfully tested at Pullman, drying the bricks made in their B-machine freshly dredged from the bottom of the lake They will shortly put into the market a new "Clay Crusher," which they have successfully tested. Mr. Carrol has the contract for the bricks from the B. & O. R.R. for tunneling purposes, which are being made by their machines.

This firm are kept exceedingly busy working day and night employing 150 hands, and during the last two years have been behind with their orders.

Philadelphia produces some hundred and fifty million bricks yearly, and the shores of Jersey about one-fourth that amount. The demand for brick all season has been sharp, in consequence of the early season being wet. Our Philadelphia trade is still held by old manufacturers, all of whom are daily making modern improvements to meet the increasing trade.

THE EQUIPOLLENT ARCH.

Although there is an acknowledged spirit of progress to be noticed in every department of Sciences and Art, we are nevertheless obliged to pause every now and then to observe the neglects and oversights which in this annual progressive movement are allowed to befall certain subjects of enquiry. Among these omissions—strange as it may seem—is the Arch question.

In the history of Architecture the Arch first appears in Egypt, about two thousand years before the Christian Era. It was generally then as now, the segment of a circle. Originally it appears to have been formed without the use of voussoirs; and was constructed by a system of corbelling in horizontal courses. Similar corbelled vaults slightly curved upon the interior, were used by Etruscans, Persians and Jains, and cannot be denied that some of these arches have stood the test of centuries that have leveled to the ground the best constructed radiating and semi-circular arches, which are ever thrusting aside their abutments. This fact leads us to believe that the thrust of one system, with its slight curve, has much less thrust than the other, with a curve that is known to be erroneous.

Gradually the voussoir system was generally adopted in Egypt, and passed to Greece and Rome, and thence to the world at large.

It is a marvel of its kind that whilst every department of architecture and engineering has been industriously and sagaciously developed in the general aspiration towards perfection, the arch has been permitted to stand still.

It is time that engineers and architects agree that the circular arch is not an arch of equipollence; but that on the contrary it is the worst and weakest of all arches in general use. It is also true that for many centuries they have vainly striven to establish a formula to define an arch of equipollence. Yet it must be frankly admitted that no such formula has ever heretofore been proposed, at least none which has received such a general sanction as to remove this great question from the realm of disputation.

The French engineers two centuries ago adopted as their nearest approach to equipollence the curve of the ellipse, with its major axis as its chord. This is still retained very generally; in France, but is a palpable fallacy and to prevent such arches from falling, great waste abutments have to be built, which would not be required with the correct curve.

The English engineers never proposed a formula worthy of the name, until that of the late Professor Rankine. His is very nearly correct; compared with all that went before, it is a monument of excellence, from the springings to the haunches, and is a modification of an inverted catenary. From the haunches to the crown it is a common catenary.

Neither of his curves are reliable as curves of equipollence, except in a case when the load is dictated by the two curves, and then loaded.

The catenary curve, whether pendent or inverted, carries all its weight in its links or voussoirs. If, when inverted it was to carry no additional weight, it would be a true curve of equipollence, but no bridge or other structure is wanted to support nothing. On the contrary, it is as the competent basis for any weight which is required to be loaded upon it that it is employed, and the arch must be safe for the maximum load. This additional load which arches are generally built to resist will distort any cotenary arch curve, pendent or inverted. Therefore the magnitude and distribution of this load determines and dictates the nature and effect of the distortion—if this familiar and admitted fact is true of the pendant cotenary—it is still more true of the inverted. And the marvel of the subject is that this truth, as regards the "Inverted Catenary Curve" in distribular, has never heretofore been recognised and established.

Mr. Thomas J. Lovegrove, an engineer of Philadelphia, U. S. A., has at length solved this intricate problem. He brings forward a formula, which applies to all the modifications or distortions which different loads accomplish in the inverted cotenary. He shows that every change in the load dictates a corresponding change in the curve, and that in order to preserve its strictly equipollent character, the inverted cotenary as absolutely as the pendant cotenary must accomodate itself to every new condition.

The arch curve formula is an expression in simple proportion. As the curvilinear thrust, (or arch pressure which is a unit of force in all equipollent arches from the keystone to the skewback) is to the concentrated weight, (or gravity pressure) at any point in the arch curve; so is the length of any abscissa to its corresponding ordinate. This ordinate and abscissa may be likened to the arms of a lever. In an arch of 180 degrees both arms of the lever are of the same length (that is their sine and versed sine are the same) and the curve thrust is about one-fourth the weight of the arch and its load. In arches where the versed sine is the greatest, it becomes the longest end of the lever, and

when least, the shortest. In arches of 100 to 106 degrees the arch ring is practically of a uniform thickness from the keystone to the skewback, because the curve thrust (arch pressure) about equal to the weight (gravity pressure), is on each skewback or abutment. When the arch has more than 106 degrees in its arch ring the thickness or depth of that number of degrees can be reduced because, the ordinate end of the lever is thus made longer. When the arch ring has less than 100 degrees, the curve thrust (arch pressure) is greater than the weight of one-half the bridge or arch, and the resistance at the skewback must be made at least equal to the arch pressure and its load.

The formula for the above arch curve is thus expressed. As E. the equipollent curve thrust is to W, the concentrated weight at any point, so is the length of A, any abscissa to the length of O, its corresponding ordinate. E. and W. can be found by any good rules, old or new.

E: W:: A: O:

The mathematical truth of this formula has been tested by the most accurate system of weighing in use at the U. S. Mint at Philadelphia, Pa.

The Lovegrove Arch invention consists in his development of a formula for the construction of equipollent arches and a movable templet, it is therefore mathematical as well as mechanical. The mathematical section being an expression in simple proportion by which a new infallible equipollent arch curve is developed of any dimensions, and for the support of any weight, evenly or unevenly distributed with a high or low factor of safety according to the exegencies of the case.

This is accomplished (so far as this competition of the curvilinear thrust of the arch is involved) by the use of triangles, retangles and parallelograms, which represents the whole weight of the structure. The weight which is concentrated in any particular part buting the load.

The mechanical section of the arch invertion consists in a mode of building tunnels, sewers or other long arches without the usual mode of centering; by substituting for it a travelling scaffolding templet, on which the workman ride. The bricks or other material being racked back, at an angle that makes any contact with or rest of the material upon the templet unnecessary, except for the first two or three feet. By this arrangement better arches of this kind can be built with one half the material and labour that is generally used.

This templet cannot be used to so great a saving on what is now acknowledged to be a bad arch curve. But it can be used with all the conic sections curves, if they are properly selected, or with an equipollent arch curve by any formula. When the eclipse is selected as the arch curve, the miner and not the major axis must be used

L.

The Material Market.

The supply of brick is ample for all requirements. Two new yards are projected, and several manufacturers contemplate enlarging their capacity. Pressed brick are in good demand, and command good and steady prices. Salmon brick are in liberal supply. Heavy bricks and arches of odd shapes have been ordered largely during the past two weeks. Manufacturers all give a good account of trade and trade prospects.

Cements are in fair demand: Polland, $2.60, $2.80; Rosendale, $1.25, $1.50; Enameled brick, $90, $150; fire brick, $20, $40; lime, 20, 25 cents; terra cotta, per discount, 65 per cent.

The lumber market is in good shape. White pine is beginning to recover from the set back, under which it has been suffering from all accounts, for a few weeks past. There is more inquiry and more business. Dealers are quite anxious to handle white pine on a large scale, and are doing business at the merest excuse of a margin. The receipts have been very large, and orders are going out every day for additional supplies. The careful dealer makes a place for his lumber before he orders it. The wholesalers canvass their trade very closely and know a month ahead pretty nearly what amount of stuff they will individually sell. Putting the figures of a half-dozen together, it can be said that what has been lost in white pine during the past two months will be made up during the next four weeks Prices are no better. No one will say he looks for an improvement. The one idea is to do the biggest business possible.

Yellow pine remains very firm, perhaps because, as we are told this week, stocks are low. We need not expect heavy receipts until after October 1, and perhaps not until October 15. The season is against the trade. Fevers and hurricanes are obstacles that beset the bold mariner. Several cargoes have just arrived, and every board is sold. A few more cargoes are on the way, and these are practically sold. One of the largest dealers said it was difficult to keep an assortment of yellow pine in stock. Now is the time to put a dollar in yellow pine. Each dealer is taxed 25 cents for the suggestion, which can be forwarded to the Chicago office.

Eastern markets generally are well supplied and prices are firm. Western markets are active and there is a disposition to harden prices, though it is no easy thing to do

Furniture manufacturers are making up a good deal of medium stock. The demand for very cheap and very dear furniture is quite light this season. No further labor troubles have arisen and the season's prospects are fair. The failures that have beset Boston find no counterpart here. Business is far from remunerative but there is a fair wager for those who understand the art of buying and the art of making furniture that sells readily.

During the past season good building stone has been laid here. The near-by supply has been considerably increased and baring strikes for wages, the cost will likely decline. It is not as necessary now as formely to go to Connecticut and Vermont for material.

The supply of slate continues very large and prices have been yielding a little.

The cutting of prices as inside building material has been the subject of much unfavorable comment among the manufacturers. Sash, doors and blinds have not held their proper place. Some mills have been filling orders at very lower figures. First-class work commands better figures because of the fact that there is less competition. The factories in and around the city are fairly off for orders, and expect to run pretty full to the close of the season. The factories in the interior of the State, especially in and around Williamsport have been running along steadily all summer. The saw mills in the lumber regions of the State have not on account of low water in the stream. Mill work of the better class is meeting with better demand. Planing mill machinery is going on at several points, and the industry at large is in a fairly satisfactory condition.

Those who supply building material have had a year of great activity in spite of the damage done by the strikes. Paint manufacturers report a very large distribution of material. Wall paper manufacturers have done remarkably well, barring the usual competition. Interior decorations have received much attention, and the business in this direction is becoming quite an item.

The demand for terra cotta pipe has been large, and nowhere is there any complaint except as to prices. Galvanized iron has been liberally used, but not to as great an extent as architectural attractiveness and utility justifies.

The stone manufacturers are threatened with a strike involving 3000 men in for a 10 per cent. advance. The employers' statement is to the effect that the local workmen, some 1500 are satisfied, no serious trouble is apprehended, as the stock of stones on hand is believed to be sufficient to carry the manufactures and dealers through.

Tests of Fire Clay Paving Blocks.

John Porter a manufacturer of vitrified fire clay paving blocks in West Virginia, is sending out a circular giving the results of tests made with his paving fire brick blocks, and the ordinary granite paving block.

The fire clay blocks were tested at the Pittsburg Testing Laboratory, on September 2, 1886, on Olsen's 50,000 pound testing machine with the following results: No. 1 spalled (i. e. chipped or broken into fragments) at 32,200, not crushed; No 2 cracked slightly at 36,700, spalled at 42,200, but did not crush; No. 3 spalled at 27,400 pounds, not crushed; No. 4 spalled at 32,600 pounds, not crushed; No. 5 spalled at 44,200 pounds, not crushed.

On August 7, 1886, the Board of Public Affairs of Cincinnati made the following tests of granite: Richmond samples—No. 1 cracked and crushed at 30,200 pounds; No. 2 spalled at 22,000, cracked and crushed at 30,100; No. 3 cracked at 28,600, crushed at 45,280; No. 4 spalled at 23,510, cracked and crushed at 25,640. Marlborough (N. H.) samples—No. 1 spalled at 13,850, cracked at 16,000, crushed at 21,900; No. 2 cracked at 18,290, crushed at 19,530; No. 3 cracked and crushed at 20,130. North Jay (Me.) samples—No. 1 spalled and cracked at 16,380, crushed at 20,000; No. 2 spalled and cracked at 17,000, crushed at 19,140. Georgia samples—No. 1 cracked at 18,590, crushed at 20,200; No. 2 spalled and cracked at 14,870, crushed at 18,320; No. 3 spalled at 17,370, cracked and crushed at 19,520; No. 4 cracked at 16,320, crushed at 17,500; No. 5 spalled at 15,700, cracked and crushed at 20,980

A specimen of Porter's blocks, 5x9x3x2¾ inches was tested at the office of the Keystone Bridge Company at Pittsburg on May 21, 1884, with a hydraulic testing machine. The ultimate strength of the specimen was 161,200 pounds, and it stood eighty tons pressure before showing signs of pressure.

A United States Marshal Captures a New Jersey City for Debt.

The City of Elizabethport, New Jersey, having defaulted in the payment of its bonds, George and Edward H. Bonner, bond-holders, brought suit in the United States District Court, and obtained a judgment for $13,495. On Wednesday last United States Marshal Gordon levied on the City Hall and the City Treasury. The city officials hold that the City Hall is not attachable and that the funds are already pledged for specific purposes. They refused to be esstopped by the levy.

—The owners of several properties on the northwest corner of Third and Chestnut streets, have given the refusal of their properties to a Syndicate of Stock Brokers having in view the erection of a Stock Exchange. The properties selected will give a frontage of 62 feet on Chestnut street and 134 feet on Third street. A proposition to purchase these properties will shortly be submitted to the Stock Exchange, and will be determined by a vote.

THE green glass manufacturers have resumed work.

BUILDERS' ITEMS.

Building and Real Estate Notes.

WOOLKIL is erecting three six-room houses on Cherry street between Sixth and Seventh street, Camden.

HARRY F. WOLFE, will erect three two-story houses on the corner of Third and Cherry street, Camden.

GEORGE & FRANK FROST, Camden, are erecting two, two-story brick stores and brick dwellings on the corner of Broadway avenue and Mount Vernon streets, Camden.

AN extensive addition is being made to the Old Woman's Home, at Lehigh avenue and Broad street, of which Mr. Windrim is the architect, and Mr. Sam'l Collom's the builder.

THE Building Inspectors issued a permit to the Baltimore and Ohio Railroad Company for a corrugated iron building for locomotives, 200 by 65 feet, at Fifty-ninth street and Woodland avenue.

A NEW building and loan association has been organized in Camden, N. J. (the Guarantee). Their meetings are held at No. 440 Kaighn's avenue. They commenced business on August 23d, and have been meeting with great success.

C. LETHERURY, real estate agent, 1123 Broadway, Camden, has been having a full share of the business done within the last 30 days, both in Camden and its neigborhood, and feels that his business this fall will show a heavy increase. Small houses are scarce, and the inquiries for them growing.

THAD. P. VARNEY, 264 Kaighn's avenue, has completed the sale of a property at 432 Stevens street for $4,000, also 602 Clinton street for $1,500, and a lot southwest corner of Broadway and Lemon street, 20 ft. by 100 ft., for $300. Business on first mortgages has been very active with him the last few days.

WM. A. TURNER, 904 Broadway, Camden, N. J., has made sale of a property, 563 Lyon street (two-story brick), for $1,500; also a dwelling on Fourth street, near Mt. Vernon street (three-story), for $1,300. Mr. Turner reports real estate business in Camden, as being much improved within the last few weeks.

MARTIN and W. H. Nixon applied for a permit from the Port Wardens to build a bulkhead on the east side of the Schuylkill river; also in front of the property of John Lang, near Vine Street; also to repair the Windmill Island ferry slip, on the Delaware River, above South Street, all of which were referred.

MR GEORGE LODGE, real estate broker, 3d and Federal Streets, reports business very flourishing. He is transacting some extensive operations in real estate, which the delicacy of his profession will not admit of him at present to speak of. His conveyancing business keeps his office working late into the night, and the demand for houses still increases and the collections are good.

PURCELL & FRYE, 119 South Fourth street are the architects of the Chapel of the Reformed Episcopal church at Chestnut and Forty-third streets; the corner stone of which was laid last Sunday, Abendale stone with Indiana limestone trimmings will be used on the chapel front on Chestnut street.

The chapel will cost $40,000 and the church which is to be erected next will cost $120,000.

HOLLINSHEAD & NEWKIRK, real estate agents, 927 Broadway, Camden, N. J., has completed the sale of a property, 522 Benson street, (three story brick) for $4,500; also 645 Clinton street, for $1895, and four frame houses on Washington street, (two-stories) above Fifth, for $2600. This firm since their partnership have been steadily increasing their business and are reporting satisfactory results.

JAMES P. MORNEN, real estate broker, Walnut street, has been very successful in disposing of his lots at "Folsom," already 372 being taken up. He reports from good authority, that within the next fourtcen days trains will be running to that station, and that at the earliest convenience a post office will be instituted. Mr. Mornen reports properties in the city a little slow to get, in spite of the many purchasers.

THOMAS J. Cotello, 1008 Passyunk Ave', real estate and insurance agent, reports real estate down town as being very active, and finds himself working night and day in conveyancing. Renting with him is unexceptionally good and within the last few days he has completed the sale of two six-room houses 673 and 575 South Eighteenth Street for $5700, also a six-room house, 1623 Latona Street, for $1500, and 1057 Wilder Street for $1450.

DAVIS & Harvey, auctioneers, 1212 Chestnut Street, have just completed an extension of the second story of the building of a depth of 236 feet to Sansom Street. On this floor is the art gallery, and the large increase in the business of the firm the last few years has necessitated the addition, in order that more room and facilities may be afforded for a display at the art, rug and furniture sales of the firm. The room is pronounced perfect in all its appointments, being remarkably well adapted to its purpose, especially in the point of light.

G. W. HAINES, 1020 Chestnut street, does an extensive real estate exchange business, and within the last thirty days, has exchanged some large farms in Maryland for city properties, (principally private dwellings.) He further reports the demand for city properties greater than usual, but finds a scarcity in procuring them. It is his opinion, which by no means is original that capitalists find real estate,the only firm basis for investment, stocks have to a large extent, been the cause, investors feeling the uncertainty of them.

S. E. GARDINER real estate & insurance broker 7th and Washington ave. has just completed the sale of ground rents (6) 13 ft. by 46 ft. 6 in. on the North side of Whistner street West of 11th, also 6 on the South side of Field 70 feet West of 11th street 13 ft. by 46 ft. 6 in. $600 each and yearly ground rents; also two properties (6 room houses) on the South side Dudly street West of 9th street also a property on the East side of 38th street 195 ft. South of Aspen street in the 24th ward; and several two story dwellings on McKean street, East of Ninth street for $1250 each. Mr. Gardiner reports as do all down town real estate men, as being very active in all its branches.

A FAMILIAR name and figure among business men of this city is old Jacob Rosenthal. Near a quarter of a century ago he was at the head of a clothing house in Scranton. Things turned, and he found himself soon after in Philadelphia making a new start in a new direction, that of dealing in scrap metal in a large way. He buys everything from a sunken ship to a nail, and is known very widely among ship owners, builders, insurance men, plumbers, and others. He also makes a plumbing solder that plumbers speak well of. He is the first to hear of a good thing in his line, and has a large force of hands at work when others are dull. He is a genius in his way, jovial, alert, and enjoys a reputation for integrity and upright dealing that is worth having.

CHAS. F. COLLOM, architect, 909 Walnut street, is making plans for a very handsome hotel, to be erected in the city, which will be constructed to have 260 rooms. It will be of stone on the first and second floor. The third and fourth of brick and terra cotta, and the sixth and seventh of iron. The whole building will cost in the neighbourhood of $225,000, anticipations are that this will be the grandest hotel in town.

Mr. Collom is also making plans for a fine stone residence for Miss Stentson, at Chestnut Hill, to cost $10,000. The view from this residence will cover some ten to fifteen miles.

CHAS. L. EATON, draughtsman, has just completed the purchase of the business of Mr. Hallowell, architect, 906 Walnut street, in which office Mr. Eaton will continue his business. He will make a specialty of monumental designing, for which he has already gained a reputation amongst granite dealers. Mr. Eaton for many years has been connected with Messrs. Billings & Co., granite dealers, of this city. He has now under construction, a fine new and original front to a dwelling-house on Spring Garden street. The first story will be of natural stone, second and third of brick, with terra cotta trimmings. The design will be something quite new in Philadelphia.

THE Girard Trust contemplates erecting another immense structure adjoining the Hood Bondbright building at Eleventh and Market. The new structure will extend from the dividing alley to the corner of Twelfth Street and back to Girard Street. The tenant's leases expire on April 1, and none of them have been or will be renewed. They all expect to go, and are now looking around for places to suit. The Girard Trust is about right. Market Street is a discredit to the city. It ought to be lined with six, seven and eight story iron fronts, from Front to the Public Buildings. The Girard People are setting the example. Now let others follow and double the available floor space on that grand thoroughfare.

ROBERT H. Tout, builder, and S. W. & W. D. Hewitt, architects, have about completed, the large structure at 1310 Market Streets, for Hirsh & Bros., umbrella manufacturers. The property has a front of 75 feet by 177 feet to Silver Street. The building is six stories high. The fronts on both streets are of iron, that on Market Street being of a highly ornamental design. Three massive arches, reaching to the top of the second story, give the two stories the appearance of but one. The Silver Street front is much more plain. Stairways lead to the upper floors from both fronts, and are located on the east side of the building. Passenger and freight elevators are also supplied. Three light wells, each 30 by 13 feet, are located in the centre of the building. The basement has a height of 10½ feet, the first story, 16 feet; second story, 13 feet; third story, 12; fourth story, 11½ feet; fifth story, 11 feet, and sixth story, 10 feet.

J. L. GALLOWAY, real estate and fire insurance agent, N. W. cor. Eleventh and Washington avenue, has within the last few days made sale of fourteen houses, each containing five rooms and bath, hot and cold water, on Latona street, west of Twenty-second street for $1500 each, and the balance of the square are still remaining for sale, which represent twenty-two others, and are nearly completed. He has also sold in another operation at Merion and Girard avenue, which are not yet finished, two houses, each containing five rooms, hot and cold water, and other modern conveniences for $1500 each. Mr.

Galloway reports that houses in all parts of the city are being applied for, and from the present prospects for the month, he anticipates to sell more houses than within the last year, and further, that fair prices are being obtained. His experience is, that the demand for renting far exceeds anticipations, and collections are satisfactory.

A great deal of property sold is not re-reported for months, and in some cases for years after the sale. Ought this to be allowed?

Mr. O'Rourke offers to build the bridge over the Richmond branch of the Reading Railroad for $22,000 and the bridge at Ontario street over the Reading Company's track for $12,000.

CULVER & ROGERS, 901 Walnut street, architects, are erecting two handsome cottages at Berwin, Pa., for Mr. Thorp; also designing on the work of a fine house to be erected on the hill between Devon and Berwin for the same gentleman.

Mr. Thorp has lately purchased considerable property on the North side of the Pennsylvania Railroad, between Berwin and Denver, on the Lancaster pike, which he is putting out in lots and will shortly erect cottages on them. Already some very fine roads have been cut through them. This estate has attached to it a very valuable spring from which the cottages will be supplied with water. In the centre of the lots the bed of a handsome lake will be excavated for which a fine stone bridge has already been erected to bridge it. Mr. Thorp is a gentlemen of considerable taste, and he is sparing no time and trouble to perfect this enterprise. The whole of the property stands on an elevation and commands a splendid view over the Chester Valley, and connects with Mr. Coffin Altmus estate at Devon.

Miscellaneous.

THE late Dillwyn Parish left $100,000 and made several bequests. His sons are executors.

THE North Baptist Church, on Eighth below Jefferson, has been repaired and improved by the expenditure of $3200.

Councils Highway Committee approved bills amounting to $25,162.52. Several small streets were recommended to be paved.

The scum that is to be sent to Harrisburgh this winter will stink about as bad as the old stuff. The decent members will have to hold their noses.

THE Councils Survey Committee will re-advertise for bids for the construction of 500 feet of the intercepting sewer rather than lose $900 on account of an error in figures.

—The school teachers are to be left out in the cold for a while longer. An addition of 15 cents would give $900,000, which would satisfy them. The only remedy suggested was an equalization of salaries.

THE business before the Councils Railroad Committee, recommended an ordinance providing for the construction of safety gates at the Philadelphia and Reading Railroad crossing, at American and Master Streets.

CHIEF Inspector Martin reported to the Board of Health that a row of twenty houses on the south side of Cambridge street from Twenty-ninth to Thirtieth street, owing to their location, 10 feet above the grade of surrounding properties, was a nuisance because the drainage from these houses flooded the adjacent streets. The Board declared these tenement nuisances prejudical to the public health.

THE BOARD OF SURVEYS on Monday, approved the plan for the revision of the grade of Diamond street from Twenty-second street to the Park, and to take the name of Thompson street from Ash to Bridge streets off the city plan, and to substitute Edgemont. The Board recommended that Chew street, which runs from Germantown to Mount Airy avenue, through the old Gowen estate at Mount Airy, be stricken off the city plan, as the ground is to be built upon.

THE Gas Trustees have $395,079, deposited in the several banks. Two thousand six hundred and thirty-three dollars and thirty-one cents in the Sixth National Bank on the Sinking Fund account, $1836.96 in the Philadelphia National Bank for the redemption of stocks, and $11,740.09 to the credit of the Cashier—making the total amount to be accounted for $411,289 92. The gas committee resolved to appropriate $68,259.91 additional to the Cashier, thus allowing him $80,000 for the payment of emergency bills and wages due October 1st.

THE School of Manual Training, which has been in successful operation for five years, opened its Fall session last Tuesday afternoon. One pupil for each grammar division can attend. The school is designed to educate the pupils of the public schools in manual training, principally modeling, carving, carpentery and joinery. Owing to its limited accommodations, but one pupil from each grammar division of the schools can attend, and, in order to accommodate that many, the school is divided into three classes of 160 each, which are held on Tuesday, Thursday and Friday, from 2.30 to 4 o'clock P. M., the pupils obtaining leave of absence from their respective schools to attend.

COUNCILS Committee on Finance approved the following ordinances and ordered them to be reported favorably as follows: To appropriate $19,976 for an addition to the Elisha Kent Kane School building; to appropriate $19,796 for a new school building at Lafayette and Adams streets, Germantown; to appropriate $35,120 for a new school building at the Falls of Schuylkill and approve the Solicitors' Title Company as sureties for Enoch Thompson, the contractor, for its erection; to purchase lots of ground for school purposes at Richmond and Jenks streets, Marshall and Somerset streets, and at Sixteenth and Moore streets, and to employ Wilson, Brothers & Co., architects, to prepare plans and specifications for the new county prison, at a cost of $7,500, and superintend the erection of the same at a compensation of $3,000 a year.

AN ordinance granting privilege to the Lehigh Avenue Passenger Railway Company to construct a double track, with stations, depots, etc., on Lehigh Avenue, from Second street to Fairmount Park, was referred to the following sub-committee: Messrs. Heins, Graham, Green, Millick and Ewell.

The chairman also appointed Messrs. Patton, Zane and McMullen a sub-committee to consider an ordinance offered by Common Councilmen Clark, with reference to the running of cars on streets on which double tracks are laid. The ordinance provides that, when a car stops to let passengers off at a street crossing, it shall not be lawful for a car coming in an opposite direction to approach within fifty feet of the car that has stopped, and that it shall not move again without the gong being rung. It also imposes a fine of $50 upon any person violating the ordinance, and requires that a policeman permitting a violation of the ordinance be discharged from the force.

The Committee on Supplies of the Board of Managers of the House of Correction and Councils Committee of the House of Correction, opened bids for supplies last Monday. The contracts for provisions and groceries were divided between John L. Hough & Co., Smucker & Co., George Boyd & Sons, and Savery Bradley. Henry J. Rife was awarded the contract for furnishing leather and shoe findings. R. McKnight & Sons were awarded the contract for feed, and Paul J. Field and Charles J. Field divided the contract for hardware. The contract for iron work for the Gas Department was awarded to the Camden Iron Works, and the contract for dry goods to Hood Bonbright & Co., and Wood Brown & Co. J. B. Lippincott Co., J. Blakiston and Detre & Blackburn divided the contract for medical books and stationery. Henry R. Worthington was awarded the contract for supplying a Worthington pump.

Building Permits.

One-story building, mansard roof, 10 ft. by 22 feet, Seventh above Spruce st. to Thomas Eccles, 711 Lloyd street.

One two-story house, 14 ft. by 32 ft., Sixty-first st. above Lombard st. to Newlin Dolbey, 3943 Ludlow st.

New front, 1804 Seybert st. to James McFadden, same place.

Front alteration, 2342 North Front st. to Stewart Bros., 2154 North Fifth st.

Three-story addition, 36 ft. by 45 ft., orphanage at Twentieth and Ontario sts., to William R. Brown, 2154 Dickinson st.

Third-story addition to factory, 41 ft. by 132 ft., Hilton st. above Kensington avenue, to William Johnson, Allegheny and Kensington avenues.

B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B.—Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E. J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—a form of action invested to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S, September Term.

An examination as to the nature of judgments and suits will bemade for subscribers without ecxtra hargeon application.

—It is estimated that the west and northwest will market this year about 7,000,000,000 feet of pine timber.

CONVEYANCES.

PHILADELPHIA.

THE
Day Sewed Shoes.

We wish to call the attention of the public to our principal object in opening the Day Sewed Shoe Store. The Day Sewed Shoe Manufacturing Co. was organized to introduce the Day Sewed Shoes, and this could only be brought about by getting the manufacturers to make them, and the quickest way to accomplish this was to give them this opportunity to dispose of their goods. We make our finest goods at our own factory, and are careful to have every pair perfect. We earnestly request that every pair of shoes purchased of us be returned for exchange if not as represented, whether they have been worn or not.

THE DAY SEWED SHOE MFC. CO.,
Under the management of W. W. Apsley,
No. 23 N. EIGHTH STREET.
Open until 10 o'clock on Saturday night, Sept. 4.

SPECIAL NOTE.—Do not forget that we make to measure for crippled and tender feet and make a specialty of all kinds of repairing at moderate prices.

MR. H. S. BEEBE, No. 231 North NINTH Street dealer in Gentlemen's Shoes exclusively, has in stock and will supply those who may desire the DAY SEWED SHOES.

FALL CLOTHING

We have made an unusual large stock this season which is already meeting a ready sale. In MAKE, STYLE and FINISH our goods excel all others, and prices defy competition. We fit you equal to the best tailor-made garment at about one-third less price.

SCHOOL SUITS FOR BOYS AND CHILDREN in new designs, and we only have what we can recommend.

The NEW FALL FURNISHINGS already in are much superior to the usual stocks found around town.

An early call solicited.

Best Makers in the World.
M. DE LONG & CO.,
1117 Chestnut Street.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the *Works are under contract with us* to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under *this Brand or a Private Brand.*

PHILADELPHIA, NEW YORK, CHICAGO. **MERCHANT & CO.**

"OTTO" GAS-ENGINE.

OVER 15,000 IN USE. Guaranteed to consume 25 to 75 per cent. less GAS than ANY other Gas-Engine per Brake Horse-power

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 39. PHILADELPHIA, MONDAY, OCTOBER 4, 1886. PRICE 15 CENTS

Items of News.

—The personal estate of Franklin P. Seltzer is appraised at $107,523.21.

—THE pipe laying for the new Woodbury, N. J., Water Works has been resumed.

—7000 pages of evidence have been taken in the city's Equity Suit against the Trustees of the Philadelphia Gas Works.

—It is estimated at the Treasury Department that there has been a decrease of nearly $11,000,000 in the public debt during September.

—THE Standard Sewer Pipe Co., of Huntington, Pa., has been closed by the sheriff, on an execution issued for workmen's wages.

—Gottleib Hoersch's plaining and saw mill on Philip street, above York street, was entirely consumed by fire on Tuesday night, loss about $12000.

—The will of John D. Taylor, late Treasurer of the Pennsylvania Railroad Company, contains no public bequests. The estate is valued at about $75,000.

—The personal estate of the late Levi Strouse has been inventoried at $97,152,17. His interest in the firm of L. Strouse & Co. is appraised at $71,849.28.

—The lowest bidder for depositing stone in the dike in the Delaware River between Hay and Maiden Islands, was Joseph H. Park, of Ridley Park, Pa. His bid was $1.09 per cubic yard.

—The fall and winter course of lectures at the Franklin Institute will be begin on the evening of November 15. The winter term of the drawing school was opened on September 27th.

—The Fourth Street National Bank of Philadelphia, located at No. 129 South Fourth street., will open for business on Monday next. S. F. Tyler is President, and R. H. Rushton, Cashier.

—The will of Jacob Hutzel, admitted to probate on Thursday, contains a bequest of $200 to the German Roman Catholic St Vincent's School Society for the support of the orphan children at Tacony.

--A bar of gold weighing 1547.95 ounces, and valued at $26,788,07, was received at the Mint on Saturday. It came from the mint at Denver, and is said to be the largest that ever entered the establishment.

—The statement of the Treasurer shows gold, silver, United States notes and other funds in the Treasury on October 1st. as follows: Gold coin and bullion, $242,811,564; silver dollars and bullion, $185,064,716; fractional silver coin, $26,925,062; United States notes, $44,393,202; National Bank notes, $230,004; National Bank notes in process of redemption $2,151,134; deposits with National Bank depositories, $11,640,346; total $513,216,028. Certificates outstanding—Gold, $84,525,957; silver, $95,200,332; currency, $7,765,000.

—A mortgage for $5,000,000 has been entered for record in the Recorder's Office for Clinton county, Pa., given by the Beach Creek Railroad Company to the Knickerbocker Trust Company, of New York city.

—President Robert Garrett, of the Baltimore and Ohio R. R. Co., has sold the entire issue of $4,000,000, second income bonds of the Cincinnati, Washington & Baltimore Co., to a syndicate representing the English holders of the securities of the C. W. & B. Co.

—On Wednesday last, $5,705.58 were paid into the City Treasury by the Board of Building Inspectors. The amount was the balance due the city for the year ending May 31st, last, and was determined upon by the Auditor Common Councilman, A. Atwood Grace.

—Letters of administration upon the estate of Gustavus Remak, late President of the Fairmount Park Commission, valued at $100,000, were granted by the Register of Wills on Thurday to the decedent's two sons —Gustavus Remak, Jr., and Stanislaus Remak.

—State Treasurer Quay cut down the number of Philadelphia Banks in which to deposit public funds, and of the $1,590,995.93 in the Treasury at the close of business on September 30 but two had deposits—the Farmers and Mechanics' National with $259,211.61, and the People's, with $180,000.

—According to the report of the Mercantile Agency of R. S. Dun & Co., there were 1932 business failures during the quarter ending September 30th, against 2173 for the same quarter last year. The liabilities, however, show a considerable increase, amounting in the quarter just closed to $27,500,000, as against $23,874,000 in the corresponding quarter of 1885. For the nine months concluding with yesterday the failures numbered 7088, as compared with 8167 for the first nine months of last year.

THE material for nine of the largest bridges in the United States is being tested in Pittsburgh, Pa., says the *American Manufaturer*, by the Pittsburgh Testing Laboratory. The cost of the bridges will range from $5,000,000 down to $450,000. Captain Hunt returned yesterday from New York, where he was consulting with U. S. Engineer General Q. A. Gilmore, of the St. Paul bridge across the Mississippi river. It will be a suspension bridge much larger than the St. Louis bridge, and will be made strong enough to carry a battalion of artillery at a trot. It is to be constructed jointly by the government and the city of St. Paul. One end of it will be at the fort in Rob street, St. Paul, and the structure will expand over the top of the three bridges now at that point. The material is being made by the Morse Bridge Company, and the Union Rolling Mills, and Wilson, Walker & Co., of this city.

THERE are rumors afloat to the effect that an enormous hotel will be erected on the greater part of the block bounded by Michigan and Wabash avenues and Van Buren and Congress streets, Chicago. It is stated that a large hall will be built in the centre of the structure, capable of holding the next Republican and Democratic National Conventions. According to the plans talked of, the hall will seat 5,000 people, and will have ample room in the hotel to accomodate all the delegates and alternates.

A CHICAGO syndicate, of which George A. Chambers is the head, is making an improvement of considerable importance between Fifty-fifth and Fifty-sixth streets, on the Lake Shore, in Hyde Park, involving an outlay of about $400,000. The ground is being filled and graded, and the streets laid with water, gas and sewers. The streets will also be paved, curbed and bordered with stone sidewalks. Sand to the amount of several thousand dollars a week is being used as filling, a switch track having been laid from the Illinois Central tracks. The sand will be covered with black dirt and laid out in lawn. The foundation of a very handsome hotel will be laid this fall, and the building completed early next summer. It will be after the style of the Wissihickon Inn, near Philadelphia.

THE practicability of using electricity for moving railway trains will soon be tested by means of the electrical locomotive now being constructed at the Rhode Island Locomotive Works, for the Bentley-Knight Electric Company. This motor, which is especially designed for light passenger work, has a wheel base of 12 feet, and a weight of about 24 tons equally distributed upon six driving wheels of 68 inches diameter. It is expected to have a power of 670 horses, and the nominal electrical capacity of its twin motors is 500,000 watts. The motor armatures, which are 36 inches in diameter, exert their force upon the drivers without the intervention of any gearing, and it is claimed that this will remove the difficulties which have hitherto been experienced in the efforts to produce large electric railway motors. The engine is equipped with electric headlights, bells and automatic electro-magnetic brakes, and it is claimed that it will be exceedingly powerful. The actual working of this motor will be awaited with great interest, and if it proves to be mechanically practicable for the purpose intended, it will still have to be demonstrated that it can be operated more economically than the steam-engine.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, OCT. 4, 1886.

HOUSES costing from $3000 to $4000 sell the best.

SOME agents with big rent rolls say they have not a house to rent.

DOWN town real estate men seem to be doing more business than up town.

THERE is a bull movement all along the line.

THE railroad companies all anticipate an immense business this fall and through the early winter.

LEGAL long windedness is tiresome. Lawyers have from time immemorial habitually indulged in verbosity. Their vermifuge of words show but little progress.

THE fever of house buying is at its height, and before winter hundreds of houses now receiving their finishing touches will be "owned" by the payment of from $1,300 to $1,800.

THE New York business men are discussing Henry George's land theories. They cannot see what advantage it would be to have leasehold titles instead of fee simple titles.

COULD not our real estate exchange manage to have a room or two in the grand building they are going to build, where building material could be placed on exhibition. This ought to be done.

JAY GOULD will some day saddle his Missouri Pacific with a lot of cheap roads which he will sell at par just as he saddled the Union Pacific at par with the Kansas Pacific which cost him very little.

THE *Record and Guide* of New York City, refers to great activity in building lot sales, which as here are sold with insured title. The New York Guarantee and Trust Company are doing a large business.

THERE is too much cheap building done for this generation. We do not, as a rule, build to last, but build for the present, how, and for the largest and quickest returns possible. Thies is a mistake, but it is a mistake for which architects are not responsible.

NOT a dollar has been expended for coast defences. This is a mistake. A foreign power could tax us a hundred millions or two by simply sending its war fleet to some of our coast cities. They won't, but they might. How would Philadelphia real estate and business men like to "stand and deliver."

IT is a mistake to imagine that architecture has exhausted itself in the success now attained in the designing of dwellings. The chief aim in the cheap houses, is to cut the floor space up into the largest number of rooms. There is room for real ability in the designing of a dwelling, the outside appearance receiving too much attention, the interior too little.

GUNNER'S RUN is still a popular theme for discussion with the members of the Board of Health and the suffering residents in the vicinity of the run. A suggestion has been made that the sewer be directed into the Fairmount avenue sewer. Why could not the entire creek be dug out at the bottom, so that the tide would ebb and flow through it; this would purify it at least.

THE church supporters have expended a good deal of money this year in repairing and improving their churches. Nearly all the city churches present evidences of the skill of carpenters, frescoers, painters and paper hangers. The improvements made were necessary. The churches will have a good deal of expenditure in this direction. The prevailing ideas among most architects, is to make our churches as hideous as possible.

THE proposition to raise a fund of $20,000 for the benefit of the family of Judge Ludlow, will be instrumental in placing beyond distress those who were nearest and dearest to him. Judge Ludlow's estate is exceedingly small, for notwithstanding his eminent services, his income was not sufficient to enable him to save much. Contributions to the Ludlow fund may be made at the office of Drexel & Co.

IT is asserted that a Physician in Chicago has restored a dead person to life, by hypodermic injection of one per cent. solution of nitro glycerine. The patient's heart had ceased to beat, and respiration had entirely ended and the body had grown so cold that the small thermometer used, failed to register its temperature. If this story be true, it will certainly open up a new and more extensive field for medical science. He might try it on some real estate men in Philadelphia.

INTEREST ceases on the 3 per cent. loan of 1882 on November 1st. next. The 143d call for the redemption of Bonds made by the United States Treasurer on September 27th, includes the following:

$50—No. 50 to 55.
$100—No. 651 to 776.
$500—No. 286 to 340.
$1000—No. 2436 to 2934.
$10,000—No. 7309 to 8810.
Total, $15,000,000.

CITY Solicitor Warwick is certainly making a very creditable showing, both as to his ability to satisfactorily perform the duties of the city Solicitor, and for his close attention to the business of his office. None of his predecessors have had in their official capacity more important duties to perform and none ever gave greater satisfaction; his decisions have been clear and pointed and evince both a knowledge of law and the power of interpreting the law to the full intent and meaning.

MR. WILLIS G. HALE'S latest architectural and decoration efforts can be seen at the new store of Lewis S. Cox, 1220 Chestnut street The front is not only beautiful, but certainly carried off the palm for originality, while the inside of the store is wonderfully refreshing to those of our citizens who are surfeited with the almost unbroken plainness of Philadelphia's houses and stores. The inside decorations are of the moorish order. The elegance, and richness in coloring with extreme light and airy construction, gives to the whole store the appearance of a fairy grotto.

Mr. Hale has made in the construction of this store almost as great an innovation as when he created the Record building.

THERE is another explanation of the activety in real estate in large blocks, in lots and in house demand. The masses of the people are busy. The surplus above the cost of subsistence is growing every year. The cost of living is declining and wages are advancing. The people who live by their daily toil are earning more and saving more. All industries are thriving. Savings Banks are well supplied with savings of people of ordinary earnings. Speculation is doing less legalized robbery than ever. Most people are willing to do a dollars worth of actual service for a dollar more than ever before. Then again there is less of a roving disposition in the American people, especially in American mechanics, than a few years ago. Men are settling down and are content to do so, and hence want their own vine and fig tree.

IT would certainly be an innovation and a good one if real estate agents and others having houses to rent would place the prices per month or year upon their signs; this would save an infinite amount of travel, trouble and annoyance, besides considerable expense often in cases where it cannot be afforded. It would be a grand idea if persons hunting for houses, could upon coming to a house see at a glance if the price was within their means, or in accordance with what they desired to pay. The custom of compelling people to travel many miles in order that they may find out the price—and frequently it occurs that when they reach the agent's office they find it in charge of a boy who knows nothing about it—is both unnecessary and annoying. If some live man would set the example there would be many agents to adopt it. Who will be the first to try it?

IT is almost enough to make a horse smile to listen to some of the objections made to the projected elevated road. They remind one of some of the objections made to the Baltimore and Ohio Railroad, or in fact to the objections raised some fifty years ago to the introduction of street gas in this city. One man don't want a quarter of a million of people to save two hours a day on an elevated road, because the road would run through his grandfather's graveyard. Another man objected to it because he wanted to know more about it.

The Pennsylvania Railroad was permitted to run down to Broad, and the elevated road, which is a Philadelphia concern, ought to be permitted under the same policy that permitted that road. The agents of the opposition have their paws velveted as yet, but before the fight is half through their claws and teeth will be seen.

THE selling of moderate priced properties continues at a rapid rate. Mention is made in our news columns of one builder selling $200,000 worth of property in three weeks. Others have been similarly active. In fact, everywhere there is great interest felt in real estate by not only individual buyers who seek to escape the dominion of the landlord, nominally at least, but by speculators, large and small, who find it advisable to invest their money in brick and mortar when it is likely to steadily appreciate in price from year to year. This sort of investment would increase faster than it does if only speculators could feel that their houses would not fall to pieces in a few years on their hands. Better built houses would sell quicker and for more money. Repair expenses after a year or two amount to considerable on a great deal of property, and it is this that keeps buyers back. Builders and investors should see to it, for it is to their interest to do so, that the very best work is done. Then their houses will command better prices and will sell more readily.

DURING August 377 permits were taken out, and during September 391, as against 417 for September last year. The total number of permits taken out this year foot up 3,117, against 2,958 for same time last year. The total number of operations this year are 7,661, against 6,490 for same time last year. The two-story houses number 4,079, against 3,615 last year, and the three-story houses 1,699, against 1,311 last year. During September permits were taken out for 643 two-story houses, against 374 last September, and 203 three-story houses, against 165 last September.

In addition to the above, permits were taken out for 2 four-story dwellings, 58 alterations, 50 back buildings and kitchens, 18 stables, 14 new fronts, 10 bay windows, 6 walls, 5 factories, 5 shops, 5 stores, 4 offices, 4 baths, 3 warehouses, 3 mills, 2 sheds, 2 churches, 2 railroad stations, 2 homes, and 1 each, library, bleach house, roof, brewery, laundry picker house, foundry, armory, locomotive house, engine house, wagon house, dye house, under pinning, boiler house.

These figures indicate greater building activity this fall than last. During September there were 1,055 operations, as against 767 last September. In two-story houses the number this September is nearly double last. From this out the number of two-story houses will increase faster than three-story houses.

Facts to Consider.

MEDIA, SEPTEMBER 18TH.

The entire herd of sixteen cows of Edgar Pierce, of Edgmont Township, this county have been reported by Dr. Francis Bridge, State veterinary surgeon, as being affected with pleuro-pneumonia. Three of the herd have been killed and the rest placed in quarantine. Dr. Bridge also believes that the herd of Caleb Taylor, of the same township, are nearly all affected and that it will be necessary to kill nearly half of them at once.

CHICAGO, SEPTEMBER 24TH.

The State authorities have decided to at once kill the 3,000 cattle under quarantine in and around this city to prevent the spread of pleuro-pneumonia, and are brought face to face with the grave question of what shall be done with the carcasses of the animals.

And we could half fill the columns of the REAL ESTATE RECORD with clippings giving accounts of the terrible ravages Pleuro-pneumonia has made among the choicest herds of cattle in all sections of this country and Europe; yet, notwithstanding the alarming influences of these sudden and saddening outbursts of this fearful disease not a single member of the medical profession seems to have given a thought as to the probable effect the transmission of virus under our present form of vaccinnation from the udder of a cow afflicted with cow pox to the arm of a person, has in rendering that person more susceptible to pneumonia. The question then is, are *not the germs of pneumonia implanted into the blood of man by our present system of vaccinnation.* The REAL ESTATE RECORD believes they are and that thousands of lives have been lost through pneumonia, the germ of which disease was transmitted in the course of vaccinnation. That vaccination is a preventive against small-pox there can be no question, but is not the preventive entirely too dangerous to be handled indiscriminately as at present.

This question is entitled to the closest investigation and the best medical experts under the direct control of the National Board of Health should at once be employed to make a vigorous search for statistical information which would establish or disprove THE REAL ESTATE RECORD'S theory that our present form of vaccinnation is extremely dangerous. There must be a reason why strong and vigorous men who should be able to combat the worst colds and even serious congestion of the lungs are suddenly taken off in a few hours with pneumonia. This is certainly a question for serious thought and investigation.

How it is in Pittsburgh and Alleghany City.

A Pittsburgh reporter has been interviewing some architects at large. Among others Mr. J. M. Alston, the Allegheny architect, said:

"It seems scarcely credible that a city as large as Allegheny should be so utterly at the mercy of either dishonest builders or of the cupidity of landlords. There is no security now that any house is safe to live in. We should have a building inspector and the strictest building laws possible. Even in Pittsburgh the laws are not half strict enough, and lax laws in building are far more injurious than productive of benefit, since they allow contractors to shield themselves behind them.

"I venture to say that one-half the sickness in Allegheny is brought about by not having any sanitary laws concerning the construction of sinks and water-closets in our houses. In all the leading cities in the East the necessity of such laws is appreciated, and there is a regularly-appointed inspector to go to all new houses and see that house-sewerage is righly constructed. I think it necessary to call attention at once to these two things and especially the former. Why, several times lately I have on my own responsibility condemned and had pulled down houses which had constantly been occupied by people not knowing that it was at the peril of their lives."

The chief draughtsman of Architect George W. Ott was seen and said:—It is most imperatively necessary to have a building inspector in this city. The number of buildings here which are unstable is fearfully large. If I were not afraid of being sued for libel I could mention some buildings in town not fit for habitation, which would astonish some people.

SOME STARTLING CHARGES.

"It is a well-known rule in architecture," continued the gentleman, "that in a tenement building the wall of the first floor should be eighteen inches thick, of the second floor thirteen inches and of the third nine inches, and yet there are four houses which have been put up lately for tenements in which none of the walls exceed nine inches in thickness. An honest building inspector would condemn an enormous number of houses at present occupied in this city, and I believe that the sooner we have an inspector the better, for now no one should be surprised to hear of some house falling in, as it is rather a rule here to have builders erect the largest possible houses for the least possible money."

Mr. Henigst a Federal street architect, said on this subject:—"I have not been very long a resident in this town, but I perceive the necessity of

having a building inspector here to examine all new buildings. This town has become a field for dishonest builders or else "quacks," who are willing to take a contract at any price, and will build a house, which to be rightly constructed, would cost say, $5,000, and yet they will offer to build the same house for two-thirds of that amount. It is ruinous t legitimate architects and builders, besides laying the foundation for some tenement disasters parallel with those of New York. I am unquestionably in favor of having a building inspector, and also the most stringent laws regulating the building of houses. No city containing over 20,000 people should be without them. In fact, I believe this to be the only large city in the country in which no restraint is placed upon builders, and where they have perfect license to indulge in any rascality without fear of punishment from the law."

SHIFTING THE RESPONSIBILITY.

The draughtsman employed by Mr. E M. Butz, 112 Federal street, said in reference to this matter:—"A building inspector has been a long felt want in Allegheny. In more ways than one that office is a necessity. As it is now, every architect is to a certain extent responsible for the buildings which he erects. With a building inspector, however, we would throw all responsibility upon him after he had approved of it. Then, with a building inspector to insure people as to the stability of their houses, a great many timid people who now worry us with their constant fears would be pacified by having the certificate of a building inspector."

In connection with this it may be noted that there are so many new buildings going up in Allegheny as to make the most skeptical feel the necessity of having an inspector. Last year there were some 378 new buildings constructed in the various wards. These have a valuation of $1,200,000. On a basis of about six people to a dwelling, it will be seen that 2,268 people have gone in new houses without any assurance further than the word of the builder that they may not be living in a house that is entirely unsafe. Said a city official:—"It is a long-felt need, and it is time the people knew their danger. Long experience has shown that only those who are versed in the rules of architecture are competent to judge of the substantialness of a house. And it is only by employing a regular salaried official to perform this work that we can hope to have it done with knowledge and correctness."

THE *American Architect* says:

Of the various kinds of asphalt or concrete that are used, opinions differ greatly. Of course much depends upon the particular kind used. Washington, Philadelphia, Cleveland and other smaller cities, testify to good results from some forms of asphalt, but in Boston there is a pretty general concurrence of opinion against the material. Teamsters, especially, condemn it largely. In Detroit there has been an experiment on a small scale with a hard brick pavement, which is said to have stood the test of heavy travel with considerable success. The smoothness of this surface, however, it seems, must be a serious drawback if generally adopted. A material that is coming in favor in Western cities, is crushed Michigan granite, which has the quality of readily cementing itself and proving very durable, while making roadway sufficiently smooth to obviate undue noise. Its expensiveness is one argument against its more general adoption; but cheap and experimental pavements have certainly had as much attention as they deserve.

A brick of average quality requires a pressure of from 600 to 2,000 lbs. and upwards per square inch to crush it, the figures varying in different descriptions of bricks, and being as high as 4,395 lbs., in hard burnt facing bricks. Brick walls and brick piers, if properly built, will bear very heavy weights as will be seen by these figures. The strength of a wall is not dependent, however, upon the strength of its brick alone, but upon three distinct conditions: (1) the manner in which the bricks are arranged; (2) the strength of the mortar and (3) the strength of the bricks. Each condition is of considerable moment, and considering that brick work is rarely weighed with a load even approaching one tithe of the crushing weight, it is obvious that the first and second conditions are of the greatest importance.

The object of mortar in a wall is simply to form an adhesive material between the bricks of which the wall is composed. It has no function beyond that. Good mortar is certainly not so strong as good brick, and the mortar joints, should therefore, be kept as thin as is consistent with the perfect adhesion of the bricks. The current custom of making thick mortar joints has the effect of considerably weakening the brick-work and should be discouraged.

One of the strongest forms of bonding in brick walls is that known as "English bond," in which the bricks are arranged in alternate courses of headers and stretchers. The small amount of cutting required, the avoidance of two vertical joints over one another, and the large number of headers in the wall, render it very strong and suitable for heavy work; in fact, English bond, if properly carried out, conforms very nearly indeed to all the requirements of good bonding.

In thick walls of heavy buildings, such as warehouses and structures of the same class, the strength of the bond may be improved, to some extent, by arranging every fourth course of bricks diagonally, forming what is sometimes termed "diagonal bond." The advantage is that a lap of four instead of two inches is obtained. The elevation of this bond is the same as that of ordinary English bond. The header courses are the ordinary header courses of English bond arranged alternately with stretcher and diagonal courses. The diagonal courses are arranged alternately in opposite directions. One disadvantage of this arrangement of the bricks at an angle is the fact of its leaving small triangular spaces on each side which tend, to some extent, to weaken the wall. These spaces should, however, be carefully filled in with pieces of brick and not be allowed to be left simply filled in with mortar.

THE receipts of lumber at Chicago for the season are 28,000,000 feet behind last year, and a great deal of lumber is going eastward from the mills, instead of going there, as in past years. Fully 75,000,000 feet of lumber have this season been shipped to the east from Green Bay points, or is thus destined, and it is predicted that the total eastward movement from there this year will be 95,000,000 feet, exceeding early estimates by 45,000,000 feet.

Taxation Made Easy.

Our municipal financiers have been very fortunate in at least one respect. While the taxing authorities in other cities suffer great embarrassments in trying to convince property owners that taxation is not heavier than appears on the face of the tax bills, our sly rulers have made taxes appear lighter than they really were. By this means the Bardsleys have been able to make very plausible showings. Their plan has been a very simple one. Instead of levying the tax direct, through the medium of the assessors, it has been levied through the Water Department under the guise of water rent, and in this way the City Treasury has been enriched since consolidation to the extent of eleven and a half million dollars, as appears by the following statement of the revenue of the revenues of the Water Department in excess of all expenditures:

In eighteen years previous to 1873	$3,101,436,49
In ten years, from 1873 to 1882, inclusive	5,929,066,06
In 1883	799,571,97
In 1884	758,870,00
In 1885	924,232,55
	$11,513,177,07

If water were supplied at cost a rate of $2 on the $100 would be required to produce what a rate of $1.85 now yields. Nearly $1,000,000 is taken off the tax bills, but it bobs up serenely on the water bills. Some people may call this good financiering. It certainly is a fair type of our modern statesmanship. But while the dollars of the taxpayer may not reach the treasury through the Tax Receiver's Office, and while they may crawl along at a slow pace, they generally get there all the same.—*Phila. Record.*

The Origin of Cyclones.

Dr. Werner Siemens, in a recent paper on the "Conservation of Energy in the Atmosphere," gives a very interesting theory as to the origin of cyclones. He states that the comparative vacuum formed at the centre of the cyclone can produce suction only in the direction of the axis of the cyclone, so that it either raises water from the surface over which it rotates or draws down air from the higher regions of the atmosphere. The clear sky and quiet air often observable at the centre of a cyclone bear evidence that there is a descending current of air.

According to Dr. Siemens a local cyclone is produced by an impulse of the superheated air, due to some local cause, given at the boundaries of an upper and lower tract of disturbance of the neutral equilibrium of an atmosphere at rest, which reaches the boundary of the upper cooled strata of air, which have a tendency to descend. An outer descending current is thus formed around the inner ascending one, the amount of air descending naturally equalling the amount ascending.

If the disturbance of equilibrium embraces extended upper and lower strata of air the descending masses would produce an increase of pressure in the neighborhood of the cyclone, gradually extending to the surface of the earth and upward into the highest regions of the air, imparting its force continually to new superheated masses of air. This air ascends with the inner and upward current, descends with the cool current, to again ascend, producing a circular motion.

The course of the centre of the cyclone is determined by the direction of the mean velocity of all the air masses forming the cyclone, and its duration is that of the disturbance of the neutral equilibrium of the atmosphere which produces and maintains it. The local ascending current, by carrying dust and particles with it, may also produce rain by condensing the aqueous vapor of the higher strata.

THE largest number of fires result from faulty methods of constructing buildings. Most of the buildings in this country are put up by contract, and they are more for show than for permanence. They are filled with inflammable material, and are deficient in every safeguard that should be provided for preventing fires. The building construction in Europe is the very reverse of this, the laws being quite rigid and rigorously enforced. While we have in this country building laws covering many points of construction, they are still conceded to be very defective, and their enforcement is so lax that a contractor and builder is rarely interfered with by the authorities. In our large cities, the business and resident blocks are mere shells, the walls being scarcely sufficient to support the roofs. The fire-proof material is interposed in the partitions, or between the floors and ceilings, and the perils of fire seem to be entirely ignored. * * * It may be taken for granted, where a fire originates with the contents of a building, that it could have been prevented by the exercise of ordinary care and foresight. The defective flues, the badly constructed furnaces, the accumulation of waste material, the careless tossing about of matches and half-burned cigars and cigarettes, and the packing in small compass of goods liable to spontaneous combustion, together with the dangers arising from steam-boilers, electric lights, illuminating gas, kerosene oil, and explosives of many kinds, combine to make the ordinary place of business in

large cities one full of peril to the property contained therein, if not to the lives of the occupants.

Every building, of whatever nature, should be carefully examined by an expert; special attention should be given to chimneys, flues and all pipes for heating; furnaces should be cared for; steam-boilers should be properly protected; ranges and stoves should be hedged in with every safeguard to prevent the communication of fire to inflammable substances in their vicinity. Matches should be abolished, so far as practicable, and such as are necessary to keep about the household should be of the safety variety, non-ignitable except upon special prepared surfaces. Extreme care should be taken in every case where kerosene or any other volatile product of petroleum or other substances is employed, either for domestic use, or the various processes of manufacturing. Habits of carefulness should be impressed upon every employee, and a disregard of this essential should be followed with summary punishment.

The Bond Calls and the National Banks.

The Acting Secretary of the Treasury has issued a call for $15,000,000 more of the 3 per cents, to be redeemed on the 1st of November, when interest on them will cease. With this call the whole amount of 3 per cents remaining uncalled for is $75,528,200 out of the total issue of $305,581,250 in 1882. Two calls of 3 per cents of $15,000,000 each have been made since the inquiry of the national banks whether these bonds could remain in the Treasury as security for note circulation after interest had ceased, and as yet there has been no response from the Law Department of the Government. This delay has doubtless been due to the absence of Attorney General Garland at Hominy Hill during the summer vacation. An individual owner of bonds may hold them at pleasure after interest on them has ceased, and it would seem that in the want of positive law to the contrary the banks should be entitled to the same small privilege.

The question is one of no little importance to the banks, as they hold a very considerable proportion of the bonds included in the last two calls. Should the Attorney General decide that the bonds lying in the Treasury as security for note circulation must be redeemed and canceled as they are called, the national banks owning them will not be likely to go into the money market to purchase other securities at a large premium The fact that they are glad to retain the 3 per cents without interest is sufficient evidence of their disposition on this point. Rather than purchase new securities to replace the 3 per cents, the national banks owning the latter will withdraw their notes from circulation. This process of contracting the national bank currency has already begun under the frequent calls of bonds for redemption that are made necessary by the excessive Treasury surplus. In 1883 the national bank circulation was $340,779,436; in 1884 it was $332,573,693, and in 1885 it was $314,394,313. During the current year the national bank circulation is undergoing still further contraction, as the Treasury report shows, but this is made up by the increase of silver coinage. As the national bank circulation is one of the safety valves in the country's currency system, the utmost care should be taken by the Government that the movements of this bank circulation are not unduly distributed.—*Philadelphia Record.*

THE N. Y. builders are still busily engaged, as is shown by the Building Trade Council. There is no idle labor, and much new building is projected. A great many costly houses will be erected in New York, ranging from $20,000 to $40,000.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

BUILDING LAW.

A building law, (Act, April 21, 1855, § 6,) after imposing a fine for erecting buildings in a city contrary to its requirements, provided, that the Commissioner of Highways should give notice to the City Solicitor of any violations of the law; also that if thereafter the buildings in question should be made to conform to the law, one-half only of the penalty should be recoverable.

Held that the omission of the Commissioner to perform this duty of giving notice, constituted no defence to an action brought for the penalty for erecting a building in violation of the law.

The right of the city to recover is not made to depend upon the performance of this duty by the Commissioner, but the right of recovery is expressly given upon the mere violation of the law.

DEED.

In many cases of deeds containing covenants on both sides, those on one side being considerations for those on the other, the party who has executed the deed may be bound by his covenants, although the other has not executed.

In general a party to a written contract who accepts it when signed and sealed by the other, becomes bound as if he also had signed and sealed.

A conveyance to a grantee who is deceased, passes the title directly to his heirs.

A conveyance by his executor under a power of sale in the will, although reinforced by deed of confirmation from the former grantor, and by sheriff's deeds of such former grantor's interest, will not give a marketable title.

LANDLORD AND TENANT.

The goods and chattels of the lessee of two adjoining pieces of real estate were levied upon by the sheriff under execution. The landlord presented a claim to the proceeds of the sale, for rent due upon both pieces of property. There was no fence between the estates, and the evidence showed that they were operated together, and that the chattels levied upon, were used on one as well as the other.

Held that the Court would not sustain a claim by the execution creditor that as the chattels levied upon, were found upon one estate only, the claim for rent due on the one estate should be allowed.

MORTGAGE.

The claim of a widow to have $300 worth of the land of her former husband, appraised and set apart to her under Act 14, April 1851, § 5, though superior to statute liens, such as that of a judgment, is not superior to a mortgage of the land executed by her husband in his life time.

VENDOR AND PURCHASER.

A purchaser who refuses to take title and execute securities agreed upon, is liable for the whole purchase money immediately, and the damages are measured by the price agreed upon.

The opinion of counsel as to the marketability of a title is not evidence. The question is for the court.

A suit for purchase money on articles of agreement, is in the nature of a bill for specific performance, and if the title is doubtful, the plaintiff cannot recover.

F. R. SHATTUCK,
Attorney at Law,
58 S. Third St.

Municipal Doings.

The Sub-Committee in Councils is pushing its considerations of the ordinance to carry out the Bullitt Bill at the meeting on Wednesday evening.

Section 12, which provides that the City Treasurer shall be elected, give security, continue in office for three years and perform the duties as now provided by law, was adopted. Sections 13 and 14 were also adopted. They provide for the Department of County Controller as now prescribed by law, and authorizes that officer to prepare proper warrant books for the new departments, but to continue the accounts as they now are until January 1, 1888.

The section placing City Solicitor at the head of the Department of Law, and including in that department, various officials known as county officers, such as County Commissioners, Sheriffs, Registers of Wills, District Attorney, Coroner, Recorder of Deeds and others, was the subject of criticism by members of the committee, and the section was finally referred to the City Solicitor for his opinion as to its legality. Similar action was taken with the section attaching the Board of Directors of the County Prison to the Department of Charities and Correction. Section 19, fixing the salary of the Mayor at $12,000, and the salaries of the Directors of Public Safety and Public Works each at $7,500, and requiring the two latter officials to give security for the faithful discharge of their duties in the sum of $25,000, was adopted.

The following sections were also adopted: Section 20, which directs the Mayor after the removal of the head of any department to send his reasons therefor, and within thirty days thereafter, the name of a successor. Section 21, which provides for the abolition of the Boards of Fire Commissioners, Guardians of the Poor, Managers of the House of Correction and Trustees of the Philadelphia Gas Works. Section 23, which provides that all heads of departments in the employ of the city on the first Monday in April, 1887, shall hold their respective positions and receive their present salaries until the expiration of the terms for which they were elected, but shall be attached to the new departments and subject to its director.

Lumber Prospects.

Builders are interested in the future of the lumber trade, and probable course of price. The most recent important utterances in this direction were made at the Annual Session of the Lumber Manufacturers Association held at the Grand Pacific Hotel, Chicago. Nearly all the large lumber manufacturing concerns in the northwest were represented.

President A. G. VanSchaick said in his annual address that the trade was now entering upon a season of prosperity for the first time since 1884. During that time it had been in a condition similar to the period of depression which prevailed between 1873 and 1880. In both periods no great profits had been possible. At present there is no overstock, and there is a general broadening of the market, while there is ample capital available to produce and protect lumber. Success seemed no longer doubtful. It was estimated that during this year the amount of lumber placed upon the market would be 7,000,000,000 feet. If so, it showed that the manufacturers, who only received the current prices of 1880 for their product, donated to their patrons all the advance in the timber since 1880, about $14,000,000 for 1886. He looked for a better adjustment of the production to the demand as timber increased in value. During the past year the value of standing timber had been permanently advanced, the average hours of labor at the mills reduced, and eastern states had made

large purchases west of Mackinac and sawed lumber had advanced fully 10 per cent. in all western markets. He predicted a larger demand from both western and eastern markets in 1887, and a considerable advance in both standing timber and lumber. He hoped to see the output of lumber decreased in order to avert charges of an overstock, which were more or less frequent, and often entailed great losses. Manufacturers should, if possible, determine the probable quantity of timber tributary to their immediate markets, and try to estimate the amount in the three producing states, Michigan, Wisconsin, and Minnesota. The fact that lumbermen invested their surplus in timber was another argument in favor of an inventory, and money expended in obtaining correct information as to the visible supply would be always a profitable investment.

Secretary E. S. Hotchkiss said that he had only partially succeeded in an endeavor to procure lumber and log statistics. The result, however, justified the opinion that of the intended log "cut" and "logs left over" there was a quantity on Sept. 1st of 6,500,000,000 feet. The amount of lumber on hand was 1,289,320,000 feet and a grand total of hung-up logs of 1,669,700,000 feet.

The treasurer's report showed receipts of $1,897.97 and disbursements of $1,653.34, leaving a balance of $155.63, and vouchers outstanding for $160, which would more than absorb it. The following officers were elected for the ensuing year: President, E. W. Durant, Stillwater; vice president, O. C. Merriman, Minneapolis; treasurer, Ernest Hospes, Stillwater, and secretary E. S. Hotchkiss, Chicago.

BUILDERS' ITEMS.

H. F. HOOVER, transacts the real estate department of Mr. Shoch's business, and is located at present at 1917 North Twenty-third street.

DR. FILBERT has the contract to put down his Asphalt pavement road, between Ridge Road and Twenty-second street, and is at work on it.

THE Harley Cemetery Association, which was formed some few months ago with Mr. J. Evans as secretary, has made a good start, already having found some thirty-five customers.

DANIEL M. BOWEN, 605 Sansom street, conveyancer, has traded a property Third and Chestnut street for Camden properties, belonging to Roberts & Cohn, of Camden, value $62000.

ROBERTS & COHN, Camden, have just completed the sale of the house owned by General Robeson at Twenty-second and Penn street for $13,500. They report business very active with them.

THE Camden real estate men report that real estate is advancing some five per cent. as compared with a year ago. They report the growth of the town fast growing, and houses renting and selling as fast as completed.

B. H. SCHAEFFER, real estate broker and conveyancer, 1309 Columbia avenue, reports that he has not one private dwelling for rent; and that inquiries for modern houses are on the increase. He has for rent four fine stores on the avenue.

TWINING & SON, real estate agent, 2133 Columbia avenue, real estate broker and insurance agent, has sold a property 2227 Sharswood street, for $1912, and within the past few days has been doing considerable business in insurance and renting.

JOHN H. HUDSON, 1428 Columbia avenue, real estate broker and insurance agent, reports the sale of 1528 Columbia avenue, for $7100. The purchaser is intending altering it into a store. He has may inquiries for small properties, which he finds difficult to get in desirable locations.

RANDAL E. MORGAN, Market street, Camden, reports the sale of a property on Carman street and also as having received bids for several others, which he has refused, feeling that properties in Camden should advance on old prices from at least five per cent. to ten per cent.

LOUIS GEIST, 2100 Diamond street, made sale of a property 2014 Diamond street, corner of Woodstock, lot 17 feet 6 inches by 92 feet for $7000. He has a fine twelve-room house on Uber Place between Nineteenth and Twentieth streets above Diamond, which is offered for sale very cheap. It is fitted up with carpets throughout.

C. HARRY SHOWAKER, Twenty-first and Columbia avenue, real estate broker, has just completed the sale of a property, 1541 Centenial avenue, for $6800; also one Thirteenth above Jefferson, for $5500; also 2101 Columbia avenue, for $13000; which will be altered into a store. Mr. Showaker will also alter 2017 Columbia avenue into a store.

JEHU EVANS, Market street, Camden, N. J., real estate and insurance broker, is the secretary for the Dudley Homestead and Building Association, and reports the first drawing having taken place September 30th, when forty-seven lots were drawn, twenty-one of which were choice lots, and further reports that one-third of them have been sold.

WILLIAM C. SMALTZ, will build on the west side of Twenty-fourth street, between Berks and Norris street, thirty-five (three-story houses, of nine rooms; they will be press brick with brown stone trimmings and have all the modern improvements. This property is in the immediate vicinity of four lines of cars; Ridge, Columbia avenue, Thirteenth, Fifteenth, and Eighteenth and Twentieth streets.

B. F. BILYEU, 809 Columbia avenue, real estate broker, reports real estate interests as being on the improve. He has within the last ten days sold a dwelling 1915 Franklin street, three-story, eleven rooms, $5500 clear; also 1814 North Seventh street, three-story, eleven rooms, $7000 clear; also 1925 North Ninth street, three-story, for $2800; also a two-story eight room house, 2261 Fairhill street, for $1900. He, Mr. Bilyeu reports renting very good with him and collections fair.

WM. L. CRAVEN & SONS, 1546 North Seventh street, real estate and insurance brokers, have just completed sale of five houses on Lawrence street, north of Cambria street, for $1600 each. These houses are in a row of twenty-two, six of which still remain unsold. They have also sold four houses on Orianna street, Nos. 2040, 2042, 2044 and 2046 for $1500 each. Within the last few days they have have had many inquiries for small properties. Renting with them is good, and the fall prospects good.

SAMUEL T. FOX, real estate broker, Ninth and Callowhill streets, has made sale of property as follows: Eight houses on Sixteenth and Smedley streets, Tioga, for $2600 each; also corner of Sixteenth and Ontario streets for $2700; also several houses on Smedley street, Tioga, for $2400 each; also several on Ontario street for $2500 each; also house No. 3412 North Ninteenth street for $7200. Mr. Fox reports real estate as being very active with bright prospects ahead. Properties are renting very rapidly in all quarters, and collections are satisfactory.

H. R. SHOCH, 1917 North Twenty-third street, has just completed eighty-two houses located on a block between Twenty-fourth and Twenty-fifth, and Berks to Norris streets, with Ringold and Taylor streets cutting through. The Ringold street properties, thirty-three, have all been sold for $2000 each, and seventeenth out of thirty-five on Taylor street, also for $2000. He has on Berks street, six three-story, nine room houses fitted up with the most improved conveniences, five of which are still for sale, one having been sold for $3300. The whole of these properties will have asphalt roads.

MOSES & King, architects, 226 Walnut street, are erecting a dwelling house for Dr. S. C. Thornton, at Moorestown, N. J. It will be frame, with slate roof and all modern conveniences, and will cost $6000; also two dwelling houses for the Rev. J. H. Lamb, at Moorestown, N. J. They will be twin built and of frame, and cost about $2000 each; also a cottage for Mr. Geo. W. Bilry, at Wenonah, N J., for gardeners' use. It will be an ornamental frame structure, with slate roof; also making exclusive alterations to a house on Penn street above Fifth, Camden, for Messrs. Roberts & Cohn.

JOHN M. SHARPE, builder, South College avenue, has within the past twenty days sold properties to the amount of $200,000. He has in course of erection, fifty-three houses, (two-story), Twenty-fifth and Brown streets, twelve on Thirteenth and Berks, (three-story), and are fine specimens, sixty (two-story) houses on Fifteenth and Columbia avenue, forty-nine (two and three story) on Seventeenth and Diamond streets, which are highly finished; also forty-eight (three-story) dwellings Fifteenth and Diamond streets, which he claims are the best houses he ever built. The rear houses are only of two-stories.

F. A. FLOOD, real estate broker and insurance agent, 2118 Diamond street, has sold within the last ten days, eleven houses on the south side of Fontaine street, for $3000 each, and nine on the north side, for $3300; the corner fetching $3500, on the north side. The houses in course of erection from Twenty-third to Croskey street, (eleven in all), the northeast corner of which is a store, and has been sold for $6500, and have considerable inquiries for the balance. Sold also two dwellings on Uber place, between Nineteen and Twentieth streets, north of Diamond, for $5250 each, there are thirty-two houses in the block; only six of which remain unsold. Also sold a three-story ten room house on Judson place, for $5500.

L. B. HUMPHREYS, real estate broker, Third and Market streets, Camden, has within the last few days disposed of properties 414 North Fifth street, three story brick with eleven rooms for $4800; also 411 Friends av., three-story rough-cast, for $1275; also a drug store, Fourth and Pinden streets, three-story brick, for $6500; also 407 Friends av, three-story rough cast, for $1050; also 904 Federal street, three-story with marble front, for $2850. Mr. Humphreys reports houses for rent scarce and in great demand and business generally satisfactory.

DIXON & HALLOWELL, conveyancers and real estate agents, Ridge road and Fairmount avenue, in speaking of real estate speak very encouragingly, and are looking forward to a heavy winter business. Houses with them are in great demand. They have within the last few days made sale of a property 2343 Sharswood street for $1650; also 1608 Fawn street, for $2300, besides several smaller properties.

—John O. Taylor, the deceased Treasurer of the Pennsylvania R. R. Co., left an estate of $75,000.

Average Yearly Pay of School Teachers.

ACCORDING to Prof. Mendell, of the Scientist's Congress, held recently at Berlin, vagrancy causes and promotes insanity.

THE deliberate poisoning of three prisoners confined in the Columbus, Ohio Penitentiary, because they are important witnesses in the investigation of abuses at the prison, is certainly a new phase of prison mis-management. The crime if proved, should be punished by the extreme law, for it is one of pure and simple devilishness.

A new form of iron pavement has been laid on Madison street just east of Dearborn, Chicago, which is attracting a great deal of interest not only from the average passer-by but from practical men and those interested in the construction of a good and substantial roadway. The material used is of iron rolled into the shape of small T rails, one and one-half inches high, laid with the flat side (or what is known as the bottom of the rail) up. This surface is an inch and a half wide and has indentations across it at intervals of six inches for the purpose of insuring a more perfect foothold. The rails are fastened together by being securely bolted with wrought-iron bars, and are laid an inch and a half apart. They rest on two-inch planking, and are secured thereto by staples which pass over the bolts. The pavement is laid in sections twelve feet in length by two feet in width, with stone blocking along the curb and next to the railroad track. The space between the rails is filled up to the street level with tar and gravel thus making it perfectly water-proof. The merits of this pavement are said to be that it will keep in a smooth condition for a period probably longer than any stone or wooden blocking, and is considerably less noisy than the stone.

PHILADELPHIA is coming to time, and *vice versa*. The clock that is to be put into the tower of the public buildings at Philadelphia is to be a grand affair. The dial will be twenty-five feet in diameter and the center of the dial will be 391 feet above the street. The dial will be illuminated by electricity, and it is calculated that the time can be seen at night from any point in the city, and with a field glass the position of the hands can be distinguished at a distance of fifteen miles. The minute hand of the clock will be twelve feet long and the hour hand will measure nine feet in length. The size of the Roman figures on the dial will be two feet eight inches in length. A steam-engine will be placed in the tower to wind the clock every day. The clock-makers who have been invited to give their views concerning the building of the clock all say that nobody in this country is able to build such an enormous time-piece. It will take a whole year to place the clock machinery in the tower after the building has been completed. The bell for the clock is to weigh between 20,000 and 25,000 pounds, and will be calculated to peal out so loud that it can be heard in the distant parts of the city. There will be what are known as Westminster chimes, and they will ring on the quarter, half, three-quarters and hour. The bell will be the next heaviest on the continent. The heaviest is in the Cathedral in Montreal and weighs 28,000 pounds.

WITH reference to the period at which kiln-burnt bricks were first used, arising out of the discovery of Drs. Schliemann and Dorpfeld at Tiryns and Mycenæ, Professor A. H. Sayce writes: "Kiln-burnt bricks of an early date are found in Upper Egypt, as well as in the Delta. The bricks composing the old fortress of Gebelen, south of Thebes, are stamped with the cartouches of Ra-men-kheper and Isis-m-kheb of the (illegitimate) XXIst Dynasty. Bricks with the same cartouches are found in another ancient fortress which dominates the Nile, that of El-Haybi, south of Beni-Suef. Here, last winter, I found the remains of a kiln where some of the stamped bricks had been burnt before being used for building purposes. A portion of one of them, with the cartouche of Isis-m-kheb, lies before me at the present moment.

New York Notes.

REAL ESTATE excepting in outlying building lots, has been selling rather sluggishly, in New York and Brooklyn for a week. A plot of 8½ acres making 133 city lots in the Twenty-seventh Ward, sold at $3.200 per acre. Ten lots on Broadway and Fifty-sixth street, are to be sold October 14, under foreclosure, on which $226,000 is due. Several other foreclosure sales are announced. During the week last reported, there were 165 conveyances involving $2,088,344. The number of mortgages recorded for week, 194, and amount involved $1,344,805. The amounts involved in conveyances and mortgages as compared to a year ago, exhibit a marked increase. During the past week, 77 new buildings were projected in Brooklyn, involving an outlay of $827,250, against 66 for same week last year involving $838,350.

REAL ESTATE agents report a good deal of inquiry. Preparations seem to be making for a large amount of winter excavation, for cellars for spring building.

Among the Churches.

THE St. Johns' Roman Catholic Church has been greatly improved in its interior.

A HANDSOME new church is to be built by the Union Methodist congregation, somewhere in the upper section of the city; partly out of funds to be realized from the sale of the old Union Church, at Fourth and Arch.

THE Mount Zion Church, at Manayunk, has been improved. New steam heating apparatus has been introduced. The old pews have been taken out and chairs substituted.

THE Western Church, on Twentieth street, has been repainted and repapered at a cost of $1500; and $1000 has been expended upon the Kensington Methodist Church.

THE corner-stone of the new St. Johns' Church was laid on Sunday, on Front below Norris.

THE corner stone of the New Theological Seminary will be laid in about two weeks.

No Map of the United States.

It will be surprising, perhaps, to the public to know that, after spending $8,000,000 in surveys, there is still no actual map in existence of the United States. The Coast Survey and the Hydrographic Office has prepared a reasonably accurate map of our coast line, but the internal surveys have been so inaccurate and imperfect that rivers, mountains and towns have in many cases been located on previous maps as much as five miles out of their true position. This is, of course, especially true of those points remote from railroads, which have, of course, been less accurate. The new map now in preparation by Major Powell, would occupy the floor space of a room in an ordinary dwelling house, and will be absolutely accurate within the limit of the scale of feet upon which it has been prepared. It will take about a year to complete this, and when done it will be the only accurate map of the United States in existence. The astronomers have long claimed to have prepared a more accurate map of the moon at a distance of 250,000 miles than has yet been made of the State of New York from surveys made upon the ground. These maps, however, have been made by means of photography, and hence are more accurate in their outline than could have been obtained by hasty triangulations. Major Powell's map, however, will be as accurate a representation of the geographical location of the mountains, rivers and towns of our own country as the astronomers have yet prepared of the queen of the night. He has also in preparation a dictionary of altitude by which he will set at rest the long mooted question as to the relative sea level of the Atlantic and Pacific Oceans. According to railroad levels heretofore made, the Pacific is supposed to stand about four feet above the level of the Atlantic. Within a year Powell will have settled this question.

Building Permits.

A two-story addition, 20 ft. by 16 ft. Lombard above Sixty-first street, to Jacob Zell, Fernwood, Delaware County.

A one-story kitchen, 13 ft. by 19 ft., Cedar and Norris streets, to David J. Davis, Jr., 3038 Frankford av.

A one-story kitchen, 13 ft. by 14 ft., 317 South street, to Charles D. Hill, 2623 Poplar street.

Addition and alteration, 79 S. Second street, to John C. Atkinson, 417 Dickinson street.

A two-story back kitchen, 12 ft. by 13 ft., Dauphin above Ninth street, to Patterson & Norton, 933 Dauphin street.

A wagon shed, 48 ft. by 14 ft., Gillingham above Mulberry street, to Gregory & Harrocks, 4437 Frankford av.

A one-story stable, 30 ft. by 20 ft., Wistar above Mercer street, to Charles W. Keefe, 56 Bringhurst street.

Four two-story houses, 14 ft. by 28 ft., Hart Lane above Kensington av., to Charles Huston, 2433 N. Fifth street.

Six two-story and one three-story houses, 16 ft. by 43 ft., Twentieth above Morris street, to Alexander Wilson, 2106 Fitzwater street.

Two two-story houses, 14 ft. by 41 ft., DeKalb street above Fairmount av., to Louis C. Smith, 619 Brooklyn street

A one-story back building, 11 ft. by 16 ft., 3604 Powelton ave., to A. P. Reiger, 3604 Powelton ave.

Three two-story stables, 21 ft. by 34 ft., Stone above Fifteenth st., to Jas. Buist, 729 S. Tenth st.

Two three-story houses, 24 ft. by 55 ft., Tulpehocken above Main st., to H. H. Buzby, 5258 Main st., Germantown.

A three-story house, 43 ft. by 63 ft., Belgrade st. above Allegheny ave., to Edward Delany, 913 S. Twentieth st.

A two-story house, 10 ft. by 49 ft., 1620 S. Nineteenth street, to Friel & Simpson, Nineteenth and Wharton sts.

A two-story building, 18 ft. by 70 ft., Jauney street above Allegheny ave., to Dickson Bros., 2817 Frankford ave

A third and fourth-story addition, 68 ft. by 180 ft., 1825-27-29 Market st., to John Wanamaker, Thirteenth and Market sts.

Alter building to two houses, 16 ft. by 26 ft., Camac st. above Columbia ave., to W. S. Ringgold, 1719 N. Thirteenth st.

A three-story back building, 17 ft. by 30 ft., 2317 Pennsylvania ave., to H. K. Kindig, 2360 Green st.

Five two-story houses, 13 ft. by 40 ft., French above Sixteenth st., to J. Stafford, 1837 N. Thirteenth st.

A one-story back building, 13 ft. by 12 ft., 1726 Leib st., to Wm. Smith, 1726 Leib st.

A three-story house, 15 ft. by 49 ft., Hanover and Thompson sts., to Harry C. Nichols, 1509 Montrose st.

Five two-story houses, 15 ft. by 42 ft., Wharton st. above Jarden, to Jas. Holmes, 1231 S. Nineteenth st.

A three-story house, 16 ft. by 60 ft., 3326 Germantown ave., to John Summers, 3322 Germantown ave.

A two-story house, 15 ft. by 28 ft., Alder st. above Thompson, to Frank Brelle, Eighth st. and Girard ave.

A two-story house, 18 ft. by 42 ft., Mascher st. above Cumberland, to Frank Streibig, 265 Diamond st.

Two three-story stores, 10 ft. by 44 ft., Sixth st. above Alaska, to B. Harvey & Son, 2119 Fitzwater st.

T. F. Shuster, No. 908 Buttonwood st., alterations to buildings with mansard roof, No. 1533 Green st., 36x38.

J. Boyle, No. 4303 Cresson st., four 3-story houses, Cedar st., near Apple, 18x43. Also, two 3-story houses, Allison and Tower sts., 18x43.

J. J. Cline, No. 420 Wharton st., 3-story back building, No. 714 Tasker st., 12x16.

J. Smith, No. 742 Martin st., underpin, No. 720 South Twentieth street.

J. H. Virkler, No. 4221 Lancaster ave., 3-story store and dwelling, Forty-second and Brown sts., 18x42.

T. S. Potter, Falls of Schuylkill, 3-story house, Queen lane, near Ridge ave., 9x48.

J. F. Cassady, No. 608 Dickinson st., 3-story back building, No 513 Carpenter st., 12x50.

H. T. Simpson, No. 759 South Sixteenth st., 2-story back building, No. 759 Fitzwater st., 12x12.

D. T. Flanagan, No. 1509 Arch st., 3-story store and dwelling, Sixteenth and Moore, 17x50. Also, dwelling adjoining same, 15x50.

A two-story house, 16 ft. by 28 ft., Ashwood ave., above Eighty-sixth st., to Levy Quidenfield, 1207 Wood st.

A two-story house, 16 ft. by 40 ft., Fifty-second and Franklin sts., to Thomas H. Burrows 5127 Kershaw ave.

A three-story house, 18 ft. by 31 ft., Willow st., below Grove ave., to George S. Roth.

A two-story stable, 70 ft. by 125 ft., Twenty-fourth, above Pine st., to J. D. Ellis, 1233 Fairmount ave.

A two-story stable, 15 ft. by 22 ft., Trenton ave., and Dickinson st., to Mrs. Lynch, Trenave., and Sergeant st.

A two-story house, 14 ft. by 40 ft., Mornen ave., above Eighty-eighth st., to Richard Goldhahn, Twenty-second and Hart sts.

A two-story building, 9 ft. by 16 ft., Fourth and Monroe sts., to P. L. Hardy, 722 South Fourth st.

A two-story store, 15 ft. by 60 ft., Stenton and Spencer sts., to John J. Joyce, 223 Armat st., Germantown.

A two-story building, 170 ft. by 38 ft. Third above Cumberland st., to Einwechter & Sons, 2037 Wishart st.

Seven two-story houses, 13 ft. by 28 ft. Wyoming, above Ann st., to Charles Roth, 5 Silver st.

Two three-story houses, 18 ft. by 50 ft., Highland av., above Twenty-eighth st., to Charles W. Macfarlane, Coulter and Green sts.

Four two-story houses, 12 ft. by 37 ft. Lawrence, above Cambria st., to John A. Snyder, 1710 Master st.

A two-story house, 10 ft. by 48 ft., Fifteenth, above Venango st., to Benjamin Walker, 3809 Germantown ave.

A three-story house, 17 ft. by 52 ft. Cambria and Hartville sts, to Samuel H. Brown, 1815 East York st.

Two three-storyhouses, 18 ft. by 58 ft., Cambria, above E st., to same party.

A two-story house and stable, 14 ft. by 64 ft., Seybert, above Eighteenth st., to John M. Sharp, 1936 S. College Ave.

Four three-story houses, 16 ft. by 58 ft., Fifteenth, above Diamond st., to same party.

Thirteen two-story houses, 15 ft. by 52 ft., Fontaine, above Fifteenth st., to same party.

Twenty-two three-story houses, 18 ft. by 69 ft., Diamond, above Fifteenth st., to same party.

Three two-story houses, 14 ft. by 42 ft., E st., above Cambria, to Samuel Brown, 1815 E. York st.

Three three-story houses, 15 ft. by 48 ft., Cambria, above E st., to same party.

Four two-story houses, 12 ft. by 28 ft., Hartville, above Cambria st, to same party.

Twenty-four three-story houses, 15 ft. by 50 ft., Twenty-fourth, above Berks st., to T. W. Small, 1545 Hutchinson st.,

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—a form of action invested to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

First Use---Then Beauty.

Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading. It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. we repeat. we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $8 up, and BOOTS AND SHOES FOR LADIES from $2 50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and attentive reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often. in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.

If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, in order that they may be exchanged. Repairing of all kinds at moderate prices.

THE DAY SEWED SHOE MFG. CO.
Under the management of W. W. APSLEY.
No. 23 NORTH EIGHTH STREET
PHILADELPHIA.

FALL CLOTHING

We have made an unusual large stock this season which is already meeting a ready sale. In MAKE, STYLE and FINISH our goods excel all others, and prices defy competition. We fit you equal to the best tailor-made garment at about one-third less price.

SCHOOL SUITS FOR BOYS AND CHILDREN in new designs, and we only have what we can recommend.

The NEW FALL FURNISHINGS already in are much superior to the usual stocks found around town.

An early call solicited.

VOL. I.—NO. 40. PHILADELPHIA, MONDAY, OCTOBER 11, 1886. PRICE 15 CENTS

The PHILADELPHIA RECORD

ANSWERS A QUESTION PROPOUNDED BY THE

NORTH AMERICAN:

HOW ABOUT THIS?

The *Record* has issued a card giving the "estimated" circulation of the different Philadelphia morning papers, and furnishing its own as "sworn to." As this card does injustice, perhaps unintended, to us, we feel at liberty to ask Mr. Singerly, posing as he does as the frankest of men, this plain, straightforward question: "Are you willing to take oath that you printed and sold 113,707 copies of the *Record* on Tuesday, October 5, as published in the columns of your paper?"—*Philadelphia North American, Oct.* 7, 1886.

TO WHOM IT MAY CONCERN.

City of Philadelphia, ss.

Personally appeared before me, the subrcriber, Richard J. Lennon, Magistrate of Court No. 5, of the said city, HENRY AYRES, who, being duly sworn according to law, doth depose and say: That he is Pressman of the Philadelphia *Record*, that the Philadelphia *Record* printed 113,707 copies of the said Philadelphia *Record* on the morning of Tuesday, October 5, 1886. And further deponent saith not. HENRY AYRES.

Sworn and subscribed before me, this seventh day of October, A.D. 1886. RICHARD J. LENNON,
Magistrate of Court No. 5.

City of Philadelphia, ss.

Personally appeared before me, the subscriber, Richard J. Lennon, Magistrate of Court No. 5, of the said city, M. A. FORRESTEL, who, being duly sworn according to law, doth depose and say: That he is Chief of Distribution of the Philadelphia *Record*; that the said Philadelphia *Record* printed and distributed 113,707 copies of the said Philadelphia *Record* on the morning of Tuesday, October 5, 1886. And further deponent saith not. M. A. FORRESTEL.

Sworn and subscribed before me, this seventh day of October, A. D. 1886. RICHARD J. LENNON,
Magistrate of Court No. 5.

City of Philadelphia, ss.

Personally appeared before me, the subscriber, Richard J. Lennon, Magistrate of Court No. 5, of the said city, E. CAMPBELL BRADLEY, who, being duly sworn according to law, doth depose and say: That he is Bookkeeper and Circulation Clerk of the Philadelphia *Record*; that the said Philadelphia *Record* printed and sold 113,707 copies of the said Philadelphia *Record* on the morning of Tuesday, October 5, 1886. And further deponent saith not. E. CAMPBELL BRADLEY.

Sworn and subscribed before me, this seventh day of October, A. D. 1886. RICHARD J. LENNON,
Magistrate of Court No. 5.

City of Philadelphia, ss.

Personally appeared before me, the subscriber, Richard J. Lennon, Magistrate of Court, No. 5, of the said city, WILLIAM M. SINGERLY, who, being duly sworn according to law, doth depose and say: That he is proprietor of the Philadelphia *Record*; that from the best of his knowledge and belief in the truthfulness of the above statements made by his employes, the said Philadelphia *Record* printed and sold 113,707 copies of the said Philadelphia *Record* on the morning of Tuesday, October 5, 1886. And further deponent saith not.

WILLIAM M. SINGERLY.

Sworn and subscribed before me, this seventh day of October, A. D.; 1886. RICHARD J. LENNON,
Magistrate of Court No. 5.

The estimate of the circulation of the daily papers of this city complained of by our esteemed contemparary was not of the *Record's* making. It is the estimate of Messrs. N. W. Ayer & Son, advertising agents. We do not believe that Messrs. Ayer & Son intended an injustice to our contemporaries—the *Record* certainly did not. In justice to the *North American* we give it what it asks for—the above affidavits. The *Record* press-room and counting department are open for the inspection of our neighbors and the public, and they are hereby invited to come and see and count for themselves.

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, OCT. 11, 1886.

NO ELEVATED RAILROAD, unless the fare is to be five cents at all hours.

CUTTING wants $50,000 damages from Mexico for injuries sustained through his imprisonment by the Mexicans.

CHARLESTON needs at least $60,000 to rebuild the Presbyterian churches destroyed and injured by the earthquakes.

IT is estimated that by a high license law $2,500,000 could be obtained from the liquor saloons of this city. This would materially lighten the taxes of our property owners.

THE first thing you know, Governor Pattison will make himself the next Mayor of Philadelphia. His gunning expeditions for big game are in the people's interests, and they know it.

DON'T forget that when you buy a ton, 2,000 pounds, according to the Supreme Court, is a legal ton; if you want a long ton, of 2,240 pounds, you must so stipulate it in your contract.

OUR big city cousin New York, is not asleep. The record of conveyances up to October 1st, shows 10,299 against 8,237 for same time last year, representing respectively $186,044,820 and $133,690,289. The number of mortgages for the same period is 9,290 and 7,451 respectively representing $104,000,000 and $76,000,000. This shows a sharp increase in conveyance and mortgages. One hundred and four million dollars is a large amount of money to borrow and lend in mortgages. About one half of it was loaned at 5 per cent. The Bank and Trust companies are credited with loans of about $26,000,000.

Is the new City Hall dangerously settling, this seems to be the question of importance just now. It was certainly bad management that constructed the walls of the building in such a manner that the settling of the tower should affect them. Would'nt it be advisible to let the tower do its settling before carrying it up much higher?

THE purchase of such valuable and costly property as the steamships Alaska, Arizona, America, and the City of Rome by the Pennsylvania Rail Road Company involving as it does millions of dollars may prove a disastrous adventure, it is in keeping with Gowens speculations which wrecked the Reading and may even prove a more costly luxury. The nearer Rail Road Companies confine their business to legitimate Rail Roading the better it has proved for stockholders heretofore and this departure of the Pennsylvania Rail Road Company is not likely to prove an exception.

GOVERNOR PATTISON manifesto against Pools has the true ring in it. The seemingly incorrigible wealthy corporations who have played shuttle-cock and battle-dore with the peoples' rights so long that the people have ceased to be a factor worthy of consideration, may yet find that they have been walking upon dangerous ground. Every citizen should place himself firmly behind Governor Pattison, and lend him whatever moral aid and support he has to give in this fight for the peoples rights. It will be no easy task for the commonwealth through its officers to stamp out this withering curse of monopoly which has been so long flourishing at the peoples expense.

THE Girard Estate management has under consideration the erection of other buildings for business purpose than those now projected. The Hood Bonbright building is a departure. The old Jayne building on Chestnut street was in its day and generation a monster, but we need buildings of an entirely different order to-day. The new building to be errected by the Girard Trust to extend from the present structure to Twelfth street, will be in its main features similar to the big iron front. Market street of all thoroughfares needs such buildings. We have remarked before that it is time for those old fashioned houses of past generations to go. Space is too valuable or ought to be for them to remain and disfigure that street. The impetus has been given and we anticipated some large operations of the Girard Trust character within a years time.

THE total number of buildings projected in New York this year foot up 3,419 against 2,575 last year and 2274 for same time 1884. The sums of money involved for these three periods are respectively, $49,481,588, $36,523,561 and $35,623,398. During September 322 buildings were projected, against 299 last September and 144 for September 1884. The estimated cost for these buildings were $3,924,365, $3,346,780 and $1,633,695 respectively. The greatest building activity is between Fifty-ninth street and 125th street, and Fifth and Eighth avenues. New York is certainly progressing rapidly and her annexed districts are receiving careful attention for the real estate interests.

TO EXAMINE all the steam heating appliances now in the market, one would suppose there is no more progress possible in that direction. Wonderful results have been accomplished during the past ten years, manufacturers have devised improvements, and have introduced them on a large scale. The increasing size of our buildings the increasing use of machinery on second, third and fourth floors the expanding size of engine and boilers which supply a number of steam uses, these and other changing conditions have developed large and better steam heating apparatuses. Recently some very commendable appliances have been introduced, which cannot help but attract the attention of builders.

PHILADELPHIA has several suburban districts that ought to be annexed in reality as they are now annexed on paper. The construction of elevated roads will complete the work that was begun many years ago. Philadelphia has passed the point, where car lines can be multiplied in the interior of the city. The system is useless in suburban sections when it is worth from 50 cents to one dollar in town to the mechanic to go and come, and much more to the business man. The evil of defective transportation facilities must be remedied. The people of Philadelphia have rights and interest which politicians and street car directors and stock holders are bound to respect. The real estate people have great interests at stake, so have investors, builders, and business men generally. Philadelphia is completely bound by iron bands. She demands more room and will have it, but elevated roads are the means and the only means by which these demands can be met with any degree of promptness.

If the labor day was nine hours long, it would result in more workmen living outside of the crowded sections of the city, especially if they could reach their homes in a shorter time than is possible at present. In other words the nine hour day would create a demand for suburban lots, and start suburban building. Mechanics know that it is a slow operation to get a home where a lot is worth from $1000 to $2000, but it is a comparatively easy matter to purchase a lot from $200 to $400 or even less than the lower amount. Shorter hours have their advantages as well as disadvantages. The overcrowded condition of our large cities is unnatural, and continues simply by reason of the necessity of the situation of labor. No amount of expensive sanitation can correct the evils caused by unnecessary and yet necessary crowding.

The crowded condition of New York streets has given rise to some extravagant but at the same time serviceable suggestions for the remedying of the trouble. It has been suggested that instead of hauling shiploads of merchandise from the water front to the mills of warehouses scattered all over the city, along narrow streets, that warehouses of great capacity be erected on the piers, and that the contents be distributed by rail. The business of New York for over two hundred years is growing to what it is and it will not be changed in a day or a year.

In lower New York there is almost a perpetual blockade. It cost 25 per cent. more to handle merchandize by trucks than eight years ago. Philadelphia's water front ought to be more valuable, but it is likely to remain as it is, comparatively valueless for years.

The more the subject is considered the more we see that a mistake was made in putting the tax levy at $1.85. A city that invests as many millions in new houses, mills and factories as is invested here, ought to, and can, and would afford a higher tax rate. Years ago a terrible fuss was made when the rates were higher but times were different then. To-day real estate is advancing, business is booming, the city is overrun with business. We are increasing at the rate of thirty thousand per year. Our volume of business is expanding. Rents are satisfactory to landlords. Better streets, more light, better water facilities, would be reflected in better rents and would be inducement to build. Property owners are not niggardly. When money is needed they are willing to pay it. Our councils have made a mistake but it can be corrected next year.

There is one thing that architects should do more than they do do, viz: they should consult plumbers and sanitary engineers more than they do, before completing their plans. The first thing the plumber has to do when a house or row of houses is finished, is to pry up the floors, and rip open the walls to do his work. But this is not all. The builder or architect, says in an arbitrary way, here is the place for the water closet, there is the place for that, and yonder is the spot for something else, utterly regardless in frequent instances of the laws, even of gravity to say nothing of ventilation. Much unnecessary work is done, much bad plumbing is done, when good plumbing could be done, if the architect consulted the plumber before hand. Builders are as much at fault as the architects in this matter. So they get their sanitary appliance in some where, it is all right. Let us have some better understanding on this matter.

In New York and vicinity there is something like a speculative demand for vacant property. In Philadelphia there is greater activity in vacant property, but it has not and is not likely to reach the speculative limits. An elevated railroad, if it was decided to build it, would have an influence on city real estate at once. A great many people would decide to live along the line of it, just as they did in New York. One of the effects of such a movement would be to bring about a great deal of repairing and remodeling. Block upon block of old style houses are let stay as they are because people must use them. Give them an alternative, and the older houses would be made more attractive and convenient. An elevated road would settle a good many questions, and produce a good many unexpected results.

What should be the basis of a circulating medium. How much money should there be in circulation in a given community, have been questions which people have never been able to agree upon. One set of thinkers demand gold and a gold basis, others call for a gold and silver basis, others favor paper money based on gold and silver, or gold alone. Others again favor paper backed only by the government fiat. "This is a dollar."

There is a wonderfully close relation between the amount of money in circulation and good or bad times. Many in fact most people attribute good or bad times to other causes. No doubt other causes and influences than the amount of money in circulation have more or less to do with the condition of trade and business. The banking interests have with the aid of the daily press done much to befog the public mind on these questions. An intelligent discussion of this question is hardly possible yet. A few facts of history may help to lay the foundations for discussion. Far back in the infancy of the Roman Empire there was $100 of gold and silver per capita in circulation and the empire and the people prospered. The sails of the Roman ships whitened every sea. The money power discouraged gold and silver money. The amount of money began to decline and with this decline the capability of the people declined and at last the empire fell. In the dark ages the average per capita in supply of gold and silver was $11. The sixteenth century supply of $600,000,000 in silver brought in this Elizabeth era, the revival of letters and the general intellectual activity of that age. Since then good and bad times can be traced by the increase or decrease of the supply of money or what answered the purpose of money. The great industrial awakening in the United States and Germany in 1873 was followed by a panic.

Money is the life blood of the people. Its abundance means vigor, its scarcity means weakness. The money power knows it and has always sought to restrict the volume in order that by its scarcity they might demand higher rates and sweep in the savings of the masses through bankruptcy.

The local press has at last awakened to some facts brought out in the Real Estate Record some weeks ago concerning the doings of the Gas Coal Tar Pool. In their hurry to get at the facts they stumble a good deal and jump at rather unwarranted conclusions. The Philadelphia tar product is about 105,000 barrels of 50 gallons. The talk of destroying 50,000 barrels to stiffen prices in all talk.

The United Refining Company and the American Felting Company exercise a good deal of influence in the combination. The alleged efforts of the pool to control prices when stripped of its exageration are simply efforts to sell the product at the best market prices obtainable. The combination has a right to combine, as much as the Standard Oil company, the Pennsylvania Railroad Company, or any other interest great or small. No fault is to be found in this. The pool has a right to store its products in immense tanks if it please. Merchants, manufacturers, miners and all other interests do the same at times. The agitation is overshooting the mark. The price of pitch is not alleged to be unreasonable. The facts ought to be carefully unfolded before crushing allegations are made. The Real Estate Record will not be second in any effort to expose and denounce any actual injustice done.

A Stock Maternity Company with hospitals for the confinement of respectable unmarried women is the latest New York novelty for the investment of surplus capital, the directors sell the babies outright at $25 dollars per head.

At a labor convention, recently held in Hull, England, an extract was read from a letter published in the *Christian World*, which gave an account of a meeting of the stock holders of a large match making firm, at which meeting the directors, declared a dividend amounting to twenty-two per cent. per annum. The letter above referred to presented as a companion pietrue, the statement that a child of seven years old in England, is known to earn by making match boxes only two pence per gross, out of which, he must find his own paste, string, and the necessary fire for drying the boxes. Two pence per gross, twenty-two per cent.! and yet this is no worse than the experience of some of the women who make shirts right here in Philadelphia, at ninety cents a dozen.

The Supreme Court has sustained the claim of Louis Rosenzuig, who obtained a judgment against the Lake Shore and Michigan Southern Rail Road Company, for $48,750 for damages for ejectment, and injuries sustained from the companies cars,

according to the decision, a rail road company cannot compel a passenger to leave the train when tendered legal fare or the rates in money. A company cannot make a rule, by which passengers can be put off in a dangerous place, and that where a railroad company issues a ticket to a passenger without restrictions or notice, it is good on any train which carries passengers. Real estate men are too poor to travel much, but it is well enough for them to know their rights when they do travel.

Some one else besides the Real Estate Record, don't believe in our present style of church architecture. Professor Hamlin, of Columbia College comes out in this way:

"An educated architectural judgment," says the writer, "is forced to admit that the majority of our more pretentious and costly churches are painfully deficient in the higher qualities of architectural expression. Purity and dignity of design, elegance of proportion, appropriateness of detail and ornamentation, and a due subordination of all parts to the general expression and effect of the whole, are sadly lacking. In the more costly churches the decoration, internal or external, is very frequently overdone by a multiplication of meaningless and complicated details, producing an effect of confusion, or else of vulgar ostentation. In this way very beautiful ornamental details are sometimes sadly misapplied, and an admirably conceived *ensemble* ruined by ill-designed or overwrought decoration. More frequently, however, absolute poverty of invention characterizes the external details of our modern churches, and not once in a thousand times is there any approach to that beautiful combination of carefully studied and finely proportioned parts so frequently seen in the most modest parish churches of the Middle Ages, where the contour of every molding and the form of every architectural details evince careful study, however rude the execution or cheap the material. In short, the appearance and decoration of most of our modern and costly churches betray *lack of education* on the part of the architect, and *lack of careful study* of the design. The latter defect is not easily understood, perhaps, by those inexperienced in architecture; but it may be explained as signifying that the forms, proportions and combinations of the constituent parts of the design are conceived and put together with a minimum of intellectual effort. A careful architect essays scores of different outlines and combinations on paper, tries different groupings of openings, different arrangements of parts and varying proportions, ransacks his portfolios for useful suggestions, and only determines on the final design after long and patient effort. He works as the careful writer works, and the final result bears to his first sketches the same relation that an author's finished work does to his first rough draft of its contents. It is this conscientious study alone that produces fine architecture, and it is partly for lack of this that most of our churches are so vulnerable to artistic criticism. But ignorance also accounts for many of their defects, their designing being so often intrusted to men who have had no artistic training, and are utterly unfamiliar with the great examples of good design to be found on either side of the Atlantic. As soon may one expect a noble literary work from a novice as a noble church edifice from an untraveled and half-educated architect."

"A church thus honorably and conscientiously built should be a structure whose external appearance elicits general admiration by its fine proportions, its expression of dignity, its graceful lines and evidently solid construction. Its architectural style should be pure; its ornamentation refined and elegant, subdued rather than florid, and designed to enhance, not to disguise, the beauty of the church's outlines. The design should tell its own story, revealing at a glance the internal disposition of the various parts of the edifice. Internally the form, proportions and arrangement should be determined by the special requirements of the case, and not by preconceived ideas, or imitation of some supposedly fine model. Aisles, vestibule, entrances and exits should be ample; the pews low and comfortable, and *without doors;* and lighting, heating and ventilation should receive special attention. Abundant windows should admit floods of light to the pews and pulpit, tempered and softened by passing through the 'cathedral glass' or 'grisaille' which, with borders of rich stained glass, forms an admirable filling for church windows. A few stained glass windows may serve as memorials for the worthy departed, enriching the whole interior with their jewel-ed splendor of deep colors. The ceiling whether of vaulted masonry, or open timber work, should conduce to the richness of the decoration below, which in turn should enhance the loftiness and beauty of the ceiling. The decoration should be fine, not florid; rich, yet subdued; revealing through all its complications of color, detail and symbolism, one harmonious and easily comprehended scheme, restful to the eye, and not distracting to the mind.

"Finally, the construction should be as solid and everlasting as masonry, iron and timber can make it. Foundations and walls should be of surpassing strength, and on them should money be expended rather than on gilding and intricate carving. We should have more vaulted ceilings of masonry, more thick walls with their deep shadows, and fewer pinnacles and spires of wood and slate. In Europe, one sees small village churches with graceful ceilings of groined masonry. Ever after our churches seem tawdry and flimsy. Only when shams and cheap imitations are banished from God's house, and honesty, simplicity and modesty, or a splendor chastened by good taste, pure and unostentatious, shall prevail within its sacred walls, shall we have a church architecture worthy of our religion and the age in which we live."

The steamship *Umbria* yesterday brought home to his many friends Chauncey M. Depew, President of the New York Central Railroad Company. Speaking of the industrial situation abroad, Mr. Depew said:

"There has been a great change for the worse in the industrial condition of Europe since I was there four years ago. The tendency of the wages of artisans is downward, while the tendency of the necessaries of life for the workingman is not downward. The spread of Socialism and Anarchism, their threats, and the occasional riots that occur are alarming the large and the small property holders alike, and, excepting in France, there is a reaction toward absolutism—the people are willing to surrender part of their liberties for the sake of protection from a strong government. The whole police and espionage system of the Continental governments, including France, are united for the suppression of Socialists and Anarchists, and the result is that these people are being driven in large numbers to this country. They are now forming a disproportionate part of our immigration. The population of the Continental nations is fast increasing, without any outlet in sight that affords sufficient inducements to seek relief in the direction of immigration, for the labor troubles in America have been grossly exaggerated by the European press, and through that influence there is nothing resembling the old colonization spirit which looked hopefully to the United States. I am satisfied from what I saw and heard of the Socialist agitation and its influence in creating a tendency toward absolutism that the cause of liberty and democracy in Europe has received the greatest set-back it has experienced in twenty-five years."—*Tribune.*

General Meigs, U. S. A, writes to *Building* as follows:

The city of New York inters in its Potter's Field about four thousand bodies annually. Europe rents a grave site for a term of years—a short term—and then disinters the bones and packs them in a catacomb or vault. Would not New York save money and treat its dead with greater respect if it embedded each body in a mass of Hudson river cement and sand (Beton Coignet)? I find that one-half a cubic yard of Beton Coignet will completely enclose the body of a man of six feet stature, weighing 200 pounds. The average human being would require even less than thirteen cubic feet. At ruling prices such a sarcophagus would cost only two or three dollars. The name and date, a perpetual record and memoriol of the dead, could be inscribed with letter bunches or stamps on the head or foot of the block or sarcophagus. Ranged along side of each other in contact, and in two rows, *i. e.*, two blocks deep, these would build on any suitable plan a fourteen-foot wall, massive enough and strong enough to be carried to the height of 150 feet.

Thus would be erected at the rate of nearly 2,000 cubic yards per year, a great temple of silence, a grand and everlasting monument to those who pass away. The designs for such a monument seem worthy of the study of our best architects. It might be a pyramid, a cone, a tower or a temple or a long gallery like those of the Italian city of Bologna, the most beautiful cemetery in the world.

Many years ago the London *Architect* published the proposal of an architect to erect by slow degrees and in successive courses a solid pyramid in which, in cells, the dead of London would be enclosed. But this made no provision for memorial inscriptions or visible records. The fourteen-foot wall does this.

OBITUARY.

Edward T. Parker, for a number of years a member of the Board of Guardians of the Poor, of this city, died in the Pennsylvania Hospital on Sunday morning the 3rd inst. Mr. Parker was taken suddenly ill in the street and was removed to the hospital in an ambulance. He died from pleurisy.

Mr. Parker was best known by his sturdy opposition to the management of the Pennsylvania Railroad, as he had always opposed the administration of the road at the annual meeting. He was deeply interested in religious matters, and for forty years was a teacher of a colored Sunday school on Locust street near Tenth, supporting it for a large part of the time solely from his own means.

Items of News.

—The Supreme Court has affirmed the decree of Common Pleas No. 2 granting a suit of main damages compelling the Phoenix Iron Company to open its books to Geo. H. Sellers a stockholder.

—Colonel Dechert the city Controller having been mandamused to countersign a warrant drawn by the County engineer in favor of T. P. Stuart the contractor for $500 for work done on the Sixty-third street sewer appealed to the Supreme Court. The Controllers appeal was sustained, this gives the Controller discretionary power as to countersigning of warrants. The Court further decides that city and county officials have no right to reimburse contractors when they accept the responsibility of collecting money for themselves on bills of assessment.

BUILDERS' ITEMS.

Building and Real Estate Notes.

A LOT of 5¼ acres, at Mt. Airy, sold for $35,000.

THE property 2043 North Broad St., 19x95, brought $9,000.

THE N. W. cor, of 9th & Morgan Sts., 41x99, sold for $19,500.

THE dwelling 2131 Ridge Av?, 15¼x100, sold for $17,000.

NINE thousand dollars was paid for 1849 Park Ave., 19x100.

FRANKLIN P. SELTZER left an estate appraised at $107,523.21.

THE dwelling and lot, 23½x100, No. 1509 N. 17th St., sold for $11,100.

GETSINGER'S window glass factory in Bridgeton has resumed work

A FARM of 35½ acres, on Gray's Lane, near Hoffman St., sold for $40,000.

323 feet, equal to 13 stories, is the present height of the City Hall Tower.

WILLIAM P. JENKS, a retired merchant, left an estate valued at $175,000.

THE Avenue Hotel, on Delaware avenue next door to the Ridgway House, sold for $30,000.

THE Equalized Spring Motor Co., of Philadelphia, has been chartered, with a capital of $50,000.

THE late Charles Bader, the pioneer of the Glue manufacturers, left his family over a million of dollars.

250 small dwellings are to be erected in Burlington, N. J. It is claimed that houses are not only scarce but business men are compelled to reside elsewhere.

FRANK P. MARTIN. 1418 South Penn Square has sold the residence 1419 N. Broad St., for $25,000 to John Z. Huber, this property was formerly owned by Thos. J. Martin.

THE corner stone of the Presbyterian Church of the Evangel. to be erected at 18th and Tasker Streets was laid on Saturday afternoon. The spire is to be 100 feet high.

THERE is to be a new Lutheran Seminary at Mount Airy, the residence and grounds of the late James Gowen having been purchased for that purpose. New buildings to cost about $1o0,000 are to be erected, the grounds cover about six acres.

AT the Northwest corner of Twenty-second and Tioga Streets stands the handsome new Temple Baptist Church, which will be dedicated to-morrow. The architecture of the building is in the English Renaissance, with a base of Leiperville stone and Newtown stone dressings. The main walls are of brick and red mortar and the gables are of terra cotta tiles. At the Southeast corner of the building is a tower 105 feet high. The entire building is ninety-nine feet long and sixty-three feet wide. The building cost $32,843, and the ground was first broken last Spring. The church was organized in July, 1885, with a membership of twenty-nine. There are now eighty. The architect was Frank R. Watson, though most of the plans were made from suggestions of the pastor, Rev. James W. Putnam.

—In a brick machine just patented by William Hilton, of Dunkirk, O., the clay-forcing or pressing-plunger is detachably secured to the operating frame, whereby the plunger is relieved from undue strain. The frame is provided with adjustable cross-bars adapted to move mold-boxes of different sizes.

A Tinner's Ideas.

I am averse to the use of an acid for a soldering flux for roofing purposes. I admit that it answers the purpose, but it is disagreeable in various ways. If your roof happens to get wet or corroded, acid will not do the work as satisfactorily as good old resin and a large hot iron. I will illustrate: Two years ago I was putting on a flat seam roof, and just about the time I finished laying the tin a drizzling rain set in, continuing several days. When I went to finish soldering I found the roof black with coal soot and rust. I was in a quandary to decide what to do, but being an advocate (at that time) of acid I used dilute muriatic, but it would not do; I then tried strong acid, but with no better result than before. As a last resort I tried resin, and was surprised to see that it worked perfectly and made a tight roof. This little experiment was enough to convince me that resin was preferable to acid. Some tinners make a mistake by using small soldering irons; I would not advise the use of less than ten-pound irons for roofing.

Building Tools in Ancient Egypt.

The brickmakers used molds, probably of wood, for making the bricks, stamps to impress on them the requisite name or inscription, pickaxes to break up, and vases for the water to mix with the clay, yokes across the shoulders to carry them to their destination, and plumb-lines to keep the walls perpendicular. In the time of the eighteenth and nineteenth dynasties foreign captives under Egyptian superintendence were employed, and the hardships suffered by the Hebrews under the Egyptian taskmakers during their sojourn in Egypt, as described in the Pentateuch (Exodus i. 14), prior to the exodus, give a graphic description of the tyranny exercised over the unhappy people reduced by the Egyptians to servitude. The plasterers used a kind of adze and spatulæ for laying the plaster on walls of clay mixed with straw, smoothers to flatten the surface, coarse brushes of palm fibres, and paintpots to whitewash and color it. Wooden objects first had a piece of cloth or linen glued on them, and the plaster was afterward laid upon it and smoothed over.

Handy Calculations for Every-Day Use.

Many of our readers may like to know simple methods for calculating the size of tanks and cisterns to hold liquids of any kind. This is readily ascertained by first finding the number of cubic feet, or inches, in a given tank and reducing the same to gallons by this method, which involves very little figuring. The cubic contents of any object can be obtained by multiplying length, breadth and depth together. In plain words, multiply the length by the breadth, and the product so obtained by the width. The result is in the same terms used. If the measurement was in feet, the answer is in feet; if in inches, the answer is in inches. There are 1,728 cubic inches in a cubic foot. A cubic foot of water weighs 62.2 pounds, and is equal to 7.5 gallons.

Doubling the diameter of a pipe increases its capacity four times, for all circles are to each other as the squares of their diameters.

An acre can be enclosed in a square 208.71 feet on each aide.

A circular acre is 235.5 feet in diameter.

Six-penny nails, No. 2, run 160 to the pound. Ten-penny nails, No. 3, run sixty to the pound. Five pounds of four-penny nails, or three and a quarter pounds three-penny nails, will lay 1,000 shingles.

A chain with three-sixteenths round-iron links will break at three-fourths of a ton. Five sixteenths iron links will break at two and a quarter tons. Half-inch iron links will break at six tons.

To find the weight of wrought-iron bolts, square the radius (half the diameter) and multiply by ten; product is the weight in pounds per foot.

The number of panes of glass in a box runs as follows: 6×8, 150; 7×9, 114; 8×10, 90; 8×12, 75; 9×10, 80; 9×12, 67; 9×14, 57; 10×12, 60; 10×15, 48.

Councils' Proceedings.

The Select Council's Electrical Committee has favorably reported an ordinance permitting the Penn Electric Light Company to lay conduits under certain streets.

Bills were read: By Mr. Stuart, to pave Twenty-second street, from Federal to Latona. By Mr. Green, for about forty electric lights in different parts of the Twenty-third Ward, and for a sewer on Frankford avenue, near Margaretta street. By Mr. Ryan, to repave New, Branch and Mayland streets. By Mr. Clifton, for electric lights at Front and Otsego streets and Washington avenue. By Mr. Thornton, for an electric light in the Thirteenth Ward. By Mr. Moffet, to repave Front street, between Girard avenue and Thompson street, with Belgian blocks. By Mr. Graham, to permit the Metropolitan Railway Company to occupy certain streets with underground tracks. By Mr. Horn, to authorize the laying of a sewer and water-pipe on Reese street, from Indiana avenue to Clearfield street, and grading and paving the same. By Mr. Graham, from the Electrical Committee, to permit the American Telephone and Telegraph Company to lay conduits under certain streets. The two last were laid over to be printed, and the others referred to committee.

Select Council resolution requesting and authorizing the Philadelphia and Reading Railroad to erect safety gates at the crossing at American and Master streets was passed finally.

Select Council ordinance granting permission to the Postal Telegraph and Cable Company to lay and maintain underground conduits, cables, wires and manholes for electrical conductors throughout the business part of the city, and out Lancaster avenue to the county line, was taken up for final passage.

This company is a branch of the Bennett-Mackey Cable.

Select Council ordinance to authorize the Bell Telephone Company to lay and maintain underground conduit cable wires, manholes and the erection of distributing poles was taken up on final passage. Mr. Willson moved to recommit the bill for purposes of amendment, which was lost by a vote of yeas 8 to nays 18. A motion to make the bill the special order at the next regular meeting was lost—yeas 11, nays 14. A number of amendments of the route were then made to the first section, when the ordinance was postponed for the present.

A resolution of request to the heads of City Departments not to enforce the ordinance requiring the writing of signatures where money is paid in their offices as directed by the City Solicitor, was ruled out of order by the Chair on the ground that no resolution could annul an ordinance, and it was ordered to be returned to Common Council, in which it originated.

A resolution requesting the County Controller to inform Councils whether Tax Receiver Hunter had retained any commission on the poll taxes received by him, and, if so, for how long a time and for what amount, was received from Common Council. Motions to postpone indefinitely, to postpone for the present, and to refer to the Committee on Cash Accounts of the City Treasury, were defeated, when the resolution was concurred in.

IN Common Councils the following bills were introduced:

By Mr. Hartman, to change the voting

place of the 12th division of the Eighth Ward from Seventeenth and Latimer streets to 1712 Latimer street.

By Mr. Ewell, to locate four electric lights on Second street, between Poplar and Girard avenue, four in George street, between Second and Fifth streets, one at Fourth and Beaver streets, and one at Third and Beaver streets.

By Mr. Purnell, to locate electric lights at Eighth and South streets, Ninth and South streets, Eleventh and South streets, Twelfth and Lombard streets, Tenth and Lombard streets, and Thirteenth and Lombard streets, and to increase the salaries of the city firemen to $900 a year.

By Mr. Trenchard, to locate an electric light at Richmond and Cumberland streets; to pave McClellan, from Montgomery avenue to Vienna street.

By Mr. Wisler, to locate an electric light at Sixth and York streets; to pave Bower from Trenton avenue to Blair; to pave Blair from Bower to Norris street.

By Mr. Wilde, to grade Krams avenue from Ridge avenue to Mitchell.

By Mr. Mackie, to re-lay water pipe in Wayne Avenue from Lafayette street to Walnut lane.

By Mr. Meehan, to pave Maplewood avenue and Seymour street from Germantown avenue and Green street; to grade Twentieth from Rusconb to Rockland street; for water pipe in Chew street, north of Haines; to open Handsberry from Laurens to Morris street; to open Laurens from Queen to Handsberry.

By Mr. Zane, to grade Orkney, from Somerset to Cambria, and from Cambria to Clearfield street.

By Mr. Weidner, to locate electric lights on Lehigh avenue, between Sixth street and Germantown avenue.

By Mr. Holeman, to pave Melrose street, from Orthodox to Bridge street; to grade School street from Ash to Church street; to pave Buckius street, from Richmond to Thompson street.

By Mr. Anderson, to place electric lights at the northwest corner of Broad and Wharton streets, and southwest corner of Thirteenth and Federal streets, to open Thirty-second street, from Gray's ferry road to Reed street.

By Mr. Bardsley, for water pipe in Huntingdon street, from Broad to Fifteenth, and in Fifteenth street, from Huntingdon to Lehigh avenue.

By Mr. Hanifen, for a sewer in Sydenham street, from Oxford to Columbia avenue.

By Mr. James, for a sewer in Sixteenth street, from Fontaine to Susquehanna avenue, and French street, from Fifteenth to Sixteenth.

By Mr. Clark, for electric lights on Ridge avenue, Girard avenue and Columbia avenue, in the Twenty-ninth Ward.

By Mr. McCoach, for electric lights at Twentieth and Fitzwater, Twenty-first and Fitzwater, Twenty-second and Fitzwater, Twentieth and Catharine, and Twentieth and Christian streets.

By Mr. Baldwin, for a sewer in Sydenham street, from Columbia avenue to Oxford street; to grade Twenty-sixth street, from Master to Jefferson.

By Mr. Bain, for water pipe in Broad street, from Germantown avenue to McFarran street.

By Mr. Hicks, to pave Warren street, from Fifty-second to Fifty-first.

By Mr. Kauffman, to grade Leithgow street, from Cambria street to Indiana avenue; to grade and pave Orianna itreet, from Lehigh avenue to Somerset street.

By Mr. Welsh, to change the voting place of the 15th division of the Twenty-third Ward from Frankford avenue and Orthodox street to No. 4 West Orthodox street.

By Mr. Atkins, for sewers in Second street, from Tasker to Reed, and Barlow street, from Wharton to Read.

By Mr. Kenton, to repave Locust street, from Sixth to Seventh.

The Select Council bill to lay water pipe in Bird, Bridge and Hamilton streets and Allegheny avenue was passed finally.

The following Common Council bills were passed finally: Authorizing transfers in the annual appropriations to the Departments of Highways, Water, Markets and City Property, Steam Engines and Boilers, Education, Park Commission and Tax Receiver; to approve the contract and sureties of Wm. C. Brunner for the erection of a new school house at Adams and Lafayette streets, Twenty-second Ward; for a sewer in Howard street, from Diamond to Susquehanna avenue; resolution instructing the City Solicitor to agree upon a case stated, or otherwise, to recover certain commissions for the city received by the several City Treasurers from the State for collecting State money; authorizing the erection of public lamps in nearly all the wards to pave Dakota street, from Thirty-first to thirty-second streets, and Thirty-first, from Dakota to Dauphin, and to pave Pennock street, from Parrish to Poplar.

A resolution offered by U. C. Smith, and referred to the Survey Committee, would instruct the Chief Engineer and Surveyor to supervise the construction of the Schuylkill River East Side Railway along the river Schuylkill, Twenty-fifth street and Pennsylvania avenue, and, on behalf of the city, to see that the provisions of the ordinances of Councils are carried into effect by the railroad company. Mr. Smith said there were instances of failure on the part of the company to comply with the ordinances, and T. M. Thompson said there was no official to guard the interests of the city along the road.

Resolutions offered by Mr. Fow were adopted, asking the City Departments to suspend, until it can be regularly repealed, the ordinance of November 28, 1868, requiring the signatures of all persons paying money to the city, and asking from the Controller information about the poll-taxes collected by Receiver of Taxes Hunter, in relation to which there had been correspondence with the City Solicitor.

THE UNDERGROUND ROAD.

Application has been made to Councils for the permit to construct the projected underground road. All necessary guarantees are offered to insure the city and the citizens against damages. Gas, water and sewers are not to be interfered with. Street pavements removed are to be replaced with asphalt, Belgian blocks or whatever Councils may order. The ordinance also provides that after the completion of the work no portion of the surface of any street within the city limits shall be occupied by the company for stations, shops, &c., or obstructions of any sort; that the motive power used shall be free from smoke, gas and cinders, and precautions shall be taken to insure a free circulation of air in the subways. There are other provisions in the ordinance such as that the plans, &c., shall be open to the inspection of the Chief Engineer of the city, that the proper municipal officers shall have access at all times to the subway for the inspection of sewers and gas and water pipes, and that the subway, from Forty-fourth to Sixty-third, on Market, and on Broad, from Bristol street to City Line road, shall be uncovered, but protected by railings, &c., the company, at its own expense, to cover the crossing as streets shall be opened, and to cover the whole subway whenever Councils shall direct. On the question of fare the ordinance says that, between 5 and 8 A. M. and 5 and 7 P. M., the rate of fare shall not exceed five cents for a single ride within the city limits. The last section says: "The acceptance of this ordinance shall be certified under the seal of said corporation by the Mayor of the City of Philadelphia, for its provisions are binding."

The capital of the company is $2,250,000.

The direction is strong. The capital is all provided. One of the projectors and strong backers said in speaking of the project yesterday, that the idea first originated two years ago. Since then statistics of population and information of all kinds bearing upon the subject had been carefully collected, and estimates and plans had been prepared. The capital, was, of course, named at its minimum. The company had plenty of backing, and if Councils would grant the desired permission the work would be done. It was a bona fide project, and not a scheme to make money out of the charter or the franchises which the city might give. If Councils were to give the permission without delay the necessary office work could be done by the spring and the road completed between the two rivers within a year. Speaking of details, he said that the motive power would be electricity, and when Councils should give them a hearing they would have present eminent electricians, among them Mr. Edison, to show that this was perfectly feasible. The subway would be constructed of masonry, brick and iron; the cars would be 30 feet long and accommodate 38 passengers, and the entrance to them would be through doors in their sides. Access to the cars would be from the interior of houses or stations, of which in business portions of the city there would be about four to each mile, and in the residence part of the route three to the mile, on opposite sides of the streets, for the up and down cars.

In constructing their road the tracks would be no lower than 16 feet from the surface of the streets. They proposed to replace the sewers along the route by substituting three for one; that is, they would lay in the subway structure a pipe or sewer on each side of the streets to carry off the house drainage, and another one of sufficient dimensions to carry off the rain, snow and storm water. The best system for supplying water, he said, it was now conceded, was to furnish oblong reservoirs or pipes, from which the water would flow into the houses. This the company also proposed to substitute for the present system along the route. All this work would be done and the sewers and pipes supplied free of cost to the city.

A director of the company said that the interests of the underground road and the proposed elevated road were independent of each other and would not be likely to clash. It would be easy to construct the underground road because there is so small an amount of rock under the city that there would be no necessity for blasting or boring and the light subsoil would oppose but little difficulty. A careful calculation showed that with five cent fares, if they carried but half the number of passengers which the surface roads did, the company would make a profit.

CHAS. HASSE, 126 South Second street, represents one of the oldest "Whiting" houses in Philadelphia, his father commenced business in 1835, continuing on until his death, when his son Mr. Chas. Hasse took charge and carried it on successively. This firm for many years were the only Whiting merchants in the town, but since that time some six others have started up and all doing good business. Mr. Hasse is taking a very active part in the interests of the trade at large.

—The public schools of this country now employ over 300,000 teachers, and pay them $62,000,000, a not very flattering annual average of a little more than $200 each.

Items of News.

—The late William P. Jenks left an estate valued at $175,000.

—15,000 acres of an Iron Ore Tract in the Nittany Valley Centre County which was recently purchased by a syndicate with a capital of $1,500,000, is being actively developed. Two furnaces of a capacity of 50 tons each daily are to be erected.

—Philadelphia has within its boundarie, about $1,000,000,000 of combustible values distributed among 200,000 buildings, etc. Now beginning its third century, it has never had an annual property fire loss of $5,500,000. Its highest annual insurance fire loss (1869) has been estimated at $4,172,304. The average annual insurance fire loss in the twelve years here to be treated is $1,218,654.

—On Tuesday last the Magistrates paid into the city Treasury the following amounts for September: Cobb, $176.40; Clement, $1: 4.60; Lennon, $166.35; Lloyd, $61.15; Randall, $70.75; O'Brien, $262.60; Gillespie, $86.50; Smith, $126.45; Thompson, $143.80; Ahern, $33.15; Riley, $65.20; Pole, $134.05; South, $30.15; Severn, $169.10; Baird, $177.35; Eisenbrown, $229.90, and Lelar, $312.75; Collins, $201.70.

—It will be useful to have some simple rules for ascertaining the weight of tubes or beams of wrought iron. The following are on the assumption that one cubic foot of wrought iron equals 480 lbs. First, the sectional area in square inches of any tube, bar, or plate of wrought iron multiplied by ten will be the weight in pounds per yard of length. Thus, an angle iron whose section is 3-5 square inches weight 35 lbs. a yard. Hence in a section built up of two similar bars as a bridge post formed of two channels latticed the weight per foot of each channel is ascertained by multiplying the section required by ten-sixths. The figures resulting give the weight per foot, which being located in the table of sections of the rolling mills, the required channel is found at once on the nearest approximation. In large masses of tubes multiply the sectional area in square inches by the length in feet, and divide by 672 for the weight in tons. To reduce cubic feet into tons multiply by 1½ and divide by 7. A deduction of one-twentieth from these results will give a close approximation for cast iron.

—There is a general opinion that business will steadily improve from this time forth up to the last of November. Auction sales have not been particularly brisk, but private sales are very heavy, and the official list of conveyances show an increased number of transactions as compared with last year. Anybody who travels west or north of the Park must be struck with the extraordinary number of new houses under process of construction. The bulk of these new structures are apartment or improved tenements, and will accommodate a far larger number of families than an equal number of the older buildings in the lower part of the city; yet, intelligent real estate dealers and agents think there will be a demand for all the new buildings west and north of the Park. They say the population of the city is increasing with great rapidity, and that all but a few of the houses will rent readily. There is a good deal of purchasing of these new buildings, and prices are very fair. It really looks as if there was beginning to be a speculative demand for vacant property. It was noticed that the recent Brooklyn sales showed a keen desire on the part of thrifty people to purchase lots for investment. Twenty-sixth Ward Brooklyn property was bid off like "hot cakes." The sale of the Parkway property leading to Coney Island was quite a success.—*The N. Y. Record-Guide.*

—No more agreeable item of news has been read by the people of Philadelphia than the announcement last Friday morning that a charter had been granted last Thursday at Harrisburgh for the construction of an underground railway under this city.

The incorporators of the company are: Messrs. William A. Ingham, J. W. Jones, William P. Henszey, John J. Deery, James G. Lindsay, George Gerry White, of Camden, Samuel G. De Coursey, Emlen Physick, Leopold Sternberger and John T. Dyer, of Norristown. The officers are President, William A. Ingham; Directors, Jonh Lucas, William A. Ingham, J. W. Jones, John J. Deery, James G. Lindsay, George Gerry White, Frederick Prime, Jr., Charles F. King and Samuel G. De Coursey.

The company proposes to build a subway from Sixty-third and Market streets to the Market street ferries, passing under the Schuylkill, and around both sides of the Public Buildings; on Broad street, south from Market to Government avenue at League Island, and north on Broad street to the City Line road; on Third street, south from Market to Moyamensing avenue, to Fourth, and thence to Pollock street; on Third street, north from Market to Diamond, and thence to Thirty-third street; on Ridge avenue, from Broad street to Diamond; on Lancaster avenue, from Market to Fifty-second street, thence to Elm avenue, and in the subway to lay two or more tracks.

—From a recent issue of the New York *Evening Post* we learn something of interest in regard to model tenement houses which is worthy of reading.

In 1880 the Sanitary Reform Association, of New York City, devoted the sum of $300,000 to the erection of a model tenement, in which the occupants should be required to pay rent enough to return a fair interest upon the capital invested. The building occupies the easterly end of the block bounded by First and Second avenues, Seventy-first and Seventy-second streets, with a frontage of 200 feet on the avenue and 200 feet on the street. It is six stories high and divided into apartments of from two to four rooms; the stairs are of slate, and the whole building is practically fire proof. Each apartment is provided with running water, private water-closet, and ashes are thrown into a shoot, with openings at every floor. At the top of the building is a common laundry, each tenant having the use of a certain number of tubs for one day a week. In October, 1881, the apartments were offered to tenants, and almost all were occupied within a few months. A reading room, club room, bath rooms, etc., were opened as soon as the number of tenants grew large. The average rent per room was about $3.00 per month.

Notwithstanding the enmity of tenement-house owners in the neighborhood, and the strict rules, concerning cleanliness, prompt payment of rent, etc., the demand for the apartments in this building have been most of the time greater than the supply during the last five years. Sometimes, as in May last, not one of the 218 apartments has been vacant, and only the least desirable rooms are ever vacant for more than a few days at a time. At present, the worst time in the year for tenement-house owners, eight apartments out of 218 are empty. The investment has paid a steady yearly return of five per cent., and the property is to-day worth double what it cost in 1881, the neighborhood having become thickly settled since then, and unimproved real estate having more than doubled in value. The present rents range from $6.25 a month, for two rooms, to $14.50 for four rooms. There are no dark rooms in the buildings. The effect upon the neighborhood has been excellent. Landlords have had to offer more conveniences than formerly for the same rents, and to insist upon greater order and neatness in order to keep their best tenants.

Although the proprietors of the first model tenement have amply proved that decent buildings for poor people can be made to pay a fair interest upon their investment, few capitalists have been found to follow their example. Many building associations with ambitious plans have been organized but have done nothing. The President of the Sanitary Reform Association, Mr. Cutting, is, however, so well satisfied with the working of the Association's first tenement that he is about to put up another tenement upon the same plan further down town, and has bought for the purpose a plot of land, 116 by 88 feet, at the southwest corner of Avenue C and Fourteenth street, where work will begin in the fall.

Commercial Affairs.

The condition of commercial affairs throughout the country has continued as satisfactory as it is encouraging, and the volume of business in progress in nearly all departments appears to be steadily expanding. Buyers are supplying their wants with a feeling of confidence that tends to a free movement of merchandise from the hands of dealers as well as manufacturers, and commercial operations generally appear to be under the inspiration of "prosperous times," but there is nothing in the present condition of affairs that warrants the assertion that has been made in some quarters that business is "booming" or that trade is under the influence of a "tidal wave of activity." In fact, there is a singular absence of anything like speculative excitement or feverish activity in any branch of legitimate trade, but rather the development of steady progressive improvement that is the result of steady prosperity and the growing requirements of actual consumption. The impulse of a healthy demand has increased the distributive movement of merchandise; manufacturers have experienced a good outlet for their products with their order books well filled with contracts for forward delivery, financial affairs are in excellent shape, promising a steady and undisturbed money market at rates of interest that will not restrict business operations, while at the same time proving remunerative to capital, and; speculation has been of a conservative character and controlled by healthy influences. It is the operation of this conservative spirit that has inspired confidence, and is now leading to the free investment of capital and a steady expansion of the field of business activity; and the most encouraging sign of the times is that what has been already accomplished in the way of improvement during the past month has been almost wholly the result of natural causes. The steady increase in railroad earnings is still a significant feature of the commercial situation, and the fact that traffic is taxing their transportation facilities to the utmost is one of the best evidences of general business activity. For the first week in September fifty-seven roads show aggregate earnings of $5,080,685 against $4,510,166 for the corresponding time last year, which is an increase of nearly 13 per cent. For the second week the gain by the St. Paul was $87,800; by the Northwest, $75,900; by the Northern Pacifice, $48,500; by the Canadian Pacific, $38,000 and by the St. Louis & San Francisco, $29,600. These gains are the direct result which has led to an increased distribution of merchandise, and to the heavy movement ofgrain. The export movement of produce, although scarcely up to expectations, has commenced to develop some improvement. It is worthy of notice, however, that while the export demand for wheat during the past week has been moderate, the shipments thus far from the whole country since the commencement of the crop year, September 1st, are very much in excess of the corresponding period last year.

Building Permits.

Two two-story houses, 12x40, Marshall above Norris st., to John Mitchell, 2441 Mascher st.

Two two-story houses, 15x41, Warren above Thirty-sixth st., to W. J. Shedwick, 676 North Thirty-fourth st.

Second-story addition, 14x20, cor. of Eighth and Walnut sts., to W. J. Shedwick, 676 North Thirty-fourth st.

A back building, 10x12, Fairmount ave., above Thirty-eighth st., to same party.

A three-story house, 36x38, Green above Upsal st., to George Hearst, Germantown.

A three-story house, 32x50, School Lane, above Norris st., to same party.

A three-story house, 15x30, Twenty-second above Brown st., to Rush J. Whiteside & Sons, 2228 Mount Vernon st.

A two-story back building, 14x16, Callowhill, above Eighth st., to E. Schmid, 1713 Mascher st.

A two-story house, 14x36, Elmwood ave., above Sixty-fourth st., to Robert H. Parker, Mount Moriah Lane.

Two two-story houses, 17x43, Fifty-first st., above Pentridge ave., to Henry Whitelaw, 129 Walnut Place.

Two two-story houses, 13x40, 1020 and 1022 South Eighth st., to Henry G. Schulz, 2633 Germantown ave.

Fifth story addition, 64x30, Cadwalader st., above Columbia ave., to John B. Stetson & Co., 1717 Spring Garden st.

One-story addition, 18x30, Harvey, above Green st., to Samuel Loughey, 34 Harvey st., Germantown.

Addition to second story, 8x16, Dickinson and Mount Holly sts., to Thomas J. Milnamow, 2026, Christian st.

A one-story building, 16x12, Kensington ave., above Harrowgate Lane, to Flood & Burton, 2218 Cedar st.

A two-story building, 10x15, Hart Lane, above Kensington ave., to William D. Huston, 2433 North Third st.

Two two-story houses, 18x50, Penn above Harrison st., to Taylor & Roberts, 238 Orthodox st.

A one-story kitchen, 15x12, Lombard, above Twentieth street, to Richard Kearney, 2411 Lombard street.

Two-story addition, 15x20, Thirty-ninth above Market street, to HartmanGrau, 655 Preston street.

Second and third-story addition, 15x30, Guilford, above South street, to A. Benner, 3164 Richmond street.

Five two story houses, 12x12, Barber above South street, to same party.

A two-story house, 13x28, Philadelphia, above York street, to L. A. White, 2318 Carlisle street.

A two-story stable and shed, 51x30, Mulberry, above Wood street, to Liebert & Olbert, Oak st, Manayunk.

Two three-story houses, 17x46, Mechlin and Main sts., to M. D. Wartman, 116 Bringhurst st.

A two-story building, 16x30, Salmon and Neff sts., to Charles Kauffman, 3010 Richmond st.

Two two-story houses, 18x50, Roxborough av., above Mitchell st., to Howard Yocum, Lyceum Av.

A two-story building, 15x14, 2127 Federal st.

Two two-story buildings, 17x30, Federal above Twenty-first st., to William J. McHenry, 2325 Catherine st.

B. Tucker, No. 133 Greenwich street, two-story house, Winton st., above Sixth, 14x28.

D. Galheber, No. 20 Oxford st., two-story wagon and store-house, No. 14 Oxford st., 16x85.

A. L. Clark, No. 1620 Gratz st., two-story back building, No. 904 North Tenth st., 10x22; also, front alterations, No. 1736 Columbia ave., 16x26; also bay window, No. 1612 Gratz st , 4.6x10.

F. M. Tweed, No. 2030 Brown st , underpin store wall No. 3334 Chestnut st., 25 feet

Haibach & Auchter, Twenty-sixth and Thompson sts., two-story stable, Ingersoll st., above Twenty-third, 16x83.

T. Walters, No. 4825 Melrose st., Frankford, office and bay window, Tacony st., near Tucker, 10x14 and 4x8.

T. Wright & Son, No. 7 Harvey st., Germantown, two-story back building, Harvey st., near Main, 20x30.

C. W. Johnson, No. 127 Pastorius st., Germantown, one-story store, Duval and Adams sts., 10x21.

J. Maxwell, No. 528 South Fifteenth st., two-story back building, Sixteenth and Afton sts., 11x16.

R. Young, No. 3719 Ludlow st., seven mansard roofs, Woodland ave., above Forty-second st., 14x24

R. Clark, No. 2329 East Cumberland st., one-story office, American st., above York, 17x17.

S. E. Moore, No. 1325 North Eighth st., two-story back building, No. 255 South Eleventh st., 17x11.

A. F. Benner, No. 2621 West Dauphin st., alter house to store, No, 2421 Ridge ave., 18 feet.

H. Govett, No. 705 North Fifth st., one-story addition to stable, Oxford st., near Sixth, 16x66.

W. C. Mackie, Chestnut ave., Chestnut Hill, two three-story stone houses, Tulpehocken st., east of Wayne, 40x60; also, four three-story houses, Thirty-first st., near Mermaid, 25x58.

Firth & Foster Bros., Taylor, Emerald and Adams sts., two story stable, and carriage-house, Taylor st , near Emerald, 42x50.

D. A. Hampton, No. 722 North Twenty-second st., one-story kitchen and porch on top, No. 107 South Fortieth st., 8x14.

J. Quigley, No. 1517 North Front st., two-story house, Amber st., near Butler, 17x40; also, two-story back building, Savery st., near Belgrade, 14x14.

Wendell & Smith, No. 1430 South Penn Square, two-story house, Thirteenth st , near Ellsworth, 16x42.

W. F. Albrecht, Twenty-ninth and York sts., three story house, Seventh st., above Poplar, 20x70.

J. Miller & Bro., No. 318 North Thirteenth st., new front, No. 1103 Vine st., 16 feet.

J. Doak, No. 2338 East Cumberland st., alter factory, Aramingo st., near Cedar, to two three-story houses, 18x0.

G. McNichol & Son, No. 217 Pear st., alterations and additions to No. 629 N. Market st., 21x132.

A. F. Haines, No. 236 South Twenty-first st., division wall, 40 feet.

Kister & Orem, No. 129 South Seventh st., front and interior alterations, No. 1101 Arch st.; also, two-story back building and front alterations, No. 130 Arch st., 20x30.

J. Little & Son, No. 718 South Eleventh st., two-story stable and carriage-house, Wynkoop st., above Thirteenth, 18x10.

G. J. Wolf, Alleghany ave., Gaul st., two-story church, Alleghany ave., near Gaul st., 56x58.

G. Laycock, No. 917 Walnut st., two two-story houses, Elmwood ave., above Sixty-third st., 16x58.

J. L. Payne, No. 605 Filbert st., three-story back building, No. 1610 North Eighteenth st., 10x8.

R. McClellan, six two-story houses, Boline st., above Dauphin and two-story factory, America st., above Dauphin, 13.8x25 and 88x75.

W. Douglass, No. 320 North Sixty-third st., two-story house, Sixty-third-and-a-half st., above Vine, 16x38.

Daniel Neveling, No. 2506 Mascher st., 2-story brick back building, Clearfield st., near Kensington ave., 14x12.

Haibach & Auchter, Twenty-sixth and Thompson sts., 2-story brick stable, Cambridge st., between Twenty-seventh and Twenty-eight sts., 16x20; also 2-story brick ice-house, 16x50.

William Steele & Son, No. 2141 Howard st., five 2-story brick dwellings, Front st., between Somerset and Cambria, four 14x39, one 16x39; also, two 2-story brick dwellings, Emerald st., betwen Venango and Erie, 14x40.

Thomas A. Kershaw, No. 2227 Venango st., two 3-story stone and brick dwellings, Ontario st., between Twenty-first and Twenty-second st., 17x56.

Henry Kletze, No. 1624 North Eleventh st., one 3-story dwelling and stable. No. 1624 Mervine st., 16x40.

H. M. Martin. No. 521 Diamond st., 1-story kitchen, No. 2122 Hancock st., 14x10.

R. Q. Gibbon, No. 1706 De Lancey place, 5-story stone and iron building, No. 230 South Third st., 21x117.

Joseph Lente, Sr., No. 2220 Frankford ave., additions to No. 2538 Kensington ave., 15x27.

John T. Bracken, Sixty-fourth st., below Hamilton, 2-story brick dwelling and store, Sixty-fourth and Hamilton sts., 18x50.

Flood & Burton, No. 2218 Cedar st., seven 2-story houses, Sepvia st., between Huntingdon st., and Lehigh ave., 12x36.

George W. Baxter, No. 121 Wister st., Germantown, 2-story brick shop, Wakefield st., between Wister and Jefferson sts., 21x28.

Edmund Behr, No. 611 Gray's Ferry road, 8x12.

Samuel H. Brown, No. 1815 East York st., 2-story brick store and dwelling, Frankford ave., between Hull and Ann sts., 18x45.

Christian Kurtz, No. 966 Lawrence st., 1-story brick blacksmith-shop, Frankford ave., between Jefferson and Oxford sts., 14x28.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—The late Gustavus Remak, President of the Fairmount Park Commission, left $100,000.

BOOKS BOUGHT.

If you have a large library or a small parcel of books you do not want, send us your address and we will call and examine them. We are always prepared to buy and pay the cash at once, whether it amounts to five or five thousand dollars

LEARY'S OLD BOOK STORE
No. 9 S. Ninth Street,
FIRST STORE BELOW MARKET.

First Use---Then Beauty.

Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading. It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. We repeat, we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $3 up, and BOOTS AND SHOES FOR LADIES from $2 50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and attentive reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often, in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.

If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, in order that they may be exchanged. Repairing of all kinds at moderate prices.

THE DAY SEWED SHOE MFG. CO.
Under the management of W. W. APSLEY.
No. 23 NORTH EIGHTH STREET
PHILADELPHIA.

GOLD AND SILVER BOUGHT.
Jewelry, Silverware, Watches broken, unused, out of style. Money Paid at once.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the *Works are under contract with us* to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under *this Brand or a Private Brand.*

PHILADELPHIA, NEW YORK, CHICAGO. **MERCHANT & CO.**

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 41. PHILADELPHIA, MONDAY, OCTOBER 18, 1886. PRICE 15 CENTS

Items of News.

—The workmen who went on strike at Disston's mill have returned.

—The cohoes manufacturers demand that their workmen withdraw from the Knights of Labor.

—The three mill tax cases will be argued before the Supreme Court during the first week in November.

—The personal estate of John D. Taylor, late Treasurer of the Pennsylvania Railroad Company, is appraised at $75,658.10

—The personal estate of the late Moro Phillips is appraised at $823,897.21; Henry Carkle, $40,081.65, and Sarah Greenwood, $38,795.

—The Carter's Protective Union, are agitating for the abolishment of the time book system. They ask for a check for each load hauled.

—It is said that experiments have proved that green oak posts will last longer in the ground that those from the same variety of seasoned timber.

—The citizens municipal association is keeping its membership fully up and are looking after the city's interest with an earnestness that is disquieting to dishonest contractors.

—The Chicago Master Plumbers held a meeting last week to decide on the question of eligibility to membership. A good many applicants have been catechised as to their practical knowledge of the trade. The difficulty usually is to induce all the members of any given trade to come in.

The Saturday half holiday movement has achieved great success and there are on the rolls over 10,000 names of persons who believe in the purpose it embodies. A great deal of money has been expended and there seems to be no difficulty in obtaining all that is needed for urgent expenses.

—The granolithic pavement is being now laid in the yard of the Public Buildings. The Building trades council gave a reception at the Boundbrook Hotel, at Eighth and Spring Garden streets, to the representatives of all interested trades. Mr. J. L. Duffy presided. The affair was a very enjoyable one and broke up at a late hour.

—The soundness of lumber may be ascertained by placing the ear close to one end of the log, while another person delivers a succession of smart blows with a hammer or mallet upon the opposite end, when a continuance of the vibration will indicate to an experienced ear even the degree of soundness. If only a dull thud meets the ear, the listener may be certain that unsoundness exists.

—Judge Miller recently decided a case in the New York court of appeals, in which he held that if the owner of a building employs a mechanic to make repairs upon the same with no specific arraugement as to terms and conditions, such employment is in the nature of an independent contract, which imposes upon the employe the responsibility incurred by the negligence of himself or those who are aiding him.

—There is a federation of English architects which is accomplishing great good in the profession. In 1881 there were 8013 architects in the United Kingdon. The number has considerably increased since that time. A proposition has been made to unite all branches of the architectural profession and a meeting will shortly be held to further that idea. The number of civil engineers in the United Kingdom is placed at 8200.

—Mr. James McCrea, of the Pennsylvania Company, is quoted in the Pittsburg *Times* as follows: "I never knew such a scarcity of cars as there is now. We have ordered 6,000 new cars. Our shops at Allegheny, Fort Wayne, Chicago are utterly unable to supply the demand, and we have placed orders with every manufacturer who was not already crowded with orders. All the manufacturers are behind with their orders."

—On Tuesday last Tax Beceiver Hunter paid over to the city treasury $9,763.94, taxes of 1886; $405.95, interest in full on amount of poll-tax commissions on special deposit, and $20.25, search fees. $4426.70, fees for September, by Prothonotary Mann; $264.94, by House of Correction managers; $130.06, by the City Solicitor; $105.91, by the Health Officer; $102.25, by surveys; $60.90, from boiler inspections, and $51.25, from the County Prison.

—A real estate dealer in Albany, N. Y., was asked the other day why so many houses were vacant in that city. His reply, as given in the *Argus*, was: "It is largely on account of the local labor troubles; many men out of work are unable to retain the houses they had engaged during more prosperous seasons, and many in search of work are removing from the city. In consequence there is an unusual number of houses that display the little telltale card, 'To Let,' or, more unfornate for some, 'For Sale.'"

—A material called cork stone is extensively used for building purposes in Germany and Belgium. Patents were secured for its manufacture in 1880. It is claimed for it that it is a non-conductor of heat, cold and sound. The base of this material consists of pieces of waste cork, such as, in many trades, are thrown out unfit for use. These pieces, cut down to about the size of a pea, are mixed with a cement, consisting of mortar and clay, until each single particle is thoroughly coated with the cement, after which they are pressed into proper shape and dried. From this manipulation results a porous body, resembling in appearance the so-called Rhenish alluvial stone, but of much less specific weight, that of cork brick amounting at most to 0 30 or 0 35.

—As a new article of manufacture, a bar or blade for the rolls of paper-pulp machines has been patented by Christian Anderson, of Appleton, Wis. It consists of a blade formed of a flat bar of steel of uniform thickness, and having upon one of its sides, near one edge thereof, indentations, which produce upon its opposite side a series of protuberances of uniform size. The latter are adapted to enter and fill the dovetail of a groove of uniform width in the roll, and to be retained therein by the compression of the sides and bottom of said grooves upon the protuberances, the plane surface and the bottom of the blade.

—Philadelphia now has double the number of dwelling-houses of any other city of its size in the world. This marvellous increase in its homesteads is due to its co-operative building associations, numbering over four hundred. They have been tried for nearly fifty years, and have proved such valuable forces in promoting industry, economy, sobriety, thrift and prosperity that the State encourages them by exempting all their stock and mortgages from taxation. Though the holdings of these associations exceed $50,000,000, they are managed by workingmen at little expense, and are always open to public scrutiny. Failures have been very rare, less than in any other class of financial associations. The worst of those closed during the panic of 1873 paid ninety-three cents on the dollar. These associations, so unique, tried so long and so successfully, are a model for the workingmen of the country, certainly in large manufacturing centers.—*B. F. Northrop.*

—Councils Survey Committee transacted considerable business on last Tuesday. Some citizens of the 8th ward objected to paying for a sewer on Currant Alley, because of its improper construction. Bills to the amount of $43,695.35 were approved. The contract for the construction of a sewer on Fifteenth street, York to Cumberland, was awarded to John M. Mack at $2.50 per linear foot. The contract for a sewer extending from Broad to Fifteenth and from Cumberland street to Lehigh avenue was awarded to David Ryan, $2 23 per linear foot. Chief Engineer Smedley stated that the Board of Surveyors had recently visited the Aramingo Canal, with a view to abating the existing nuisance. A plan embodying this subject, would, he said, be presented at an early day. Benjamin Jacobs was appointed inspector of masonry at the Market street bridge. The following appointments made by the Chief Engineer were approved by the committee: James J. Craig, draughtsman of the Registry Bureau; Joseph R. Scott, rodsman; Edgar M. Smedley, chainman, and John G. Moore, sewer inspector, all the above appointments being made to fill vacancies.

PHILADELPHIA, MONDAY, OCT. 18, 1886.

BUILDERS are taking advantage of the fine weather and are pushing things.

THE Broadway people are bitterly fighting the arcade road. They also fought the surface line cars. They were not in favor of the elevated railroad system, yet for all that, improvements have come one after the other, and they will come in spite of their opposition.

A NEW YORKER while sitting in a barbers chair, in a shop on Franklin street above Wood, one day last week, said that the noise and annoyance caused by the cable running past the door was far greater than that on any New York elevated road, inasmuch as the cable racket was continuous, whereas the elevated caused a rumble for a second then the noise was gone.

THE difficulties in the building trades in New York City, have resulted in more serious embarrassments than we at first anticipated. A good many architects and builders have their work hanging fire amounting to from $25,000 to $100,000 in a single job. Arrangements are being made to establish journeymen's co-operative shops. The architects expect the trouble to be of short duration.

AN unusually large number of building patents are being taken out. They cover everything wherein improvement is possible. Among the latest are patents for ceiling and floor fire proof. Hydraulic cement, chimney cap, door check, elevator door, door fastener and door hanger, machine for forming metallic roofing, roofing tile plate, door check and buffer, gutter bending device, adjustable scaffold, transom lifter, latch patents, window blind, door hangers, devices for adjusting blind slats, and many others of a similar character.

AT a meeting of the Fire Commissioners on Tuesday last, at 1328 Race street, the committee on real estate and leases reported the complaint of the engine house at Bridesburg, and recommended that the quarters of engine house, number thirteen, be released for a period of ten years at $1,600 per annum. It was decided to ask councils for a small fire engine and truck. Several cases of negligence were reported to the Board of Fire Escapes in reference to non-compliance with the law, and a resolution was passed declaring that all persons notified to erect fire escapes must comply with the law.

IN cases where large mills or factories are burned, and the lives of operatives are lost, owing to inadequate fire-escapes, as was the case in the recent New York fire, the owners should be placed on trial for manslaughter, and if found guilty should be punished as murderers or other malefactors.

It is certainly a curious code of laws that will hold the Chicago anarchists guilty of murder and permit a mill owner who deliberately and entirely ignores the law and sacrifices innocent and helpless women, to escape scot free.

Who's looking after the Philadelphia mill owners and the fire-escapes?

IT is a question for capitalists to consider in these days, when real estate is advancing in value and profitable avenues, for the investment of capital are getting scarce, whether it would not be a good way to turn an honest penny by buying up some of our old tumble down tenements in our thickly populated city, and either erect fine manufactories in their place or put up buildings for some other purpose. There is certainly a good deal of property in the thickly built up portion of Philadelphia, which is a disgrace to this century and its civilization. It might be safely weeded out for more than merely sanitary reasons, and occupied to better advantage by large structures, which are certainly needed for business purposes. Owners take no care whatever of these old properties but let them go to ruin, the miserable occupants live there through necessity and because of convenience to work.

OUR New York correspondent writes us that the past week's business in real estate, has been a very active one. A large number of sales were made of real estate in various portions of the city ranging from $25,000 up to $250,000. There has been a very great demand for valuable residence property between Madison and Fifth avenues, above Fifty-ninth street. The fluctuation of property in that city, may be shown by the sale of thirty-two lots which thirty years ago sold for $50,000, but the owner subsequently refused $1,350,000 from Mr. Vanderbilt. Nine lots on the west side of Madison avenue extending from Seventy-ninth to Eightieth streets, sold for $2,750,000. Real estate dealers are looking around very sharply for chances to secure property on reasonable terms for building purposes. The builders are still quite crowded with work, and expect to have very little spare time until after December the first. Bricks have advanced in New York from 12½ to 37½ cents per thousand. The weather is favorable for out door work, and there is no dullness anywhere. Export clearances for the past week of lumber were two million feet.

THE new silver certificate money coming out will be popular. The one and two dollar greenbacks will disappear and be supplanted by silver certificates representing $90,000,000 unused silver dollars in the treasury. The certificates, however, will run from $1 to $10. This influx of currency is urgently needed. It will have a stimulating effect to all industries. Currency may be compared to blood, a deficiency of it leaves the patient weak. Financiers have been making a mistake in supposing that there was danger of two much money. The fact is, people have been kept idle and industries depressed because of too little money to stimulate enterprises and maintain industrial activity. What is wanted, is a greater supply of money for the ordinary necessities of the people. The large paper issues from $10 to $20, ought to be withdrawn from circulation, and the six hundred and forty million dollars in gold, and four hundred million dollars of silver should be put into circulation through the medium of gold and silver certificates. European countries have more money in circulation per capita than we. France with thirty-eight millions, has 600,000,000 in five franc pieces, while we with 60,000,000 population have much less.

IT is said that Mr. McManes, of the Gas Trust, openly boasted before the vote was taken that the Elevated Railroad Bill would be killed, will he kindly inform the readers of the REAL ESTATE RECORD how he knew? It is certain that the combined strength of the Traction Company and other passenger railroad companies together with the interested steam railway companies was brought

to bear against it. The fact is our councilmanic brethren are resolving themselves into a lot of puppets and in important matters involving the prosperity and development of the city and the comfort and advantages of our citizens their conclases are little better than a second class marionette show, the masters dexteriously manipulate the wires and the poor things dance to all sorts of music. A little healthy political extermination must be done before this inculus of misrepresentation and misrule can be eradicated. New York is pushing its capital and enterprises way up into Westchester county, not because there is any more purity in that great city, but because their boodle alderman are enterprising to say the least. A glance at the crowded street cars at six o'clock in the evening more eloqently presents the necessity for an elevated railroad than any thing that can be said or written in its favor.

To the Editor of the REAL ESTATE RECORD.

Philadelphia, October 12, 1886.

One of your subscribers has noticed with pleasure, (I think, in last week's number), a suggestion to place upon all notices and advertisements, "To Let" the price; do please follow this subject up; I had the renting and collections of an estate years ago, I always did just that way, and it saved then as it would now save an immense amount of useless labor; only yesterday I saw a bill "For Sale," on a property, which I thought might suit me as an investment, no price of course, I traveled about five miles to make inquiry around at office as directed, the price was so ridiculously fabulous, that I turned upon my heels. I had all that trouble and expense, two ferriages, four car-fares, &c., to bother the agent and myself. Philadelphia is a grand city, I have resided many years in other countries, and I can safely say that it surpasses all the cities I have ever been in either as a residence or for manufacturing and business purposes, but there is plenty of room for improvements. She has made much improvement. A great deal of the slow movement has buffed off, still our people are hard to move.

I see yesterday's papers mention somebody wishes to apply filtering apparatus to give us perfectly pure water; in the year 1843, I proposed the same thing to their Water Works Engineer, and he pooh-hooed me and the idea. I forget how many years ago a gentleman; then a large contractor and builder endeavored to tunnel under Market street, I tried I believe, to get a charter, I think his name was Moxie or Moxie, he and his idea was knocked out, to-day the tunneling of the city is again spoken of; for years I worked to down the iron railings, success is visible but oh how shamefully. Washington Square is policed, disgracefully peopled by drunken vagrants, who of course keep away the children and their parents.

Yours respectfully,
B. O. C.

The above terse communication is from an old and esteemed friend of the REAL ESTATE RECORD, whose many years of usefulness and advanced age, gives him the right to chide our citizens for their adherence to old fogyisms. Forty-three years ago he was in active work, and he was not a young man then, to-day his heart beats as warmly and his brain is filled with as kindly thoughts for old Philadelphia as when he wore the harness, and manfully filled his place in the front rank of Philadelphia's busy men.

ONE of the most important questions that can occupy the minds of the builder and investor, is: the proper housing of the masses in our great cities. Too little attention has been given to this important question. The people have been allowed to house themselves as best they could. In Philadelphia, there are six tenants on the average to each house; in Brooklyn, nine; in Boston, eight and one-half; in St. Louis, eight; in Baltimore, six and one-half; in Chicago, eight and one-half. While New York has sixteen and one-half persons on an average to each building, while the 26,000 tenements and flats accommodate from twenty-five to fifty persons. Sanitary laws have not been enforced because of the lack of energy of public officials. London has nearly four fold the inhabitants it had a century ago. Paris three times as many. Berlin has increased its population five times in the last fourteen years. While several European countries have doubled their population within thirty years. Philadelphia has increased 2000 per cent. within eighty-five years. In London, in 1882, four million persons occupied 422 thousand houses or about six persons to each house. In Paris, the average number of occupants to a house is twenty-nine. Berlin fifty-six. These facts and many others show that rigid inspectation from house to house of dwellings, halls and tenements, should be followed up. In fifty-three English towns and cities, inspections are made from once in three months to once in two years. In New York City it is impossible to inspect yearly. An increase of the inspection force is loudly called for. It is recommended in Chicago that spring inspections should be made in order to remedy the defects arising out of winter carelessness.

THE thieving propensities of people nowa-days are something wonderful, embezzlements of staggering proportions occur almost daily, business men arise in the morning to find that some trusted employee has robbed him and skipped, a corporation is suddenly ruined by some sycophantic psalm singing official whose only ways have advanced him over his associates.

Men are elected to council on reform platforms, with a view of securing more honest legislation and better government, and while the plaudits of their fellow citizens in response to their earnest promises are still ringing in their ears, they join hands with the plundering gangs and under the hope of gain they advocate measures that are intended to rob the city of millions and with the sophistry of the devil they try to reason out the advantages to be gained.

If the Gas works of this city are worth one million dollars per year to one man or a body of men they are worth if properly managed double that sum to the city of Philadelphia.

The President of the Gas Trust, Mr. Salter in his statement of the Profit and Loss of the Gas Works shows that a profit was earned in 1884 of $814,132 27
In 1885, 551,315.72

Total profit for '84 & '85 $1,365,447,99

Add to this Gas for the departments and for Public Lamps at the prices the syndicate propose to charge and we have
for 1884, 218,274.77
for 1885, 235,177.00

making a total profit of $1,818,899.76

or over $900,000 per year and yet as a business proposition some of our City Fathers think they are honest in leasing the works for a million dollars per year. If it is done, the citizens of this city ought to express their indignation by tarring and feathering every member of councils who votes in favor of it and on rails riding them out of the city they so shamefully disgrace.

THE question of leasing the Gas Works is now up before the public, and will not be disposed of until the question is determined who shall supply the city with gas hereafter. The proposition is to spend three million dollars in improving the works, and pay the city a rental of a million a year. The objective point of the syndicate seeking the control of the Gas Works is to get a good bargain out of the city. Gas can be made and delivered at from 65 to 75 cents per thousand. To charge $1.50 would leave the syndicate $1,500,000 profit on the present supply of gas. The city would receive a million of this and the syndicate five hundred thousand. The syndicate would profit by the increase in population. Those who have figured the matter up closely are able to figure out about a million dollars profit to the owners at the end of five years. The report submitted by the committee of ten to consider the whole question have reported these and some other facts to the citizens' committee. It is addressed to Mr. Bardsley of the Councils' Finance Committee. The committee make these interesting statements as the result of their inquiry: In the present state of gas manufacture $1.50 per 1,000 is too high a price. In New York the maximum price is fixed by law at $1.25 and no more than that is asked in Washington. In Baltimore it is even less, but there are competing companies there and the comparison would not be fair. At $1.25 the New York gas companies earn a fair interest on capital actually invested, besides paying about $400,000 per annum in taxes, from which the lessees would be exempt.

As in a lease the city furnishes the plant, a very moderate capital is requisite to make and distribute gas—not over $600,000 or $700,000, irrespective of what may be required to improve the condition of the works. We feel confident that capitalists of undoubted standing could be found who would take a twenty-five years' lease on a royalty of fifty cents per 1,000 feet of gas sold, agreeing to furnish eighteen candle-power gas, to do the public lighting on the terms of the ordinance before you, to abandon to the city at the end of the lease all improvements and extensions without charge, except holders and mains, and to sell gas at the prices named above, based on the present cost of materials and labor, with a further agreement, similar to what has long been the established practice in England, to make a reduction on those prices for every increase of dividend above 7 per cent. per annum on capital actually paid in, with allowance for a sinking fund to redeem at the end of the lease the capital originally invested in rendering the works efficient. We regard it as possible that even better terms than these could be obtained, but these will serve as a basis for your consideration.

The Pennsylvania law relating to the Board of Building Inspectors was approved May 7th 1855 over 31 years ago. Supplemental acts were passed in that year and in 1857, 1864, 1867 and 1870. Various ordinances have been passed from time to time of a prohibiting and defining character. It is evident from the patchwork legislation that has been done both at Harsisburg and at Philadelphia that there is need of a revision of the laws governing the erection of buildings. Western cities are far ahead of us in this respect. Our permits call simply for the name of the owner of the projects building, the size of the building, size of walls, and location. Even this meagre information is given with the greatest reluctance in many cases. It is Philadelphia style all through. From the grudging way in which a great many applicants for permits give information it would appear that they felt it to be a criminal act to build a house and were afraid at being caught at it. Certain it is that they enter that Building Inspectors office with fear and trembling and take a long breath of relief when they escape. In order to show just how far behind the age we are we will look in detail at the contemplated legislation in the state of Illinois. The committee on Sanitary legislation of the Illinois State Association of Architects at a recent meeting prepared an act for the regulation and inspection of the sanitary construction of buildings. It provides that a blank entitled description of building shall be filled out, describing the intended building with its plumbing and sewerage fixtures and that no permit shall be granted until this is done. The provision which this committee have made are so valuable that we make room for the entire report and commend it to the attention of our local architects, builders, board of Health, and the general public which are interested in the proper sanitary regulations.

There shall be no privy pits on any lot adjacent to a street or alley wherein there is a public sewer, and all present pits of the kind shall be cleaned out and abandoned and contents removed off the premises within three months from notice being given to the effect by the officer of the department of health.

The boss-plumber executing the plumbing work or causing its execution in any building—other than mere repairs—shall, before in any way concealing such work, be this through his own agency or that of other mechanics or operatives working upon said building, notify in writing the officer or department of health to this effect that the said plumbing work there and then is in a state of completion and allow such officers or department a full day's time for proper inspection of and officially passing upon such said work.

A habitable room in any building shall have one or more windows of dimensions not less than one-tenth of the area of floor space of each room, and the open space of light shaft to be established for such windows or window shall have an area of not less than fifteen superficial feet for a building three or less stories in height with an addition of five superficial feet for each additional story, and such open spaces shall be part of he lot upon which the building is to be rected.

Skylight coverings of lightshafts shall be so constructed as to allow admittance of fresh air into the shaft, and openings for this effect shall be not less than one twentieth of the area of such light shaft.

Habitable rooms henceforth to be arranged or newly entered shall have an average height of not less than eight feet.

The hallway in any building shall be lighted and ventilated, be it directly from the open air or indirectly from a skylight.

A water-closet room, or bath-room with water.closet shall have ventilation through an express and independent air shaft, the area of which shall not be less than one superficial foot. Said shaft to extend not less than two feet above the roof and be arranged for admission air. Each bath room must be lighted by a window opening to a separate light shaft or to the outside air, or by a French window off a general light shaft.

No alterations, additions or converting to a different purpose, which will change or alter any or all of the sanitary conditions or arrangements in any building, shall be made, except upon the express written approval of the proper officer of the said department of health; nor shall any additional structure be erected upon any lot on which there is already a building, except upon such approval and a special written permit.

Sewerage drains shall be laid with a uniform decline of not less than one-tenth of an inch to the foot. There shall be a trap and adjacent air inlet in connection with the drainage system of each building, located without such building, and the entire sewerage systems for any building shall be so constructed as to allow ready and complete construction when completed.

Earthen sewage drains shall be laid upon a foundation expressly prepared for the same, and their joints shall be made absolutely tight and permanent.

Metal sewage drains and soil pipes, if not enameled, or not of non-corrosive material, shall be covered inside and outside with a coat of asphaltum. Their joints and their connections with any tile drain shall be made absolutely tight, in manner as prescribed by the officer or department of health.

Every soil and waste pipe shall be made of durable and permanent material, satisfactory to the officer or department of health, and each pipe shall be vertically extended, in the full size, through the roof of building to a point at least two feet beyond the higher surface of same.

No chimney flue or water-leader pipe shall be used for conveyance of exhaust steam or for ventilating, soil or waste pipe.

All sewerage plumbing work shall be executed in a thorough manner, satisfactory to the officer or department of health, whose privileges it shall be to make proper tests as to the quality of such work.

There shall be a trap to every water-closet, sink, and all other plumber's fixtures in building.

Overflow guards to any fixture, and wastepipes to refrigerators, shall have independent wastepipes, which have no connection with the sewerage system.

No lead pipe shall he connected with an iron pipe except by means of a metallic ferrule or other means expressly approved by the officer or department of health.

Any duct admitting fresh air to an apparatus intended for warming shall not be concealed below the lowest floor of the building.

Any duly authorized officer of the said department of health shall, so far as may be necessary for the performance of his or their respective duties, have the right to enter any building or premises in such cities or towns.

Any person violating any of the provisions of this act shall, upon conviction before a court of justice, be fined in a sum of money not less than $250 nor more than $500.

Any person thus convicted and fined, as specified under Sec. 22, shall begin to rectify the said violations of this act within two days from conviction, and push such work with energy, so as to have it completed within a certain time to be set by the officer or department of health, and in default thereof become again and again subject to another fine, and still another, in accordance with said section 22.

Said court of justice is hereby still further authorized to issue, upon due application of any officer of a department of health, an injunction against the use or occupation of any building or structure which is erected or altered, maintained or used in violation of this act.

This act shall take effect immediately after its passage.

Any and all legal provisions being in conflict with this act shall be null and void.

Our recent plumbing relations go a very long distance in this direction, but the Chicago architects and plumbers are entitled to a little more credit, we think, than ours for the thoroughness with which they have mastered the subject. One thing is evident, and that is our present system of taking permits can be improved. Too little information is required and much more is needed. We commend this feature of the case to our coming real estate exchange.

In the iron trade Mr. B. G. Clarke, the head of the Thomia Iron Company in New York, says: "We are the largest makers of iron in the United States, but we have none to sell. We sold out some time ago, and cannot furnish iron fast enough. We have been compelled to import blooms to make steel rails, because we could not furnish the material ourselves. I have been in the iron business for thirty-five years, and I never knew the trade to be in such excellent condition at this time of the year but once or twice before. The mills are taxed to their utmost to fill orders. A number of them cannot begin to keep up with the demand. There has been a great demand for steel rails and iron pipe, and that has kept the mills going and given employment to thousands of workmen. This branch of the business is phenomenal, and so far as my observation goes I think there is a steady and even an unusully large demand for all kinds of iron for different manufactures, both large and small. The best of it is that the trade is not only good now, but is bound to stay good. When you find the iron trade active you will find all branches of business looking up. Iron is an index of the general condition of trade.

One of the simplest methods of accomplishing the object is the use of whitewash. Wood can be rendered practically fire proof by first drying it thoroughly and then coating it with common whitewash. The coat of whitewash shells off, but it is still a difficult matter to burn wood which has been coated with whiting or even limewash. A mixture of borax and sulphate of magnesia is also recommended. To prepare this, use 3 pounds of borax and 2½ pounds of sulphate of magnesia, with 20 pounds of water. The action of this mixture depends on the formation of a borate of magnesia insoluble in water, hot or cold, which surrounds an impregnates the fibers of the wood, and thus renders the development of the combustible gases and the spread of flame very difficult. A mixture of sulphate of ammonium and sulphate of lime or gypsum is also applied. The action

of this mixture depends on an incrustation of fibres which prevents the spreading of fire, and, on the other hand, extinguishes flames by the volatilization of the salt of ammonium at a high temperature. Take 1 pound of liquid ammonia and 2 pounds of sulphate of lime. A single coat of this concentrated solution is sufficient. The wood is not rendered absolutely incombustle, but it is not easy to light and ceases to burn when the action of foreign inflammable substances comes to an end.

RELATIVE STENGTH OF WET AND DRY TIMBER.—In reply to a statement by the *American Miller*, that "wet timber is not as strong as dry, in some cases it has not half the strength of dry," a correspondent of that paper writes as follows: "In September, 1876, the Lanesboro mills, Lanesboro, Minn., burned, and that fall we rebuilt them and began making flour the next March. We used sawed pine (taken out of the Mississippi River), for joists 3″ x 12″, 12′ long, and sized them, laying them on top of the girders, to get their full strength, and then used ⅞-match flooring. The joists were placed 12 inches from centre to centre, leaving 9 inches between them. In the fall of 1877 we piled wheat on the floor 26 feet deep in the bins, and the joists, yet wet and green, only sagged a trifle, and carried the immense weight safely. Two years later the same joists were dry, from the heat of our very large stove. We loaded the floor with 24 feet of wheat, and six joists broke off nearly square in the middle, and others were cracked. In the first instance the bins held 360 tons of wheat while the joists under them were green. When the joists were dry 300 tons or less broke several of them. This shows that green pine is stronger than dry pine, as the wood becomes brash or brittle by drying, and is not as strong as when green. This is caused by the sap drying and leaving only solid matter in the capillary tubes, and they cannot move one on another, while if the timber is green the tubes are full of water, and can bend or move on one another. I know of but two kinds of wood that are stronger dry than green, and they are maple and white oak."

SO MANY mechanics are deficient in understanding the quality of good work described in specifications, that unless they can be referred to some particular job done, they have no definite knowledge of what is wanted. It is therefore urgently necessary for architects to be very precise in explanation of all matters relating to the minute description of the class of work wanted, and to state the height, depth, and length of stones in each course.

In building a house, one of the first and most important considerations are the foundation walls, for on them rests the entire structure, and on their stability the safety of the house is dependent. Circumstances regulate the thickness and mode of construction, but for an ordinary structure, an 18 inch wall is deemed sufficient, All walls should be provided with footings, which ought to consist of good large rectangular stones, full breadth of walls if obtainable, otherwise every alternate stone should be the whole width. Where the stones are not square, the largest surface should be laid horizontal. The quality of stone to be used should be chosen and quarried, and left to season before put in walls and laid in their natural beds, that is, in the same position they occupied in the quarry.

As building in stone is more difficult, and requires more attention than brick, owing to the fact that so many irregular forms are to be dealt with, it is necessary that the workman should be very precise in his judgement, and that he should give particular attention to the bed of the stone. By all means avoid making the beds hollow or concave, as the stone is sure to break off at the joint when they have to bear much pressure. Walls should be built to a line on *both* sides and bounded as may be permitted by the style of work adopted for the face. It is usually thought that it makes little or no difference whether the joints between stones are made carefully or not—of course the quality of work contemplated would to a great degree regulate this matter—but usually it is advisable to have them just large enough to allow a good bed of mortar between. The stones should be thoroughly wetted before the mortar is applied, so as to adhere to each other.

A fault too common in masonry, is that of bringing a wall up level by the use of spalls, and then placing large stones on top; or to level up unequal places on the stone with spalls. Another very objectionable feature and one which should be guarded against is, that where masonry is hidden by an embankment, little attention is given to whether or not the walls are built to a line but the stones are thrown in and slushed over with mortar. It seems almost useless to assure our readers that a wall built in this manner is sure to result in a injury to the building. To obviate this, we suggest that the excavations be made about 12 inches wider than the building.

An Important Move.

The Master Builders' Association of Boston have conferred with the real estate owners and architects of that city, and adopted a code of working principles for a better dealing with labor and with organizations. The association invites all contractors in New England to join with them and co-operate to make their effort a success. They bind themselves to mutual support as against the dictations of trades-unions. As the matter is one of very great importance not only to the contractors, builders and architects of Boston and New England, but everywhere, we will occupy space enough in this issue to set forth their methods of work in detail.

ARTICLE 1.—Change in method of payment for labor performed, beginning at a date not later than the 1st day of April, 1887, we will pay for all work performed by journeymen or laborers in our various trades, at a certain price per hour. This price per hour shall be a matter of agreement between the individual workman and the individual employer. This change is not intended to apply to work known as "piece work," or work "by the year."

ART. 2. Hours of labor.—In order to rationally test the question of whether ten hours per day is too long for men to labor, and whether a less number of hours can be accepted as the measure of a day's labor without seriously retarding business enterprises, we will begin on the 1st day of April, 1877, to work nine hours in each working day, beginning at 7 o'clock, A. M., and ending at 5 o'clock, P. M., with the usual hour at noon for dinner, under payment by the hour as set forth in Article No 1. All work done before 7 o'clock, A. M., and after 5 o'clock, P. M., to be paid for as overtime at such price as may be agreed upon by the workmen and employers. We will continue on this plan during the year 1887. If it is demonstrated that this change can be made without detriment to the interests of the workmen, or the owners, then the contractors will be satisfied, and if further reductions seem desirable they can be considered at the close of the year when this experiment shall have had a fair trial. If, however, there should be displayed a desire to disturb this trial by bringing on any general strike during the year 1887, then we shall feel at liberty to return at once to the old standard of ten hours.

ART. 3. Protecting clause in contracts, etc. —For the greater security of the contractor, we will demand the insertion of a clause in every building contract relieving the contractor from any forfeiture or demurrage on account of delays caused by strikes. This demand, we are assured by real estate owners and architects, will be cheerfully granted. In case of a general strike, those men who wish to work, and will work, will be kept employed as long as there is anything to be done, and will be protected in their employment, provided they do not aid and assist the strikers by contributing to their funds; but men who engage in the said strike will not be re-employed until the said strike is completely over, or until they, as individuals, are willing to go to work on the same terms as above stated. In event of a strike, of any one special branch throughout the city, the men who will continue at work in that special branch will be kept employed the same as in a general strike, and all other branches of building will be continued with such men as will not contribute to support the strike. When a point shall be reached upon any building or buildings where further progress is blocked because of the said strike in a special branch, then the contractors in that special branch shall not be pushed or forced by their co-contractors to complete their work, but the said buildings shall be allowed to remain incomplete till a reasonable and satisfactory settlement be reached.

ART. 4. Improper interference with business.—Certain workmen have of late very improperly interfered with the carrying on of work by striking or threatening to strike for the most trivial causes, as follows:

Because certain other workmen were employed.

Because certain workmen were not employed.

Because certain workmen were discharged.

Because certain stock was used or was not used.

Because more than a certain number of apprentices were taken on, and for other equally untenable reasons.

They have also intimidated certain fellow-workmen by threatening that they would prevent their getting employment by refusing to work with them unless they joined certain societies. Such practices we condemn as most unfair and intolerable, and we agree that in case any workmen interrupt and embarrass our operations by such procedure, we will promptly discharge them and notify our fellow-members of the discharge. We also agree that all conspirators shall be prosecuted to the extent of the law.

ART. 5. Arbitration.—It shall be, as it always has been, the recognized right of the group of workmen in the employment of any individual contractor in the building trades to demand and receive from their employer a hearing upon any grievance that may arise, or any changes that may be desired; and at this hearing they can elect to be heard through a spokesman chosen from their number, or by their individual voices; but no person outside of the employment of the said contractor will be allowed to represent them. If amicable ground of settlement is not reached through such hearing, then the grievances shall be left to arbitration—should the terms of such arbitration be mutually agreed upon by the employer and his workmen—in the same manner that other business disputes and complications may be settled.

—A new trial has been ordered by the New York Court of Appeals of the celebrated Dwight Insurance case. The suit was brought by the executors of Walton Dwight, of Binghampton, N. Y., for $250,000 against several Insurance Companies, who refused to pay, because it was alleged Dwight had committed suicide.

BUILDERS' ITEMS

Building and Real Estate Notes.

DRY bricks will absorb about one-fifteenth of their weight in water.

A SANITARY convention will be held at Big Rapids, Mich., November 18th and 19th, under the auspices of the State Board of Health.

THE Patent Soapstone finish which is used as a finish for walls and ceilings in lieu of hard or soft sand finish is meriting a good deal of notice.

THE Haines Street Methodist Church, Germantown, has leased a plot of ground 60x100 feet, on Haines street, near Stenton avenue, and will erect a Mission Church and School.

Norway pine, which until lately has been neglected by Michigan lumber in favor of the softer white pine, is coming into favor with railroad-car builders on account of its greater strength.

MAJOR JOHN STANTON, has purchased from C. Chadwick, a lot 60x100 feet, on the corner of Stenton avenue and Haines street, Germantown, and will erect a two-story mansand roof cottage, 27x40 feet. Contracts not yet made.

A COMMITTEE was appointed at the last meeting of the San Francisco Architects to confer with the master builders in regard to getting up a building contract that shall be alike, equitable and just, to both owner and contractor.

EXPERIMENTS are being made in Germany, with a composition of cork, sand and lime, molded into bricks, for the construction of light partition walls. It is said to exclude sound better than ordinary brick work, while being light, and a good non-conductor of heat.

THE Wells Glass Company have recently introduced a new style of embossing in their manufacturing of art glass. Ordinary stained glass has developed a taste for a finer manifestation of art, and this company has succeeded in winning the endorsement of very exacting architects and builders.

A LONDON builder was recently fined £5 for allowing a dwelling to be tenanted before a certificate had been granted showing that the house was fit for habitation. Another builder was fined forty shillings for the same offense. The defects related chiefly to the water supply, drainage and ventilation.

F. O. NORTON, of Weehawken, New Jersey, publishes some very strong recommendations in favor of the cement which he makes. The Engineer who has used 100,000 barrels of it in brick and stone mason work during the past eight years, says the results of tests many hundreds in number has been most regular and gratifying.

BY a recent ordinance passed in Chicago, neither cement nor mortar can be used in making connections of metal with the tile piping of drains, for the reason that these compositions are even more porous than brick. The authorities and the plumbers are in consultation as to the best methods to be used in making such connections.

SAMUEL BENNER the famous Ohio prophet has made one mistake in predicting the continous decline in iron, and stocks during this next year. It is very possible he may be right for the next year, but for this he has made a big mistake. We publish elsewhere, some statements of high authority to show that the present is the most prosperous in our industrial history

THE Courtright system of metal plate roofing is attracting a good deal of attention among builders. Contraction and expansion are perfectly provided for in each sheet. The ridge coping is put on first, each plate being securely nailed to the sheet. A copper roof under this system is unsurpassed for beauty and durability. It is impervious to snow or wind or any other kind of weather.

STEEL nails are rapidly working their way to the front. Of the 6,676,815 kegs of all kinds of cut nails produced in the United States in 1885, 1,825,027 kegs, or 27 per cent. were of steel. In 1884 only 5 per cent. of the entire production was composed of steel nails. The Wheeling and Central Pennsylvania districts still continue to manufacture over 40 per cent. of the entire production of the country.

SERPENTINE marble has come gradually into use. The Green Serpentine Marble Company of Hartford County, Maryland, have been very active in their efforts to bring this stone to the attention of builders. It has carbonate of magnesia in such quantities, and combination as to make it a good out-of-door stone. It does not crumble in cutting, and had no superior for fine work finished and durability. Its crombling strength per square inch is 32,000 pounds.

A COMPANY has just been organized for the purpose of utilizing the immense water power of the Niagara river. We learn that the scheme contemplates the construction of a tunnel from the water below the falls, 200 feet below the high bank of the river, extending through the rock to the Upper Niagara river, to a point about one mile above the falls, where a head of 120 feet is obtained. Sufficient land has been secured along the river and on the line of the proposed tunnel, affording facilities for approach by rail and water, to accommodate 238 miles of 500 horse-power each, or 119,000 horsepower in all, the estimated capacity of the proposed tunnel. This is said to be a power largely in excess of the combined waterpower in use at Holyoke, Lowell, Minneapolis, Cohoes, Lewiston and Lawrence.

THE *Mississippi Valley Lumberman*, in discussing the recent advance in lumber, says:

"It is a matter of general knowledge among dealers that for the last year at least the lumber produced in the Northwest has been marketed at a price which hardly returned a new dollar for an old one, as many bad failures attest. The growing scarcity of pine timber and the consequent increase in the cost of production seems to have been lost sight of by the fraternity of the three great lumber states of the Northwest, and a general scramble has ensued in which the entire mob have sacrificed millions of dollars. Legitimate competition has degenerated into beastly throat-cutting. Chicago middle men, wanting the earth, have tried to drive the valley men out of house, home and mills at the expense of the Michigan manufacturers, and a regular monkey and parrot matinee has been held. All hands are now nearly sick of the show and Providence seem to smile on evidence of returning reason. Some 300,000,000 feet of lumber has been burned up since January 1st, and at least 800,000,000 feet of logs hung up which were designed for manufacture this year. Many mills have already been compelled to shut down and others must soon stop.

—$38,224.10 have been paid into the city treasury for poll tax receipts.

—Councilman Geo. B. Edwards voted against the elevated railroad on "general principles." The voters of the Twenty-second ward are not only mad clean through, but they propose to oppose his re-election on "general principles."

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ACKNOWLEDGMENT.

A magistrates certificate that the wife of the grantor was of full age, is not conclusive if she were in fact a minor; in such case, she can only ratify a mortgage whilst an infant, by a separate acknowledgment after attaining full age.

DEED.

Where a railroad is located through the property, held by a firm under a lease, a conveyance by one of the partners to the other of all the real and personal estate of the partnership, does not pass the grantee's proportion of the damages for the location of the railroad; it is a personal debt, and no part of the firm's assets.

If a deed be executed and delivered with a mistake as to the grantee, the title does not so pass, as to prevent a destruction of the deed and the execution of a new one according to contract.

EASEMENT.

If the owner of a lot of ground convey a portion of it to another which is drained by a sewer through the part retained by the grantor, and such drainage is essential to the enjoyment of the past conveyed, the right to the use of the sewer passes as an easement appurtenant to the property sold.

EXEMPTION.

Where real estate is sold under a judgment which is prior to a mortgage, the defendant cannot claim his exemption out of the proceeds of sale.

FRAUDULENT CONVEYANCE.

Creditors whose debts were contracted subsequently to a fraudulent conveyance, expressly on the faith of declarations both of the grantor and grantee that the former retained his interest in the property conveyed, may as against the latter, avoid the conveyance as a fraud against them.

MARRIED WOMEN.

The deed of a married woman in which her husband does not join is absolutely void, and cannot be validated by evidence of his assent, nor can she be estopped by the receipt of the consideration or any subsequent act of ratification short of a new conveyance.

LANDLORD AND TENANT.

Any agreement whereby one party divests himself of the possession and the other comes into it, for a determinate period, in consideration of a certain profit issuing yearly out of the premises demised, constitutes a lease and raises the relation of landlord and tenant.

MORTGAGE.

Where the owner of an equity of redemption for a valuable consideration paid to the mortgagee conveys the property clear of encumbrances, with warranty undertaking to procure the mortgage to be satisfied of record, this amounts to a payment and discharge thereof, as against a subsequent assignee for value.

TAXES.

In Philadelphia the lien of registered taxes for a prior year is not discharged by a sale for the taxes of a subsequent year, if the proceeds be insufficient to discharge such prior taxes.

F. B. SHATTUCK,
Attorney at Law,
58 S. Third St.

Concrete Floors.

These are sometimes formed on a centering of pieces of fir of proper scantlings resting on a trestle or on the lower flanges of the girders. Across these transverse pieces are laid and boarded with boards of say one inch thick and close-jointed. The concrete is laid in bays; each is finished in one operation so as to form a slab. The ingredients may be as follows: 1 part cement to 4 parts of breeze or other porous substance, iron slags, hard bricks, well-burnt clay, which have to pass through a ¾-inch mesh. If fine stuff is required, clean smith's ashes may be used as being better than sand, the fine stuff not exceeding one-third of the whole. Portland cement, of fine ground, capable of passing through a sieve of 2,500 meshes per square inch, should be used, and the following test is given: When made up wet and filled into a glass bottle, and struck level with the top, it must not, in setting, crack the bottle or rise out of it, or become loose by shrinking. When filled into molds, and after being seven days in water, it must have an ultimate strength under tensile stress, slowly applied, of 250 lbs. per square inch of section. The mixing is to be performed by turning the ingredients over twice dry, then shoveled to a third heap, at the same time adding from the rose of a hose water enough to make ingredients cling together. The broken material and breeze should be damped before mixing. The concrete, after being laid, is slightly rammed with wooden beaters, and the surface should be kept damp by water fourteen days after laying. The soffits should be well wetted and a setting coat of fine stuff given. These are the instructions given in a specification for concrete floors, and may be usefully followed. Slabs of concrete 6 inches thick have been found to break from 1 cwt. to 2½ cwt. per foot super., the size of slab being about 14 feet by 13 feet in the former case, and 14 ft. by 7 feet in the last. Experiments have not been sufficiently numerous or conducted with enough exactness to insure any reliable rule, the slabs crack suddenly, and there is little warning after the ultimate resistance has been reached.—*The Building News.*

Trade Review.

The trade outlook from the lumber dealer's standpoint is very bright. There is no difficulty in selling all the lumber that can be delivered. A great deal of building activity is going on. Prices are very firm for all kinds of material, including the hard woods. Advices from Chicago show that there is a better tone in the trade with values for supply on a higher level and that a probable advance will be made within the next four weeks. There has been a great deal of care taken by manufacturers of lumber to prevent overcrowding the market. Reports from all Mississippi markets point to only a moderate supply and the same condition of things is found to exist along the Lake markets as far as Albany. This scarcity, if it is proper to so term it, has induced wholesalers, retailers and contractors to purchase larger quantities than they would otherwise have done. There is nothing like a scarcity of lumber probable. Much as has been said to the contrary. The entire lumber trade is only anxious that there should be no undue depression of prices. So far as the east is concerned this can be brought about by the western men allowing the east to attend to its own business. Depression of prices in this city and other cities east, has been due to the fact that wholesalers from the west have gone among retailers and carpenters and have supplied them at wholesale rates. If they could be induced to not do so the wholesale dealers say they could advance prices fifty cents to one dollar. Of course buyers have nothing to complain of and are anxious to purchase where they can purchase cheapest, yet the manufacturers recognize that they are pursuing an unwise policy in breaking down eastern markets because by so doing they are making it impossible for manufacturers to pay good prices. The receipts of hemlock are rather larger. Cars are scarce but there is no absolute scarcity. Walnut is likely to decline in price owing to the fact that exports have fallen off. All through the summer and fall cut rates existed, hence the exports assumed large proportions. Since August 1st freight rates have been restored. There is a good demand for cherry, oak, ash, mahogany and all kinds of hard woods. The furniture manufacturers are very busy and have bought quite heavily on account of the possibility of higher prices. Lathe is in abundant supply. The supply of shingles is equal to all requirements. Yellow pine is arriving liberally and there is no trouble over prices. The planing mills are all busy both here and in the interior, and will probably continue so long as building operations can be prosecuted.

The September fire loss in the United States and Canada was $6,500,000. The fire loss for 1886 up to October 1st was $83,000,000, or $11,400,000 in excess of the loss for the same period in 1885. The loss for 1886 will probably reach $100,000,000.

Building Permits.

John Kramer, No. 1314 North Front st., 2-story ice-house, between Columbia and Montgomery ave., 61.6x45.10.

Joseph Bird, No. 1106 Hunter st., 2-story brick dwelling, No. 1331, Moore st., 16x27.

Charles L. Loney, Sixteenth and Erie sts., fifteen 3-story dwellings, Eighteenth and Ontario sts., one 18x57 and fourteen 17x50.

John Duncan, 905 Chant st., new front and floors in 4-story building, No. 213 South Front st.

H. Phillippi, No. 1031 Sansom st., front alteration at Southeast corner of Thirteenth and Pine sts.

John Stifer, No. 4813 Lancaster ave., constructing porch, front and rear, No. 658 Westminster st.

Martin H. Ryan, No. 828 South Front st., alteration of building, No. 714 South Front street.

A 2-story house, 14x30, Marshall st., above Indiana ave., to Stewart Bros., 2154 North Fifth st.

A 3-story house, 16x32, 721 St. Mary's st, to Edwin Ward, 526 South Seventh st.

Two 3-story houses, Cullen above Seventh st., to same party.

Eleven two-story houses 14x28, Tremond, above Twelfth st., to L. K. Slifer, Tenth and York sts.

Two 3-story houses, 35x40. Chew, above High st., to James Kennier's Sons, 101 East Chelten ave.

Five 3-story houses, 16x55, Fifteenth above Federal st., to Mowbray Bros., Twenty-eighth st., and Gray's Ferry Road.

A two-story schoolhouse, 45x74, James st., above Ridge ave., to Edward Delaney, 913 South Twentieth st.

Two 3-story houses, 17x16, Hemberger above Berks st., to Mrs. Dorothy Wagner Fifth above Thompson st.

One 2-story house, 14x28, D. st., above Indiana ave., to P. Fitzpatrick, 2838 Kensington ave.

Five 2-story houses, 12x37, Bache's Alley to McFarren st., to J. R. Oyle, 1741 North Twentieth st.

Two 2-story stores, 16x47, Wistar above Mercer st., to Charles M. Rufe, 56 Brnighurst st.

A 2-story warehouse, 30x73, Front, above Master st., to John M. Bochanan & Bro., 1618 Vienna st.

Three-story addition, 15x30, 1515 Christian st., to same party.

A 2-story store, 16x45, Front, above Oxford st., to same party.

Fifteen 2-story houses, 15x40, Sixth above Tioga, st., to George F. Gibson, 2248 Master st.

Alterations and additions, Tenth, above Chestnut st., to James V. McGarvey & Son, 1931 Vine st.

A 3-story store, 16x31, Sixth above Catharine st., to Charles McCaul, 20 North Eleventh st.

Two 2-story houses, 14x28, Eastburn st., above Lime Kiln Pike, to Martin Hetzel, 45 Church st.

A 2-story back building, 13x16, Crowson, above Church st., to same party.

Joseph Ladley, Haines st., Germantown, 2-story dwelling, west side Haines st., between Hancock and Morton, 15x30.

John Owens, 52 Springer st., Germantown, 2-story shop, rear of 5247 Germantown ave., 20x32.

Jacob Ziegler, 2828 Ann st, 2-story addition, east side Salmon st., between Ann and Neff streets, 16x12.

Henry Schilke, Twenty-seventh st., north of Huntingdon, 2-story house, east side Twenty-seventh st., between Huntingdon st. and Lehigh ave., 16x42.

John Spoere, 2008 Cambridge st., dwelling, 2007 Scott st., 16x35.

Thomas S. Cadwalader, four houses, southwest side Jackson st., between Memphis and Tulip, 14x34; eight houses, northwest side Memphis, between Huntingdon st. and Lehigh ave., 14.3x40 and 16. 4½x40.

George C. Vandyke, 1223 Warnock st., third and fourth-story addition to store, 1831 and 1833 Market st., 42x120.

Thomas H. Burrows, 5127 Kershaw ave., 3-story house, N. side Paschal ave., between Forty-ninth and Fiftieth sts., 18x54.

B. D. Currey, 1708 De Lancey pl., 1-story kitchen on S. side De Lancey pl., between Seventeenth and Eighteenth sts., 11x10.

Stewart Ralph & Co., 2-story addition to factory, S. side of Columbia ave., between Mascher and Hancock streets.

Morris Kutz, 710 Preston st., an addition to building, 525 N. Forty-first st., 14x50.

Lafayette Horter, 211 N. Thirty-sixth st., two 3-story houses, Thirty-eighth, above Aspen st., 15x50.

John Holtenstein, Chestnut Hill, one 3-story house on Willow Grove ave., below Twenty-fifth st., 22x44.

H. Tree, Clifton Heights, two 3-story houses on Springfield ave., above Fifty-fourth street, 21x53.

John Briggs & Bro., 242 E. Orthodox st., 2-story back building, Orthodox st., above Jefferson.

Charles L. Loney, Sixteenth st. and Erie ave., fifteen 3-story houses, 17x50, Eighteenth st. and Ontario ave.

J. B. Elliott, 3515 Wallace st., front alterations at 324 N. Twenty-third st.

Porter Thompson, 2037 Filbert st, third-story additions, 40x60, Twenty-second, above Arch street.

F. S. Hall, 1939 E. Cumberland st., 2 story back buildings, 10x12, Kensington ave. above Lehigh.

Samuel J. Bault, 418 Saunder ave., four 2-story houses, north side of Chestnut st., between Fifty-second and Fifty-third, 16x45.

Henry T. Supplee, 235 S. Thirty-seventh st., three 2-story houses, 16x44, Forty-ninth st., between Paschall av. and Say st.

Philip Weber, 1427 American st., third-story addition to dwelling, 1208 Germantown ave.

Frank Thurwanger, 1618 N. Nineteenth st., 2-story school-house, 53x100, Marshall and Somerset sts.

William Forbes, 1404 S. Twentieth st., 2-story stable, 16x48, Reed st., between Twentieth and Twenty-first.

T. Frank Shuster, 908 Buttonwood st., 2-story back building, 12x16, 1309 Fairmount ave.

Judge & Snyder, 3138 Salmon st., three 2-story dwellings, 13x36, Bley st., between Hull and Clearfield sts.

James F. Same, 719 S. Ninth st., 3-story store and dwelling, 15x30, Eleventh st., between Locust and Walnut sts.

Thomas Baker, 2131 E. Cumberland st., six 2-story dwellings, 15x48, Allegheny ave., between Jasper and Emerald sts.

Samuel E. Moore, 1325 N. Eighth st., three 3-story dwellings, 14x48, south side Lombard st., between Seventh and Eighth sts.

E. Thompson, 1609 N. Eighth st., 2-story dwelling, 14x42, east side of Germantown ave., between Green and Westmoreland sts. Also, a 2-story school-house, 80x130, corner of Crawford and Krail sts.

ABBREVIATIONS.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M.L.D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B.—Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E. J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

1416 Chestnut Street.

First Use---Then Beauty.

Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. We repeat we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $3 up, and BOOTS AND SHOES FOR LADIES from $2 50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and cordial reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.

If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, or order [illegible] may be exchanged. Repairing of all kinds at moderate prices.

THE DAY SEWED SHOE MFG. CO.
Under the management of W. W. Apsley.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 42. PHILADELPHIA, MONDAY, OCTOBER 25, 1886. PRICE 15 CENTS

Items of News.

—Disston's men have nearly all returned to work.

—Lots in Sec. G., Odd Fellow's Cemetery sold for $5.00

—United American Cemetery lots command $10 each.

—The shares of the Gray's Ferry Pass. R. R. are $2 higher.

—The residents of Germantown want an Elevated Railroad.

—The property N. E. cor. 18th St. and Susquehanna Ave. brought $12,000.

—The property N. E. cor. 16th and Green streets 36x101½, sold for $18,000.

—A Dwelling and lot on Broad St., above Norris, 18x150, sold for $11,500.

—West Philadelphians have been favored by an extension of street car facilities.

—John D. Taylor, late Treasurer of the Pennsylvania R. R. Co., left an estate of $75,658.10.

—The late Moro Philips' estate is appraised at $823,897—all of which is divided among his family.

—There are 1080 gas companies in the United States and Canada. Of these, 153 are water gas plants.

—By auction the three-story brick residence, N. E. cor. 24th street and N. College Ave. sold for $6,000.

—At auction, 13 17-100 acres, S. Broad St., Sixteenth and Seventeenth Sts., Curtain and Geary Sts., sold for $8,000.

—Broad St. properties bring good prices; a dwelling e. s. of that avenue, above Berks street, 18x150, sold for $11,000.

—The personal estate of the late Abraham Kahn is appraised at $297,948.79, and of Agnes W. Lennig at $145,223.

—Officals of the Pennsylvania Railroad Company state that the fuel tonnage of that line this year will reach 16,000,000 tons, 14,000,000 tons last year.

—The corner stone of the St. John's Reformed Church was laid last Sunday week. The church is to be of brick, 40x75 feet, and will cost when completed $14,000.

—A character has been granted to the Bellefonte Eastern Railroad Company with a capital of $1,000,000. The line will extend from Milton to Bellefonte, a distance of fifty miles.

—The Haddonfield Baptist Church cost $38,000, of which $30,000 has been paid. Serpentine stone is used and sandstone trimmings. The main auditorium is 65x75 feet.

—The Board of Surveyors have recommended the construction of a bridge over Poquessink Creek, on county line road, west of Cemetery lane, in the Twenty-third ward, at a cost of not over $4000 to the city.

—The Board of Public Charities have received a communication from Lemuel Coffin and George C. Thomas requesting the body to recommend to the Legislature an appropriation of $150,000 for the Hahnemann Hospital.

—Last Thursday the Building Commissioners of Camden held a meeting and heard statements from a number of property owners, who are charged with not providing proper fire-escapes to their buildings. The Commission will report to City Council.

—Coatsville has had experts make a test of the water served to that borough, and find it to be impure to an alarming extent. The town has no water works, the water gravitating into a reservoir from a slimy dam inside the borough limits. To correct the evil steps will be taken at once.

—The officers of the New Fourth street Bank are: Sidney F. Tyler, president; R. H. Rushton, cashier; Sidney F. Tyler, John C. Bullitt, W. W. Kurtz, William L. Elkins, George F. Tyler, B. K. Jamison, Elisha A. Hancock, James Hay, Frank T. Patterson, Edmund Lewis, Charles I. Craggin, William A. Dick and H. S. Frank, directors. It will take about a year to complete the new bank building.

—The Water Committee of Councils last Wednesday considered the annual appropriation for the department. The item for extension of the service was reduced from $1,860,000 to $500,000. John Baisely's bill of $6911.27 for work performed was finally approved and ordered paid. The contract for a new stack at the Spring Garden Pumping Station was awarded to Thomas Gamon for $2475. A petition from citizens on Girard avenue, near Broad street, complaining that the main pipe, which is only four inches in diameter, is insufficient to supply the necessary quantity of water, was referred to Chief Engineer Ogden.

LABOR NOTES.

—The street car employee association maintains its membership and discipline.

The striking bolt makers of Welsh & Lea received $600 from the Knights of Labor.

—The daily papers contain numerous advertisements for skilled labor in the building trades especially.

—The Bricklayers' Ball on Tuesday night of last week was attended by about 2000 people. It was held at Industrial Art Hall, Broad street.

—The South Jersey Glass Blowers all resume work at 5 per cent. reduction over last year. All of the works have been idle since last summer.

—A jury before Judge McKennan in the United States Circuit Court, rendered verdicts in favor of the North and East River Steamboat Company against Elizabeth H. Baillie, executrix of William A. Baillie, deceased, for $3500, and against the executrix of William A. Baillie and Elias Philhower, for $4500. The suits were to recover against Messrs. Baillie and Philhower, sureties for E. H. Deakyne, who chartered two steamboats, the Shady Side and the Morrisania, to run between Philadelphia and Wilmington in 1883. The defence claimed, among other things, that the plaintiff did not furnish the boats with sufficient steam to make competition with other boats running between the same points successful.

—The United States Treasurer shows that on the 15th instant their was in the treasury the following; Gold coin and bullion, $243,162,744; silver dollars and bullion, $185,924,832; fractional silver coin, $29,506.185; United States notes, $41,171,026; national bank notes, $239,941; national bank notes in process of redemption, $2,053,846; deposits with national bank depositaries, $13,597,756; total, $512,856,330. Certificates outstanding—Gold, $84,389,419; silver, $98,957,628; currency, $7,135,000.

—The best pavement in Philadelphia is the asphaltum pavement around the City Hall. It was laid in September, 1884, cost no more than Belgian blocks and is as perfect as when put down. It is as noiseless as a macadamized road, smoother than the smoothest floor, and affords an excellent surface for horses' feet. It is easy to clean, handsome, impenetrable to water, and resists the torrid sun of August and the lowest winter temperature perfectly. It requires hardly any repairs and does away with the necessity for "crossing stones," as it is, itself, equal to any sidewalk. It is vastly better than a cobblestone pavement, which allows mud to ooze up with every rain, grass to grow in all the crevices, and requires constant repairs on account of settling. It surpasses Belgian blocks, for they are noisy, hard upon vehicles and horses in winter and summer, and are not easy for foot travel. None of the other alleged improved pavements, like the wooden pavements of Chicago, the hard fire-brick pavements of Steubenville, or the "composition" pavements in vogue in some of the smaller New England cities, possess the excellent properties of this asphaltum pavement about the City Hall, and it was not laid under the most favorable conditions. As it has answered so well where it is it should be tried on other streets. Let it be further tested at points of heavy travel in the business portion of the city. While it would not be advisable to take the results up to this time, satisfactory as they are, as conclusive, they certainly warrant the expenditure of money in thoroughly determining upon the value of a street pavement that seems the best now in use in Philadelphia.—*News.*

VOL. 1.—NO. 42. PHILADELPHIA, MONDAY, OCTOBER 25, 1886. PRICE 15 CENTS.

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, OCT. 25, 1886.

THE *Record* says there are 104 people in San Francisco who are worth one million or over.

THERE is plenty of boom in the Pig Iron trade and if this is not indicative of higher prices for building material of all kinds we will be very much mistaken.

LET us have cheap gas. In over 900 cities gas is less than $2. Five years ago the price was $3. In a few years more a gas engineer predicts it will come down to $1. Therefore look out for the Gas Works. Don't sell our prospects for cheaper gas for a song.

THE gas engineers are aroused to the magnitude of the work before them. The consumption of gas is growing rapidly. Improved systems of lighting are coming into general use. The Siemens-Lungrin system is in use in Washington and Independence Squares. The improvement is marked. Let us have more such lamps.

THE wholesale merchants of this city should make special efforts to inform their western customers that the Baltimore and Ohio Rail Road Company grants a stop over to their passengers travelling on through tickets, who desire to purchase goods from Philadelphia merchants and manufacturers.

THE Holloway Chemical Engine located on Decatur street below Market has been placed where it is likely to do most good. The cumbrous and noisy and water destroying engines could be called upon less frequently if these chemical engines were more numerous. We now have two, and ought to have twenty, and will have that many as soon as they demonstrate their capabilities. Baltimore has a dozen in use.

JUDGE Willson on Tuesday sustained the exception taken by the city against demand made by the Jury assessing the damages for the opening of 25th street between Biddle and Spring Garden streets. The Jury besides awarding to the owners of the ground the full value of the same, gave to the owners of irredeemable ground rents representing the estimated premium or excess in the value of such rents over and above their principal sum.

IT looks as though there will be a competing line to Pittsburgh, when Beech Creek and South Penn question gets settled, enough capital can be be raised in Pittsburgh and Philadelphia in forty eight hours to complete and equip the road, both cities have already felt the withering discrimination of the Pennsylvania rail road company and it would be a pure and simple God send if its corrupting influences could be crushed forever.

THE daily newspapers are very careful to not hurt the delicate feelings of the Traction people by refering to the frequent stoppages from day to day and from week to week. If all their break downs and stoppages were reported and commented upon there would be a healthy growth of public opinion against the arrogant indifference and unreliability of that company, and in favor of a better system of city locomotion. The dailies know how to keep friends on both sides.

THE interests of Philadelphia call for the construction of the South Penn road, but the P. R. R. will not permit it until the last act in the judicial farce has been played. It is no credit to our Judiciary or to our law system that a case of this kind can be kept hanging fire for years and years. Our modes of legal procedure need a Justinian revision, but the law flies will not be quick to desert the molasses barrel of litigation which our present system sustains.

IT was a lucky thing for our citizens that the present drought did not take place during the hot days of last summer, for with the summer's evaporation and the supply as short as it is at the present time, the Schuylkill would have yielded a beverage that would have sickened a hog. Yet notwithstanding the present unusual drought and the low stage of water in the Schuylkill, the gutters of the city are flushed regularly with water from the street hydrants, and there seems to be no alarm expressed by the Chief of the Water Department.

NOW THAT the United States Treasury is overflowing with the people's ducats, and our statesmen are bothered how to utilize the surplus, it would be a splendid opportunity for the press of the country to agitate penny letter postage. One cent is quite enough, besides it is an open question, if at a cent postage the earnings of the mail service of the country would not be much greater than under the present two cent postage rate, but whether greater or less, it would make but little difference, for the deficiency could be readily met by an appropriation. There is at least one feature of this proposition that commends it to the consideration of Congress, and that it is the easiest way of relieving the people of no inconsiderable part of their burdens without inflicting any risk of business disturbance, besides, which from a mercantile point of view, it would beyond a doubt be received with approbation by the whole people as a wise and judicious measure.

THE question of using brick for pavement has at last come up for discussion after several Western cities have tried them thoroughly, and find them better than any material previously used. Dr. Paxson has exhibited a sample of fireproof brick made at New Cumberland, W. Virginia. It has been used, among other places, in Steubenville, Ohio. Contracts have been made at Steubenville, and work is now being done at eighty-five cents per square yard. In Wheeling these bricks have been used for paving, on a line of street cars. During three years not a dollar has been expended for repairs. The same pavement has been tried in St. Louis with most satisfactory results. They have been in use there two years, showing even then but little signs of wear. Contracts have just been placed for ten miles of streets at $1.50 per yard. The contractor will keep the streets in repair for ten years. A committee of seven were appointed, with instructions to make a full report after careful investigation. The committee consists of Messrs. Clark, Meehan, McMurray, Patton, Horn, Thornton and Wilde. We await their report with interest.

SUBURBAN ACTIVITY.—A 240-acre tract, near Gloucester, New Jersey, has been cut, or is to be shortly cut up into building lots and sold at reasonable prices to meet the views of the army of lot buyers. A good many industrial establishments have been built within the last year or two between Camden and Woodbury, and the demand for houses has grown apace. Rents are high, and demand ahead of supply. In the south-

ern section of Camden over 200 houses have been erected for persons of moderate means.

Another tract is to be opened in Frankford. Waln Grove an old yellow mansion, is one of the old landmarks. It stands east of the railway station. A deed has just been recorded of the Waln Farm to the Real Estate Trust Company. It will be at once cut up into 300 city building lots. Many hundred operatives in that section of the city are now obliged to walk from one to three miles to and from their work. These lots will be covered with neat and comfortable dwelling houses. It was contemplated a few years ago to purchase these grounds as a park, but they are to be devoted to a more useful purpose. Should the projected elevated railroad be built, it will benefit this locality eventually. The industries of Frankford have been prosperous for years, and the result is that life has been given to real estate and building operations.

We want a new building law under which law the issuing of permits can be regulated on a practical business basis, for John Jones or Peter Smith to obtain a permit for some kind of an indefinite building just because one or the other may desire it, is neither protective nor business like, other cities exact under their building laws a detailed statement describing the building contemplated, its size, material to be used, name of architect, name of contractor for mason work, name of contractor for carpenter work if contracts have been made, location of lot on which the building is to be erected, owners name and residence.

Our present system imposes no restrictions neither does it place responsibility where it belongs, it is faulty in as much as it is not expected that the permit is to be complied with in any respect, it leaves the door open for evasions, subterfuges and the worst forms of rascality, even now much complaint is made at the few questions that are asked and because forsooth the owner seeking the permit is afraid some enterprising building material man will hunt him up and try to sell him a few thousand bricks or something that is needed to make the building, yet the same man if in business does not hesitate to send his representatives by the score in quest of business and if they dont get it theres war, his is a sample of the usual consistency and reasonableness of Philadelphia's old Fogies.

Now then the chance is presented for the incorruptable councilmanic statesmen, who have so strenously advocated the sale or lease of the Gas Works to convince the people that they were actuated by motives that were really commendable. The Excelsior Gas Light Company of New York, wants to introduce their method, and offer to supply pure brilliant, non-smoking gas of thirty candle power, at from twenty to twenty-five cents per 1000 feet, the company will erect its own plant at a cost of about $100,000, and will remove the same if the gas is not perfectly satisfactory, the city to be at no expense either for the erection or removal of the plant. The New York Company does not even ask for a lease of the gas works, but simply propose to make the gas and place it in the gas-holders, this proposition presents too many advantages for the long suffering gas payers of this city to expect that they will ever enjoy them.

In a few days, when the last patch of ground is purchased for the site of the new Philadelphia hotel we will know where it is to be located.

The Metropolitan Railroad company has its ordinance now in hand of a Sub Committee of seven.

None of the objections made to an elevated road can be made to an underground road, but opposition will be manifested nevertheless. Anything that will detract from the surface roads will be fought. The interests of Philadelphia or the convenience of its people have no show before our municipal law makers. Yet a ticket composed of men who could be relied upon to legislate for the city's good, would have no possible chance of election. If the founders of the republic could have foreseen some of the results of the republican form of governments they gave their lives to establish they would not have died with such contentment with their life's work.

Five years hence a birds-eye-view of Philadelphia will exhibit thickly built up arms along the lower lines of the various roads leading out of the city, extending five, ten, fifteen miles out, like the spokes of a wheel. There is an evident tendency in this direction. Much real estate is now held for building purpose along the lines of the Pennsylvania Railroad both on the main line and on the New York Division, on the P. W. & B. on the Reading roads, on the B. & O. and lastly comes a new line to West Chester. The road has been graded a distance of fifteen miles and will soon be put in operation. It is virtually owned by the P. R. R. Large tracts of land have been purchased along the line and it is to be cut up and sold for building purposes. The lots will be sold at prices which will attract buyers, and train accommodations will be abundant as the B. & O. Road traverses the same section. The movement by the P. R. R. people is one of self-protection partly.

Councilman Etting proposes to make the salary of the new mayor $10,000 in place of $12,000. The latter figure is not a dollar too much considering the drain upon the purse of the chief magistrate of a city like Philadelphia. Mr. Meehan has queer ideas about public offices. A second-class drummer for a Chestnut street dry goods house can make more money than he is willing to allow the Director of Public Works and of public Safety. Mr. Roberts wanted to make the salaries of each $9,000, not a dime too much, unless it is the intention to drive talent away from such offices and make them fit only for third or fourth-class men. We had a hard fight to get our new charter and we dont propose to see it defeated practically by having the salaries fixed so low that good men will not fill the positions made under the bill.

The effort to fix salaries at a niggardly limit looks like a political trick. It is a small one. It will not run. ' The people of Philadelphia want to see their servants well paid. What business man can afford to accept a $5000 position. The Council Committee having this matter on hand must not mistake the temper of the people. They do not want economy of that sort and they will not have it. They propose to elevate the standard of public service and will begin by making the positions worth having for what they yield in compensation.

Architectural Courtesies.

The following paper was read at the late convention of the Iowa State Association by Mr. E. S. Hammatt, on the subject of

PROFESSIONAL HONOR.

One of the first questions a would-be-architect should ask himself, is : "Am I a gentleman?" If the answer cannot be given in a conscientious affirmative, do not apply for admittance to this profession, for you are not wanted. Had some such rigid self-examination been applied by all members of the profession, there would be no need of saying anything about professional etiquette, but, unfortunately, too many architects seem to forget that the fact of his being an architect does not, in the least, absolve him from the responsibility of, at all times, at least appearing a gentleman, and most of all in our professional relations to other architects. In our dealings with clients and society in general, we are not often led to err in this respect, knowing that if we do we will speedily be taken to task for our conduct, but among ourselves the facts are that not a few do often exhibit traits which indicate a very great deficiency in this really quite essential element for the make-up of an architect. We may, to outsiders, appear to be perfect gentlemen in our intercourse with one another. It is, nevertheless, sadly true that behind this convenient exterior gentlemen, there frequently lies a weapon full charged with the most virulent and debased elements of professional practice, which does deadly work when fired, and would surely cause the sender to suffer untold pangs of remorse if he were not completely dead to such feelings. Most of us have had some experience in coming in contact with this class of architects. Happy are they who have yet to make their acquaintance. It may be true that "all is fair in love and war," but even these two antagonistic forces, which appeal so strongly to the passions of men, should not be allowed to warp us into the use of degrading means to accomplish an end. As an instance of what may be considered a breach of professional etiquette, we will suppose a case taken from actual facts: An architect has been asked by a building committee, to submit sketches for a building. In order to give the architect a better knowledge of the requirements necessary to incorporate in his plans, the committee take him with them to visit buildings designed for a similar purpose in a distant city. After finding out what is wanted, he goes to work in good faith, feeling that his work is sure and he has only to give his best efforts to the work, but he awakes one morning to find the devil has been assiduously at work against him. His

majesty has by a gradual ascent in the scale of diabolical improvement, deigned to assume the garb of an architect, and make a professional call on the building committee. He is told by the unsuspecting committee that an architect has already been employed. The devil, otherwise the architect *pro tem.*, finding there is no possible means of having himself employed, at once proceeds to take the committee and set them on the pinnacle of his architectural fame and show them all the glories of his devilish creation, and promises to make them a gift of plans for the proposed building if they will only fall down and worship him by giving him the work. The architect already employed, is held up to the derision of the committee, as a young man with so little experience that it would be a criminal folly for them to intrust their work to him. The scheme works. On the appointed day the committee examine the plans of their selected architect—they are found to be a fair interpretation of the requirements of the committee, and are simple, straightforward sketches, as was asked for. The architect *pro tem.* is then announced; he appears with a flourish of trumpets and in full satanic robes. The drawings, resplendent in vermillion and elegant draftsmanship, are thrown open to the view of the astonished committee, with an air of; there, gentlemen, that is what you want, and in an aside "that is what you shall have." Remarks of 'splendid,' 'grand,' 'magnificent,' 'just the thing,' etc., etc., *ad nauseam* are poured forth by this achitectural fiend, till the committee are thoroughly exhausted, and finally succumb to a man, and they are all honorable men. The work of the other architect is done, the drawings rolled up and the hand that has drawn them lays them away. The world wags on as usual, one young architect's hopes blighted, nothing more. So the scene ends, as far as the public and committee are concerned, and just here, gentlemen of this convention, is where we who desire the advancement of our profession, and wish above all other considerations, that its practitioners shall be honest in their dealings with clients, contractors and their professional brethren, here we should put our foot down decidedly, and say to a member of this association who is guilty of unprofessional practice, we consider ourselves an association of gentlemen, as well as architects, and unless you can carry on your business under this simple restriction, you must cease to be one of us, for we cannot consent to any individual member degrading himself to secure work, and the sooner you realize this fact the better it will be for you and the profession. Gentlemen, this is only one of many similar cases that most of us, unfortunately, have to deal with. At the January meeting of this association the subject of unprofessional practice was referred to the board of management, with power to act. We have been quite fortunate, so far, that not a single case of unprofessional conduct has been reported so far as the writer knows. Truly this is is commendable, and may it ever be thus, but when they do occur may we not expect the board to act with prompt decision? With the assurance that they will, we will leave this subject for the present.

Municipal Doings.

COMMON COUNCIL.

A SPECIAL meeting of Common Councils was held last Tuesday and the following bills were introduced.

By Mr. Meehan to grade Ruscomb street from a point 200 feet west of the Germantown Railroad to Nineteenth; to authorize the construction of a bridge over Wingohocking creek, on the line of Eighteenth; to lay water pipe on Belfield avenue, between Mill and Penn, and to grade Montana avenue, from Musgrove to Chew.

By Mr. Jenks, to permit the Mantua Baptist Church to erect a one-story frame building for a mission chapel, at the north-west corner of Belmont and Westminster avenues.

By Mr. Holeman, to appoint an additional watchman at the draw-bridge across Frankford creek at Bridge street, and to locate electric lights on Richmond street, from Bucklus to Bridge, and on Bridge from Richmond to Frankford creek.

By Mr. Anderson, to appropriate $45,000 to erect a school house on the city's lot at Sixteenth and Moore streets.

By U. C. Smith, for a sewer in Carlton street, from Fifteenth to Sixteenth, and to locate three electric lights on Spring Garden street, at Fifteenth, Sixteenth and Seventeenth.

The Select Council resolution to prohibit the use of any but safety matches in and about Independence Hall was, on motion of Mr. Clay, referred to the City Propertp Committee.

The Select Council resolution authorizing the Reading Railroad Company to put safety gates at the American and Master streets crossing was concurred in.

Mr. Hicks introduced a resolution, which was adopted, requesting the City Solicitor to inform Councils in whom the title to that portion of Lancaster avenue, between Forty-fourth and fifty-second streets, is vested, and whether the Hestonville, Mantua and Fairmount Passenger Railway Company is responsible or not for the repairs on that highway.

The following Select Council bills were passed finally; To lay water pipe in Hardsberry, Carpenter, Wiota, Haverford, Washington, Emery, Ontario, Forty-second and Elizabeth streets, and to locate electric lights on Broad street, at Dauphin and Lehigh avenue.

The following Common Council bills were passed finally:

To sell to William G. Warden the city's lot of about one acre, in the Twenty-sixth Ward, for the purpose of squaring the lines between the property of the Atlantic Refining Company and that of the city.

To make the Northwestern and the Southwestern Nationol Banks depositors of the city's money.

To repeal the ordinance requiring persons making payments to city departments to attest the payments by signing their names in the department books.

To pave Washington avenue, from the west side of Swanson to the east side of Front street.

To grade and pave Croskey street, from Norris to Diamond.

To pave Orkney street, from Lehigh avenue to Somerset.

To grade Berks street, from Seventeenth to Eighteenth.

Mr. Hoffman resigned from the Highway and Mr. Holeman from the gas Committee. Mr. Hoffman was than appointed on the Gas and Mr. Holeman on the Highway Committee.

Common Councils measures were called up and passed finally as follows: Appointing the Northwestern National Bank and the Southwestern National Bank depositories of public money; authorizing the paving of Washington avenue, from the west side of Swanson street to the east side of Front street; granting permission to the property owners on Boyer and other streets, in the Twenty-second Ward, to macadamize the same; authorizing the paving of Dakota and Thirty-first streets, in the Twenty-eighth Ward; authorizing the erection of a large number of gas lamps in different wards throughout the city; making an appropriation to the Board of Education of $41,776 to pay for the erection of a schoolhouse at the northeast corner of Fourth and Dauphin streets, and of $25,287 for a school house at northeast corner of Marshall and Somerset streets, and approving the contract and sureties of Frank Thurwanger for the erection of the latter; appropriating $1126.90 to pay H. & J. Dechan, for constructing a sewer on Palmer street; transferring $2000 in the appropriation to the Electrical Department from Item 13 to Items 3 and 6; authorizing certain transfers in the appropriation to the Board of Health, Clerks of Councils and Register of Wills; making and appropriation of $797.74 to pay for a sewer on Howard street, in front of Norris Square and the public school; authorizing the paving of Pennock street, from Parrish to Poplar; the grading and paving of Croskey street, from Norris to Diamond, and the paving of Orkney street, from Lehigh avenue to Somerset street, and Berks street, from Seventeenth to Eighteenth streets; providing against the merging of appropriations for the erection of school houses and purchase of lots; asking the City Solicitor to inform Councils as to the responsibility of the Fairmount and Hestonville Railway Company for repairs on Lancaster avenue, between Forty-fourth and Fifty-second streets; authorizing the sale of certain property in the Twenty-sixth ward to Wm. G. Warden, and asking information from the City Solicitor relative to certain commissions of the City Treasurer received on moneys paid by the State.

SELECT COUNCIL.

In Select Councils last Thursday:

Petitions and communications were presented as follows and appropriately referred: By the Chair, for six electric lights on Germantown avenue, two on East Chelten avenue, one on West Cheltent avenue, between Green and Wayne streets and one on West Chelten avenue, between Wayne street and the Pennsylvania Railroad depot, by Mr. Grim, to place Filbert street, between Forty-first and Forty-third streets, on the city plan; by Mr. Matthews, complaint of the sewer emptying into the mouth of of Cohocksink creek as a nuisance; by Mr. Wilson, for a sewer on Johnson street, between Twentieth and Twenty-first; by the Chair, from the Mayor, transmitting police appointments; from the Chief Engineer of the Water Department and Fire Commissioners, giving the names of recent appointees, and the annual report of the Public Buildings Commission.

Ordinances were read in place as follows and referred to their appropriate committees: By Mr. Johnson, for electric lights at Shackamaxon and Savery streets and Girard avenue; by Mr. Graham, affixing a penalty to the unauthorized construction of vaults under sidewalks; granting permission to the Time Telegraph and Western Union Companies to lay underground conduits and wires, and for electric lights in Germantown; by Mr. McMurray, to open Clearfield street, from Twenty-second to Nicetown lane; for sewers on Eleventh and Seventeenih streets, and for electric lights in the Twenty-eighth Ward; by Mr. Scherr, for electric lights in the Sixteenth Ward; by Mr. Grim, to place Filbert street, from Fortieth to Forty-third, on the city plan; by Mr. Etting for lamps at the corners of Spruce, Goodwater, and Duponcen, streets; by Mr. Green, for a sewer on Arrott street and fire signal boxes in the Twenty-third Ward; by Mr. McMullen, for gas lamps in the Fourth Ward; by Mr. Patton, for water in the building of Battery A; by Mr. Lawson, for transfers in the Board of Education appropriation.

Ordinances were submitted providing for fire escapes for various school houses.

The Lehigh Avenue Railway Company wants to lay a double track along Schuylkill avenue from Second street to the East Park entrance.

The Finance Committee will examine into the advisability of providing for twelve additional appointees to look after weights and measures, and the sale of tainted meat.

The Superintendent of the Public Squares wants an increase of salary.

Select Council ordinance were passed to lay water pipes on McClellan, Parker, Webster, Chew, Pleasant, Penn, Willow, Sumac, Ripka, Fiftieth and Twenty-fist streets, Passyunk, Roxborough and Freeland avenues.

Select Council ordinance granting permission to the Penn Electrict Light Company of New Jersey, to lay and maintain underground wires for electric lighting purposes throughout the city south of Chestnut street, from the Delaware to the Schuylkill.

Select Council ordinance granted permission to the American Telegraph and Telephone Company to lay and maintain underground conduits, cables, wires and manholes for electrical conductors under Walnut street, from Pier 7, South Wharves, to Twenty-fourth street, thence to Chestnut street, to Thirty-second, to Market, and out Lancaster avenue to the county line; also, along Fourth street, from Washington to Girard avenue.

The following Select Council bill were passed finally:

To permit the Postal Telegraph Cable Company of Pennsylvania to lay and maintain underground conduits, cables, wires and manholes for electrical conductors in certain streets; giving similar permission to the American Telegraph and Telephone Company of Pennsylvania, and permitting the Penn Electric Light Company of New Jersey to lay and maintain underground wires for the purpose of furnishing electric light.

The following Common Council bills were passed finally:

Authorizing the Survey Department to revise the plan of Pennsylvania avenue, between Twenty-fifth street and Fairmount avenue, by reducing the same to the width that it had before the passage of the ordinance of July 3, 1885, relative to the construction of the Schuylkill River East Side Railroad.

Appropriating $40,000 to erect a school house at the northeast corner of Fourth and Dauphin streets, and $25,287 to erect a school house at the northeast corner of Marshall and Somerset streets.

To appropriate $1126.90 to pay H. & J. Deehan for building a sewer in Palmer street.

To construct sewers in Budd, Chestnut, Dugan, Filbert, Fifth, Ogden, Pink, Sixteenth, French, Third, Thirteenth, Thirty-fourth and Thirty-sixth streets.

To permit the Church of the Rosary to erect a temporary frame chapel at the southeast corner of Sixty-third and Westminister avenue.

By Mr. Zane, to authorize Lippincott, Johnson & Co. to lay a steam pipe across and under Commerce street, below Seventh.

By Mr. Kinkaid, to locate an electric light at Twenty-second and Pine streets.

By Mr. Wilde, to grade Bolton avenue, from Ridge avenue to Pechin; and for a sewer in Lyceum avenue, from Manayunk avenue to Ridge avenue.

By Mr. Meehan, for a sewer in Bringhurst street, from Germantown avenue to Mercer; for a sewer in Floyd, Cedar lane and Haines; to grand Roumfort avenue, from Stenton avenue to Sprague; to grade Pulaski avenue, from Rittenhouse to Harvey; to grade Sedgwick, from Germantown avenue to Chew; to open Roumfort avenue, from Germantown avenue to Sprague.

By Mr. James, for electric lights on Broad street, between Berks and Susquehanna avenue.

By Mr. Upperman, for electric lights on Otis, Dauphin, York, Cumberland and Amber streets, Lehigh avenue, Frankford avenue, Trenton avenue, Front and Norris streets, and Susquehanna avenue, in the Thirty-first ward.

By W. A. Miller, for electric lights at Fifth and Moore streets and Fifth and Snyder avenue.

By Mr. Clark, to pave Oxford street, from Broad to Fairmount Park, with fire bricks.

By Mr. McCoach, for water pipe in Peltz street, from Gray's Ferry road to the Schuylkill river.

By Mr. Holeman, to grade Amber street, from Westmoreland to Butler.

By Mr. Taxis, for sewers in South College avenue, from Twentieth street to No. 2010, and Twenty-sixth street, from Poplar to 100 feet south of Girard avenue.

By Mr. Holeman, to appropriate $54,000 to erect a school house at Richmond and Jenks, Twenty-fifth ward.

By Mr. Anderson, to pave Twenty-first, from Reed to Long lane.

By Mr. Hicks, for water pipe in Fairmount avenue, 75 feet west from Orion.

By Mr. Jenks, to place a fire-alarm box on Ford road, in front of the Methodist Episcopal Orphanage.

By Mr. Brown, to approve the Fire Commissioners' lease of No. 1411 Brown street, for ten years, at $1000 a year.

By Mr. Wilde, to grade Monastery avenue, from Ridge avenue to Wissahickon drive.

By Mr. Purnell, to extend the Lombard street sewer from Eighth to Thirteenth.

By Mr. Millick, for electric lights at Tenth and Wood, and in Spring Garden, between Tenth and Twelfth.

By Mr. Hartman, for a sewer in Arch, from Fourth to Fifth.

By Mr. Hartman, to permit Bailey, Banks & Biddle to lay a pneumatic tube from the southeast to the northwest corner of Twelfth and Sansom.

Mayor Smith wants $2500 for printing his annual report.

A petition was presented for the opening of Schuylkill avenue, from the South wall of the U. S. Arsenal to Gray's Ferry road.

The members of Christ's Church object to a fire engine house, at 954 North Front street, and citizens on Germantown avenue protest against the erection of a fire station at 1936 Germantown avenue.

The Eight Hour League wants eight hours to be the rule in the gas works if it is sold.

Bills were introduced in Common Council to pave Oxford street, from Broad to the Park, with fire-bricks; to appropriate $54,000 to erect a school-house at Richmond and Jenks streets, Twenty-fifth ward.

By a vote of 58 to 14 the B. & O. Company has been released from the obligation of undering Pennsylvania avenue from 25th street to Fairmount Park.

Numerous ordinances passed Common Council last Tuesday, as follows: To appropriate $25,287 for the erection of a school-house at Marshall and Somerset streets, Twenty-fifth ward, and to approve the sureties of Frank Thurwanger, the contractor for it; to sell certain city property in the Twenty-sixth ward to Wm. G. Warden, of the Atlantic Refining Company, for $3000 an acre; appropriating $41,776 for the erection of a school-house at Fourth and Diamond streets; $1000 to the Electrical Department to remove overhead wires; $1126.90 to pay H. & J. Deehan for constructing a sewer on Palmer street; to pave Orkney street from Lehigh avenue to Somerset street; Berks street from Seventeenth and Eighteenth streets; Croskey street from Norris to Diamond street; Washington avenue from Swanson to front street; Pennock street from Parrish to Poplar sreet; instructing the City Solicitor to agree upon a case to recover certain commissions paid by the State to ex-City Treasures Martin, Southworth and Irvine.

The vote against the Bell Telephone was 14 to 9 on the question of laying underground wires.

THE GAS TRUST LEASE.

COMMON Councils listened last Thursday to a proposal to lease the gas works for twentyfive years. The United Gas Improvement Company, the Company in its 2nd proposition says: The United Gas Improvement Company shall, during the continuance of said lease, operate said works and furnish and supply all gas (which shall not be of less than eighteen-candle power) which may be required in your city at a net price to private consumers of not over $1,50 per thousand cubic feet, and to the city, except for street-lamps, of seventy-five (75) cents per thousand cubic feet, and shall furnish gas to light, clean and repair, extinguish all public lamps the city may require, in the lines of the mains and their extension, for the price of $16 per lamp per annum.

The company will make all improvements, will expend $3,000,000, will pay 33⅓ per cent of the gross receipts, will furnish gas at $1,50. The total rental, the company estimates will be $36,500,000.

The Projected Hotel.

Architect, Charles F. Collom, has been kind enough to furnish the REAL ESTATE RECORD with the following description of the hotel, to be erected at an early day in a central locality in this city. The exact location is withheld for the present, as negotiations for enough land for the site of the hotel have not been quite concluded.

The building will be 107 ft. by 110 ft., 7 stories high, with basement elevated 5 ft. above the curb level. The basement will contain billiard room, 47 ft. by 50 ft.; kitchen, 25 ft. by 45 ft; boiler room, 25 ft. by 45 ft.; refrigerator room containing five large refrigerators; water closet, 12 ft. by 25 ft.; storage room, 12 ft. by 20 ft. The balance of basement is divided into large convenient rooms, which the company propose renting for offices.

The first floor contains the rotunda, 47 ft. by 50 ft.; restaurant, 25 ft. by 100 ft.; toilet room, 10 ft. by 16 ft.; reading room, 25 ft. by 25 ft.; elevator, baggage room, &c. The balance of this floor is divided into large and handsome rooms to be used as offices. There will be a large beautiful designed stairway leading from the rotunda to the seventh floor, in addition to this, there will be a private stairway of iron placed in the rear of building leading from kitchen to top floor for servants use and fire escape.

The second floor will contain the dining room, 25 ft. by 75 ft.; in the rear of this is located the stewarts pantry, 20 ft. by 25 ft.; the pantry also communicates with a private dining room for children, &c., on this floor is also located the parlor, 26 ft. by 53; reception room, 17 ft. by 42; also two largeand completely filled up toilet and bath rooms, the balance of this floor is divided into rooms ensuit each containing bath tubs, stationary ward robes, &c.

The balance of the floors are divided into chambers, each floor having ample toilet and bath rooms.

The building is so arranged to receive light from all sides, in addition to this, there will be a light shaft in the centre of the building, 22 ft. by 48 ft.

The basement and first story will be constructed with granite, the balance to the sixth story of brick, with stone and terra cotta trimmings, the roof will be of iron, and contain the two upper stories, the entire building will be heated by steam and also thoroughly ventilated, the interior finish throughout will be of a handsome and attractive design.

There will be 284 windows in the hotel, and the total cost of the building itself will be $225,000.

The Common Wealth Title Insurance and Trust Company Opens its Doors.

Tuesday, October 26th instant has been designated by the directors of the Commonwealth Title Insurance and Trust Company, for the formal opening of its doors for the transaction of business. The organization of the commonwealth was the conception of a number of gentlemen identified with the real estate business of this city, who considered that their experience, influence and capital, when concentrated to the interest of a strong and thoroughly equipped corporation must command the attention and patronage of property buyers, who desire not only all the elements of safety that are now offered in the insurance of titles to property, but also other and even more reliable safe grounds, for certainly the experienced judgement of the best posted real estate lawyers and conveyancers in this city, nearly all of whom (there are over six hundred of them) are stock holders in the commonwealth, and whose financial interests demands the closest scrutiny must necessarily secure to its patrons that protection and safety which cannot be obtained elsewhere.

The office of the company is located at 706 Chestnut street, and the following gentlemen comprise the officers and directors:

President, Henry M. Dechert; Vice-President, Wm. Nelson West; Secretary and Treasurer, Adam A. Stull; Title and Trust Officer, Edward M. Bonsall; Directors, A. M. Beitler, James R. Booth, Henry Clay, Henry M. Dechert, Joseph C. Ferguson, Samuel T. Fox, William Gorman, George W. Hancock, John F. Lewis, E. Cooper Shapley, John H. Sloan, James H. Stevenson, Fred'k Sylvester, Fred'k B. Vogel, W. Nelson West.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE dwelling and lot, 44x142, N. E. cor. 22d and Pine sts., sold for $18,000.

BRICK buildings are to take the place of those destroyed by the recent fire.

THE sum of $33,500 was paid for the property s. s. of Green st., east of 23d, 53x177½.

J. E. JACKSON & Co., will re-erect their extensive mill which will be of iron.

THE Ocean City Land Association, expects to erect a large excursion house on its property at Ocean City.

A HOUSE of straw 2½ stories high, 42x52 feet is to be sent to the American Exhibition in London from Philadelphia.

THOMAS Gamon obtained the contract for a new stack at the Spring Garden Pumping Station price $2,475.

A NEW grain elevator has just been completed at Germantown Junction which will hold 70,000 bushels of grain.

THE Roman Catholic High School building, now being erected at the N. E. cor. of Broad and Vine sts., will cost $200,000.

SUPERVISING Architect Bell of the U. S. Treasury is looking for a building site for a new Post office at Wilmington Delaware.

THERE is an abundance of business among the tin roofers, the stove heater builders, the paper hangers and inside artificers generally.

AN effort is to be made to organize a stock company to erect a four story hotel with forty bedrooms at Salisbury Md., at once.

M. C. HONG got the contract for repairs to Mill Creek Sewer and James Deehan for the construction of the Wissahickon Valley Sewer at $7.00 per foot.

A PARTY wants to buy a half acre of ground to build on out the Pennsylvania Road as near to the city as possible. Address D. REAL ESTATE RECORD.

W. H. H. ACHUFF has been awarded the contract for the erection of the bridge over the Germantown branch of the Reading Rail Road at Ontario street price $4,800.

A BUILDING boom is expected along the line of the Philadelphia's Midlands Rail Road, the road has been surveyed to West-Chester and about 15 miles have been graded.

TO ALL indications organized charity will have less to do this winter than for many winters. All who can and will work will have the chance. Our industries were never in a more healthful condition.

THE *Press* works up a letter interest in the defective condition of the Stevens building as to fire escapes. It would cost $3000 to put them in, it says: less would do it. There are 1100 children in attendance.

A CONTRACT was let last week in New York for the construction of sixteen dwellings on Madison avenue and 79th street to cost $1,000,000. There is less desire to put money into tenement houses than formerly.

A COUPLE of uptown plumbers have discovered that our new plumbing law means something. True bills have been found against them for covering and concealing their work in sixteen houses on Orkney street before the inspector could pass upon the work.

THE city of Baltimore has just awarded a street paving loan of $200,000 four per cent bonds, running till 1920, to the Eutaw Savings Bank of that city, at 114½, and $70,000 3.65 per cent bonds, running till 1900, issued for the improvements of Jones' Falls, to various bidders, at 107.28@102.28.

HENRY GEORGE in his anxiety to show how bad off the Pennsylvania mines are forgot to state that 25 per cent of the poor down trodden miners over whom he wept ink so copiously pay no rent. They earned and lived in their own homes. Mr. George can be something of a demagogue when he tries.

BUILDING Inspector Coles has found that all the principle buildings of Camden are without fire-escapes and that there has been a general disregard of the law compelling the erection of the same. The owners of the buildings have been summoned to appear before the Commissioners at the City Hall on Thursday evening to explain the cause of their failure to comply with the law.

The Strongest Brick Walling.

A brick of average quality requires a pressure of from 600 to 2,000 pounds and upwards per square inch to crush it, the figures varying in different descriptions of brick, and being as high as 4,395 lbs. in hard burnt facing bricks. Brick walls and brick piers, if properly built, will bear very heavy weights, as will be seen from these figures. The strength of a wall is not dependent, however, upon the strength of its bricks alone, but upon three distinct conditions: (*a*) the manner in which the bricks are arranged; (*b*) the strength of the mortar, and (*c*) the strength of the bricks. Each condition is of considerable moment, and considering that brick work is rarely weighted with a load even approaching one tithe of the crushing weight, it is obvious that the first and second conditions are of the greatest importance.

The object of mortar in a wall is simply to form an adhesive material between the bricks of which the wall is composed. In has no function beyond that. Good mortar is certainly not so strong as good brick, and the mortar joints should, therefore, be kept as thin as it is consistent with the perfect adhesion of the bricks. The current custom of making thick mortar joints has the effect of considerably weakening the brick work and should be discouraged.

One of the strongest forms of bonding in brick walls is that known as "English bond," in which the bricks are arranged in alternate courses of headers and strethers. The small amount of cutting required, the avoidance of two verticle joints over one another, and the large number of headers in the wall render it very strong and suitable for heavy work, in fact, English bond, if properly carried out, conforms very nearly, indeed, to all the requirements of good bonding.

In thick walls of heavy buildings, such as warehouses and structures of the same class, the strength of the bond may be improved, to some extent, by arranging every fourth course of bricks diagonally, forming what is sometimes termed "diagonal bond." The advantage is, that a lap of four instead of two inches is obtained. The elevation of this bond is the same as that of ordinary English bond. The header courses are the ordinary header courses of English bond arranged alternately with stretcher and diagonal courses. The diagonal courses are arranged alternately in opposite directions. One disadvantage of this arrangement of the bricks at an angle is the fact of its leaving small triangular spaces on each side, which tends, to some extent, to weaken the wall, these spaces should, however, be carefully filled in with pieces of brick and not be allowed to be left simply filled in with mortar.

It often happens in the construction of brick buildings that the necessity arises to form a wall of the greatest possible strength with the smallest amount of materials. This will occur when very high buildings are centered up, on one or more sides, on to piers, as in the case of the many large structures erected on Broadway and other of the principle streets of New York City, where the lower portion of the building is designed for a store and every inch of space is valuable. The most economical form of wall, or pier, for such a purpose would be the diagonal bond and if it were carried out with the best hard bricks and good cement mortar, it would probably form the strongest brick wall that could be built. To further increase the strength hoop iron bond should be used, being laid one tier in every fourth course in height and one row to every half a brick in the thickness of the wall. The iron should be prevented from oxidation preferably by dipping into tar, be roughed or jagged at the edges to form a grip on the cement and be lap-jointed and riveted at all angles.—ARSUS in *Building*.

According to a published statement emanating from the United States Treasury department the population at the ending of the last fiscal year was 58,420,000 and the net revenue for the year was $336,439,727, being a per capita of $5.76, or .08c. greater than the fiscal year of 1885. The expenditures were $242,483,138—a per capita of $4.15, or .24c less than that of the previous year.

—A safety-device for cable roads, where-by the cars may be stopped very suddenly, consists of one or more fixed or stationary cables supported above and distributed in the direction of the length of the road-bed, combined with one or more sheaves supported below the car and adapted to pass under said cable, with a gripping-device to clamp the cable, thereby stopping the motion of the car. Louis Goddu, of Winchester, Mass., is the patentee.

Building Permits.

A 2-story stable, 15x25 ft. Queen st., above Pulaski ave., to Mrs. Rittenhouse, Germantown.

Addition to factory, Wood, above Twenty-second st., to Frank W. Tweed, 2630 Brown street.

Addition to building, 37x20 ft., Chestnut, above Broad st., to Charles McCaul, 20 North Eleventh street.

Nine 3-story houses, 14x27 ft., Twenty-sixth, below Federal st., to Michael Whelan, 1223 Snyder avenue.

A 2-story house, 18x48 ft., Melrose street, above Frankford ave., to D. C. Schuyler, 2327 North Sixth street.

A 3-story storehouse and 1-story shop, 18x46 ft., Carlisle, above Dauphin st., to same party.

A 2-story fire house, 25x86 ft., Twenty-seventh st., above Thompson, to Amos W. Lunn, 4767 Garden street.

A 2-story house, 18x51 ft., Sumac and Wetherall sts., to James H. Boone, Manayunk.

A 3-story house, 18x45 ft., Fitzwater and Juniper sts., to Hailbach & Auchtere, Twenty-sixth and Thompson streets.

A 3-story store, 18x59 ft., Hunting Park ave. and Mideval st., to McLaughlin & McNamara, Clinton st., Nicetown.

Two 2-story houses, 15x31 ft., Ontario, above Rorer st., to Joseph Parkes; 2639 Germantown avenue.

A 4-story factory, 44x194 ft., Nevada, above Tenth st., to Carey Brothers, Tenth and Colorea streets.

A 2-story back building, 11x11 ft., 1217 Oxford st., to B. H. Smith, 520 Buckley street.

A market store, 12x16 ft., Orkney st., above Lehigh ave., to John D. Smith, 2806 Orkney street.

A 2-story house, 16x30 ft., Garnet, above Somerset st., to John Cairns, 2739 Kensington avenue.

Thomas Matthews, 2334 Hancock st., addition to house, northeast corner of Howard and Diamond streets.

B. H. Smith, 520 Buckley st., 2-story back building, 1217 Oxford street.

John D. Smith, 2806 Orkney st., 1-story store, north side Orkney st., between Lehigh ave. and Somerset st., 12x16 ft.

John Cairns, 2739 Kensington ave., 2-story dwelling, east side of Garnet st., between Somerset st. and Hart lane, 16x30 ft.

Valentine Lent, 2724 North Front st., two 2-story houses on east side of Front st., north of Alleghany ave., 14x38 ft.

Robert Osborn, 2215 Vine st., alterations to five houses on east side Thirty-sixth st., north of Aspen street.

William F. Fogg, 1604 Vine st., alterations and additions to house 1312 Oxford street.

James B. Carey, 1630 Venango st., 3-story building on east side Germantown road, above Butler st., 18x70 ft.

Joseph Bird, 1106 Hunter st., alterations in house, east side Fifteenth, above Chestnut street.

John C. Kelly, 1218 Brown st., a second-story addition to store, on S. side of Arch st., above Ninth street.

T. Frank Miller, 544 W. Lehigh ave., two dwelling houses, S. W. cor. Fifteenth st. and Alleghany ave., 22x56 ft.

Michael Schwartz, Paoli ave., above Washington st., Roxboro, 2-story factory, 58x64 ft., on Paoli ave., above Washington street.

A. A. Stewart, 2210 Oxford st., carriage-house, 2210 Redner street.

A. Rittenhouse, Germantown, 2-story stable on Queen st., between Pulaski ave., and Morris st., 15x23 ft.

Frank W. Tweed, 2630 Brown st., additions to factory on Wood st., above Twenty-second street.

Michael Wheelan, 1223 Snyder ave., nine houses, east side Twenty-sixth st., below Federal st., 14x27 ft.

D. C. Schuler, 2327 N. Sixth st., 2-story dwelling on Melrose st., above Frankford road, 18x48 ft., and 1-story dwelling and workshop at Carlisle and Dauphin streets, 18x46 ft.

Amos W. Linn, 4767 Garden st., Bridesburg, 2-story fire-house on Twenty-seventh st., between Thompson and Master sts., 25x86 ft.

John B. Loflin, 3512 Filbert st., 2-story house on Centre st., above Thirty-sixth st., 14x28 ft.

James H. Boone, Cedar st., Manayunk, 2-story building on Sumac, near Wetherall, 18x51 ft.

Hodbock & Aucten, Twenty-sixth and Thompson sts, 3-story dwelling corner Fitzwater and Juniper sts., 18x45 ft.

McLaughlin & McNamara, Clinton st., Nicetown, 3-story store and dwelling on Hunting Park ave., corner of Midvale st., 18x59 ft.

Joseph Parkes, 2639 Germantown ave., two 2-story dwellings on Ontario st., near Rorer st., 13x31 ft.

A two-story store, 17 ft. by 50 ft., Sixteenth and Tasker sts., to George H. Wagner, 1542 S. Sixteenth st.

A two-story back-building, 11 ft. by 14 ft., 237 S. Third st., to Samuel P. Glenn, 2039 Evergreen st.

Two two-story houses, 17 ft. by 42 ft., Fairhill and Somerset sts., to James Hood, 212 New st.

Fifth story addition, 17 ft. by 180 ft., 1829 Market st., to John Wanamaker, Thirteenth and Market sts.

A seven-story building, 100 ft. by 200 ft., Fourth, above Walnut st., to George F. Payne & Co., 1211 Sansom st.

A three-story house, 18 ft. by 59 ft., Seventh, above Norris st., to Conrad Bachle, 1711 Fawn st.

Two-story addition, 50 ft. by 30., Montgomery ave., and Sixth st., to C. A. Blessing, 1747 North Sixth st.

James W. Carson, 3611 Locust st., six 3-story houses, Locust st., between Thirty-seventh and Thirty-eighth sts., 18.3x60.

Miss Cahill, 1528 S. Twelfth st., one 2-story back building, 12x14.

M. L. Heis, 712 W. Cumberland st., eleven 2-story dwellings, E. Darien st., between Lehigh ave. and Huntingdon st., one, 13x26; eight 14x26 two, 15. 3x26. Also alteration front east of Ninth st., between Lehigh ave. and Hunting-don st., 15.6x46.

J. Grass, 450 N. Twenty-first st., alteration at 145 S. Second st.

Thomas C. Nesbit & Son, 425 Locust st., third story to back building, 1121 Chestnut st., 16x36. Also, front alterations to 3204 Race st.

H. C. Martin, 521 Diamond st., back building, 915 Randolph st., 12x15.

Charles Phipps, 1728 N. Thirteenth st., addition to 1203 Oxford st., 12x12.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National ank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J , June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—A Jury of view on Wednesday filed a report making an award of $14,500 in favor of Cornelia V. Tobler against the Schuylkill River East Side Railroad Company. The railroad takes about a quarter acre out of a wharf property belonging to Miss Tobler, north of Vine street.

—A Jury at Norristown on Wednesday awarded E. Channing Potts $5454.41 against the Pennsylvania Schuylkill Valley Railroad Company for crossing and occupying his land. Counsel for the railroad company entered the usual motion for a new trial.

—The corner stone of the Theological Seminary was laid Thursday at Forty-third and Chestnut streets. The Seminary building will have 40 feet on Forty-third and 128 feet on Ludlow street.

—The Pennsylvania Railroad Company has employed upon its system 77,000 cars and yet cannot handle the buisness offered it for the want of transportation facilities.

—The personal estate of the late Lawrence S. Pepper is appraised at $270,187,70, and of Henry Walton at $61,207.

—Jarndyce vs. Jarndyce had another hearing last Thursday. The facts elicited were that, under the contract in 1884, the price paid for coal was $4 per ton. while under previous contracts the usual price had been $6. President Jackson emphatically denied any collusion or corruption on the part of the Gas Trustees in any of these coal contracts. The next hearing will be on November 3.

—On Monday last a deed from William Walter Phelps to Harriet Stanwood Blaine, wife of James G. Blain, dated May 29, 1885, and conveying the Blaine mansion on Dupont Circle, was placed on record at Washington. The consideration is $60,000.

First Use--Then Beauty.
Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading. It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. we repeat we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $3 up, and BOOTS AND SHOES FOR LADIES from $2.50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and attentive reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.
If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, in order that they may be exchanged. Repairing of all kinds at moderate prices.
THE DAY SEWED SHOE MFG. CO.
Under the management of W. W. Apsley.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the *Works are under contract with us* to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under *this Brand or a Private Brand.*

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 43. PHILADELPHIA, MONDAY, NOVEMBER 1, 1886. PRICE 15 CENTS

Items of News.

—Hugh O'Donnell left an estate amounting to $10,000.

—Joseph L. Caven, Esq., has returned from his European trip.

—The gas Trust met on Tuesday afternoon, and transacted some trifling items of business.

—The late Annie C. Coleman left an estate worth $86,659 35; Samuel Bettle, $125,837 27, and Eleanor Cuyler, $44,235 41.

—The Lehigh Avenue Passenger Railroad Company want to lay a double track on Lehigh avenue from Second street to Fairmount Park

—According to the allotment of the anthracite coal combination 3,250,000 tons of coal is to be mined for November against 3,500,000 for October.

—The Metropolitan Rail Road Company want the privilege to construct an underground railroad from this city to Chelten Hills, Montgomery county.

—The impeachment farce is gradually edging along to its last act, the public understand what is coming, and would as lief see the thing done quickly and done with it.

—After the Girard Trust has erected its companion building to the present big iron front at Eleventh and Market, that part of Market street will begin to look like a city.

—The Committee on Distribution of the Gas Trust have acted favorably upon the application for a gas main on Belmont Avenue. above Elm Avenue, which will cost $2500.

—The September statement of the Northern Central shows net earnings, $159,785.55, a decrease as compared with September, 1885, of $67,491.23. For the nine months of the year, net earnings $1,379,654.46, a decrease of $182,345.08.

—Nearly forty suits are now pending against the Pennsylvania Schuylkill Valley Rail Road for land damages, verdicts amounting to several hundred thousand dollars have already been given against the company.

—On October 23d, the United States Treasurer held in United States bonds to secure a national bank circulation, $249,820,550; to secure public moneys on deposit in the Treasury, $20,105,900; to secure circulation during the week ending October 22, $1,390,250; to secure circulation withdrawn during the week ending October 22, $5,298,000. National Bank circulation outstanding — Currency, $301,931,293; gold notes, 296,129; receipts of national bank notes for redemption during the week as compared with the corresponding period of last year were as follows: 1885, $1,899,000; 1886, $1,387,385; receipts Oct. 23 $225,000. The amount of lawful money on deposit in the Treasury for the redemption of notes of banks redneing circulation is $30,058,100; banks in liquidation, $44,678,130; failed banks, $1,214,578; making a total fund of $75,950,808.

—The Frankford improvement association proposes to do some good work in the matter of public improvements in taxation. That end of the City is in need of just such an organization.

—Sooner or later we will have a new railroad between Philadelphia and Pittsburg, another line has been surveyed from Shippensburg, two other lines have also been partially surveyed. One of these is from Ashland.

—The Land Title and Trust Co. 621 Chestnut street, has settled upon the sight of the large double building 608-10 Chestnut street. This will be a fine location, and it will be interesting to know what was the amount of the check that paid for it.

—The will of Charles Bæder, Sr., of the firm of Bæder, Adamson & Co., as modified by its codicils, directs the trustees of the estate to pay $1250 monthly to his widow during her life, gives her the use of his real estate during her life and bequeaths certain real estate in New Jersey and most of his personal property to her. His children are also provided for. The estate amounts to over $1,000,000.

—The *Press* of last week says: To say that Philadelphia is so thoroughly under the thraldom of the street railway interest that all attempts to free it are hopeless is a most humiliating confession and evinces as well a cowardly acquiescence in a most disgraceful condition of affairs. The street railway companies of this city are, as a rule, arrogant, avaricious and overbearing, but they are not invulnerable. If they control the next Legislature it will be the fault of the people of Philadelphia, who are given the data necessary for their guidance on election day if they wish to keep the street railway representatives from going as their representatives to Harrisburg.

—The managers of the Philadelphia base ball club are having their grounds at Broad and Fifteenth improved under the supervision of Jones J. Geery architect and civil engineer. The grand pavilion at the corner of Fifteenth and Huntingdon streets will be two hundred and eight to two hundred and nine feet long on Huntingdon street, and two hundred and eight feet on Fifteenth street. Broad flights of easy ascending stairs reach to the top of the rear pavilion. There will be seating capacity for five thousand people. There will be fifty-five private boxes on the roof, facing the field. Three large boxes will be erected for representatives of the press and for Directors. Wrought iron trusses are used in spands of thirty-seven feet and fifty seven feet.

The grounds will be enclosed with panelled-stretcher brick walls, laid in red mortar on Huntingdon and Broad streets, and the other portions enclosed by panelled wooden fences, surmounted at intervals with banneret standards. Entrance to the open seats and to the carriage sheds will be located at the corner of Broad and Huntingdon streets, and at Lehigh avenue and Fifteenth street.

All the entrances will be emphasized by prominent and well-designed portals.

The distance from "home plate" to "catcher's fence" is 90 feet; from "home plate" to "left field" fence is 400 feet; to "centre field" fence is 345 feet; and the "right field fence" 295 feet. The grounds are being carefully graded, underdrained and well sodded. The entire work will be completed as rapidly as possible, and early in the spring the new grounds will be opened.

—The electric pneumatic Company will shortly introduce a new system of transmission of packages and messages. The laying of the pipes begins this week. The speed will be two miles a minute. Terminals will be placed wherever they will bring business. At main stations messengers will be on hand to receive and deliver packages. In a short time package tubes will be put in operation. They will be from eighteen to twenty-four inches in diameter. The message tubes will be two and one half inches in diameter. Each person can drop his parcel into the tube, and it will be received at the other end and delivered. Automatic arrangements have been devised by which whistles can be blown at patrol boxes calling for patrolmen.

The invention is that of Henry Clay, of this city, originator of Clay's telephone. John C. Scott, of John Scott & Son, coal shippers, is president of the company. The streets through which tubes will be laid are Walnut, from the Delaware to Tenth; Fifteenth, from Carpenter to Fairmount Avenue; Market, from Fifteenth to the Schuylkill; Front, from Spruce to Callowhill, and Fourth, from Spruce to Library. The main office will be at 422 Library street, where a constant stream of air will be sent through the pressure tube, and a vacuum created in the vacuum tube by a patent pump instead of by a monster fan, as is the custom with pneumatic tubes at present.

—A plaintiff in a suit in Judge Gordon's suit last week obtained a verdict for $228.74 for the improper shoeing of a horse.

—The time will come when the City will own and operate its own street car lines, and pay its expenses by the profits accuring from the traffic, or else the cost of riding will be reduced considerably.

—A Mobile correspondent write to a City paper, calling upon Northern ship-builders to come there and start a ship-yard. No doubt there is everything convenient for ship building near Mobile, but industry has its peculiar notions.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, NOV. 1, 1886.

LOOK out for an advance in the price of window glass, the manufacturers are organizing a combination throughout the whole country.

BUSINESS thrift—lease the Gas Works for a million dollars per year when, if properly managed, the plant could be made to yield a net profit to the city amounting to double that sum yearly.

IT IS high time for the real estate owners of this city to take a hand in city politics, real estate owners and householders working together with a view of securing the best possible results from our city government could make themselves felt in such a forcible manner that lasting benefits would soon follow.

IF the members of Councils want to monkey with something, they should turn their attention to their own individual business enterprises, keep their hands off the Gas Works, and under the new order of things the institution may become something better than a nest for the impecunious friends of Ward politicians.

INVOLVING, as it may, at least a quarter of the entire population of this city, the probable lock-out of the textile workers, owing to the troubles at Troth's Mills, is viewed with considerable uneasiness. There is no question that the Knights of Labor have lately assumed too much of a dictatorial spirit, and if not met with organized opposition there is no telling where their aggressions may end. The manufacturers seem determined to settle the question of the management of their establishments, and it is but just that they should do so. It is simply suicidal for a manufacturer to continue under the present condition of affairs; it is impossible to form any definite plans for the future, and his entire working force is liable to leave him in the lurch, without a minute's warning, or without a shadow of justice in its demands.

That we are entering upon an era of national prosperity there is no doubt; but if our manufacturing interests are to be hampered by the churlishness of the workers the sooner the lines are severely defined the better it will be for all. The question as to whom an employer shall employ can never be settled but in one way, and that must be against labor combinations every time.

THE experience of house-holders heretofore has been that every time the price of gas has been reduced, the quarterly bills have increased. Heaven help the gas consumers if the works are leased, for no matter how low the price agreed upon at which gas is to be furnished to consumers, the old cow can be made to give just as much milk while in the hands of the lessee as she ever did.

EVERY one of the pre-eminently philanthropic syndicate, improvement companies and what-nots with a single exception, who want to lease the Philadelphia Gas Works, take care in their stipulations to name a good round price, at which they propose to furnish the dear people of this city with gas. Those who know best the earning capacity of the works if conducted on straight businesss principles are behind these schemes, and there is big money in the lease to the party who gets it.

Councils should say at once, that the Gas Works are not to let. Try the works under the Buillitt bill, and if properly managed they can be made to make money almost as fast as the United States Mint.

IT is a burning shame that rascally contractors can with apparent impunity, and under the very eyes of city officials who are paid by the city to look after its interests, ignore the specifications and requirements of their contracts, and with inferior work and materials make it impossible for honorable men to compete with them for work to be done. The Citizens' Municipal Association through Mr. Addis, its efficient representative is doing all it can do to prevent imposition and fraud upon the city, but it is simply disgraceful that a committee of citizens must do the work that city officials are paid to do. Mr. Addis was right in reporting the cement used on the new foundation for Market Street Bridge, and if contractor Malon's threat to slap him in the mouth, is typical of the man, he should be made to understand that his relationship with the city is simply one of business, and that if he cannot do the work as it should be done and with proper material, it would be better if he threw up his contract at once.

IF THE owners of property who contemplate the renewal of their old brick sidewalks because flagging is expensive would stop to think that concrete walks at an intermediate cost between brick and flagging are infinitely preferable besides being more durable than brick and equal in every other respect to the best flagging they would certainly give concrete the preference. There are several kinds of artificial stone walks that commend themselves to house owners, all have stood the test of years and all have been tried in different parts of the city and have given perfect satisfaction. The Keystone Artificial Stone. The Cinderlithic, and the Granolithic are perfectly reliable and should be given the preference against brick every time.

WHAT A travesty on city government our Fire Escape law seems to be. It is not only ignored in several hundreds of cases where the screws should have been put upon the delinquents long ago but the city itself, deliberately and willfully treats it with contempt. If a mill owner had erected such a miserable apology for a fire escape as that of the Ringgold school house and an accident had followed the indignation of our citizens would have been fearful. In this case the lives and safety of 800 children are involved and yet our Fire Commission and School Board are too greatly pre-occupied with politics or entirely too indifferent as to the sad consequences their neglect might have caused to remedy the evil. The *Press* is entitled to the commendation of our citizens for its enterprise in exposing the Ringgold schoolhouse death trap fire escape.

—The Board of Trustees at the Norristown Insane Asylum are considering the advisability of establishing a pumping station to supply that Institution with water at a cost of fifty thousand dollars. The Norristown authorities will probably ask for an appropriation for four thousand dollars for the erection of suitable building for the confinement of indigent insane persons, now confined in alms houses and hospitals, and an addition of twenty thousand dollars will be necessary to complete the excess buildings now being erected.

The Elevated Road.

There ought to be a public meeting of the citizens of Philadelphia during the next two weeks to let our subservient boss ruled Councilmen understand that the Elevated Railroad project cannot safely be defeated. Mr. Hammett's report, which is characteristic of Philadelphia's conservatism, says what was to be expected—that the people along the built-up portion of the road are opposed to it. Their grandfathers were opposed to the introduction of gas in our streets fifty years ago, lest it would blow the town up. He asks that the Legislature legislate on the subject, as though the great city of Philadelphia had not sense enough to decide for itself whether it wanted such a system. We must go and ask a parcel of backwoods third-class lawyers what we want and what they will allow us to do. It is a wonder Hammett and his committee don't ask the Legislature for permission to eat breakfast. He admits rapid transit is a good thing, fortunately. The better way to have disposed of this question would be to say, "The surface roads and our political bosses wont let us favorably report a bill, therefore we report unfavorably," and sign it "your obedient dogs."

But there is a little virtue left. A minority report was presented, which goes over all the ground in the following masterly manner:

"It is further required to elevate its tracks over the entire distance from Tacony and Front and Allegheny avenue, and to depress that part of its line between Front and Allegheny avenue and the Montgomery county line so as to cross no street either now or hereafter opened at grade, and where its line crosses any street, either now or hereafter opened, it is required to construct bridges at its own expense for the use of the city.

"A provision has also been inserted, prohibiting the company from using any part of the sidewalk for stairs to the road, but requires that the road use private property. To prevent any probability of the projected road being used as a freight road or as a connecting road for any of the great lines, two provisions are incorporated in the ordinance, one prohibiting absolutely the transfers of freight and the other establishing a gauge for the tracks too narrow to permit any other company's cars to go over them.

"In addition the company is not permitted to charge more than five cents fare at any hour, day or night. Every restriction that was suggested was freely accepted by the representative of the company; and the undersigned feel that, having had the aid of the city's law officer and the Chief Engineer in drafting the ordinance, all legal and technical difficulties have been met.

"It is manifestly impossible to build a railroad through the built-up portion of a city like Philadelphia upon any street without more or less injury to abutting property owners; but it is believed that no street could have been selected upon which so little damage will arise as Front street. The street is for almost its entire length given up to business, and for a considerable distance occupied by steam railroad tracks and large warehouses; but apart from this, if the people of Philadelphia are to have rapid transit facilities, some property must be more or less damaged, and no better street for the purpose has been suggested than Front street.

"Private property holders are amply protected by the provisions of the law, which require the company to enter security to pay any damage to property, before any part of the road is constructed in front of the property. The private interests may be safely left to the careful guardianship of the courts.

"In conclusion, we repeat that the demand for rapid transit has grown to be one of the most urgent now before the people. An unnecessary waste of time in going to and returning from business is a deprivation that is protested against by nearly every citizen. Philadelphia has the right to demand of the local government that every facility and comfort enjoyed by the citizens of another city shall be equally enjoyed here.

"Elevated railroads, under proper restrictions, have been demonstrated to be the most agreeable and convenient mode of city transit, and we believe the citizens of Philadelphia demand that when an organization containing, as the Philadelphia and Northeastern Railroad Company does, the names of citizens identified with the greatest and best interests of the city, asks permission to construct such a road, and accepts all the restrictions suggested by members of Councils, the City Solicitor, the Chief Engineer of the city, such permission ought to be granted. We, therefore, report the accompanying ordinance with a favorable recommendation."

This is a vital matter. Councils will play into the hands of the opponents of the new road unless watched—in fact, unless hounded into a performance of their duty.

The Dirty Schuylkill.

What is the reason that Chief Ogden has not notified the people of Philadelphia that we are on the verge of a water famine? The people may find some day that there is no Colonel Ludlow at the head of the Water Department. The Schuylkill is in a filthy condition. A canal boatman said last Thursday it was all he could do to get through the canal for the slush and filth. Weeks ago attention was publicly directed to the condition of the Schuylkill in the neighborhood of Norristown.

Let us restate a few facts. There are four grave nuisances there. The first is Stony Creek. For eight months in the year not a drop of water flows over the dam at Elm street. When the rise comes, the accumulated refuse is rushed into our drinking water. The second source of pollution is Sawmill Run. The stream is dammed up at Heebner's meadow. Volumes of waste dye pour into the water constantly. A long dark line of pollution is distinctly traceable. Then the film of oil not far from Hemmer's Oil Works, shows there is something wrong. The sewage of St. Joseph's Protectorate, or Sandy Hill, is added to all the rest. The people of Conshohocken are particularly concerned over this.

A drain was to have been laid down Franklin street to carry off this impurity, but the work has not been done. It does not extend to the Schuylkill, but ends 106 feet short of the river. The sewage flows out the meadow until a friendly rise of water carries it into our drinking water. The people near the neighborhood of Conshohocken and Norristown would be satisfied to have the refuse matter properly deposited in the river, but what about Philadelphia? Of course the distance allows a precipitation of the offensive matter, but it does not end here.

This subject has some connection with the subject of low water. The next rise will bring a large percentage of these accumulated impurities in suspension in the water, for drinking and domestic purpose generally. Such water is hardly fit to wash streets with.

It is useless, utterly useless, to call attention to these facts. The public are waiting for some epidemic to arouse them to the danger that surrounds them. No efforts are being made, at least none commensurate with the magnitude of the evil to be remedied. What more is to be done? How many more days will it be before our reservoir will show the effects of low water? Pumping has to be very carefully done even now. Of course the Chief of the Water Department expects a waterfall to save him from the effects of his apparent indifference.

W. W. GOODWIN'S paper on gas statistics read last Thursday before the American Gas Engineers Association showed that there are 971 gas companies in the United States that 592 manufacture their gas from coal and 296 under various patents. In Canada 24 companies manufacture from coal and 16 from other processes. One company manufacturing gas from coal with an output of 11,000,000 cubic feet, recived 75 cents per 1000 feet; 26 companies, with an output of 1,879,900,000 cubic feet of coal manufactured gas; received $1.50; 6 companies manufacturing by other processes, with an output of 900,000,000 cubic feet received $1.50, and 45 companies manufacturing from coal, with an output of 468,000,000 cubic feet, received $2.25 per 1000 feet. The output of 495 coal gas companies was 17,502,305,000 cubic feet, the income from which was $30,452,710; 188 companies manufacturing by other processes have an income of $10,291,000 from an output of 5,554,000,000 cubic feet. The average price of coal gas is $1.73 99-100, of gas manufactured by other purposes, $1.81-2-10.

In the matter of public lamps 1056 were receiving gas at a cost of 1 cent per hour, 100 at 1¼ cents, 142 at 1 1-16 cent and 100 at 1¼ cents; 6000 lamps ranged from 1 to 1 4-7 cents per hour; 104,000 lamps realized $3,319,287, an average of $30.17 per lamp. The output of gas by 517 companies manufacturing from coal required 1,908,611 tons of coal. The output of 206 companies using water and other processes required 178,563 tons of anthracite coal. The capital required to run all the gas interests amounts to $261,000,000, the income from which is about $50,000,000.

The Local Lumber Market.

White pine is coming in fast. One firm is averaging 20 cars weekly—not much in itself, but we have 20 or 30 firms who call themselves large buyers of white pine. Western men are trying to put up prices, and we are quite willing to assist them in this commendable effort. White pine could be, and if they will help us it will be, 50 cents higher. But this is not enough. The out of town white pine trade is particularly good at this season, and with all the activity there seems to be very little in the yards. So send on your pine, but be cautious with prices. Cutting doesn't pay. It won't sell an extra million feet. While on this subject it would be well for Westen shippers so to ship stuff as to give no good cause for complaint here.

The hemlock demand is very heavy, and the trouble over cars is at an end. The trouble now is to get it hauled away fast enough. The city delivery capacity is taxed to its utmost. Prices are strong; a little further advance will be made. More yellow pine is arriving. The ship and car builders and the railroad buyers have bought quite heavily of yellow pine. Some exceptionally large contracts have been placed for stuff for winter work. Ties are also under contract for large quantities. A great deal of heavy stuff has been used by the Baltimore and Ohio people along the Schuylkill for bulkheads and wharves and piles. Bulkheads have been built at Ellsworth, Lombard, Race and Callowhill streets. North Carolina and Florida lumber was principally used. About 350,000 feet of hemlock were used for piles. Taking things all through there is a great deal being done, and with good management better prices can be realized. The fall and winter season will be active. The wholesalers are nearly all exceeding last year's records. The retailers once more begin to feel that they are of some use in this sinful world.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

BUILDING ASSOCIATIONS.

The omission of a building association to record its charter, does not render it absolutely void.

A member of a building association, who for years has enjoyed the advantages and profits of the business, will not be allowed to go back and question the legality of the organization.

DEEDS.

The intention of a deed is the governing rule of construction, except that it requires formal words of limitation to convey an estate of inheritance.

Where the language of a deed is defective, but the intention of the party executing it is plain, it will be so construed as to give effect to that intent.

A reservation in a deed is to be construed most strictly against the grantor.

ESTATE FOR LIFE.

As between tenant for life and remainder man, the former is liable for interest on municipal assessments for street improvements, and the latter for the principal at the death of the tenant for life.

A tenant for life is bound to keep down the encumbrances.

GROUND RENT.

A ground rent created prior to the Act of 1850 cannot be extinguished except by agreement.

Under the Act of April 25, 1850, § 8, an action of covenant for arrears of ground rent lies against a Sheriff's vendee of the premises out of which it issues for arrears accruing during his title, though he be a mere dry trustee, without personal interest; the act of June 12, 1878, has no retrospective operation.

LANDLORD AND TENANT.

Where a lessor covenants to repair, an entry by him to repair a damage by fire does not constitute an eviction which will suspend the rent.

Where a tenant is evicted by title paramount from a portion of the demised premises, but continues to occupy the residue, he is liable to the landlord in an action for use and occupation for such proportion of the rent as the value of the part retained bears to the whole.

MORTGAGE.

An absolute deed and separate defeasance, if the latter be not recorded, amount only to an unrecorded mortgage as against subsequent lien creditors.

STREETS IN PHILADELPHIA.

The written consent of a majority of property owners is not requisite for the paving of a street; that provision of the Act of 1864 only applies to sewers.

The City may ratify a contract for a street improvement which is invalid for noncompliance with existing ordinances, and such ratification will make it binding on the property owners; they are not parties to the contract.

TAXES.

A mortgagee in possession is liable for the current taxes; he is deemed to be the owner *quoad hoc* (with respect to this).

VENDOR AND PURCHASER.

Want of title in the vendor cannot be set up as a defence to an action to enforce the lien for purchase money.

F. R. SHATTUCK,
Attorney at Law,
58 S. Third St.

Communications.

PHILADELPHIA, Oct. 25, 1886.

Editor Phila. Real Estate Record:

In a communication dated at Wissahickon Sept. 15th, and signed J. C. Worthington, I find that the author of said communication is agreeing and disagreeing with your correspondent's (Brick-Bat,) communication of Sept. 6th. I have not the least objection to the course of this correspondent as long as he disagrees with himself.

In his first letter he finds fault and objects to the opinions of others, but steers clear of giving his own views. In his second attempt he upholds his first, and advises Brick-Bat to agree with him. This, Mr. Editor, Brick-Bat will not consent to do. I may, had I not seen as many of those distant places, which are the first, at all times, to be described as charming by the ever nervous fault-finder, who invariably would have people believe that black is blue.

He claims no liking for brick fronts in his latter letter, while in his former, in a long-drawn sentence, partly borrowed, he exclaims with ridicule a dislike for our Public Buildings, and gives off the effluvia of one whose sole training, with regret, has not been on our Public Buildings, or on the facades of our distant cities, but on those disagreeable brick fronts which he claims line our streets. He claims that the American Institute of Architects has accomplished wonders, but does'nt single out any. He claims the American architect has diffused seed to such an extent that 19th century architecture is revolutionized, and while Philadelphia and her architects have been sleeping and forgotten, distant cities were taking the advantages which were offered and making use of them. According to this, Philadelphia must be a place where architecture cannot be learned or studied. Indeed, Mr. Editor, I would be sorry if this was true, as I feel a deep interest in the future of the architectural profession in this beautiful city, Philadelphia.

I don't think your correspondent believes this himself, as he gives praise to some rural-architectural efforts which are to be seen I suppose, on the line of his daily travels.

Not wishing to trespass on your pages, I desire to close with an advice to "Hitting-All-Around," although I have strongly hinted one already. Don't be fault-finding. Come out plainly in your next letter. Tell the readers of the REAL ESTATE RECORD what in our beautiful city you admire and what you dislike. Give names and locations, and don't give any more schoolboy's compositions.

BRICK-BAT.

OCTOBER 25, 1886.

Editor Real Estate Record:

Having been a reader of your valuable journal since its inception, and having enjoyed the many articles on real estate and building which have appeared from time to time, I beg leave to offer a suggestion, and should you feel disposed to grant it, I think it may tend to bring about a change in the architecture of Philadelphia, awaken those who intend building to a correct sense of their undertaking, as well as inform parties of their responsibilities in purchasing properties or buildings, aid in driving out of existence the mode of practice of the present house-row-builders in and about the city, inform the public of the tricks and devices of the real estate humbugs, show up the snares of the quack architects and the various pretenders that live on the varied branches of building and real estate generally.

If you open the columns of this journal for debate on the above topics, I feel satisfied to say you will do our city and people an incalculable amount of good. Let me hear, editorially, your opinion. I hope favorable.

Very respectfully, BRICK-BAT.

BUILDERS' ITEMS.

Building and Real Estate Notes.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National ank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J, June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

—So far five hundred and fifty-nine dollars and fourteen cents has been contributed by the printers of the U. S., towards the fund to build a printers, headquarters in Philadelphia.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

The Building Boom in Germantown.

To say that real estate is booming on the west side of the town, would be stating a fact very mildly. Property near the line of the Chestnut Hill branch of the Pennsylvania Railroad is rapidly increasing in value, especially desirable building sites, which are being brought up by people who are looking about for permanent locations for residences. Some parties who bought real estate in this section last spring at what was considered a high figure in some instances, have realized handsomely on their investments. One gentleman, well known, purchased an unimproved plot of ground last spring for $6,000, intending to erect a dwelling thereon. A few weeks since an offer was made at an advance of over $3,000, which was thought to be too tempting to refuse. Another gentleman, who has dealt somewhat in real estate, secured an unimproved tract of ground for between $20,000 and $25,000, just three times the price the property could have bought for five years ago. Many persons thought he paid entirely too much for the site. However, he improved the ground a little to make it attractive, and a week ago he sold the last of his purchase, realizing over $13,000 on his investment for six months! There are other real estate transactions going on all over the Ward, generally at good figures. On the other side of Germantown avenue, building and real estate transfers are active. On the Boyer estate, lots purchased last spring have been sold lately at an advance of 33 per cent. The same improvement is going on at Mount Airy and Chestnut Hill, house building and real estate transfers being made in every direction. The town is growing in every direction, and it will not be many years before the streets crossing Germantown avenue will be built up, almost solidly, between the two railroads.—*Independent.*

News Items.

—The gross earnings of the Camden and Atlantic Railroad for September were $59,676, and the net earnings, $19,603, being an increase of $957 as compared with the corresponding month of the last year. The gross earnings of the company for the nine months this year were $500,636, and the net earnings, $136,784, being a decrease of $4110 as compared with the corresponding period of last year.

—The gross earnings of the West Jersey Railroad and branches for September were $133,725; expenses, $77,375 and net earnings, $56,350, being an increase of $18,335 as compared with the corresponding month last year. This includes $19,767 gross earnings and $4532 net earnings of the West Jersey and Atlantic Railroad. The gross earnings of the company for the nine months of the year were $1,077,139, and the net earnings $419,846, being an increase of $25,953 as compared with the corresponding period of last year.

—The statement of the Treasurer shows gold, silver, United States notes and other funds in the Treasury on October 29th, as follows: Gold coin and bullion, $244,255,537; silver dollars and bullion, $186,796,937; fractional silver coin, $26,380,798; United States notes, $39,462,302; national bank notes, $267,784; national bank notes in process of redemption, $2,853,812; deposits with national bank depositaries, $13,682,130; total, $513,699,200. Certificates outstanding—Gold, $85,786,919; silver, $99,781,110; currency, $7,150,000.

Mr. Geo. W. Hancock, President, J. L. Stevenson acted as Secretary. Numerous matters were considered. It was resolved that Real Estate Exchange shall have only for its object, the meeting together daily in a suitable building, to be bought or rented, of real estate brokers and others interested in real estate for the purpose of buying and selling through each other real estate and real estate securities, and shall not be authorized to act as agent, attorney, broker or dealer in real estate in the city of Philadelphia.

—Those not directly interested in real estate were requested to retire if they wished, and their money paid in will be refunded, less their pro rata share of the expenses incurred. More or less difference of opinion has existed among the members of the exchange as to its scope. It is believed that harmony has at last been established, and that those that have heretofore been in factious opposition, will now stand together for the realization for the common objects agreed upon. As there was a difference of opinion at the outset, it was necessary to allow those who are dissatisfied with the present purposes of the exchange to withdraw.

—The will of John Hulsema, who left an estate valued at $125,009, was admitted to probate on Friday.

—The stone rubbers' strike of New York involved a loss of twenty five thousand dollars in wages have. They returned to work.

—The Board of Education, of this city, like most of the other city departments, are asking for a large increase for the ensuing year. Last year they got along with $3,806,300; now they want $4,031,000. The salary list alone is estimated at $2,800,000, against $2,750,000 last year. Last year the janitors received $120,000; now they want $134,000. For the salaries of professors, teachers, tutors, etc., in the Normal College, the estimate for 1887 is $99,000, or $1000 in excess of the approtions for 1886.

—The citizens of the Twenty-third Ward have organized an association calling it the Twenty-third Ward Daily Riders Association, for the purpose of strengthening a movement for the construction of an elevated railroad. The consideration of this question comes up again in Councils on Thursday, and the politicians who carry the city of Philadelphia in their vest pocket, chuckle quietly to themselves that they have the thing all fixed.

—General Agent Latta of the Pennsylvania railroad protests strongly against the application of Albert H. O'Brien to lay tracks across Lehigh avenue in the interest of the Reading railroad, which is intended to connect the road with their Richmond branch and their road on Commerce street. It will be necessary to cross the tracks of the river front at grade. The application was refused. The Baltimore and Ohio Company will build a temporary stairway from Chestnut Street Bridge down to Twenty-fourth street.

—The communication of Dr. Wm. R. DeKraft of the Excelsior Gas Light Company, of N. Y., throws a little more light upon the gas question. He writes that if the consumption of gas in this city is rated at an average of 10,000,000 cubic feet per day the total cost of the gas delivered in a year would be $1,200,000. If three thousand million cubic feet were sold in a year at $1.50 per thousand, the receipts would be $4,500,000; at $1.25, $2,750,000, and at $1, $3,000,000. The remaining 650,000,000 cubic feet would go on the supply account of street lamps, public buildings and leakage. By keeping control of the Gas Works the city could not only net in twenty-five years over 100 per cent. more than the United Gas Improvement Company offers, but could save in addition about $10,000,000, which it would have to pay to the lessees for public lighting.

—Mr. Parish states that a reduction to five cents fare would produce a net revenue $2,596,185.72 deducting six per cent. on the bond of debt, an amount equal to $297,723,48, there would be still left for the stockholders $2,298,463.21. Mr. Parish goes on to say:

Upon the stock outstanding this would be a profit of 11.4 per cent. Upon the basis of cost, or amount paid in, the profit would be 21.8 per cent. Despite the "sacrifice," still measurably profitable.

That no question as to the accuracy of my figures may be brought up, I would state that they are the result of an analysis of the reports submitted by these companies to the Department of Internal Affairs and are the subject of easy access and verification.

The method of treating the subject as a whole needs, I suppose, no excuse, as public interest is not concerned with the results in individual cases, demanded the same treatment from, and apportioning their patronage to, all alike.

The conclusion to be reached from the foregoing is, plainly, that the people are not receiving fair treatment at the hands of those whom they have enabled to "wax fat" upon their patronage.

—A Danielsonville correspondent of the *Sun* writes as follows about the shingles removed a few days ago from the steeple of the Unitarian church at Brooklyn: "One of the first pastors of the church nailed them with big-headed wrought-iron nails to the steeple in 1771, and under them General Israel Putnam often has sat and listened to the discourses—rare in these days—giving liberal interpretations of the Scriptures. It is stated also that the shingles were 'rived' by men who afterward fought with Old Put at Bunker Hill. The shingles are remarkably well preserved. Four of them are displayed in the street windows of the *News* office, in this village, and above them is a placard with this reading: 'These shingles were in use on the Unitarian church in Brooklyn 115 years. Just look at the nails.' The nails are fine specimens of old fashioned, pains-taking workmanship. They are smooth, straight and round, with large, thin, perfect heads, and are as clean and bright as at the time they were driven into the steeple. They would be considered to-day too valuable to use in any except the most elaborate and costly work. The shingles, which are of red cedar, are not at all decayed."

The industrial condition of this country is liable to change so suddenly as to discount all previous calculations. A year and a half ago it was scarcely possible to place a respectable order for steel rails. Now the mills are crowded so that if an order must be filled immediately, a part or a whole of the required amount must be obtained in England. Several of such instances have been noted within a short time. After a trade and industrial depression has continued until oversupply of commodities has been entirely swept away, a revival comes quickly. The present activity in railroad building and the resulting demand for steel rails are marvelous when the recent extreme depression in these matters is considered. It is reasonable to expect that a boom in the demand for lumber may not be far behind. After all, demand and prices for commodities depend very much upon the spirit of the times, and not altogether on the quantity that is available at the moment. But the lumbermen could learn a lesson from the rail manufacturers. The latter gauge their output by the demand, while the lumbermen gauge their product by the utmost speed they can put into their saws, day and night.

Mr. W. E. Parish, of Germantown, writes a letter to the *Press* of last Thursday on the profits of the horse car lines as shown by their published reports, which goes to show that their annual profits amount to thirty-one and one-half per cent. on the cost of all the roads. The profits on some of the roads are as high as forty per cent. He states the existing lines of street railways:

Cost to build and equip	$ 9,575,000
Have stock outstanding	20,801,450
For which was paid	10,538,101
Bonded and floating debt is	4,962,058

An analysis of these figures clearly shows that whatever profit the public patronage enables these corporations to divide, it is divided upon an issue more than doubly inflated. The necessity of the people becomes the object of speculation.

But the figures do not rest here. The subjoined statement will show what profit is made upon this inflated enterprise, and also what profit *might* be made if the good of the people were considered. The business of the street passenger railways resulted last year in net earnings, $3,619,451.45. Setting aside 6 per cent. as interest upon bonded and floating debt, leaves a profit upon stock outstanding of 16 per cent. or on the basis of cost, or amount paid in, 31½ per cent. Despite the inflation, a measurably profitable enterprise.

Interesting Bank Statement.

The following is the statement of the average condition of the banks in Philadelphia for the week preceding Monday, October 25, as furnished by the Clearing-house:

	Loans.	Reserve.	Deposits.	Circ.
Phila	$6,514,000	$1,840,000	$5,535,000	$45,000

Produce	360,000	58,000	225,000	45,000
FourthSt	1,144,000	397,000	678,000	.....

The totals for this and last week compare as follows:

	Last week.	This week.	Increase.
Capital	$20,278,920	$20,278,920	.....
Loans	88,386,600	88,043,800	*$342,800
Reserve	23,650,000	23,710,600	60,600
Bank notes	517,300	576,600	59,300
Due fr'm b'ks	7,281,300	6,729,100	*552,200
Due to banks	16,201,300	15,556,800	*644,500
Deposits	70,597,000	70,302,500	*294,500
Circulation	4,920,200	4,765,100	*155,100
Clearings	64,000,182	66,083,620	2,083,438
Balances	9,910,208	9,058,951	*851,257

*Decrease.

In estimating the deposits of the Philadelphia banks the item due to banks should be included with that of deposts. Monday's statement shows the latter to be $70,302,500 and the former $15,556,800, so that the total deposits are really $85,858,300.

First Use---Then Beauty.
Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading. It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. We repeat we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $3 up, and BOOTS AND SHOES FOR LADIES from $2 50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and attentive reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often, in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.
If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, in order that they may be exchanged. Repairing of all kinds at moderate prices.

THE DAY SEWED SHOE MFG. CO.
Under the management of W. W. Apsley.

News Items.

—The foundation of a mission chapel has been laid at Jamesburgh N. J. to cost twelve hundred dollars.

—Fifteen hundred feet of the two thousand feet tunnel under construction by the Baltimore and Ohio Railroad Company have been completed. The work is to be done by December 1st. Six hundred pounds of dynamite loosened one thousand cubic yards of stones and earth last week. Drake and Stratton, the contractors, have one hundred stone masons and brick layers besides several gangs of laborers at work. The road way from the tunnel to the P. & R. Railroad tracks on Pennsylvania avenue on the upper end of the line is all walled in. This will be a fine piece of engineering work when completed.

—It is to be hoped that the experiment of using fire-brick on Oxford from Broad to the Park will be tried. The carelessness permitted in the laying of Belgian blocks, results in an unevenness of surface which makes that pavement in some places not much better than cobblestones.

Some of the textile workers in Philadelphia have been talking for some time of establishing a co-operative company. The capital stock will be fifty-thousand dollars, and stock can be held only by Knights of Labor. A charter will be applied for. The experiment will be a very good one, it will enable the workmen to know something about the difficulties of manufacturing, and the margins of profit.

—A meeting of the stock holders of the real estate exchange was held Wednesday afternoon in the Orphans Court room.

—The inter municipal convention held at Reading last week, will ask the Legislature to divide the cities of the State into four instead five classes. It was agreed to ask in the matter of paving streets with Belgian or other blocks, that the law be changed, so that paving can be done without petition. Also that there be no classification of property for purposes of taxation. Besides several other modifications designed to simplify municipal management.

—Geo. A. Fletcher and the children of Chas. W. Mitchell, in a suit brought against the Philadelphia, Norristown and Phœnixville Railroad Company before Judge Biddle on Friday last for seven and a half acres of land taken by the company at Fifty-third street and Georges and Lancaster avenues together with a quarry at Elm and Montgomery avenues obtaided a verdict for $92,922. This is inclusive of interest from January 1882.

—Edward T. Parker's personal estate is valued at $90,042.33.

—The personal estate of William Jopson has been inventoried at $45,914.51.

—The City Treasurer received on Thursday last $20,997.74 taxes of 1886 from John Hunter, $841.03 from the water department, $724.83 from the City Solicitor, $532.50 from city property, $266 37 from Surveyor, $58.69; from the Health officer, $53.55 from Boiler Inspection, $27.00 from the County Commissioners and $4.00 from fire-escapes.

—A $36,000,000 real estate millionaire has died at Newport, R. I., his name was Smith.

Titles. Trusts. Loans. Deposits. Suretyships.

THE COMMONWEALTH
TITLE, INSURANCE AND TRUST COMPANY,
No. 706 Chestnut Street.

CAPITAL, $250,000.

This Company has a membership (limited to Lawyers, Conveyancers and Real Estate Brokers) of nearly 500. The Stockholders have contributed a large number of Briefs of Title, Maps, Plans and Surveys, thus giving the Company one of the most complete and valuable plants in Philadelphia for Title Insurance.

THE COMPANY WILL

INSURE TITLES to Real Estate, Mortgages, and against Special Risks, such as Decedents' Debts, Mechanics' Liens, &c.

EXECUTE TRUSTS of every description, acting as Executor, Administrator, Guardian, Assignee, Receiver, Registrar, &c.

RECEIVE DEPOSITS, payable on check at sight, and allow two per cent interest.

LOAN MONEY on good collateral at lowest rates and on mortgages, receiving payment in instalments, if desired.

BECOME SURETY for Executors, Administrators, Employes, Clerks, and all parties in fiduciary capacities.

ISSUE SEARCHES, giving a plain Certificate, assuming the greatest measure of liability.

The aim of the Company is to transact a Title Insurance Business through Lawyers, Conveyancers and Real Estate men in such a way and upon such terms as will permit a purchaser of real estate, or an investor in a mortgage, to have not only the security and facility which a Title Company affords, but also the advantage of the care and attention of the particular conveyancer or counsel whom he may select, and that he shall have this additional advantage without additional expense.

Members of the Bar, Conveyancers and Real Estate Brokers are invited to visit the Company's office, **No. 706 Chestnut Street**, where any desired information can be obtained.

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, NOV. 8, 1886.

AN AMERICAN architect has been employed to go to Athens, Greece to erect buildings for the American School of Archæology.

A GERMAN architect of national fame is now visiting this country to study architecture, prior to his departure for Japan, where he has been employed to prepare plans and superintend the construction of a large number of buildings to be erected by the Japanese government.

THERE is no doubt whatever, but that the cost of gas making will decline from year to year. It would be well for us to keep this fact in mind, and not enter upon any arrangement by which it would be made the interest of any party or interest to restrict the natural decline in prices, which is destined to come.

WOULDN'T it be a surprise to our patient and God fearing citizens if in case the lease of the Gas Works is consummated, to see the old time serving members of the gas trust ring, bobbing up serenely as the head and front of the new deal. None know better the earning capacity of the Gas works and stranger things have happened.

NOW that the country has practically expressed itself against free trade and the aggregation of surplus millions in the United States Treasury must go on, why not release the people of at least part of their burdens, by establishing a one cent letter postage. The member of the next congress who will introduce such a bill, will enhance his popularity a hundred fold.

OUR public squares seem to be given over to the depraved and drunken denizens of the surrounding purlieus. The better class of people do not patronize them, but rather avoid them. Fashion may have something to do with it, but it is more than probable that a sense of insecurity and the want of protection from insult, deters ladies with their children from using the public squares for recreation and pleasure.

THE experience of those of our Passenger Railway Companies, which have reduced the fare to five cents, has been not only a decided increase in travel, but also an increase of short riders, the idea of the six cent companies hanging to a war expedient, makes them unpopular with the people and entails upon the companies, the loss of many thousands of dollars that might be picked up from mid-day short riders.

THE question of municipal gas making will likely receive a proper solution during the next twelve months ; meanwhile it would be well to study the progress made on both sides of the Atlantic. Glasgow, Scotland, is served at seventy-five cents. London is served at a trifle of the cost here. Several cities in the United States have gas at a much less cost than we have. A good deal of unnecessary secrecy seems to surround the question of the cost of gas making. The problem is in a transition state.

NOW THAT the working men have shown what their votes amount to, they may hereafter be regarded as a very important factor in politics. George's 67,000 votes in New York City, obtained with very little organization, and almost entirely without the leadership of experienced politicians must awaken workingmen to a realization of what is possible when united and with equal chances.

A workingman's party with a workingman's Candidate for President is an assured-thing for 1888.

THE building of cheap and comfortable houses is attracting the attention of a good many architects, and designs are very numerous. The new houses range in cost from six hundred to fifteen thousand dollars.

Here is an estimate of a $921.00 house.

Excavation	$ 20 00
Rubble Masonry	100 00
Chimneys	26 00
Lumber	250 00
Mill Work	100 00
Tin Work	25 00
Plastering	75 00
Stairs	50 00
Labor	200 00
Painting	75 00
Total	$921 00

The above estimate is based on good work.

THE real estate market of New York is very active. In some sections of the city lots have been bought in batches of from five to twenty to be built upon next spring. Prominent dealers in the Exchange have been bidding against each other at a lively rate. One sale last week was made at the Exchange of four hundred vacant lots along Third, Fourth, Fifth, Sixth, and Seventh avenues from Forty-sixth to Fifty-eighth streets inclusive. An advance of fifty per cent was realised on some lots over prices obtained a year ago. The price realized was $148,000 cash. It is evident from the activity in real estate in New York that an immense amount of building will be undertaken next year.

THERE have been no further developments in reference to the scheme referred to a few weeks ago in this paper to extend the Baltimore and Ohio tracks along Sansom street to Broad. The cost would be heavier and greater than that incurred by the Pennsylvania Company on Filbert street. The houses are more numerous and more costly, and the opposition from the surrounding neighborhood would be more intense ; yet the matter has been considered. The Company has so many improvement schemes on hand, that it can afford to delay this one for a while. Philadelphia would welcome another trunk line terminus on Broad street, and it will eventually be consumated, mean while, the under ground railway system will be established.

THE Real estate market is not very active just now. Several important projects are under consideration, involving the purchase of large tracts of building property, both in, and near the city. Perhaps most of the enterprises next season will be directed to the development of desirable building tracts outside of the city, no less than a dozen are now under way. Cheap travel is a strong incentive to purchase a building five or ten miles away from the city. A prominent real estate authority stated recently that the purchase of small lots for building purposes during the past year has gone far ahead of all former years. Several large properties of ground have been looked at by real estate agents representing combinations of purchasers, and it is probable that some large purchases will be consumated during the next sixty days.

IS IT true that we are likely to have a fire brick age? The experiments being made in

some Western cities are attracting the attention of Eastern architects, builders, and municipal officials interested in the improvement of pavements.

Not enough is as yet known to make a strong case as against the boulders, belgian blocks, or asphaltum pavements. The matter is one which will bear careful consideration. A few years ago several municipalities went wild on the wooden block pavements, and large sums of money were thrown away upon them. When the Belgian block was introduced, it was thought to meet every requirement, now it is found defective as a system. It is convenient however, for tearing up, but the tearing up of pavements will not be necessary much longer. Fire brick can be removed as easily as blocks.

With due respect to Mr. Rudolph Herring and his very elaborate report to Councils we would urgently impress upon Councils the necessity of grappling with the water question in a manly and business like way. The scheme proposed by Mr. Herring to bring water from the Tohickon Creek and Delaware river at Point Pleasant, is an expedient after all, for it is simply an exchange of Schuylkill filth for the filth of both the Delaware and Lehigh Rivers. If there is any preference between the two, it is certainly in favor of the Schuylkill. According to Mr. Herring's own showing it may be necessary to extend the proposed acqueduct to the Delaware Water Gap, owing to the filthy condition of the Lehigh river, if so, where is the necessity for entertaining a proposition that neither affords a remedy nor has the element of permanency about it. An acqueduct to the Water Gap is what we need and to what we will ultimately come.

It is the intention of a good many storekeepers to improve their store fronts this winter, This is a matter in which Philadelphians have permitted themselves to fall behind. Other cities are far ahead of us in window displays. A few storekeepers have taken the hint in time, and have made amends for past neglect, but there is a great deal of room for improvement. Improvements will be made not only on Market street, but upon several parallel streets, and also on streets as far south as South street, and as far north as Columbia avenue.

It is not only necessary to be up to the times with an abundant supply of new and attractive goods, but it is also necessary to display them to the passers-by in elegant windows. Lew S. Cox has given a hint in his beautiful Chestnut street store. Such elaborateness is not necessary everywhere, perhaps, but there is a great deal that could be done, and that ought to be done by our storekeepers to make their store fronts more attractive. The carrying out of forty or fifty fronts this fall will open the way for a more general adoption of the rule.

There is certainly need for immediate reform in the sanitary condition of our public schools. Attention has been frequently called of late to the fact that serious defects exist, which jeopardize the health of the inmates; but thus far, those who should give the matter careful consideration, seem to have not done so.

The report of the medical inspector states that there are twenty-one schools that are scarcely fit for occupancy, or at least which demand immediate attention. Damp cellars and foul gases are two of the chief causes of complaint. It is rather surprising that this condition of things should have existed so long. The defects arose in the original construction of the building and its surroundings. That there is no excuse for the continuance of this evil goes without saying.

A city like Philadelphia, that prides itself upon its good health, ought not to allow such a condition of things as has been set forth. Not only are the sanitary appliances defective, but there are serious complaints made that the requirements for safety in case of fire are far below what they should be. It is to be supposed that the new buildings which are to be erected will be guarded against a continuance of this state of things. It would be easy to say much in the way of denunciation of this neglect, but the fact that it exists is sufficient in itself to call for immediate attention and correction. We are extremely careful in the matter of quarantine, but while straining at this gnat we are swallowing a camel right in our midst.

It is high time that the insurance companies of this country, awakened to a serious realization of the wicked and wanton waste caused by conflagrations that have their origin in sheer carelessness, millions by the quarters, halves and wholes are consumed from time to time, until the aggregate reaches a cool hundred every year hardly without a passing comment, and so the waste goes on from year to year without exciting any great interest further than the temporary depletion of the treasuries of the unfortunate companies.

No effort is made to correct, either by legislation or the rigorous enforcement of healthy protective regulations, this fearful consumption of national wealth, with quiet indifference the loss is paid, and bankruptcy itself seems to fail in arousing our underwriters to a full appreciation of what is needed. No country but ours could withstand this fearful destruction of capital, and when it is considered that most of the many hundreds of millions of dollars that have gone in smoke, might have been saved had the proper precaution been taken, the apathy of the insurance companies is simply wonderful. The entire system of Fire Insurance is radically wrong, it embraces very little if any of the elements of prevention. Its compensation covers but a small fraction of the loss, it yields a profit simply because the earning capacity of the country is so great and the area of insurance so large that losses are distributed. What the country might have been were it not for the destruction of property by fire, no one can estimate. Fire risks should be largely based upon evidences at a much less cost than we have. No insurance should be granted where a high standard of precaution is not stipulated. House to house inspection should be inaugurated and dangerous matches or other combustible articles excluded.

W. M. Lockington criticises the Philadelphia town house, in the last number of *Building*. He refers to the old style houses between Pine and Vine streets, where the original builders took plenty of room in width, depth, and height, many of which because of their careful construction and convenience, are regarded as too good to pull down. He points out that most of these buildings are unsuited to the purposes for which they are now used, such as offices, boarding houses, and the like. His criticism points without saying so to the necessity of apartment houses, or of houses built with modern ideas, for the accommodation of a large class of persons who do not care to rent houses for themselves. He says, very truly, a few apartment houses are a crying need, and that there is not the slightest doubt, that the erection would be welcomed by a comparatively large class of business men, who must live near their work. In this Mr. Lockington is correct. At present it is necessary for a good many of these people who would be glad to live within the limits of the old city, to ride from thirty to sixty minutes from their places of business to their home beyond Columbia Ave., or beyond the Schuylkill. The Street car system makes living possible in those outlying localities, but after all there is urgent need for comfortable living accommodations nearer to the business center. Just why this matter has been neglected it is hard to say. Perhaps no one has given any thought to it. There are plenty of good sites that can be purchased for little money. Rents east of Market street are declining, and so are values. Rents west of Market street are steadily, and in some localities rapidly advancing. Front street properties are almost unsalable. Properties all through the lower section of the city and those near the river are hard to sell, and hundreds of them are occupied to disadvantage.

Many of them are used as warehouses, where but little business is done. The *Real Estate Record* suggested some months ago, that it might be a paying thing to purchase some of these old tumble down buildings, and erect in their places apartment houses, that might serve on the first floor, the purposes of offices, and the upper floors might be used as apartments. The question of location is a secondary one. Properties comparatively valueless could be made valuable. No doubt this will be done. Street car riding consumes time, is annoying and expensive. There is a need of better living facilities in the old city. Apartment houses one hundred feet square, seven stories high, within five or ten minutes walk of Market street, between Second and Eighth, could be soon filled by good paying occupants.

—Wages have been advanced in two or three Eastern Pennsylvania rolling mills.

THE Westinghouse Air-brake company has divided $300,000 among its shareholders, this is equal to a 50 per cent dividend on its old capital stock of $600,000. Besides the above cash dividend a 400 per cent stock dividend has also been made in accordance with a vote of the company to increase the share capital from $600,000 to $3,000,000, this was done to more nearly represent the value of the plant and property.

MR. RUFUS E. SHAPLEY, in giving his opinion upon the probable results arising from Sheriff Rowan's illness said: "The Sheriff is under $80,000 bonds and the public has abundant protection. His office has ceased to be judicial in any way. It is simply ministerial and therefore may be delegated to a deputy. The coroner cannot assume the duties of the office except it becomes vacant by death or malfeasance, or except it is necessary to serve a writ on the Sheriff himself. I am confident that Rowan's name, signed by Mr. Ridgway, will be perfectly legal."

Notice.

A WORK OF ART.

George C. Newman, 806 Market St., invites attention to a handsome Mantel Mirror, now on exhibition in his window, it is novel in design and elaborately gilded and speaks well for the mechanical and artistic ability of this establishment.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

CEMETERY LOTS.

When land is dedicated for the use and benefit of soldiers, and inhabitants of a village, mainly for a burial ground, and inferentially for school purposes also, a Court of Equity will enjoin the removal of the dead from the portion occupied for burial purposes, in view of the erection thereon of a new school building.

All special acts prohibiting the opening of streets, etc., through cemeteries in cities, were repealed by the Act, June 8, 1881.

DEDICATION.

The mere setting back of a building from the line of a street, is not a dedication of the intervening space to public use.

If a property owner conveys lots, describing them as bounded on a certain unopened street, this is evidence of the dedication of the soil of the street to public use.

DEED.

The execution of a deed by a blind man who denies that his name was signed at his request, and where the person who wrote it has no recollection on the subject, but simply recognizes his own handwriting, is not sufficiently proved.

Where the boundaries in deed call for the sides of unopened streets, but which have been laid out by law, the vendee takes title to the centre thereof, and on a subsequent opening of the street is entitled to damages for the taking of the land.

ESTOPPEL.

Where a person encourages another to enter upon land and invest money or expend labor, assuring him that he will thereby acquire title, he cannot call in question such title though he acted in ignorance of his own rights.

HIGHWAYS.

The owner of lands adjoining a highway may lawfully place building materials thereon for a temporary purpose; being responsible for an unreasonable or negligent use thereof.

LANDLORD AND TENANT.

Where several properties are leased by a single contract for a fixed rent, but the lessor is unable to give possession of one of them, the tenant must either rescind or pay for the use and occupation of the others.

Goods intrusted to an agent to be sold on commission are not liable to distress for rent due by the agent.

MORTGAGE.

A mortgage given to executors to secure the widow's interest in the personal estate bequeathed to her for life will inure to her benefit, on a sale of the mortgaged premises, to the extent to which the mortgagors are then in default.

MUNICIPAL ASSESSMENT.

A claim for a municipal assessment not filed within six months from the completion of the work, creates no lien which is entitled to preference as a first lien on the property benefitted.

The damages for altering the grade of a street cannot be assessed upon the property owners benefitted thereby.

PARTNERSHIP PROPERTY.

Where partnership real estate is sold, after the death of one of the partners, and the decedent's interest is purchased by the survivors or outside parties either, the balance of the fund after payment of debts is to be treated as realty.

This is so as between the widow and a child of the decedent.

F. R. SHATTUCK,
Attorney at Law,
58 S. Third St.

A Handy Book.

A handy little book which really amounts to a miniature encyclopedia has been compiled by Mr. S. V. REEVES, Secretary of the Liebrandt and McDowell Stove Company, 123 North Second street. It contains a large amount of useful knowledge prominent among which are a few pages devoted to facts for builders. Mr. Reeves has displayed considerable tact in arranging, and excellent judgement in his selection of matter for his little work and it is altogether a very creditable affair.

Lead-Eating Insects.

A French architectural journal recalls an observation made by Viollet-le-Duc, that lead plates for roofing and other purposes are often pierced by insects. He accused the wasps of being the authors of the little holes that he found gnawed in lead roofs, but later observers have discovered that both worms and flies often drill through heavy plates. Some twenty-five years ago, it was found that the lead bullets of cartridges that had been stored in wooden boxes were badly gnawed, and a number of gall or saw flies were found in the act of working upon them. Why these little creatures should amuse themselves in digging out the tough metal with their jaws, it is hard to say. Both males and females were found at work; and the only suggestion which our Gallic contemporary can make is that they were, perhaps, sharpening their teeth. The first notice of perforations made by worms seems to have been made by Mr. Janniard, formerly official architect in charge of churches and public buildings, who observed that the lead covering of the steps on the roof of an old house in Paris was bored through in several places. Only one of the steps was attacked; and, on looking closely, he found that every hole in the lead corresponded to a worm-hole in the oak planking on which it was laid.

BUILDERS' ITEMS

Building and Real Estate Notes.

A SILK FACTORY is to be built at West Chester, Pa., by a party of New York capitalists.

THE Wesley M. E. Church, corner Linden and Jackson streets, Wilmington, Del., are going to erect a new church.

GEORGE ERLINGER, of York, this State, has bought ground in that place upon which building improvements will be placed.

A NEW National Bank is to be erected at Steelton, Dauphin County. L. S. Bent, of Steelton will be the President.

JOSEPH WHARTON contemplates a number of building improvements on Summit avenue and Twenty-fifth streets, Germantown.

THE new village of Preston near Bryn Mawr is very active in building operations, some eight houses now being in process of construction.

J. LOWBER WELSH has bought the property of Matthew Kerr, on Paper Mill road, in Springfield township. The place contains 21½ acres and the price was $16,000.

The new summer residence of John Pepper, situated on Washington Lane, near Jenkintown, will be when completed, a very handsome one. Its cost will be $30,000.

S. MAY & BROTHER will erect a six-story building for store purposes at 721 and 723 Arch Street. The architect, W. H. Geissinger, 441 Chestnut street; contractor is E. Richards.

HAVERFORD COLLEGE, in common with numerous other suburban stations along the line of the Pennsylvania Railroad, is being improved by the erection of a block of nineteen cottages, by Wendell & Smith of Philadelphia.

JAMES H. WINDRIM, 132 South Third Street, "Architect," reports business good with them; he has several extensive operations in New York and Erie, and his anticipation for Philadelphia are very bright.

A NEW City by the Sea which is to be called Chelsea is to be started a few blocks below the old Excursion House at Atlantic City, New Jersey, by a company composed of wealthy residents of Philadelphia. One hundred thousand dollars will be expended before spring in cottages averaging about $5,000 each.

CAREY BROS., manufacturers of wall paper will erect a new building adjoining their present one, which will have a front of 60 feet and a depth of 200 feet and will be four stories high. In addition to this there will be a 30 feet square varnish house. A stable and dwelling 30 by 60 feet. The lot on which the buildings are erected is bounded by Tenth street and the Germantown branch of the Reading Railroad and Colona and Nevada streets.

A. M. GREENE, manager of the Fidelity Improvement Company at 729 Walnut street, Philadelphia, has been awarded the contract for the erection of a building 40 feet square, two-stories high, on Pine street, Darby. It is expected that the building will be finished about the latter part of the present month, and is intended as a workshop for the construction of furnaces and the practical demonstration of the Benninghoff Heat Producing Process, which is the invention of Dr. G. E. Benninghoff.

Building Permits.

Du Ross & Welsh, No. 758 South Broad st., 2-story stone and dwelling, Sixteenth st., near Tasker, 16x50.

R. Smith, No. 1219 South Third st., 2-story back building, No. 1221 South Third st., 8x12.

M. McIlwain, No. 170 Mechanic st., 3-story house, Lane st., near Cresson, 16x21.

J. F. Reichardt, No. 135 James st., four 2-story houses, Sunnyside st., near Thirty-fifth, 16x32.

J. S. Cornell, 2104 North Twentieth st., alteration and addition to Masonic Home, No. 3335 North Broad st., 18x49.

J. J. Campbell, No. 2911 Howard st., four 2-story houses, Howard st., near Gwiney, 14x40. Also, 2-story store and dwelling and 2-story dwelling, Front st. and Indiana ave., 16x48 and 14x26.

J. Escandel, No. 428 McIlwain st., three 2-story back buildings, Square st., near Reed, 12x10.

G. W. Snyder, 2-story stable, Broad street and Lehigh ave., 66x28.

H. Hazlett, No. 1935 Columbia ave., new front, No. 1753 North Thirteenth street, 18x30.

T. A. Lynch, No. 1619 North Fifteenth st., 1-story back building. Also, alterations, No. 1508 Sansom st., 12 feet.

G. Jahn, 3118 Germantown ave , 2-story kitchen, 3200 Germantown ave., 20x26.

C. W. Rufe, 56 Bringhurst st., two 2-story houses, Jefferson st., near Mercer, 15x44.

G. F. Gibson, 2248 Master st., six 2-story houses, Marshall st., near Tioga, 14x36.

J. Galbraith, 2226 Amber st., 2-story storehouse, Palethorp, st., below Somerset, 35x36.

Haibach & Auchter, Twenty-sixth and Thompson, 4-story storage-house, Thirty-third st., above Master, 16x30.

J. Loughran, 2542 North Eighth st., eight 2-story houses, Hutchinson st., above Huntingdon, seven 14.6x42, one 12x36.

J. M. Buchanan & Bro., 1610 Vienna st., 2-story house, Howard st., above Cumberland, 16x40.

S. Kennedy, Sixth and Venango sts., four 2-story back buildings, Osprey st., above Spring Garden, 8x14.

C. R. Kohl & Bro., 45 West Johnson st., Germantown, 3-story house, Emlin st., near Carpenter, 25x75.

F. Taylor, Factory st., Frankford, 2-story stable, Oxford st., near Paul, 15x30.

J. McConaghy, 1710 Christian st., 2-story store Seventeenth and South sts., 16.10x70.

William Garvin, 5008 Adams st., 3-story house, Chelten ave. and Green st., 20x50.

G. Parr, 2448 Palethorp st., 3-story store, Cumberland and Hancock sts., 15x45.

Albert Rheimer, 3807 Germantown ave., 2-story house, Mervine and Somerset sts., 16x45.

William Devitt & Sons, 1125 Brown st., 3-story building, Locust, above Sixth street, 63x115.

A. Oberholtzer, 2547 North Seventh st., 2-story houses, Kensington ave. and Sixth st., 18x55.

John Bird, 1106 Hunter st., front and interior alteration, Market and Juniper streets.

William H. Abbott, 20 North Seventh st., five 3-story houses, Arch, above Twenty-first st., 10x56.

John Buchanan, 1618 Vienna st., 2-story house, Howard and Cumberland streets, 16x40.

G. Speck, 2044 Somerset st., 2-story back building, 263 W. Norris st , 11x18.

W. Hetzell, 45 Church st., Germantown, 2-story house with mansard roof, Main and Southampton sts., 35x30.

C. Martin, 2312 E. Cumberland, four 3-story houses and stable, Fifteenth and Fontain sts., 17.8x60.

C. C. Linahan, 3203 Ridge ave., two 2-story houses, Alleghany ave., below Thirty-fifth st., 13 and 10x73.

W. Tecklenburg, 1614 Cadwalader, two 2-story houses, Fifth st. near Ontario, 16x46.

A. H. Heist, Doylestown, 1-story warehouse, Sophia st. near Otter, 30x60.

W. A. Brown, 1700 Master st., eight 2-story houses, Twenty-first, near Reed, 16x42; also, three 2-story houses, Reed st. near Lambert st., 18 and 16x42.

T. Meehan, 1700 Master st., 2-story store and dwelling Twenty-first st. and Long lane, 26x42.

C. Bossert, 2114 Marshall st., 2-story house 2119 Sergeant st., 20x43.6.

C Spoerl, 3139 Frankford ave., six 2-story houses, Amber st. below Alleghany ave., 14x30.

T. W. Wright & Son, 7 Harvey st., Germantown, 2-story stable, 5054 Germantown ave , 27x54.

George Sheppard, 1604 Sansom st., bathroom extension, 3414 Powelton ave., 12x6; also, alterations, Seventeenth and Wharton streets.

Wm. Garoim, 5008 Adams st., eight two-story houses, 16x30, Bellfield and Penn streets.

Hugh Haylett, 1935 South College avenue, a one-story addition, 18x27, 1929 Columbia avenue.

J. W. Kuhn, 917 South Fourth street, a three-story house, 18x55, 633 Reed st.

Same party, a two-story stable, 30x60, Hayes above Sixth street.

A. A. Harmer, Sumac st., ten three-story houses, 18x60, Sumac above Wetherill st.

Use of the Public Highway.

According to a late decision of the New York Supreme Court (McCaffrey vs. Smith), neither the State Legislature nor a village can confer authority on a person to occupy part of the public street as a hack stand as against the adjacent lot owners. The court said: "The Legislature undoubtedly had the power to authorize the village authorities to pass ordinances and by-laws, which they might enforce, limiting and restricting the use which the public might make of the streets beyond their rights of travel—ordinances which could be enforced as against the adjoining owners themselves for the purpose of keeping the streets open to free and uninterrupted travel. But the Legislature had not the power, neither had the municipal authorities, as against the adjoining owner, to confer upon any person the right to make use of the highway for any other purpose than to pass and repass without the consent of the owner of the fee."

—The matter of building a gravity road in the Park is now in the hands of a sub-committee comprising E. C. Knight, Frederick G. Wolbert and E. H. Fitler.

—Articles of incorporation of the Philadelphia Time Electric Company, whose object is to supply standard time by electricity, have been filed in Camden. The capital is $250,000, and the incorporators are John and Ernest Hexamer and George M. Brill.

—Another rumor comes from Pittsburgh that the great Stude baker Wagon Manufacturers of South Bend, Ind., will shortly remove to Pittsburgh in order to enjoy the advantages of natural gas. The Disston's who proposed to move their steel work there, will go to Butler, thirty miles north, unless they can induce the B. & O. people to give them a switch.

Nat. Bk.—National ank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

—The prosperous industrial condition throughout the States is attracting a good many immigrants. During the past nine months $200,000 persons emigrated from the British ports to the United States. This is almost a too rapid increase in population, but so far there is no apparent surplus of labor, and no apparent decline in the rate of wages.

Councils' Doings.

The Councils Finance Committee has favorably reported upon the bill to lease the gas works to the Dolan syndicate. The daily papers have commented upon this contemplated movement with more or less indifference. The matter is a very important one for reasons heretofore given. The strongest point in this proposed lease is, that the citizens will probably have better and cheaper gas, and that the gas works will, or at least it is supposed that it will, cease to be such an important factor in municipal politics; the weak point in the lease is, that the syndicate will make a great deal more money out of the least, than the investment or the responsibility justifies. Of course the stipulations by which the city can excreise a certain degree of control are favorable to the city. This control is shown in the following amendment submitted by Mr. Thomas M. Thomson.

"The lessees or their assigns shall have the right at any time during the said term, when the increased sales of gas or the cheapening of the cost of its manufacture shall be sufficient to justify them in reducing the price of gas to private consumers, to make a reduction thereof to such price per thousand cubic feet as Councils may agree to by ordinance, but no such reduction in price shall operate to reduce the rent payable to the city below the sum of $1,000,000 as aforesaid. All gas supplied as aforesaid shall be made from bituminous coal, and the lessees or their assigns shall not manufacture or supply water gas or gas made by any other process except by consent of Councils. The lessees or their assigns shall, at all times during said term, furnish to private consumers gas of not less than eighteen candle power at a price never to exceed $1.50 per thousand cubic feet."

The matter now goes before Councils. Mr. Clays amendment herewith apended contains the gist of the matter.

"The lessees or their assigns shall pay to the city during each and every year of the said term as rental one-half the net profits realized from said works during each year; and until the said rental from said share of the profits shall yield to the city a net rental of $1,000,000 per annum, the lessees or their assigns shall pay a fixed rental of $1,000,000 in each and every year (even if the half of said profits shall not be equal to said sum), and shall make no charge to the city for lighting, extinguishing and maintaining 14,268 street lamps, each of five feet burner capacity, or for gas consumed in any of the school houses, armories, police stations, fire stations or other public buildings lighted by the city, to the extent of the amount now consumed therein: but for such street lamps hereafter erected in excess of the number aforesaid, shall be entitled to charge the city the sum of ten dollars per annum for each lamp of five-feet burner capacity toward the expense of maintaining the same, and for all gas used in public buildings in excess of the amount now used therein, at the rate of sixty-five cents per thousand cubic feet. Said rental shall be paid to the City Treasurer in equal quarterly payments of $250,000, each in advance, in each and every year during said term, and whenever the rental due the city for any year arising from one-half of the net profits of said works, as aforesaid, shall exceed the said fixed rental paid during said year as aforesaid, said excess shall be paid to the City Treasurer within thirty days after the end of said year."

The Finance Committee provided for the erection of a fire escape for the school house on Fairmount avenue, above Twelfth street, at a cost of $1150,00; also for a fire escape from the school house on Pine and Queen streets, at a cost of $3,159.00. The sum of $38,400 was appropriated for a school house on Eleventh street, between Moore and McClellan streets, and $26,987 for a school house on Sansom street, between Thirty-fifth and Thirty-sixth streets. The committee recommends that the Fourth Street National Bank be made a depository of city money.

The Councils committee approved an ordinance authorizing the Western Union Telegraph Committee to lay wires on certain streets, also an ordinance allowing the Philadelphia Time Telegraph Company to lay wires under the intersection of certain streets to furnish customers with correct time. The Board of Highway Supervisors, is considering a request of Bailey, Banks & Biddle to place a pneumatic tube eight inches in diameter under ground. It will be fifty feet long under Sansom street. The request of the American Telegraph Company to lay their wires under ground was granted. The Pennsylvania Railroad Company was granted permission to place two eight inch iron pipes on Jones street from Sixteenth to Eighteenth streets.

Select Council held its regular meeting on Thursday of last week.

Petitions and communications were presented as follows, and appropriately referred: By Mr. Monroe, for water pipe on Eleventh street, from Thurlow to Catharine: by Mr. Green, to authorize the use of House of Correction labor in grading and macadamizing certain streets in the Twenty-third Ward; by Mr. Murray, for water pipe on Westmoreland street, between Twentieth and Twenty-first, and Sedgely, between Sixteenth and Seventeenth and to grade Eighteenth street, from Ontario street to Tioga; for electric lights on Diamond street, from Broad street to Fairmount Park, and at Somerset street, the Pennsylvania Railroad crossing, and Allegheny avenue, on Broad street; by Mr. Gates, for electric lights in Germantown; by Mr. Stuart, for a fire engine at Thirtieth street and Gray's Ferry road; by Mr. Thornton, for an inercase of the salaries of water purveyors and for a sectional sewer on Ellsworth street; by Mr. Ryan, for a sewer on Arch street, between Fifth and Sixth streets.

The Committee on Water recommended the placing of water in the armory of Battery H, and the laying of water pipe on Fairmount avenue, from Orion to Thirty-fifth street, and on Carpenter street, from Twenty-third to Gray's Ferry road.

Ordinances were laid over to be printed making transfers in the appropriation to the Board of Education for $13,887 for a school house at Coulter and Morris streets, for five thousand dollars for property on Grayson street adjoining the Stevens school house, $15,939 to be expended on improvements on the school house at Twenty-sixth and Thompson streets, and $1,725 00 for furnishing the J. L. Claghorn school house.

Mr. Moffett presented an ordinance for an electric light in the Seventeenth Ward, Mr. Freeman for one in the Fifteenth, and Mr. Horn for gas and gasoline lamps in the Twenty-fifth Ward.

Mr. Jones, for water pipe, gas and gasoline lamps and the revision of streets in the Twenty-first Ward.

Mr. Graham, to permit the Cosmopolitan Underground Telegraph and Telephone Company to lay conduits and wires under certain streets.

The Committee on City property and prisons was directed to consider the questions of removing the municipal hospital to some other place.

The galleries were crowded in expectation of hearing a discussion of the elevated railroad bill. The vote to adopt the minority reported by Mr. Green in favor of the construction of the proposed road was seven to twenty-three, and the committee on the question was discharged by a vote of twenty-four to five.

The Common Council Ordinance releasing the Schuylkill River East Side Railroad Company from the obligation to widen Pennsylvania avenue, between Twenty-fifth street and Fairmount avenue, was concurred in.

Select Council ordinance to permit the Lehigh Avenue Railway Company to construct a railway and to build depots, &c., on Lehigh avenue, between Second street and the eastern end of Fairmount Park, was laid over to have an amendment, offered by Mr. Green, providing for five-cent fares, inserted in the ordinance.

Select Council ordinance to authorize the Bell Telephone Company to lay and maintain underground conduits, cables, wires, manholes, and to erect distributing poles, was laid over and made the special order for the next meeting, to permit the consideration of amendments offered by Mr. Etting.

Common Council ordinances to authorize the construction of sewers on Budd, Chestnut, Dugan, Filbert, Fifth, Ogden, Pink, Sixteenth, French, Third, Thirteenth, Thirty-fourth, Thirty-sixth, Tenth, South, Sixth, Broad, Filbert, Twenty-sixth, Front, Berks, Cambridge, Wister and Centre streets, and on Walnut lane were concurred in.

Common Council resolution to permit Henry A. Duhring to do certain paving was concurred in.

Select Council ordinances to lay water pipe on Broad, Chew, Musgrove, Douglass, Hancock, Reese, Jefferson, Thompson, Twenty-ninth, Berks, Twenty-seventh, Huntingdon and Fifteenth, East Leverington, Belfield and Somerset avenues, and to relay Wayne avenue, were passed finally.

Common Council ordinances to authorize the construction of sewers on Seventh, Sydenham, Eighteenth, Sixteenth, Fifteenth, Somerset, Twenty-second, Cambridge, Seybert and Fifth streets, and Passyunk and Ridge avenues, were concurred in.

Resolution of Fire Commissioners to locate truck G on Kelt street, below Market, and for the completion of the fire station on Eighth street, below Girard avenue, was adopted.

At the Common Council meeting the requisition of Samuel C. Perkins, President of the Public Buildings Commission for one million to $1,226, 637.26 was referred to the Finance Committee. The following bills were introduced:

By Mr. Heins, for an electric light on the east side of Broad street, above Columbia avenue.

By Wm. M. Smith, to open Walnut street, from Thirty-second street to the Schuylkill river.

By Mr. Hicks, for water-pipe in Warren street, from Fifty-second street to Landsdowne avenue; to open and grade Sixty-second-and-a-half street, from Vine to Hamilton, Westminster avenue, from Sixty-second-and-a-half to Sixty-third and Race, from Sixty-third to Sixty-fourth street.

By Mr. Claghorn, to locate a gasoline lamp at the southern end of the alley running south from Race street, west of Twenty-first street.

By Mr. Grace, to grade Orkney street, north of Cambria.

By W. A Miller, to locate a fire station at the southeast corner of Moyamensing avenue and Greenwich street.

By Mr. Weidner, for electric lights on Susquehanna avenue, between Germantown avenue and Front street, and to permit Joseph Rieger to lay a two-inch iron pipe across and under Cadawalder street, to convey beer from the brewery on the east side to Nos. 1710-12 on the west side.

By M. Meehan, to grade Handsberry street, from Morris to Laurens; to open Pulaski avenue, from Rittenhouse to Harvey; to grade Chew from Mt. Pleasant avenue to Mt. Airy avenue; to grade Laurens, from

Queen to Hansberry, and to open Cedar lane, from Haines to High.

By Mr. Anderson, to pave, lay water pipe and construct a sewer in Thirty-second street, from Gray's Ferry road to Reed.

By Mr. Holeman, for water pipe in Russell street, from Kensington avenue to Jasper; to open Thompson, from Kirkbride to Bridge; to grade Buckius, from Richmond to Thompson; to grade Thompson, from Buckius to Ash.

By Mr. Hall, for water pipe in Conestoga street, from Master to Thompson.

By Mr. Claridge, to strike from the city plan Moyer street, from Palmer to East Montgomery avenue.

By Mr. Iseminger, to locate electric lights on Passyunk avenue, one at Seventh, and the other at Eighth street.

Petitions were received for the grading of Forty-third steeet, from Kingsessing avenue to Woodland avenue, and of Forty-fourth street, from Baltimore avenue to Kingsessing avenue; for the macadamizing of Ridge avenue, from Roxborough avenue to Shur's lane, and for the extension of Mill Creek sewer five hundred feet eastward from Woodland avenue.

The following Common Council bills were passed finally:

To open Thirty-third street, from Wallace to Fairmount avenue.

To pave Bringhurst street, from Wakefield to Mercer, and Cresson street, from Penn to Cedar.

To pave Salmon street, from Ash to Buckius.

To open Mt. Vernon street, from Thirty-second to Thirty-third.

To construct sewers in Tenth, South, Sixth, Broad, Filbert,, Twenty-sixth, Front, Berks, Cambridge, Wiota and Centre streets, Walnut lane, Seventh, Sydenham, Eighteenth, Sixteenth, Fifteenth, Somerset, Twenty-second, Cambridge, Seybert, and Fifth streets and Passyunk avenue.

To place upon the city plan Cottman and Bleigh streets, from Oxford to Edmund; Oxford, Spring, Wissinoming, Middleton, James, Edon, Keystone, Tulip and Edmund streets, from Cottman to Bleigh (all in the Twenty-third ward), and Orkney street, from Ontario to Westmoreland, in the Twenty-fifth ward.

To permit R. W. Gibson to erect a hay warehouse at Thirty-second and Market streets, completely covered with corrugated iron.

To permit John Dunlap & Sons to erect a frame shed on Eleventh street, above Cambria.

The engineers entrusted with the investigation as to the best future water supply of Philadelphia have been heard. No more important question has engaged the attention of our city authorities for years.

The Councils' Water Committee listened last week to the report of Mr. Rudolph Hering, who has had the investigation in hand. It has extended over a period of three years, and has engaged the services of upward of 100 persons, at a cost of $80,000. Investigations have covered an area of 150 miles of Philadelphia.

The most significant statement in the report is that, sooner or later, the city of Philadelphia will be obliged to obtain its water supply from the Blue Mountains, and that in addition to the projected aqueduct below referred to, another aqueduct will be necessary to reach those mountains by way of the Delaware or Lehigh river. The requirements aimed at are 200,000 gallons per day. At Point Pleasant, which is 217 feet above tide water, the minimum flow of the river is assumed at 1,500,000 gallons a day. The pumping mains would be 30 inches in diameter, and the distance to the aqueduct 600 feet. The engineer computes, after deducting lossage, that 117,463,000 gallons can be raised into the aqueduct every 24 hours, in a low stage of water.

The available capacity of the Delaware river is put at 120,000,000 gallons per day. The engineer says the most economical scheme is to bring the water from Point Pleasant, because the river has a more rapid descent near this place, which materially reduces the height of pumping as compared with points lower down the river.

Purely gravity supplies of water can be obtained, but not in sufficient supplies.

"The cost of the aqueduct, pumping plant and capitalized cost of pumping amounts to $19,622,543, if 210,000,000 gallons of water daily are pumped by steam, and to $15,475,262 if only 120,000,000 gallons are pumped by water and the remainder by steam."

In reference to the Blue Mountain scheme the engineer says:

"The cost of procuring a supply from the Perkiomen Creek is $13,674,493, and from the Tohickon and Neshaminy Creeks together, $13,849,662.

"Finally, a combined gravity and pumping scheme is possible by procuring water from the Tohickon Creek and from the Delaware river at Point Pleasant. The former can furnish on the average between 90,000,000 and 100,000,000 gallons per day by gravity; in minimum years only 80,000,000 gallons can be depended upon.

"The Delaware river, as we have seen, can furnish 120,000,000 gallons by water power. Both the Tohickon and Delaware waters have been found not only to be of good quality, but much better than the waters of the Neshaminy, and particularly of the Lower Perkiomen Creek.

"The cost of the scheme is $12,695,941 if the water-power is utilized, and $17,717,025 if steam-power is used."

The South Mountain Water Company will now be heard. The company offers to the city of Philadelphia, in consideration of a lease for the term of fifty years of the entire plant of the water works at the city, the following: That $5,000,000 be expended in completing the reservoirs of the city, laying new mains and replacing old pipes; $3,000,000 to be paid as a sort of bonus; the company agrees to construct the system within two and one-half years from the execution of the lease—a new conduit from Point Pleasant to the city, with a capacity of 200,000,000 gallons of water per day. The company proposes to retain $2,000,000, and to pay the city annually a sum equal to one-half of the excess of the gross receipts of that company over and above $2,000,000. The company guarantees an ample supply of pure water without adding to the tax rate, and without increasing the present water rent paid by the city.

It is estimated that Philadelphia will have a population of 2,000,000 in 1920, and 4,000,000 1960. In 1910 Philadelphia will need 100 gallons per head per day.

The city will need an average supply in 1920 of 220,000,000 gallons. In such an important matter as the future water supply of Philadelphia it is necessary to take a long look in the distance. It is poor economy to measure our expenses by the requirements of the next few years.

The question has been postponed for another meeting, and the South Mountain Water Company, it is understood, make a vigorous presentation of its case.

"The cost of this scheme, which is now relatively greater than that of others, would then probably be less. The Point Pleasant aqueduct could later also be carried to the mountains whenever the quality of the water, owing to the pollution from the Lehigh river, becomes objectionable and its extension would then most economically be to the Delaware Water Gap.

"It is better to build two separate aqueducts in this way than only one with double the capacity, because in the latter case the risk from accident becomes greater. New York, Boston, Washington and Paris have each two; London has even more.

"When the above-mentioned aqueducts are built the city of Philadelphia will be supplied with the best water obtainable in Eastern Pennsylvania."

The important questions before the city of Philadelphia call for the exercise of more than ordinary ability. Party politics have nothing to do with them. The real question now before us is the future industrial and commercial prosperity of this city. Times bring their men, exigencies develop ability. At present there seems to be no broad-minded man with sufficient comprehension to properly battle with the great issues and interests now before us, among the great enterprises.

—The Secretary of the Treasury on October 29, issued the 144th call for $10,000,000 of the 3 per cents of 1882, interest to cease December 1, 1886. Following is a description of the bonds embraced in the call, the numbers being original and inclusive in each case: $50, No. 49; $100, No. 610 to 640; $500, No. 267 to 285; $1000, No. 2176 to 2434; $10,000, No. 6326 to 7308.

—The Anderson Pressed Brick Company of Chicago, have contracted to furnish 400,000 of their special Brown Opsidian Pressed Brick for the new office building of the Central Safety Deposit Company of that City. The shade of brick manufactured by this company is now being extensively employed and the bricks are said to be an elegant material for exterior surfaces.

—The aqueduct board of Newark, N. J., has recieved three propositions for a water supply. (1) From D. H, Tichenor, reprecenting a syndicate; the proposition was to furnish 15,000,000 gallons daily from artesian wells at Belleville to be connected with the city's pumps; estimated cost, $150,000. (2) From the Great National Water Purifying Co. to supply 15,000,000 gallons per day, with six patent filters; the company is composed of Charles P. Worthington, Theo. F. Miller and W. M. Deutsch: estimated cost, $180,000. (3) From Robert Crane, of Philadelphia; the water would be elevated and made to pass through a patent filter; estimated cost, $10,000.

First Use--Then Beauty.

Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading. It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. We repeat, we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $3 up, and BOOTS AND SHOES FOR LADIES from $2.50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and attentive reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often, in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.

If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, in order that they may be exchanged. Repairing of all kinds at moderate prices.

THE DAY SEWED SHOE MFG. CO.

Under the management of W. W. APSLEY.

No. 23 NORTH EIGHTH STREET

PHILADELPHIA.

FALL CLOTHING

We have made an unusual large stock this season which is already meeting a ready sale. In MAKE, STYLE and FINISH our goods excel all others, and prices defy competition. We fit you equal to the best tailor-made garment at about one-third less price.

SCHOOL SUITS FOR BOYS AND CHILDREN in new designs, and we only have what we can recommend.

The NEW FALL FURNISHINGS already in are much superior to the usual stocks found around town.

An early call solicited.

Browning, King & Co.

910 & 912 CHESTNUT STREET,

PHILADELPHIA.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and original designs, a great specialty.

All orders delivered free on board at Jersey City. Estimates for Philadelphia and vicinity cheerfully given.

"CAMARET"

GUARANTEED ROOFING PLATES.

A maker's brand, controlled by us to the extent that we represent the manufacturers in the United States. We are thus enabled to keep up the standard quality of this brand, the makers being under contract with us to do so.

We guarantee the material of the "CAMARET" to be the best Martin-Siemens Steel (exactly the same material as the "Gilbertson's Old Method,") while many of the cheaper plates offered in competition with the "CAMARET" are made of Bessemer Steel, which can be bought at a less price, hence is of inferior quality.

For the information of the trade we repeat the Guarantees which have made our "CAMARET" Brand so famous throughout the country.

The following is our specific guarantee of all the plates purchased from us under the brand "CAMARET."

1. That the coating, though not quite so heavy as on the "Gilbertson's Old Method," is of the same quality, is evenly distributed and heavy, perfectly coating and protecting the iron.
2. That they will stand any strain encountered in working a Roofing Plate.
3. That each sheet is cut perfectly square, has an even surface and is free from ragged or beaded edges.
4. That each box contains 112 sheets of uniform gauge, and that each sheet is stamped with brand and gauge.
5. That every box of "CAMARET" is securely bound with IRON STRAPS.

There is no other Roofing Plate that we know of to which the above Guarantees can be applied.

We take the entire product of the Mill in this Brand of Roofing Plate; and the *Works are under contract with us* to keep up the Quality of Goods as Guaranteed by us, and agree not to furnish the "CAMARET" Roofing Plate to anyone else, either under *this Brand or a Private Brand.*

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 45. PHILADELPHIA, MONDAY, NOVEMBER 15, 1886. PRICE 15 CENTS

News Items.

—Henry Lewis left an estate of about $200,000.

—The New York aqueduct board has asked for $7,000,000 for the ensuing year.

—The Commonwealth Title Insurance and Trust Company have already issued over one Hundred Title Insurance Policies.

—The will of Robert W. Shalcross, of Frankford, admitted to probate on Thursday, disposes of an estate valued at nearly $100,000.

—Mr. E. D. Marchant has obtained verdict against the Pennsylvania Railroad Company for the depreciation of his property on Filbert Street, above Seventeenth, for $4,960.

—The Appellate Court of Illinois has decided that it is not necessary for a street railroad company to obtain the consent of abutting property-owners in order to lay tracks through the streets.

—Charters were granted to the Cedar Building and Loan Association, of Philadelphia, capital, $100,000, and to the Walnut Lane Land Association, of Philadelphia, capital, $100,000; also to the Pennsylvania Chemical Light and Power Company, of Chester, Pa., capital, $50,000.

—Our reporter called on Mr. Wanamaker in reference to the alleged purchase of the Taylor Hotel, at Freehold, New Jersey, which was burned down. The statement was, that Mr. Wanamaker had purchased the property to build a hotel and store. Mr. Wanamaker states there is no foundation for the rumor.

—As an evidence of rapid growth of the Department of Architecture in the Cornell University, the present year's attendauce is of interest. The total number of new students admitted this fall is thirty-three, of whom twenty are freshmen; remaining thirteen being special students. The present freshman's class is the largest that has ever entered the department, and the total number of students therein at present is sixty-five.

—The New England people are a little better posted in insurance matters than we. Mr Clifford Thomson of the Boston Board of Underwriters advocates a rigid system of inspection as the best method for preventing fires. He puts the direct loss in the country by fire at $100,000,000 annually, while the whole waste is summed up at three times that large amount. There is a constant increase in the number of fires—14,114 in 1885 as against 9,301 in 1876—being somewhat in excess of the ratio of increase in property valuation for the same period. The most important statement made by Mr. Thomson is that "from 80 to 90 per cent of all the fires that occur arise from preventable causes, that is to say, would not have occured had reasonable precaution been taken." The "physical" causes are numerous; but they consist chiefly in defective flues, badly constructed furnaces, the accumulation of waste material, the careless tossing about of matches and cigar stumps, together with the dangers arising from steam boilers, illuminating gas, oil and explosives of various kinds. The "moral" hazards are found in the readiness to fully insure and the temptation to incendiarism. It is said that from 33 to 50 per cent, of all fires are of incendiary origin, and that ninety-nine cases in a hundred incendiary fires are due to overinsurance. The whole argument may be summed up thus: If boards of underwriters would make it their business to see that policy holders use proper precautions against fire and would cease the bad practice of overinsurance the losses from fire would be reduced to the minimum.

A Good Retort.—A plumber was sent for to the house of a wealthy stockbroker to execute some repairs. He was taken by the butler into the dining room, and was beginning his work, when the lady of the house entered. "John," said she, with a suspicious glance toward the plumber, "remove the silver from the side-board and lock it up at once." But the man of lead was in nowise disconcerted. "Tom," said he to his apprentice, who accompanied him "take my watch and my chain, and these coppers, home to my wife at once. There seems to be dishonest people about this house."—*The American Builder.*

—Among the recent inventions patented is a building block, intended for interior partitions, wall lining, etc., and is composed of ground cinders and ashes, dry slacked lime, boiled glue, beach sand, plaster of Paris and Portland cement, and blended promiscuously in a compound by the aid of water, which is afterwards placed under heavy pressure, and is intended to make water-tight and fire proof partitions. The patentee has certainly employed some very reliable and staple materials in his composition, but the old adage that "too many cooks will spoil the broth," may find just application here, since the adhesive qualities of the several materials vary materially in their nature and time of permanent hardening.

—In Vienna there were recently exhibited gas and water service pipes made of paper. The same kind of pipes will do for many factory purposes, and for laying electrical wires, etc., we should suppose it to be specially useful. The pipes, according to the *Paper World*, are made as follows: Strips of paper are taken, the width of which corresponds with the length of one pipe section. The paper is drawn through melted asphalt and wound upon a mandrel which terminates the inner diameter of the pipe. When the pipe thus made has cooled, it is pulled off the mandrel and the inside is covered with a kind of enamel, whose nature is kept secret by the makers. The outside is painted with asphalt varnish and dusted over with sand. It is stated that such a pipe will resist some 2,000 pounds internal pressure, though the thickness of the stuff is only about half an inch.

—In the construction of fire proof buildings, says the *Firemen's Standard*, the greatest difficulty has always been to find a cheap but incombustible material for floors, iron and stone being necessarily very expensive. It has been recently suggested that this trouble would be overcome by introducing a layer of ashes two or three inches deep in each partition separating the stories. The ashes should be sifted and packed solidly between the wooden floors. These latter, so far as the planks are concerned, may be destroyed, but fire cannot be communicated from one story to another. The earthy mineral particles remaining after the combustion of wood form the best fire-proof of all substances, and, should the burning story be flooded with water, not one drop could pass through the layer of ashes to damage goods in the lower stories. Five to eight dollars per square of ten feet would cover the expense of rendering floors fire-proof in this manner.

—John R. Hinchman who has been traveling through Germany comes home with some modified ideas as to the superiority of our dwellings. He writes as follows: "Let us compare, briefly, the dwellings of our middle class houses with those of the same class in the larger cities of Germany. Everyone knows what the ordinary twenty-foot three-story house is here, with its high stoop, brick or veneered brown stone front, uninviting basement dining room with kitchen back, narrow hall and parlors in first story, with a repetition of the some hall and stairway in the second and third stories, and too often, with defective plumbing and poisonous coal gas. The work required to keep such houses in order, not to mention the disadvantages of poor light and ventilation in the halls, is almost double that required by the German dwellings; there the houses are built free on all sides, are usually four stories in height, accommodating one family on each floor. The staircase is broad, has windows at each landing, every apartment has its individual entrance and bell. The buildings are ordinarily about square, the main rooms grouped about a central hall, the kitchen and servant's bedroom being separated by an entry. All rooms are well lighted, have perfect ventilation, and, being on one floor, half the labor of housekeeping is avoided. I think it scarcely requires argument that such flats in New York, with the addition of the best modern plumbing and steam-heating, which have not yet been introduced into the houses in Germany, would find ready occupants as fast as they could be erected."

THE PHILADELPHIA

REAL ESTATE RECORD

AND

BUILDERS' GUIDE.

VOL. 1.—NO 45. PHILADELPHIA, MONDAY, NOVEMBER 15, 1886. PRICE 15 CENTS.

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

(REAL ESTATE PUB. CO.)

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, NOV. 15, 1886.

THE Philadelphia brick yards have finally closed down, or nearly so, and the 3,000 workmen will have time to rest. During the winter they will perfect their organization as they have contemplated, and will no doubt dispose of the question of wages before the opening of the Spring season.

THE frequent recurrence of fires in textile mills ought to call the attention of textile manufacturers to the importance of more efficient and sufficient protection. The New England manufacturers have reduced the question of fires and fire insurances down to fine points. We refer to the matter elsewhere in a well-considered article.

THE Citizens' Municipal Association have not succeeded in leading Commissioner McDonald to believe that Contractor Hong's work is properly done. Controller Dechert has been asked to withhold his signature from any warrant. The Commissioner must certainly have some good reasons for his ignoring of the requests of this Association. The differences in dispute could be readily settled. The Citizens' Association is composed of material which will not permit its admonitions to be lightly brushed aside.

THE committee of Municipal government has completed its very important preliminary work intended to carry into effect the Bullitt Bill. This committee, so far as the public has been permitted to follow its recommendations has done its work sincerely and creditably. The great test will be when the new officers take their places. The people will have patience with them and will not be quick to find fault with any slight jarring that may arise in the efforts to put this vast piece of municipal machinery into harmonious working order.

WE have referred previously to the great depot of the Baltimore and Ohio Railroad, Chestnut street bridge. The building will be completed in twelve months, and will cost $100,000. It will have a frontage on Chestnut street of 173 feet, and extend back 110 feet to Sansom street. The train shed will be 300 feet long and 120 feet wide. The main portion of the building will rise 67 feet above the level of the bridge and 94 feet above Twenty-fourth street. The Company will, according to its policy, insure this property itself. The contract for the building will be let in a short time.

THE newspapers are full of rumors of great railway construction enterprises. We are to have, it seems, a new railroad from the Atlantic coast somewhere, to Pittsburg, where connections will be made with the South and West. Then again we are to have a 450 mile net-work of tracks in the Northwest. In the next breath we are told that the Pennsylvania Company has purchased, or has about secured control of, the Chicago Northwestern road, which is a vast railway corporation, controlling over 6,000 miles of road between Chicago and Omaha. This new road is in the heat of the race for the Pacific coast which several Chicago roads are seeking for. In fact, if rumors and predictions have any value, we are to have a genuine railroad building boom next year.

SOME weeks ago the REAL ESTATE RECORD called attention to the fact that the tenants occupying the stores on the Girard estate between Hood, Bonbright & Co's building and Twelfth St. had been notified to vacate. Although the Trust endeavors to keep its business closely to itself it is certain that a large business structure will be erected on that site. There is a demand for houses of large dimensions and the projected construction of this building, on the heels of the completion of the first one, indicates that the Girard Trust recognizes the current demands of Philadelphia for finer stores. Compared to the existing stores, the new store will have a floor space four times as great. This practically makes a reduction in rent. There are blocks of houses on Market street between the two rivers, which ought to be torn out and structures creditable to the city and its pretensions erected.

FORTY-THREE years ago the present safety match was in general use in Norway, Denmark and Sweden. In those countries laws even now exist against the use or introduction of all sulphurous or explosive non-safety matches. These laws were enacted in order that fires arising from the use of dangerous matches might be prevented altogether. All attempts to bring them into general use in this country have failed heretofore, owing to the opposition of the match monopolists. At present a safety match is manufactured by a firm in Erie, Pa.; they are held in high esteem by a few large manufacturing concerns that allow only these upon their premises.

If leases and fire insurance policies were so drawn as to stipulate that all non-safety matches were to be entirely excluded from the premises leased or insured, millions of dollars of valuable property might be saved yearly.

THE people of New York have had their attention called to the unjust tax assessment in their city. The same matter is deserving of a little attention in our own. The personal property of the Vanderbilts is set at only $8,000,000, and of Jay Gould at $100,000, his son at $25,000 and the great Taylor estate at only $3,000,000. These three estates are generally accounted to be worth at least $175,000,000, yet they pay taxes on less than $11,200,000. The pinching point to New Yorkers comes in right here, for if all this personal property were taxed the rest could be reduced from $2.39 to $1.59 per $1000. These are very pertinent questions to New Yorkers. The tax-ridden people of that city will not tamely pay out 70 cents on every $100 worth of property they own in order that the few millionaires much better able to pay than they are, be allowed to go scot free of that much. Some of the New York people are ringing the changes on this injustice. The Vanderbilt Trustees pay taxes on $8,000,000 worth of personal property, which is at least worth $20,000,000, thereby paying only $180,000, where they ought to pay $500,000 at least. Of course the arguments made are that if we taxed personal property in this way that bonds and stocks will be removed from that city to some more friendly or more negligent municipality. The argument is a weak one This question may some day become an interesting one to Philadelphians.

IF a canvass were to be made it would show beyond a doubt that at least seventy-five per cent. of the citizens of this city are in favor of an elevated railroad. It is worse than folly to try to overcome this sentiment, for it is an outgrowth of actual necessity. Our citizens have been hampered in their building enterprises through the want of adequate travelling facilities, and those

who have preferred the advantages of suburban residences, even in the face of the present limited accommodations, are growing irritable over the unjustifiable action of Councils in defeating the last bill, which was so patched by amendment, that it became practically the production of the very board that killed it.

There has never been a time in the history of our city that suburban property was in such demand as at present. No city in this world presents so many inviting spots for suburban homes, and if our travelling facilities were what they should be, thousands of respectable mechanics who are now compelled to live in courts and side streets would seek surburban homes in order that their children might be brought up among better surroundings and under better influences. The advantages offered by the numerous land associations have enabled poor men to secure building sites which, with an elevated road, would be even nearer to their work than the courts and alleys in which they now live, and these men are patiently waiting and saving in order that they may be ready to build when the road does come.

ALEXANDER R. COLESBERRY AND SAMUEL B. HUEY will be appointed to fill the vacancies from the Seventh and Twenty-seventh Sections in the Board of Education.

STATE LAWS AGAINST RAILROAD DISCRIMINATION UNCONSTITUTIONAL. — The State of Illinois brought suit against the Wabash, St. Louis & Pacific Railroad Company to enforce its laws against discrimination, the company carried the case to the United States Supreme Court, which has decided that only Congress can legislate in regard to inter-state commerce. Consequently all State legislation upon the subject of railroad discrimination is unconstitutional. There is not a law of general application upon the subject among the national statutes. This invalidates all State laws upon the subject, no matter how beneficial, and leaves the railroad companies the right to do about us as they please until Congress passes a general law.

Our Underground Road.

No more important project was ever submitted to the Councils and people of Philadelphia than the project relating to the construction of an underground railroad. A fair presentation of what the company having this project in charge proposed to do and how they proposed to do it was made to the sub-committee of Councils on Tuesday of last week. A future meeting will be held very soon at which the city solicitor, the chief engineer and surveyor, and other city officials, will be present to represent the city's interest in the inquiries that it is proposed to make. It is useless to say this is a project which meets with the hearty approval of the people and the newspaper press. The objections which can be urged against the elevated railway system cannot be urged against the underground system. It is casting no reflection upon the former system to say that the latter possesses advantages which the former does not. Between the two the public would naturally prefer the latter. The system in brief as elaborated by J. T. Deery, the engineer of the company, involves the construction of twenty-six miles of railroad under the city, but about one half of that will be placed in contract at the outset. The road will run from the county line at its intersection with Market street, under Market to Merrick, thence to Filbert, to Broad, and thence northward to the City Line road. Branch lines were projected as follows: From Market, under Merrick, to South Penn Square, to Broad, and under the latter to Government Line road, at League Island: from Broad, under Filbert, to Juniper, to Market and to Delaware avenue; from Broad, under Ridge avenue, to Diamond, and thence to Thirty-third; from Market, under Lancaster avenue, to Fifty-second, and thence to Elm avenue; from Market, under Third, to Diamond, and thence to Ridge avenue; from Market under Third, to Moyamensing avenue, thence to Fourth and thence to Pollock.

At the last meeting the advantages and the difficulties were clearly set forth. High engineering authorities stated that the engineering difficulties, such as they were, could be readily over come. The grades will be moderate and no damage will be done to the sewerage system of the city. The principal difficulty is stated to be the tunneling of the Schuylkill river, and the construction of the tunnel under the Thirty-second street railroad. Mr. McArthur, the architect of the new City Hall, has given this project his careful consideration and approves it and states that no damage would be done to the City Hall. The engineers' plans for the building of the tunnel are complete, and will stand the most careful engineering scrutiny. Maps and plans were shown to the sub-committee setting forth in detail all of the operations to be gone through with in construction. Mr. Haupt of the University of Pennsylvania gives it as his opinion that there are no serious engineering difficulties to be overcome. He enumerated some of the advantages to be derived from the construction of the underground railroad. He argued that the city's revenues which are obtained mainly from real estate could be vastly increased by the increase in the valuation of property which would naturally result from the extension of this system.

While on this matter, we may as well refer to some matters of detail showing the advantages, immediate and remote, which are to be derived from such a system of travel. The increase in population in Philadelphia between 1870 and 1880 was twenty-five per cent.; in Camden one hundred and eighty per cent.; In New York City the percentage of yearly increase in population fell off between 1860 and 1880 from five per cent. to one and one-third per cent. This was due to the deficient travelling facilities. The people of New York traveled 116 times per year in 1870 and in 1878 the travel increased to 200 times per year. The argument is used that an increase in facilities increases travel This is a self-evident fact. The rate of speed on elevated railroads is ten to twelve miles an hour, on horse-cars or cable lines the speed is five to six miles. Surface roads are liable to numerous delaying causes, to wind-storms, rains, snows, fogs and frosts. Cable railroads we find by experience involve numerous and vexing delays. The surface roads oppose the construction of an underground system through fear of a reduction of their revenues. This is contradicted by the experience of New York surface roads. In 1878 when the L road began operations the surface lines were carrying 161,000,000 passengers. Five years later the same lines carried 176,500,000 passengers. It is fair to say that the same result would be realized in this city. From the annual, reports of the tax commissioner of New York the net increase in valuation of real estate for four years prior to the opening of the elevated railroad was $21,000,000, while for the four subsequent years it was $134,000,000. The increase since then is still greater. This is a formidable fact and one which real estate interests as well as the public generally should take notice of. The increase in the value of real estate by the construction of an underground system cannot be measured or even guessed at.

The experience of other cities, both on this continent and abroad, in the matter of transit, throws light upon the question. The London underground system, of twenty-two miles in length, is in every respect a complete success. Berlin has a brick viaduct, containing four tracks, passing through the centre of the city. Paris has given permission to a company to construct and operate thirty miles of covered way and tunnel railway. In New York a company will shortly build and operate a four-track sub-railroad, covering a distance of thirty miles inside of the city limits.

With reference to the details it may be said that there will be no fault found with them. The covering over the projected road will consist of heavy wrought iron beams, supporting arches covered with asphalt, over which will be a bed of earth, and above this asphalt, Belgian block or other good pavement. Cars will be run in trains, and each car will accommodate thirty-eight people. There will be two hundred and ten openings for ventilation in each mile. The motive power will be electricity. The system of sewerage will be reconstructed, and no alteration or improvement of existing sewerage will be made until after the new system is first completed. Steam pipes, pneumatic tubes, and wires for all purposes will be provided for. The work will be executed without interruption to travel of any kind. Protection against injury or damage to buildings will be guaranteed. Passengers can travel to any part of the city for one fare, which will be five cents between certain hours, and ten cents in the other hours.

The city has already reached a point where such a system is absolutely necessary. Population will of necessity increase very slowly. Without such a system people will be driven into surrounding towns and villages, as they are now. The steam roads are entirely inefficient. The proposed increased facilities for rapid travel will multiply traffic, will increase the value of real estate, will induce the thousands who in a short time will be obliged to move beyond the city limits, to remain nearer to the city; in short, will confer advantages in numberless ways, which will go to make Philadelphia the greatest city on the continent.

The company would like to cross the Schuylkill river on a bridge. There seem, to be no good reasons for opposing this. It will reduce the cost considerably without interfering with the convenience of the public. Mr. Ingham, the President of the company, stated that the cost would not be less than $5,000,000, and might reach $10,000,000. The cost of an elevated road he stated was about $400,000 per mile, and that the cost for the underground road would be double that. The company has been chartered, with a capital of $2,250,000, of which about $90,000 is subscribed at this time. The London underground system pays 14½ per cent. on a valuation of $2,500,000 per mile. The people of Philadelphia were disappointed at the defeat of the elevated project, and they will now watch with deep concern the fate of the underground project.

At no time in the history of Philadelphia have there been as many important questions presented to its law makers. Among these questions are that of rapid transportation, of cheaper and better gas, of more extended water facilities, and of better streets and railways. A master mind is needed to lead our municipal bodies out of the ruts in which they have been running for years. The opportunity is now presented of making Philadelphia the grandest city on the continent, and a narrow and short-sighted policy will

throw it back ten years. A vigorous and comprehensive policy will open up great opportunities. Which course will be pursued? The elevated railroad scheme has been defeated. The underground railroad is now before us. Will this also be defeated? Will the interests of the surface line companies prevail? Are the people strong enough to secure a recognition of their rights and interests? Are we to have an abundant water supply? Is the management of our gas works to be placed upon a sound and permanent business footing? Are public improvements to proceed, or are they to be pushed on in an inefficient, dilatory manner, without regard to the urgent demands of the hour? In short, is the city of Philadelphia to be governed by comprehensive management, or is it to remain a vast collection of villages, while cities to the east and west of us are forging ahead? Common Councils can answer these questions.

We have elsewhere referred to the underground railroad. There is no objections made to the ability of the company having this project in hand to carry it out. No public expression of opinion has been made with reference to it. It is to be supposed that the surface roads are quietly opposing it under the apprehension that their revenues will be affected injuriously by its construction. We have given some facts and figures to show that this is a groundless fear; even were it otherwise, the opposition to the underground system on this score would be a selfish and narrow one, and one which the citizens of Philadelphia could not recognize or tolerate. The real estate interests which the REAL ESTATE RECORD represents, call for the earliest possible construction of this underground system. Its advantages are apparent. There are millions of dollars worth of real estate to be benefited by it. The population of this city can be made to increase at double its present ratio. The value of vacant lots in many sections of this city would increase and become desirable for building or manufacturing purposes in the event of the construction of such a road. Rapid transit is absolutely necessary. One speaker before the Councils stated the truth very sparingly when he stated that he spent ten per cent. of his business hours in street cars. The working population of the city are obliged to spend from one to two hours in riding to their homes after a hard day's work. The vast areas from five to ten miles from the business centres of the city would begin to appreciate in value upon the mere determination of the City Councils to authorize the construction of this road. New York is beyond us in many respects. Manufacturing towns are springing up all around us within an area of one hundred miles. Philadelphia possesses some advantages which they do not, but it lacks in the one essential requirement of rapid transit.

It is advisable that the wages question in the building trades should be settled during the coming winter. The building trades of Philadelphia are very compactly organized under trade unions and the Knights of Labor. Wages are about from twenty to thirty per cent. less here than in New York City. Working men are calling attention to this fact and agitating the question in their various unions as to how this inequality may be remedied. They have decided to do so, and by way of preparation are now engaged in a quiet canvass among non-members in order to increase membership. Wages in Philadelphia are lower than in some other cities, because many remain outside of organizations. The activity of the past summer in building operations has served to increase the membership considerably among carpenters, stone masons, plasterers, bricklayers and painters. Even common labor is pretty well organized and the brick makers contemplate the establishment of a national district assembly. If the workmen will make no move until the contractors have made their arrangements for their coming year it will place both them and their employers at a serious disadvantage. Employers do not feel like starting up an agitation of this kind, but it is advisable that the rate of wages should be fixed long before the opening of the spring building activity.

Public attention has been called to the problem of a future water supply through the report of Engineer Herring and some others who have spoken recently as experts upon this question. Councils have proceeded very carefully and perhaps too slowly for the public interests in arriving at conclusions. The most expensive and longest line will be best and cheapest in the long run. The several projects proposed have points of advantage. It is not to be expected that the various engineers shall all agree upon the wisest line of action to pursue. The South Mountain Company possesses advantages which others do not. The question is not, or at least ought not to be, between a few million dollars and a few more. Philadelphia should now provide water facilities that will last fifty years at least. In fact, with but little additional expenditure facilities could be supplied which will last a century. A hundred years is a long time to look ahead, but in these times when civil engineering is developed to its high perfection we can as easily look forward one hundred years as we could a fewyears ago look forward ten or twenty.

There are already indications of financial uncertainties. A vast amount of money is invested by foreigners in America. The possibility has been pointed out that foreign complications might make it to the interests of these foreign investors in American securities and properties to withdraw their investments. This is a false alarm. If we have no financial perturbations until foreigners withdraw their investments here we can rely upon undisturbed finances for many years to come. In fact a foreign war would increase investments on this side. Serious problems are threatening the business of Europe. European and British investors have been much pleased with their investments during the past few years, and they are now engaged through their agencies here in making examinations as to the most desirable avenues of investment in order that when things go wrong on the other side they will be able to profit by the large margins which accrue from investments on this side. At the same time we are not absolutely safe from financial depressions. Our national banking system makes monetary depressions difficult. The demand of the public debt however, threatens to weaken the, foundation of that system. Financiers have been endeavoring to devise some substitute. No sufficient one has been suggested. Every one recognizes the necessity of avoiding the wild-cat system of banking which was another name for the old state banking system. The advocates of money who rest upon gold and silver are renewing their agitations. The advocates of paper money also see or think they see opportunities for the promulgation of their ideas once more arising. The public mind has been largely educated in the past ten years in the functions and uses of money and it can be safely said that with this public sentiment no unjust or insufficient system will be established. One thing the public recognizes more clearly than they did in former agitations of this sort is that an abundant supply of money is necessary. The advocates of the gold standard have been obliged to vacate some of the positions they have heretofore occupied. Silver is the money of the people and must remain so A larger supply of paper money will become necessary on some sort of basis, but no unstaple basis, will be tolerated.

The increase of manufacturing activity throughout the United States during the past few months has been a matter of surprise to manufacturers, capitalists, railroad managers and to the entire business public. The productive capacity of the country has increased at an enormous rate. Producers in every avenue have been surprised. Not more than a year ago well-informed journals reminded the manufacturing interests of the possibilities of over-production. It is not so long since manufacturers were regretting the previous extension of their facilities because of the improbability of their full employment. Prices had been gradually declining for years, and prospects a year or two ago for an early revival of manufacturing was far less encouraging than now. Within the past twelve months an expansion has been developed. Railroad building schemes began to multiply. While last year's railway construction reached only to 3,000 miles of main track, a multitude of schemes were projected, calling for the construction of ten or twelve thousand miles. The first genuine assurances of the improvement was manifested at the rail-mills. Contracts have already been placed this year for the construction of 15,000 miles of road, that is to say enough rails will be turned out this year to construct that amount of mileage. The rail-makers inform us that by the first of December they will have at least five thousand miles of rail sold for next year's delivery. This indicates some very gratifying things. Next year will outdo all former years in railroad building activity. The building statistics of all the larger cities show clearly that more building has been done by far this year than last and the best building authorities both East and West assure us that the indications for the coming year point to a greater activity than this. The rolling mills throughout the country are crowded with orders. The wrought-iron pipe mills have not been as busy in their history. The blast furnace capacity which produces 120,000 tons per week is oversold for from two to three months. Prices are firm and in some directions advancing. A vast amount of bridge building is projected. Our domestic supplies are insufficient and large orders have been placed in foreign markets for crude and finished material to be delivered during the winter and spring.

It is not only in the iron trade that we find this encouraging indication The textile industries are prospering. The railway people are extending their shop capacity, and the machinery builders all through the New England and Middle States have more business in hand than they will be able to execute between this time and the end of the year. The car shops throughout the country are without a single exception sold up, and many of them away into the winter. The complaint among railway managers is as well as among shops that cars are scarce. Even the locomotive builders are meeting with a good many inquiries for locomotive capacity.

How long will these extensive demands continue? Are we doomed to another depression? We think otherwise. The country has learned valuable lessons in the past. As long as the sixty million people in this country cannot afford three square meals a day, so long as pinching economy must be observed by the vast body of wealth producers, so long as they must live without house surroundings and furnishments, so long will it be folly to talk of over-produc-

tion. The great difficulty of the hour is under consumption. Consumptive capacity must increase. Our machinery is made to work and not to stand idle. The expansion of our manufacturing capacity must continue. We have no use for panics or depressions.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ATTESTATION.

An attested instrument must be proved by the attesting witness, unless he be deceased, out of the jurisdiction, insane, interested, or become infamous, or refuse to testify, or did not see the writing executed.

Proof of attestation is also proof of sealing and delivery.

DEED.

In Pennsylvania, when a decedent's estate is sold by order of the Orphan's Court, all judgments and mortgages no longer continue a lien on the real estate; but such lien, in lieu of being continued on the real estate, is transferred to the proceeds of sale, which must be applied to the extinguishment of any such lien.

A DEED MAY BE AVOIDED,

By alterations made in it after its execution, by the disagreement of those parties whose concurrence is necessary, or by the judgment of a competent tribunal.

GROUND RENT.

No ground rent deed made since April 22d, 1850, which contains a reservation that said ground rent is to become perpetual upon the failure of the purchaser to comply with the conditions therein contained, shall be construed so as to make the said ground rent a perpetual encumbrance upon the said real estate; but it is lawful for the purchaser at any time after the said ground rent shall have fallen due to pay the full amount of the same, and such payment shall be a complete discharge of such real estate from said encumbrance.

LANDLORD AND TENANT.

The obligations of the landlord are to perform all the express covenants into which he has entered in making the lease, and to secure to the tenant the quiet enjoyment of the premises.

The obligations of the tenant are to perform the covenants contained in his lease, to defend the title of his landlord, and to redeliver possession of the premises at the termination of his tenancy.

WILLS.

No will in writing concerning any real estate shall be repealed, nor shall any devise or direction therein be altered otherwise than by some other will or codicil in writing, declaring the same executed and proved in the same manner as provided by Act of Assembly, or by burning, cancelling or obliterating or destroying the same, by the testator himself or by some one in his presence, and by his express direction.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

—The Westinghouse Air-Brake Company has increased its capital from $600,000 to $3,000,000. This Company has a world-wide reputation for its brakes and is loaded up with orders for months to come, many of which are from foreign countries.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE Carlisle Car Shops are to be enlarged.

THERE are fourteen dwellings in course of erection in North Wales.

REMINGTON & Co., will erect a brass foundry in Wilmington.

A LARGE property near 9th and Dauphin sts., 95x61, sold for $20,300.

THE dwelling S. E. cor. of Fitzwater and Fallon sts., sold for $16,500.

A NEW St. John's Industrial School is to be built at Eddington, Pa.

DELANCEY ST. properties rule high; No. 2010, 37x100, sold for $22,500.

THE modern three-story brick residence 1530 Vine st., sold for $5,600.

THERE is a decided building boom going on at Clifton, Delaware county.

THE fine dwelling s. s. of Green, west of 18th st., 36x121½, sold for $16,500.

THE English Lutherans of Scranton will erect a handsome church edifice.

AT public sale, a country place of 3½ acres, Lancaster turnpike, sold for $20,000.

AN overall and shirt factory is to be built at Spring City by James Rogers & Co.

EXTENSIVE improvements are to be made to the Gulf Church at Conshohocken.

BY auction, the four-story brick store and dwelling 224 S. 11th st., sold for $9,400.

SAMUEL R. DAVIS is erecting a number of houses on Fayette street, Conshohocken.

A PUBLIC hall and fire engine house will be erected by the citizens of Jenkintown.

EXTENSIVE improvements are to be made to the Academy of Music at Williamsport.

THOMAS STURGES, of West Conshohocken intends erecting a number of new buildings.

A NEW Unitarian church is to be built on Benson st., above Fourth st., Camden, N. J.

O. J. HESSION is erecting a large warehouse at Front and Monroe streets, Wilmington, Del.

EXTENSIVE building operations in Reading it is thought, will tighten the money market there.

THE two dwellings South side of Fairmount ave., west of 19th st., 20x61, sold each for $7,500.

THE three-story brick store and dwelling, N. W. cor. 16th and Spring Garden sts., sold for $4,600.

PHILADELPHIA Trust Companies gladly take up all first mortgages brought to them by builders.

A NEW hose house is to be erected by the Gloucester City Council, Gloucester county, New Jersey.

MESSRS. COMLEY & JARDNER will build 12 three-story brick dwellings 18th and Westmoreland sts.

A FARM of 98 13-100 acres, Red Lion and Academy roads, 23d Ward, with buildings, sold for $13,846.

THE Camden, N. J., Board of Education will erect a new school house at Seventh st., and Ferry ave.

THE corner-stone for a new Presbyterian church has been laid at Janvier, Gloucester county, New Jersey.

JACOB WAGNER of York has purchased considerable real estate in that place upon which he will build.

PRESIDENT SHEPLY has purchased a lot at Marion, Pa., on which he intends building a fine dwelling for his niece.

THE Carlisle Manufacturing Company has just received orders enough for cars to keep the works employed all winter.

THE lot and old building formerly occupied by Sam'l Bispham & Sons, wholesale grocers, 629 Market street sold for $55,000.

IMPROVEMENTS are in progress on the farms of Alan Wood, near Conshohocken, which will consume 500,000 feet of lumber.

THERE were never as many buildings going up in Easton and Allentown as now. There are as many more in contemplation.

THE Pottstown Iron Company is erecting a building at the steel works, 80 by 48 feet, for the manufacture and burning of basic brick.

SILVERBROOK is the name of a new mining town near Mohany City, in Schuylkill county, where a large amount of building is to be done.

THE following are a few of the citizens of Scranton who contemplate building at an early day: Thomas Watts, D. W. Connelly, and Collen Howell.

THE Philadelphia Trust, Safe Deposit and Insurance Company is interested in a number of properties in Easton, upon which fine residences will be built.

CHARLES O. BAIRD, of Darby, will make extensive improvements to his handsome property at Darby. He will expend $40,000 in these improvements.

THE great activity in business circles during the past sixty days has stimulated manufacturing and building enterprise in nearly every State in the Union.

JOSEPH STOECKLE will erect a handsome new building in place of the old three-story ice and store house at Fifth and Adams streets, Wilmington, Del.

THE old Inquirer building, 301 Chestnut, is to undergo extensive alterations to make it suitable for the Philadelphia Petroleum and Stock Exchange which has leased it.

THE disposition to ornamentation in building is more noticeable now than ever before. This gives builders and architects an excellent opportunity to show their taste.

PHILADELPHIA parties are negotiating with James Rhodes of Wilmington for the Franklin Mills property in that city, with a view to converting it into a silk mill.

THE Union Switch & Signal Co. of Pittsburgh, has purchased 12 acres of ground at Edgewood, near the first named place, upon which 100 houses are to be built for workingmen.

THE property at Second and Cooper streets, Camden, N. J., is to be purchased by the Trustees of the Homœopathic Hospital; price $20,000. Extensive alterations are to be made.

THE cheapening of the rate for money will greatly assist the building "boom" which is now upon this city. Cheap money and easy accommodation will encourage many to improve idle properties.

MANY attempts have been made to estimate the amount of money that has been expended in this city in building operations in the past year, but this is impossible. Many have put it between $6,000,000 and $10,000,000.

PITTSBURG will offer many opportunities for builders and architects. There are no

less than one hundred factories, mills, machine shops, etc., to be erected there in 1887. Many of them are going there from other places to get the benefit of the economy to be derived from using natural gas.

THE firm of Erben, Search & Co., one of the most successful and wealthy in our midst, is preparing to erect three warehouses and factories in Tacony for the manufacture of worsted and woolen goods. The plot of ground selected is just south of Disston's mill. Two of the proposed buildings will be each 175 by 75 feet and the third will be 150 by 50 feet. The plant will cost $150,000, and the mills will give employment to 1,500 hands.

GEO. W. HANCOCK, Walnut Street Real Estate Broker, has just completed the sales of properties 4743 Lancaster ave., for $2,000; 4722 Girard ave., for $1250, subject to $750; 4724 Girard ave., for $1250, subject to $750; also lot 4900 Monroe ave., for $400; also six acres, 65th and Lancaster ave., for $1200 per acre; also dwelling house, 3601 Baring st., for $16,000, and 3603 Spring Garden st, for $8000. He reports inquiries for properties and good mortgages scarce.

Architect's Notes.

THE Dispensary Building of the Hahneman College is to cost $38,000.

THE Real Estate Trust Co.'s building at 1340 Chestnut st., is to cost $40.000.

A DWELLING is being erected in Villa Nova for W. H. Maule at a cost of $16,000.

C. HILL is putting up 14 stone dwellings in Germantown at a cost of $5500 each to $14,000 each.

THE cost of the Fourth Street National Bank is to be $425,000. It will be eight stories high.

T. R. WILLIAMSON, architect. will build a fine dwelling at Marion, Pa. R. G. Gibbon is the contractor.

BROWN BROS., Bankers, will erect a handsome bank on the Southeast corner of 4th and Chestnut. Theophilus P. Chandler Jr., is the architect.

MR. ARTHUR TRUSCOTT, architect, 226 Walnut street, is making extensive alterations to the Baptist Church at 9th and Linden streets, Camden, N. J. He also has on hand at 3:d and Market, Camden, N. J., a fine brownstone building to cost about $30,000.

THE Western association of Architects will hold their next annual convention in Chicago on Nov. 17, 18 and 19. Eastern architects have been invited. The turnout is expected to be very large, and important matters will come up for discussion.

MR. SMITH, of the firm of Wilson, Bro. & Co., civil engineers and architects, has been appointed Chief of the Bureau of Instauration of the American London Exhibition to be held next year. Mr. Smith in this particular department is thoroughly practical, having been connected with the Paris and many other exhibitions.

P. A. WELSH, architect, 429 Walnut st., will erect two dwellings at Ridley Park. Each first story brick, and second story redwood shingles, with porch and side porches and furnished with all modern improvements, for Mr. Samuel McIlvain. Also two houses at North Chester, Pa., for Mr. Wm. Flaville, first story will be of brick, the second shingles, and attic furnished with modern improvements; also building a fine stable for A. J. Croll, 855 North Broad street, Philadelphia. It will be brick in red mortar with stone trimmings.

COLLINS & AUTENRIETH, 410 Walnut st., architects, have on hand a very handsome factory for H. D. Jusk at 32d and Spring Garden; it is four stories, with a frontage on 32d street of 110 feet and 40 feet on Spring Garden. This is for the manufacturing of dental work. They are also erecting a very fine house for Messrs. Chas. and Arthur Lea, at Chestnut Hill; it will be frame and shingles, tile roof and terra-cotta ornamentation; it has a frontage of 62 feet by 42, with a 10-feet porch round the three sides, with Porte Cochere at main entrance.

WILSON BROS. & CO., architects, Chestnut st., are erecting for J. W. Hopkins, at Tamaquea, Pa., a handsome dwelling. Also a fine cottage residence for E. B. Leisenring, at Upper Lehigh; also making plans for alterations to the Mint; also preparing plans for the erection of a cottage for E. W. Perry, at Island Heights, N. J., and are at present building a prison wall for the new Philadelphia County Prison, at Holmesburg Junction, the main form of which is 907 feet long; the masonry below surface will be 8 feet wide, rising from the surface with a thickness 7 feet finishing with a thickness of 3½ feet top. The wall will be 35 feet high and will be roofed with timber and covered with tin.

The Real Estate Exchange.

The following notice having been issued to the Stockholders of the Real Estate Exchange, a number of gentlemen in accordance with the resolution have withdrawn their subscriptions:

"At an adjourned meeting of the stockholders of above Company, held Oct. 27th, 1886, the following By-Law was adopted:

"That the Board of Directors shall make all rules and regulations necessary for the management of the business of the Corporation, and for the proper government of the Exchange.

"PROVIDED: That the Board shall make no rules inconsistent with the following resolution, to wit:

"*Resolved:*—That The Real Estate Exchange shall have only for its object, the meeting together daily, in a suitable building, to be bought or rented, of Real Estate Brokers and others interested in Real Estate, for the purposes of buying and selling, through each other, Real Estate and Real Estate Securities, and shall not be authorized to act as Agents, Attorneys, Brokers, or Dealers in Real Estate, in the city of Philadelphia.

"After which the following Resolution was adopted:

"*Resolved*, That all the stockholders, shall have the privilege of withdrawing their subscriptions if application be made to the officers of the meeting, on or before the 15th of November next. And the said officers are authorized to pay each of such applicants the amount of Fifty dollars paid by him, less pro rata of expenses incurred to date.

"Subscribers desiring to avail themselves of the privilege will please notify the Secretary,

JAMES L. STEVENSON,
Fifth and Library Streets."

On Thursday the 11th inst., the Board of Directors met for the purpose of filling vacancies occasioned by the withdrawal of Messrs. Harry K. Fox, John J. Ridgway, D. J. Myers and W. F. Deakyne, and the following gentlemen were elected: Louis H. Redner, Samuel T. Fox, W. Frederick Snyder, D. L. Dallam. On Friday last the Board of Directors met and elected Mr. George W. Hancock President of the Exchange. The Charter has been received from Harrisburg and at an early day the rest of the officers will be elected.

The Board is now composed of the following gentlemen: G. W. Hancock, Frederick Sylvester, James H. Stevenson, J. H. Chubb, Ellwood Becker, Joseph G. Francis, D. S. Lindsay, John M. Erickson, Lewis H. Redner, Samuel T. Fox, W. Frederick Snyder and D. E. Dallam.

Building Fermits.

William H. Pollock, 1929 Poplar st., a 2 story back building, 11x11 2024 Cambridge st.

A. Neiman, 301 Coulter St., a 2-story building, 17x40, Morris, above Hanberry St.

Frederick May, 82 Wister St., a 2-story stable, 11x20 Garfield and Main st.

James McConnell, 2206 Fitzwater st., one 3-story house, 16x45, Bainbridge, above Seventeenth st.

George A. Barber, Adams and Harvey sts., one 2-story house, 16x32 Meehan ave., and Musgrove st.

Henry G. Schultz, 2638 Germantown ave., two 3-story houses, 16x17, 2400 North Ninth st.

M. McManus, 313 North Second st., a 4-story factory, 35x49, Buttonwood, above Thirteenth st.

Michael Moger, 1516 North Eight st., Eleven 2-story houses, 13x25, Stillbourne st., and Columbia ave.

Robert Scott, 803 Norwood st., a 2-story house, 14x20, Virgine and Twenty-second sts.

W. G. Smith, 2536 Marshall st., a 1-story building, 14x13, 3852 Lark st.

W. R. Brown, 2145 Dickinson st., new front, 16x30, 2210 South st.

Andrew M. Conneen, 1302 North Tenth st., a 2-story building, 24x70, Germantown ave., and Grave's Lane.

Amos R. Crosta, Salmon st., a stable and shed, 18x38, Church, above Young st.

Two 2-story houses, 16x42, Salmon and Lefevre st., to same party.

A 2-story shop, 18x40, Richmond and Bockius st., to same party.

Charles E. Bartle, Thirty-third and Lehigh ave., two 3-story houses, 18x32, Cresson and Dawson sts.

John Brennan, 1903 Wharton st., three 2-story houses, 16x44, Tasker, above Twentieth st.

J. Sims Wilson, 1327 Buttonwood st., a 3-story house, 20x29, 1618 North st.

J. E. Mehrer, 644 Franklin st., a 3-story house, 16x15, 644 Franklin st.

William Garovin, 5008 Adams st., two 2-story houses, 15x30, 59 Bringhurst st.

J. W. Kuhn, 917 South Fourth st., one 2-story house, 15x28, 628 Hayes st.

James H. Young, 3940 Chestnut st. a 2-story house, 16x41, Chester ave., and Forty-sixth st.

S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

A BARREL of kerosene oil buried ten feet under ground will, it is said, contaminate every well within a quarter of a mile, and the oil will be apparent to the taste. The accumulation of privy vaults will extend their pernicious influence even a greater distance, although the water which it effects may not indicate to the taste the presence of any impurity. Whether privy vaults are open or plastered with cement they cannot keep the poisonous gases and substances from penetrating the surrounding soil.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

—The Baltimore and Ohio Railroad have asked for a siding at the Twenty-sixth Ward works.

Internal Revenue Receipts for Twenty-four Years.

On July 1st, 1862, the Internal Revenue laws went into operation. Since that time, and up to June 30, 1886, the total, amount of collections were $3,438,290,455.

Of this amount

New York	paid	$606,700,000
Illinois	"	426,600,000
Ohio	"	372,600,000
Pennsylvania	"	288,900,000
Kentucky	"	201,400,000
Massachusetts	"	127,500,000
Indiana	"	118,600,000
Virginia	"	105,700,000
New Jersey	"	104,700,000

The public debt, when it was at its greatest height, amounted to $2,756,431,571. Consequently the Internal Revenue collections for twenty-four years amount to $681,858,884 more than the nations debt when at its highest point.

A SUPERSTITIOUS subscriber, who found a spider in his paper, wants to know if it is considered a bad omen. Nothing of the kind. The spider was merely looking over the columns of the paper to see what merchant was not advertising, so that it could spin its web across the shop door and be free from disturbance.

POINTERS FOR ADVERTISERS.—Don't expect an advertisement to bear fruit in one night. You can't eat enough in a week to last you a year, and you can't advertise on that plan either.

People who advertise only once in three months, forget that most folks cannot remember anything longer than about seven days.

If you can arouse curiosity by an advertisement, it is a great point gained. The fair sex don't hold all the curiosity in the world.

Quitting advertising in dull times is like tearing out a dam because the water is low.

THE burning of a $200,000 building belonging to the Case School of Applied Science, at Cleveland, from an explosion in the chemical laboratory, shows to how small a degree science has been applied to even the best buildings in America. It is a disgrace to our intelligence as a practical people. Our builders ought to take notice of the new method of building blocks, even those not of the most expensive character, which is being introduced at Boston and elsewhere, owing to the influence of the Atkinson plan of building mills. The new method does away with the enclosed floor-spaces and hollow partitions, which are the great opportunity of fire. It supports the floors upon strong beams, not sheathed in, set further apart than the ordinary floor joists, and consequently less numerous, and the floors themselves are laid in heavy plank three or four inches thick. A fire has got to burn some time before it will burn through a floor of that kind, either upward or downward. Partitions are likewise made of plank, standing on end, and lathed in such a way as to do away with all interior spaces. This method is not expensive, but vastly increases the proof against fire. Of course in the more expensive buildings now in course of construction in New York and Boston, the floors are laid in solid self-supporting tile, and the joists are of iron. But those who cannot afford this quality have no need to go on in the old-fashioned sham way of raising brick walls, and then connecting them by floors and partitions of the most inflammable character.

THE United States engineers who are investigating the results of the earthquake in Charleston find that nine-tenths of the damaged brick buildings have been constructed of faulty material and with careless workmanship. One new school-house, costing $20,000, is utterly ruined for this reason. The same condition of things prevails in cities generally, and even where no fault can be found with the material it is too sparingly used, and the structures are necessarily of an unsubstantial character.

And it is not in the matter of houses alone that imperfect or stinted work is evinced. The evil is one which pertains to the age and particularly to this country. In the desire to place cheap goods of all kinds on the market the limit of true economy and prudence is left far behind. The clothing which the great majority of people buy is poor stuff. It looks well at first, but soon fades, comes to pieces, or wears out. It takes about three suits to do the legitimate service of one good one. A large amount of shabby gentility, so far as appearances go, is the consequence, and it contrasts unfavorably with the stout and appropriate garments used by the masses in Europe or by the people of a generation ago anywhere.

The unsound manufacture extends to wagons, agricultural implements, furniture and many other articles in common use. The frequent remark is that it is difficult to find any of these things which are up to the old standard of excellence. A lack of confidence in chairs is experienced by heavy people which did not exist some years ago, and good old housewives mornfully shake their heads at the degeneration of fabrics in which they are interested. Much of this imperfection is attributed to the increased use of machinery, but as machinery is not responsible for the kind of material used, the reason is not adequate. The truth is that there has been a wave towards flimsiness and apparent cheapness in houses, clothes, and pretty much everthing else, and there is a fair hope that it has about reached its limit, and that under the influence of prevailing experiences the current will set the other way, as it has already done in some particulars.

Items of News.

—Charles L. Borie's estate is valued at less than half a million.

—The Finance Committee thinks it is not expedient to reduce the price of gas.

—The corner-stone of the Mary J. Drexel Home was laid on Tuesday afternoon.

The seventh annual meeting of the practical iron workers was held in this city last week.

—The Pennsylvania Railroad Company will hold on to its surplus in spite of John Taylor.

—There is great activity in the building trades. Very few men are idle. Hod carriers are paid $2.75 per day.

—The building trades councils propose to take action in the way of urging the passage of the Underground Railway Bill before councils.

—Eight Siemans lamps are to be located in the neighborhood of the Dock street market. There are now 168 of these Siemans lamps in the city, costing $20,710.76 or $110.16 each.

—The Schuylkill and Lehigh Valley Railroad Company will extend a line from Tremont through Schuylkill Haven to Lehigh Gap. This will be an important coal road.

—The total cash in the United States Treasury has grown from $273,896,027 in January 1, 1880, to $451,068,033 on November 1, 1886. This sum is equal to 82 per cent of the outstanding legal tender notes, certificates of deposit, gold and silver certificates and fractional currency unredeemed.

A New Brick.

The American Brick & Tile Co., whose works are at Phillipsburg, Warren Co., N. J., are introducing something new in the manufacturing of bricks. They are composed principally of slate rubbish, and when ready for market are of a dark red, or any color that may be desired. The advantages claimed in this brick are as follows: first, uniformity of size, in both hard and soft burned bricks, the time in burning and drying being not more than one-fifth the ordinary clay bricks; second, no twisting or warping, as is usually seen in hard burned clay brick; third, strength and durability. By tests made on various machines the medium burned press brick stood an average pressure of 7,200 lbs. per square inch; fourth, owing to their solidity they are much easier to lay and do not take the water so soon, allowing it to form a much firmer bind; fifth, their non-absorbtion of water renders them very valuable for laying water courses and sewer drains; sixth, from actual experiments made in Hoboken, N. J., they have been proved not to discolor when built in a wall as the ordinary clay ones do.

The works of this firm are capable of turning out 25,000 bricks daily (10 hours) of a superior quality. They run one Newell crusher, one dry grinding pan (Carlnes Improved), one pug mill, one Crellens Improved Buck Machine and various smaller machines incidental to their work. Many of our leading architects are willing to use them freely next year, if satisfied they are equal to or better than accepted makes and styles.

Architects and Fire Insurance.

First-class architectural ability means a low rate of insurance. The low water-mark of the cheapest building is the high water-mark of insurance rates. Among fire-resisting building material fire clay comes first, bricks second, with which is classed terra-cotta. Iron does not render the best needed service. If the iron girders or lintels were covered with fire clay they would do better. In all cases where iron has to carry weight it should be protected from heat. Stone takes the second place to break as a fire-resisting medium. Architects should insist on actual tests of stone under the action of fire.

Wood, when cut thin and surrounded by an air space, is very inflammable, but in large masses burns slowly. It has the advantage over iron in that the application of heat impairs its area only, without destroying its carrying efficiency. Wood may be protected and combustion retarded by creosote, and other devices which are often treated by architects and underwriters with neglect.

Asbestos, mineral wool and plaster of Paris are exceptionally good materials to retard the progress of fires. Glass and paper, properly protected, are coming into greater use.

What are the most prominent reasons for the total destruction of buildings by fire? They are, facility furnished for the rapid and unobstructed spreading of flames, which we may call "flues," and, second, the falling out or in of parts of the burning building, which we will call "leverage."

As to flues. In all our common wooden houses the sides are composed of flues, generally open at top and bottom. The same is true of nearly all brick houses, where for reasons of cold and dampness all inner surfaces of the walls have small wood strips set against them, to which are nailed the laths for plastering. This is, in America, the Universal Insurance Company. Elevator shafts and soiled linen chutes often supply a large flue or shaft to connect all the others.

In all these houses the fire is first seen in the roof, but it almost always starts almost anywhere else.

It is not cheaper to build in this way. The first plan should be to make the flue as fire-proof as possible, and stop it up with something that will not burn. At the line of the various floors run out a board between the studs of the partitions, or between the furring on the brick walls. Fill up this board two inches deep with the mortar left from the masonry and plastering, and the difference between this and the common form of wood or brick houses is that this house if it catches fire can be saved; the other cannot. If the wood studs or furring strips have an inner lining of asbestos paper, or an outer lining also, for wood houses or partitions, the security is just that much greater. The flues in the floor should be broken by fire-tile bulkheads. The shafts for elevators, lifts, chutes and other similar purposes are more malevolently designed but not more dangerous. Their walls and doors should be as nearly non combustible as possible and should close automatically. The shaft should in all cases continue through the attic and out the roof, having its top closed with some substance that will readily break if fire be in the shaft; or the top should be tightly closed with fire proof material.

As to the leverage; walls of buildings are generally forced over by some form of direct leverage. The floor joists or beams generally have with the outer wall some fixed connection which, when the action of fire causes the beams to fall down, hold them to the wall, forcing the wall to "buckle" and fall out and in. The mechanical power for destruction of a weight thus applied is very great. Falling under the application of this strain the wall need not necessarily fall inward, but if applied at top or bottom, several reasons may make it fall both ways. It should be insisted by underwriters that a method of anchoring wood joists to walls be used of such character that falling of the joists shall free this anchorage and leave the walls standing.

Trade Notes.

If there are signs of weakness in the general market for lumber, they are not sufficiently developed to be visible to the naked eye.

The volume of business is heavy in this and all Eastern cities. Builders are purchasing liberally, and are less inclined to question prices than a month or two ago. The receipts of white pine have been very heavy, and wholesalers report no difficulty in disposing of their receipts at strong prices. The tenor of lumber paper reviews is that the supplies of lumber for the winter and spring will be considerably short of last year, and hence there is a feeling that with a revival of building activity in the spring, prices will be higher. There is activity in the hardwoods, and stocks are of moderate proportions.

The brick yards have been shutting down, one after the other, all over the country. A few yards will run in a small way all winter, because of the strong inducements. Stocks are light. The brickmakers, here and elsewhere, are preparing to increase their productions next year. A cinder brick of great value is likely to attract a great deal of attention soon. A firm has begun the manufacture of them at Wilmington, Del. Machinery is being put up to turn out 40,000 per day. Further mention will be made of this brick.

The nailmakers held a meeting last week in New York, and agreed to stand out for $2 in car load lot, $2.10 in jobbing lots, and $2.20 in store lots. The demand for sheet iron is very heavy, and bar mills are well sold up.

The slate trade reports a good business for the season.

The stove makers and range builders are very busy, and the plumbers are overrun with work.

The paper-hangers and painters are full of work.

There is very little idle building labor. The prospects for the winter are very good.

How to Render Brickwork Water-Proof.

Perhaps one of the best linings is asphalt, and the Hygeian Rock composition has been used with success. A mortar that is said to be water-proof is made with lime slaked with green vitriol instead of water. The quantity of green vitriol is dissolved in warm water, the lime is then slaked in the usual manner and then mixed with fine quartz sand. For water-proofing brick walls, the following mixture has been recommended: Soft paraffin wax, two pounds; shellac, one-half pound; powered resin, one-half pound; benzoline spirit, two quarts; dissolve these by gentle heat in a water bath, then add one gallon of benzoline spirits and apply warm. The mixture is very inflammable, and must be kept away from the fire. We may mention here another method of making brickwork impervious to water, known as Sylvester's process, which was used with success on the Croton reservoir, Central Park. It consists in the successive application to the walls of two washes—one composed of Castile soap and water and the other of alum and water. The proportions are three-quarters of a pound of soap to one gallon of water, and one-half pound of alum to four gallons of water. The walls should be quite dry and clean, and the temperature of air not below 50° Fahr. The soap wash is laid on first with a flat brush and at a boiling heat. After twenty-four hours the wash becomes dry and hard, and the alum wash is applied at a temperature of 60° to 70° Fahr. This is allowed to remain twenty-four hours, when the operation is repeated until the wall has become impervious to water. The number of applications required will depend on the water pressure to which the wall is subjected. In the Croton reservoir case four coatings were found to render the reservoir free from leakage under forty feet head. Resin has been used also as a protection against moisture. Five parts of turpentine heated and stirred in ten parts of pulverized common glue and one part of finely-sifted sawdust are then applied to the wall, which should be cleansed and heated by means of a lamp so that the composition may run into every crack and joint. Very often a cement lining is of no use to make a tank water-tight, especially where the bricks and joints are of an inferior description, and the aim should be to get a composition which, when heated, enters the pores of the brickwork and renders them impervious.

It is Unlucky

To be struck by lightning on Monday.

To sit on a buzz-saw in motion on Friday.

To break the mirror your wife's mother gave her.

To fall down stairs with the parlor stove on Tuesday.

To speculate with other people's money and get caught.

To get wet when you fall overboard while boating on Thursday.

To dream of snakes after drinking cider in a prohibition town.

To see a bill collector over your right shoulder on Saturday night.

To see a bull-dog over your left shoulder in your neighbor's orchard.

To see your overcoat over either shoulder as you pass out of the shop of your uncle.

To bet all your money on a horse whose driver has bet his money on another.

To marry on Wednesday a girl who practices with ten-pound dumb-bells.

To spill salt in the coffee of the man who has the carving-knife.

To be one of thirteen at table when there is only food for six.—*Tid-Bits.*

—A new school-house will be erected in Camden at Seventh street and Ferry avenue.

—The value of the imports at the port of Philadelphia for the past year show an increase of twenty-five per cent. over the imports of the previous year.

Some citizens of West Philadelphia are in favor of the construction of a bridge over the Pennsylvania Railroad, at Thirty-fourth street, at a cost of $150,000.

—The *Manufacturer and Builder* thinks that the man who is working to secure a small piece of property substitutes a new and distinct ambition for a remote and vague one. Day dreams about large estates and princely incomes may be very amusing, but they are not half so profitable as a vision of a lot 100 by 200, with a snug little dwelling house upon it. With this before a man he will rise early and retire late, turning his hand cheerfully to any and every kind of work. He will have a motive for rigorous economy which will make it a pleasure. He will have the vision of the last payment before him as a perpetual motive to moderation in living, economy in expenses, abstinence from expensive companions. Thus it will come to pass that a judicious debt, incurred at the beginning of a journeyman's or laborer's career, will become his good genius, watching over him, inciting him to all industry and to self-government. Every laboring man ought to own his house. The first duty of the workingman should be to convert his earnings into real estate.

GUARANTEE

Trust & Safe Deposit Co.

LEARY'S OLD BOOK STORE
No. 9 S. Ninth Street,
FIRST STORE BELOW MARKET.

First Use--Then Beauty.

Our idea in fitting up the store No. 23 North Eighth street is briefly expressed in this heading. It is intended in the first place FOR THE PEOPLE, offering them all the styles of boots and shoes from the finest to the medium grades. It is intended for a FAMILY SHOE STORE, supplying fathers, mothers and children, the old, the young and the babies. It is comfortable, cheerful, well lighted, and, we hope, well served. After planning and arranging everything to these ends we then thought of making it attractive, of pleasing the eye and taste as well as the more important considerations of comfort and use in the merchandise offered for sale. We have every reason to think we have been successful in these last particulars, as our store has had many compliments on its appearance. But we have not lost sight of the first intention, and we wish to bring it prominently before the public. Our store is one where ALL can be suited. It is not a "show store," but a place for real business, where all are welcome, and the wishes and wants of all are consulted. We repeat, we have ALL STYLES OF BOOTS AND SHOES, FROM the FINEST TO THE MEDIUM GRADES, AT REASONABLE PRICES. We have BOOTS AND SHOES FOR GENTLEMEN from $3 up, and BOOTS AND SHOES FOR LADIES from $2 50 up, in all the different kinds and materials and all DAY SEWED EXCEPT in the TURN, SOLE OR SINGLE SOLE dancing boot and slipper. All are invited to visit us, and if they do not meet with a respectable and attentive reception we hope we will be told of it at once. The store contains "enough and to spare for all the needs of shoe wearers, and we cannot repeat too often. in this place, that we intend to supply ALL but those who want cheap, shoddy shoes. They are not made—AND CANNOT BE MADE—by the Day Sewed Process.

If any goods purchased of us prove other than represented or not satisfactory, we request that they be returned, in order that they may be exchanged. Repairing of all kinds at moderate prices.

THE DAY SEWED SHOE MFG. CO.
Under the management of W. W. APSLEY.
No. 23 NORTH EIGHTH STREET
PHILADELPHIA.

THE PHILADELPHIA

Real Estate Record

AND

BUILDERS' GUIDE.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 46. PHILADELPHIA, MONDAY, NOVEMBER 22, 1886. PRICE 15 CENTS

News Items.

—Charles Baeder's estate is valued at $613-862.99.

—The personal estate of Henry H. Reed is appraised at $121,332 42.

—James Simpson, the ship builder, left an estate valued at $150,000.

—Notwithstanding the rapid growth of labor organizations there is a large element of non-union labor in the country which seems anxious to accept employment where opportunity offers.

—Three and a half per cent. interest will be paid on the 24th instant on the registered income bonds of the Lehigh and Wilkes-Barre Company, issued for funding coupons of the consolidated mortgage.

—J. Hoover has bought a lot on Buttonwood street, adjoining his present lithographic establishment, where he will erect a four-story structure, 35x49. The increase in the chromo business has made this extension of facilities necessary.

—The M. E. Church Extension Society held its twenty-first annual meeting on last Thursday, at 1026 Arch street. Last year $230,000 were expended for church improvements. The Society expects to collect and contribute for this purpose $250,000 during the coming year.

—The formation of a National Union of workingmen is now the order of the day. No less than twenty have been organized during the past year. The latest movement in that direction is in the case of the garment-cutters. The movement originated in New York, and a convention will be held in Cincinnati on December 8th.

—The *Financial Chronicle* reports the earnings of eighty-eight railroads in October to have been $32,432,490, an increase of $1,763,425 on an increased mileage of 2309 miles. Of the eighty-eight roads sixty-one show gains. The earnings of eighty-two roads, from January 1 to October 31, were $245,888,527, an increase of $251,560. During the first week in November thirty-seven roads increased $267,742 in gross earnings as compared with same period in 1885.

—A sub-committee of Councils' Highway Committee resolved to recommend the passage of ordinances for paving Commerce street from Fourth to Fifth, and Cherry street from Broad to Sixteenth, with granite blocks, and Locust street, from Eighteen to Twentieth, with asphaltum, excepting that portion south of Rittenhouse Square which is occupied by railway tracks. This will exhaust the balance of the appropriation for improved paving, amounting to about $10,000.

—The statement of the Treasurer shows gold, silver, United States notes and other funds in the Treasury on November 12, as follows: Gold coin and bullion, $248,657,119; silver dollars and bullion, $187.200.835; fractional silver coin, $26,022,506; United States notes $37,229,687; national bank notes, $273,-236; national bank notes in process of redemption, $1,967,083; deposits with national bank depositories, $13,708,717. Certificates outstanding—Gold, $88,788,479; silver, $102,-231,345; currency, $7,060,000.

—What promises to become a very prominent feature of the trade of the next six months, says the *Lumberman*, is the shortage of stock at nearly all the chief points of distribution in the West. Despite the assertions to the contrary made by some commercial writers not fully informed as to the facts, it is too clear to admit of question that the trade is not nearly so well off, in respect to its supply of leading qualities of lumber in condition for shipping, as it ordinarily is at this time. There is reason to believe that the present available stock is at least twenty per cent. smaller now than it was a year ago.

—The building trades councils of Philadelphia held a meeting on Thursday evening of last week at which it was proposed to make a test of the Pennsylvania conspiracy law in the case of the indictment of the workmen who were arrested for inducing carpenters to quit work on Hood, Bonbright & Co.'s building at Eleventh & Market streets. The workingmen regard this case as a violation of their rights and consider it a very good one to make a fight on. They propose to employ the services of some friendly lawyer of national celebrity, and Benj. F Butler has been selected. General Butler would be a good advocate as he is in sympathy with the workingmen and has had considerable experience before the Courts of the country fighting their cause.

—There is a strong movement upon the part of manufacturers in various industries to put themselves in positions where they will be able to meet the demands of their workmen with more equanimity. Employers in this and other states who have been studying the position very carefully say that many of the defeats which they have been obliged to take, have been due not so much to the strength of the labor organizations as to the lack of a proper understanding among themselves. They will endeavor to correct this evil and present a united front to organized labor during the coming winter when questions of wages will come up for discussion. Organized labor will be very glad to deal with organized capital. It would be better all around.

—A patent has been issued to George Westinghouse, Jr., of Pittsburg, inventor of the Westinghouse air brake, for a new system of distributing electricity to be used in lighting and for other purposes—a system which, it is said, will greatly cheapen the electric light, and render it a more dangerous rival of illuminating gas than it has ever become. The new invention will, it is alleged, effect a saving of about 95 per cent. in the distributing main wires, as compared with the Edison

—The Bell Telephone Company have won a victory. The recent United States railroad decision favors the railroads. The Supreme Court decision in Pennsylvania justifies the store order outrages. These are all straws which show which way the wind blows. They all stimulate indirectly the organization of labor, because workmen see and feel that municipalistic tendencies are still at work. The Judges may be right in their decisions, but if so this fact only argues that there is a stronger necessity for organization on their part.

New York Notes.

—A lot 75 x 125 on the corner of 7th Ave. and 130th street, New York, sold for $42,000.

—Building activity is reported all over Brooklyn. A great many fine private residences are being built.

The Hudson River tunnel progresses very slowly. Some people have almost forgotten such an enterprise is under way. Pulitzer ought to boom it.

—Philadelphia brick will be used in the construction of a large apartment house to be erected on the corner of Pleasant Avenue and 116th street, New York.

—Three hundred acres having a water front on Staten Island of a quarter mile have just been purchased below Vanderbilt's landing for the use of a Western railroad to connect with the Anchor line of Steamships.

—The electric motor has been tested on the Eighth Ave. City Railroad track. The electricity is stored in a Siemens invention. The cars carry more passengers and run faster and do not take up as much room as the street cars.

—The Third Avenue Railroad Co. of New York is thinking of spending $1,500,000 in discarding horse-power for cable services. This proposed departure is due to the strike the Company has had with their drivers and conductors.

—The sale of the Lorillard estate has been the feature of the real estate market of New York last week. The property sold at more than it was appraised by the heirs. The total amount realized was $648,700. Some other large properties are being sold in New York City.

—The sale of vacant lots in New York this week has excited a great deal of interest. There is quite a speculative feeling in real estate circles and some properties are run away up. A good deal of property is selling in the neighborhood of 110th and 115th Sts., and between the Boulevard and Riverside Avenue,

One Year, in advance, - - - - $5.00

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, NOV. 22, 1886.

THE Altoona shops have been turning out a freight car for every working hour for the last two months.

AN agitation is going on in Pittsburgh for the erection of a blind Asylum, which it is estimated will cost $150,000.

THE New York Sub-Way Construction Co. is about being reorganized and the scheme will be pushed to completion.

THE Lehigh Valley Railroad is very busy. The average business for October, was forty-four coal, thirty-two freight and thirty passenger trains per day.

THE glass blowers in and around Philadelphia it seems have gained their point on the apprentice question. Work will be resumed at the Dyott Green Glass Works without apprentices, and at no reduction of wages.

IT is certainly an excellent showing for the Baltimore & Ohio Telegraph Co., to show an increase in its earnings during the past fiscal year of 172 per cent., as compared with 1884, and 41 per cent as compared with last year.

THE New York workingmen encouraged by their political success propose to push trades unionism a little farther. A general strike of the union painters took place last Wednesday afternoon. Twenty-five hundred men are concerned.

IT is likely that a public meeting of the people of Philadelphia will be held at the Academy of Music on next Saturday night, to protest against the leasing of the Gas Works. The matter is being worked up.

One feature of the New York Real Estate Exchange might be safely adopted by ours, namely, to establish a department of wants and offers. This system brings out a great many wants and a great many offers.

THE members of the councils' Committee on Finance visited the almshouse last Wednesday to ascertain the improvements desired to be made. Two additional pavilions are wanted that will cost $50,000, $25,000 is wanted for a new water main, and $2500 for repainting the institution. The Guardians of the Poor have asked for an extra appropriation of $40,000 to provide for the expected increased population.

THE farce of the Gas Trust equity suit is still being played. It is expected that in a few more meetings the defendants' testimony will all be in and then the whole case will go to a master. It is to be hoped the ringsters will not put the master on the bench. Their last move of that kind gave us one of the best Judges we ever had, but deprived the city of the services of an excellent master.

THE elevated railroad project has been up again. This ordinance was referred to the committee by a vote of 71 to 18. Mr. William M. Smith introduced the new ordinance which is similar in many respects to that defeated in Select Councils recently. His purpose was to have the ordinance referred to a special committee of fourteen. A good deal of sparring was indulged, and the question will come up again. There will be a good deal more sparring of a different kind done at the next election if the city is to be deprived of its valuable properties and more valuabe franchises by unfair means.

THE New York Lumber Trade Association will shortly be established on permanent footing. A good deal of difficulty has been encountered in bringing the Association to its present degree of perfection. Membership will be open to the entire trade of the city and within a radius of twenty miles. Associate membership may be secured by any corporation, firm or individual legitimately engaged in the lumber trade throughout the United States. This rule was not adopted without a good deal of opposition. The Association is well-officered and after a few more meetings to perfect details, it will hoist its flag and sail on.

WHAT can be the motive of the Gas Trust in refusing, to give the Baltimore and Ohio Rail Road Company suitable sidings at the Twenty-sixth ward gas works? Are the members of the Gas Trust subsidized by the Pennsylvania Rail Road or are they purposely preventing the Baltimore and Ohio Company from competing with the Pennsylvania Rail Road for the transportation of the coal that is used at the above works, knowing that such competition will cheapen the price of coal and consequently disturb mathematical calculations?

THE New York Real Estate market is quite active. Three or four large estates are being sold in large plots and there seems to be an anxiety among builders and those they represent to secure the most desirable sites for house building purposes. Manhattan Island is building up very fast, and the upper section of the city especially, is the theatre of great activity. Real estate is advancing in value, but this fact seems to stimulate rather than check demand. More abundant railway terminal facilities are desired and it is a problem which seems to be putting the architects and railroad managers to their wit's ends. The tunnel under the Hudson river is not progressing and an interest is being worked up in this enterprise on account of the importance of the question to New York.

THE American Institution of Architects will hold its twentieth convention in New York City on the second and third of December. It is intended to have this meeting the largest and most enjoyable since the foundation of the Association. The western architects have by their numerous and well supported organizations stimulated the eastern architects to greater efforts. Throughout the West there is a spirit of enterprise which has not been met with in the east. There is no good reason for this lack of interest and architects here feel as much interest in their profession as they do elsewhere, but there is less of the jovial, open-hearted "how are you?" feeling in the East. There is no more reticence, more formality, more trade secrecy and jealously, though there are no real solid reasons for this condition of things. A more satisfactory code of professional ethics is desired. The membership has been steadily growing and a large turnout may therefore be expected, so we are informed by interested parties.

ACCORDING to the decision of the Supreme Court of this State corporations do not come under the act of 1885 which imposes a three

mill tax upon mortgages. The court held that corporations are taxed under other sections of the revenue law which imposes a tax on their capital stock and that the three mill mortgage tax applies only to mortgages held by individuals. This interpretation of the law is certainly an unjust one as it practically releases from taxation, immense sums that have been loaned on mortgages by institutions that have no capital of their own, but which are depositories of the peoples savings, these sums aggregating millions are loaned on mortgages at the highest interest the depositors receiving but a bare pittance as interest. As an off-set it may be said that these savings institutions afford depositors security and safety not obtainable elsewhere, yet the earnings of these institutions are so great that they can well afford to pay the three mill tax and thus bear a part of the public burden which is imposed upon the individual without the shadow of a chance for evasion, besides which there is no justice in taxing individuals and allowing the wealthy saving funds to escape and the framers of the law never intended they should.

THE Master Builders Association of the city of Philadelphia have incorporated themselves for protective and defensive purposes. The object set forth is as follows:—"The character and object of this Association shall be, for the encouragement and protection of the building interests in the city and county of Philadelphia, to inculcate just and equitable principles, establish and maintain uniformity in commercial usages, acquire, preserve, and disseminate valuable business information, and avoid and adjust, as far as practicable, the controversies and misunderstandings which are apt to arise between individuals engaged in trade, when they have no acknowledged rules to guide them; to the end that membership in this Association may be an assurance to the public of skill, honorable reputation, and probity."

The Board of Directors shall consist of one person from each trade represented. The Associaton shall have no capital stock. It will have a president, three vice-presidents and a board of directors, clerk or secretary and treasurer. Any person engaged as an employer in the constructive mechanical trades can be a member. Fifteen members will constitute a quorum, and five votes against an applicant will defeat his election. Failures to pay dues for six months shall work the forfeiture of membership. Members can be expelled by a two-thirds vote for good cause, corporations can be represented in it. The association will meet on the fourth Tuesday of each month at eight o'clock P. M. Annual meetings will be held on the fourth Tuesday of January each year. The Board of Directors will have the general management of the affairs and properties of the Association, subject to its instructions. There will be a committee of arbitration of five members to decide disputes between members. The admission fee for members will be $25.00 and will constitute a special fund. The annual dues will be $12.00, payable quarterly.

COMMON Councils took fright last Thursday and did not give away the gas works. They will need close watching to prevent the acceptance of some soft bargain in favor of some syndicate or other. Some of the syndicates are prowling around the Council Chambers trying to wheedle the City representatives into a betrayal of their trust. Of course, there was a lively discussion, but it took no philosopher to see what was beneath. The lookers-on had more weight in the Council Chambers than the members themselves. A communication from a "Citizens' Committee" was submitted and read. It was signed by Wm. Sellers, Francis D. Reeves, Henry D. Tatham, John Hunter, Charles Spencer, John Y. Huber, Henry C. Lea, John Field and Joel J. Bailey. It pointed out the fact that a good many cities are supplied with gas at $1.25 per thousand, and that we should not pay $1.50; that the difference of twenty-five cents means $500,000 per year. The communication states that the lessees expected to make a million dollars a year out of that production,and that it was the opposition of the Gas Trust, who would not allow the properties to be examined, that prevented their committee from giving reliable figures as to the cost of improving and running the works. Another communication was submitted, signed by S. L. M. Barlow, J. R. Keen, and J. R. Bennett, of New York. The communication asked a postponement of action upon the ordinance until the next regular meeting, that they might have the opportunity of putting in a bid for them. They propose to pay down $100,000 and to pay a large bonus soon after. The ordinance was postponed until November 30th. Some lively work may be expected. It will be a surprising thing if the interests of 1,000,000 of people can be trifled with as some of the schemers contemplate.

ARCHITECTS are giving attention to the question of better and cheaper facilities for the conveyance of drawings by mail. At present tracings must pay letter postage. Even where drawings are encased in pasteboard cylinders, the cost goes higher than it should. In consequence of the mishaps which frequently occur, many architects are obliged to go to the trouble and expense of sending packages by express. The English Government is ahead of us in this particular. We are twenty or thirty years behind. In European countries a box or parcel is as common as a letter. In England a package can be sent which will weigh 70 pounds and which does not measure more than 6 feet both ways. This takes trunks. Of course, our express companies would fight anything of this kind. The parcels post in Great Britain and Europe now include services from one country to another and from mother-countries to the colonies. It is in excellent operation between England and Belgium, and only a short time ago the parcels post system was established between Germany and Holland. A 14 pound package can be sent from England to New Zealand for thirty cents, a distance of 14,000 miles; this shows what can be done here. We have no reason to deprive ourselves of these facilities in order to increase the profits and opportunities of Express Companies. Our postal facilities need to be developed in many directions. We need a parcel post system badly, and it is not saying too much to say that we will have it despite the opposition of the Express Companies individually and collectively in this line of monopoly. Of course, the fight would be a bitter one but the people when they can be enlightened as to what ought to be done, and as to what is being done elsewhere, will be able to carry their desire into realization. It becomes the duty of the architects to begin this agitation. We understand this agitation is contemplated. The establishment of a parcels post is of benefit to all classes.

IF the interests of Philadelphia are properly looked after, the city will grow in population, value and productive capacity much faster during the coming five years than it has during the past five years. There is no occasion for driving small or large manufacturers from our city to surrounding towns. A great deal of this driving is nevertheless going on. Circumstances are doing it; inducements are being offered to large and small manufacturers in towns within a hundred miles of Philadelphia to locate there,and a great deal of land has been bought within the past year for manufacturing purposes and much money expended in them for that purpose. Our City Councils have a very important duty to perform. If our city is to remain in the leadership of politicians who seek their own selfish good at the expense of the city's there will be a silent and gradual outflow of capital to localities where more advantageous facilities can be had. We need more improvements than we will likely secure. We need as has been frequently pointed out, a water supply system that will guarantee a much more abundant supply than we now possess. We need a reorganized gas system and are likely to secure it, but not through the honesty of those in control. It will be the indignation of the public that will bring it. It has been frequently pointed out that we need better pavements, better lighting, that we need elevated railroads, that we need an underground system, and that we need a dozen things which, were we in a position to purchase them, and had we a municipal government to establish them, would be soon established. But for the present we are obliged to go slowly. In fact we are obliged to fight against corruption, against the selling out of valuable franchise for a song, and against secret influences and companies which aim at taking advantage of us. It is no use to cry out against these evil influences, because those who are seeking to establish themselves in high places to maintain political control, have no consciences. We have a powerful enemy to fight within the midst and that enemy cloaks itself under respectable names, but the people understand that these syndicates intend to secure control of

valuable franchises which will realize them fortunes without rendering an equivalent.

THE annual farce of making large appropriations for municipal improvements, and then reducing them in order to gain a popularity for economy, has been gone through with by the Councils' Finance Committee. The people understand the play and enjoy it. Some new device must be resorted to, to gain the reputation of statesmanship; this has been worn out. The managers of the House of Refuge secured their $43,000. The Park allowance was reduced from $100,000 to $50,000. The amount for nurseries, planting and so on was reduced from $7,500 to $2,500. The sprinkling of drives was reduced from $23,000 to $20,000. $5,000 instead of $10,000 will be used for building foot bridges through the Park, and $10,000 instead of $15,000 for the care and maintenance of Memorial Hall. $30,000 was asked for a new glass roof for Horticultural Hall, but not a dollar will be spent at present. Instead of $50,000 for finishing the concourse in the vicinity of the Welsh Memorial, $10,000 will be used. $1,000 instead of $5,000 will be spent on resurfacing the Wissahickon road. $5,000 instead of $20,000 will be spent on the continuing of the river wall from its present terminus. So it goes all through from A to izzard. The salaried officials did not forget themselves; they were in bright and early with requests for an increase. A committee of public school teachers appeared before the Finance Committee, and advocated an increase of 25 per cent. in the salaries of teachers. Considering that Philadelphia is at the tail end of the list in regard to teachers' salaries, their request might be seriously considered. The Highway Department asked for $1,170,200, which was reduced $419,800, the reductions as follows:—Item for paving intersections, from $40,000 to $35,000; item for repairing unpaved streets, small bridges, and building drains, from $30,000 to $25,000; item for resurfacing Macadamized roads, from $20,000 to $18,000; item for grading, from $75,000 to $60,000; item for cleaning streets and markets, removing ashes, garbage, etc., from $300,000 to $200,000; item for grading, curbing, repaving footways, etc , from $7,000 to $5,000; item for crossing, gutter and tramway stones, from $40,000 to $35,000; item for emergencies, from $5,000 to $1,500; item for repairing, altering and extending sewers, from $20,000 to $15,000; item for repairs to bridges, from $112,300 to $30,000, and the items of $130,000 for new bridges and $150,000 for new paving stricken out entirely.

WE are told we are at the end of the building season. We would not know it unless we were told so. The building journals do not show it. Throughout the country permits are being taken out in large numbers for buildings, large and small. A great deal of new work is projected which will keep the architects fully as busy as they were last winter. New York seems to be taking the lead. A great many buildings are projected there costing from $50,000 to $200,000 each. A great many alterations are also projected in that city. The same is true of Brooklyn. A great many dwellings are projected there which will cost from $20,000 to $50,000. Besides these finer dwellings a great multitude of smaller houses are about to be built this winter, intended for workingmen. Throughout Pennsylvania a good deal of winter building will be done, mainly of houses of small cost. A great deal of manufacturing building will be done also. A statement was made a few days ago that upwards of 200 manufacturers were contemplating removal to western Pennsylvania within the limits of the natural gas belt. No doubt this is a gross exaggeration, but there is a great deal of building projected there nevertheless, and many manufacturers, large and small, will remove there and more will follow in their footsteps as they become satisfied that the supply of natural gas will be permanent. Eastern Ohio is feeling the benefit of the stimulus from this source. A great deal of church and school-house building is to be done, besides buildings for educational purposes. The bulk of these buildings will be of stone. The construction will be of the very best fire-proof material Architects are leaning to a plainness of outline rather than to the reverse. A great deal of building activity is reported throughout the Northwest. Strange to say a good deal of wooden building is talked of. Church work is abundant.

The bulk of the projected work in the Southern States is manufactory and shop building. The investments for the past twelve months will no doubt foot up $100,000,000, if the statisticians who devote attention to these matters are to be relied upon. A great deal of money is seeking employment South. Nearly all the investments of the last four years have proven fortunate. There are fewer risks to run and the confidence is manifested on the part of not only Northern but European investors in Southern manufacturing and railroad enterprises.

THE gas question is just now the all absorbing one. A more important one is the water question. The city is confessedly unable to furnish a sufficient supply. It is the height of municipal foolishness to delay this question on this account. The City's necessities are of a most urgent character. Hundreds of millions dollars worth of property are to-day in jeopardy, because of the insufficiency of our water supply. Those who have occasion to pay insurance bills know what this means. Insurance rates have been advanced as much as ten per cent. in the old section of the city, and why, because in the event of a fire, the probabilities of a prompt extinguishment are gradually lessening. In other words, the probabilities of a small fire growing into a large one are greater now than two or three years ago. The extra ten per cent. counts up a good deal upon all the property insured. The insurance officials of the city are tired of calling attention to the insufficient supply of water. Our Water Chiefs when questioned about what they propose to do, reply in a dreamy sort of way that they guess there is not much danger. The fact of the matter is simply this, that the danger is great and increasing. The city is to-day unable to better itself, and there are no probabilities that for the next twenty years it will be any better able to invest the millions necessary in the improvement of our existing system, or in the establishing of a better one. If there is any way of avoiding the placing of our water supply in the hands of private interests, the REAL ESTATE RECORD wants it pointed out. We would furthermore like to have some one point out wherein the city would be placed to any disadvantage by putting the matter of its water supply in the hands of a private company. It must come to it sooner or later. We are unable to see what benefit is to accrue from delay. On the contrary, it is evident that it is in the city's power from recent propositions submitted, to make a bargain which will increase its revenues as well as vastly increase its water facilities. The reason why such an enterprise is not at once taken hold of, is an indifference upon the part of the public. The public's attention is distracted from this vital question by other questions, such as gas, elevated and underground railroads and others. There are too many in control in the city who are unwilling that any great measure should go through, unless it brings them the largest possible profit in one direction or another. It is this opposition with which we have chiefly to contend at this time. We are told that we cannot have a new gas management unless we perpetuate the old management in disguise, and when it comes to deciding upon the establishment of a new water system, we will no doubt be told, not in so many words, however, that we cannot have it, unless we will submit to a perpetuation of political bossism, from which we have been endeavoring to extricate ourselves for years. The only cure for these threatening evils, is a thorough popular rebellion of the people against existing municipal methods. Propositions have been made to the city, endorsed by our highest engineering authorities, by which in two or three years without the outlay of a dollar, we can be supplied with a bounteous supply of pure water under a system which is capable of infinite extention. The city will, no doubt in the end compel the acceptance of some such a system. The present is the proper time to take action, and the attention of councils to this important matter is urgently directed.

IF those members of Council who advocate the leasing of the Gas Works, knowing as they do that public sentiment is against it, and that the scheme is regarded by the citizens of this city as a pure and simple piece of unadulterated rascality, are still determined to obey the behests of their masters and pass the measure, they will justly merit and should receive the scorn and contempt of every respectable man and woman in the community. Ordinarily on questions involving public interest there is room for hon-

est difference of opinion; but in a case embracing millions of property as does the gas lease, which it is proposed to hand over without a shadow of reason to a gang of capitalists, who have already grown rich at the people's expense, there can be no honest difference of opinion and the man who votes for such a measure brands himself as a scoundrel unfit for a public trust, and should be treated as such. The Philadelphia *Record*, in its issue of the 17th, inst., uses the following pointed argument:

"The experience of nearly every American city gives warning that in selling the Gas Works Philadelphia would move backward, like the sand crab. In nearly twenty cities of England the gas works have been bought by the municipalities from private owners in order that the many evils of private control of the gas supply might be overcome. Philadelphia and Richmond are the only American cities which stand in the advantageous position of complete control of their system of lighting, though in many parts of the country herculean efforts are being made to do away with private ownership of the gas supply in order to reach the position which Philadelphia occupies.

Within the next six months the present Board of Trustees of the Gas Works will have been abolished, and for the first time in its history the city of Philadelphia will have an opportunity of ascertaining what improvements and economies can be introduced into that department. Under its present management there is no direct or concentrated accountability. The department is now run as a political machine, and over $1,000,000 a year is expended for unnecessary labor. Under the new city charter the works would be placed in the care of a superintendent, and it is believed that the department could then be administered as economically and as thoroughly as has been the Water Department, which yields a net revenue of $1,000,000 a year to the city. Gas at 65 cents per 1000 feet would then be a possibility.

But if Councils shall decide that the works can be more profitably managed under private control the taxpayers are certainly entitled to all the advantages of competitive bidding. It is unfair to our people to accept the proposition of any particular syndicate without first inviting proposals from the capitalists of the world. Such a bargain would have in it the flavor of jobbery.

But if the Gas Works might be placed under private control let it be done to the best advantage of those who pay the taxes and bear the burdens of municipal management. Let it be understood that any bargain which disposes of the Gas Works must be made in daylight and after mature consideration. Those Councilmen who are attempting to dispose of a property worth $40,000,000 should rise to a sense of the responsibility that is resting upon them."

THE glass manufacturers held a meeting at Lafayette hotel on Thursday and passed a resolution not only agreeing to not pay the advanced wages demanded, but to stop their furnaces, unless the workmen will accept present wages. This is another indication of the growing determination upon the part of manufacturers to combine and resist labor dictation. Much of the agitation and hundreds of the strikes which have occurred this year have been due to the fact that the manufacturing interests were not organized. Even the workmen themselves believe and assert that their employers cannot stand together. This is an error. The textile manufacturers of Philadelphia have shown that when their interests are seriously threatened as they have been that organization is possible. It is true that when demand comes a very strong tempation is presented to some of the weaker members, and in times past, these temptations have not been resisted. The master builders of this city have made a movement which shows that they too appreciate the urgent necessity for trade organization. Heretofore their union has been of comparatively little use. It was organized a hundred and more years ago and has existed all there years with very little vitality. The organization of labor which has assumed such extraordinary dimensions within the past year or two has made a departure necessary, and the building interests of this city have promptly accepted the issue and will show as their Boston brothers have done that they are abundantly able to cope with whatever difficulties may be presented to them.

THE highway department should see that when the streets are torn up the re-paving is done in a proper manner.

PERSONAL.—Mr. E. R. Brevoort, of the well known firm of Robert L. Pirsson & Co., 19 Park Place New York, importers and dealers in building stone was in town last week looking after that firm's interest. Mr. Brevoort says that big things are anticipated in New York for the building season of 1887.

IT is not at all unlikely that the natural gas supply which is now attracting so many manufacturers will suddenly become exhausted. To estimate the length of time that a sufficient supply can be relied upon is simply speculative, for there is no valuable data on which such an estimate can be based. A great quantity of this now very valuable article is stored in the earth's reservoir, but how great that quantity is, and how long it will meet the present demands, and withstand the present immense waste, no one can determine. It is, to say the least, a hazardous experiment for manufacturers to erect expensive plants with the idea of taking advantage of natural gas for fuel in the face of the fact that a sufficient supply may become exhausted at any minute.

—The sash, door and blind manufacturers through the northwest have got prices down so low that a proposition was made to close down some of the mills on December 1st, to give demand time to catch up with the supply products in hand. The manufacturers have a very strong association, with headquarters in Chicago, but it was thought by some impracticable to put the proposed scheme into effect, and it is hoped that an accelerated consumption will soon bring things into proper shape, and make the business more profitable.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ASSIGNMENT FOR BENEFT OF CREDITORS.

Though an assignor for the benefit of creditors may reserve for his own use property to the value of $300, such reservation will not prevail against a judgment for purchase money, nor can it be paid out of the subsequently accruing rents of the real estate on which such judgment is a lien.

ATTACHMENT.

An attachment against the defendants distributive share of a decedent's estate, served upon the administrator does not bind the defendant's interest in the real estate descended.

DEED.

A conveyance of a tract of land except certain lots which are recited to have been sold or contracted to have been sold to other persons operates as a reservation from the granted premises, though one of the excepted lots does not appear to have been previously sold.

DESCENT.

A mother cannot inherit from her deceased minor child, an estate which descended from the father, because not of the blood of the husband.

DURESS.

Where a person gets possession of a deed and by threats to destroy it, extorts money from another who is interested therein, the payment so made is involuntary and may be recovered back.

ESTOPPEL.

A married woman who has given a certificate that there is no defence or set-off to her mortgage, is estopped thereby, though it be not separately acknowledged.

JUDGMENTS.

A foreign judgment by default, the record of which fails to show a service upon or appearance by the defendant, has no binding force in this State.

LANDLORD AND TENANT—(PAYMENT OF TAXES.)

Where a lease by which the tenant contracts to pay one-half of the taxes, is renewed, after the imposition of a new tax, but before its assessment, he is bound to pay his share of such tax where a lease provides that the tenant shall pay all taxes and assessments, he is liable for a municipal claim for paving the sidewalk.

Where a tenant, in addition to the rent reserved, agrees to pay the taxes on the demised premises, the landlord is not entitled to such taxes, out of the proceeds of a sheriff's sale of the tenant's goods.

MORTGAGE.

Where a mortgage is satisfied out of the proceeds of a foreclosure sale, the mortgagee cannot proceed on his bond for the interest accruing between the day of sale and the time of payment by the sheriff.

MUNICIPAL CONTRACTS.

Where the City of Philadelphia, directs a street to be paved, it has full power to fix the width of the footways.

The City has no right to drain other than surface water into a small stream running through private property.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

BUILDERS' ITEMS

Building and Real Estate Notes.

817 to 821 Washington ave., realized $15,500.

1907 Wilt st., 4-room house, was sold for $1,875.

1636 Valeria st., 8-room house, was sold for $3,200.

JAMES SIMPSON, the ship builder, left $150,000.

NUMBER 1951 North Broad st., 18x150, sold for $12,000.

THE late Joseph E. Temple left an estate of $844,235.14.

No. 1301 Green st., (3-story dwelling), was sold for $5,650.

No. 1731 Montgomery ave., (3-story,) was sold for $8,500.

THE property 812 N. Broad st., 20x160, brought $15,750.

THE dwelling and lot, 40x108, 3601 Baring st., sold for $16,500-

A NEW school house is to be built on Ridge ave., above Kalos st.

A NEW residence is to be built by Geo. L. Roth at Chestnut Hill.

THE foundation of the new Baltimore & Ohio Depot is completed.

C. D. MIDDLETON sold two lots at Tioga, each lot 18 feet, for $3,750.

THE dwelling and lot, 18x115, No. 827 N. 8th street, sold for $10,000.

FOUR houses, Nos. 3101-9-3117 and 25, eight rooms, sold for $1,400 each.

BUILDING operations were never brisker than they are now at Bristol.

HON. JAMES G. BLAINE will erect a cottage at Seabright, New Jersey.

A $30,000 residence is being erected by John Pepper, near Jenkintown.

THE house and lot S. W. cor. 20th and Oxford sts., 34x49⅔, sold for $10,500.

THE new Benson st. Camden, N. J. Unitarian church is to cost $14,000.

No. 1938 Juliana ave., sold for $2,200. 1220 Whitehall st., was sold for $1,500.

WALNUT STREET dwellings bring good pries; 3457, 28x111½, sold for $11,650.

JOHN SHARP sold a lot on Park ave. and 29th st., with a 32 feet front, for $1,529.

EXTENSIVE improvements are to be made to the mills of Crozer & Co., in Upland.

THE handsome property S. E. cor. Walnut st., and St. Marks Place sold for $16,000.

A DWELLING and lot, 18x150, on e. s. of Broad st., below Norris, sold for $12,000.

THE personal estate of the late William M. Belcher has been inventoried at $28,034.21.

MRS. MCFARLAND, of Yonkers, New York, will build a large silk mill at Phœnixville.

CHARLES BAEDER, of the firm of Baeder, Adamson & Co., left an estate of $613,862.99.

HON. WAYNE MAC VEAGH, is erecting a pretty cottage upon his Brookfield property.

J. & P. BALTZ have contracted for an ice machine with the De La Vergne Ice Machine Co.

MRS. RORIE RHOADS has been successful in raising funds to build an Episcopal Church at Ardmore.

JAMES ROGERS & Co., will erect a large factory for the manufacture of overalls, at Spring City.

FIFTEEN hundred shares of a new building association to be started in Germantown have been subscribed for.

CHARLES KLEINMANN, of this city, has purchased ground in Darby, upon which he will erect dwellings.

THE New York Central Sleeping Car Company are going to build extensive car works at Buffalo, New York.

JOSEPH RANKIN, of Clifton Heights, has purchased an acre of land upon which he will put improvements.

MR. SHOCH sold the property 1920 Croskey st., 7 rooms for $3,100; also a 7-room house, 621 N. 24th st., for $2,400.

THE Savage Drop Forge Works of Southington, Connecticut, speak of erecting large buildings at Scranton, Pa.

ST. PETERS CATHEDRAL, recently destroyed by fire, in Allegheny City, is to be replaced by a handsome structure.

THOMAS J. MANLY, of Clifton Heights, has bought a number of lots at that place upon which he will build.

A NEW building in connection with the Normal school at that place is being erected at Kutztown, Berks county.

THE Lincoln Manufacturing Company of Chester intend making extensive building improvements to their mills.

THERE are three new land associations formed in Germantown, all of which will commence operations next spring.

THE Chester Foundry and Machine Company has purchased a lot for building purposes at Chester at a cost of $20,000.

A HOUSE on Manton st., Christian st., and lot on Park st., have been exchanged for properties 817 to 821 Washington ave.

THE members of the Merchants' Fund have several amendments to their charter which the Court will be asked to approve.

HARRY HIGH, of Chalfont, Bucks county, has purchased the Eagle Hotel at that place and will erect a handsome structure there.

FRANK H. MAGEE, of this city, has purchased a tract of land in Haverford upon which he will make extensive improvements.

UNITED States District Attorney, John R. Valentine, owns 200 acres near Bryn Mawr, which, it is understood, he intends to improve.

THE enormous production of structural iron that is now going on is reported to be one of the incentives for such a tremendous amount of building.

S. I. COMLY and family, who have been travelling in Europe for the past five months, arrived home yesterday on the Belgenland.

$10,000 is to be expended by the Philadelphia Sanitarium Association, in improving and altering their recent purchase at Red Bank, N. J.

J. & W. Wallace are erecting 25 houses, with 4 rooms, on the north and south sides of Wilts st., situated at Montgomery, 19th and Uber sts.

THE Franklin Improvement Company has been put in operation at Franklin, Venango county, this State, to foster building operations at that place.

V. S. BODNER, of Easton, represents the Lehigh County Agricultural Society in negotiations for new grounds which will be handsomely improved.

EBLE & HERTER, 32nd & Thompson sts., brewers, have closed a contract with the Consolidated Ice Machine Co. for an ice machine to be put in at once.

JOHN BETZ & SON have closed a contract for two 50-ton machines, with the Consolidated Ice Machine Co. for their new brewery, at Broad & Columbia ave.

THE erection of the new armory for the Third Regiment on Broad street, above Wharton, is being vigorously pushed. The building is already one story high.

A NEW boarding house is to erected at old Langhorne Park, Bucks county, which will contain 75 sleeping rooms and be surrounded by eighteen acres reserved as a lawn.

P. A. WELSH, 429 Walnut st., is preparing plans for a house for Mr. A. J. Croll of 855 Broad st.; also preparing plans for the interior of the Chester National Bank.

MISS ELIZABETH SCHAFFER, in memory of her brother, the late Wm. L. Schaffer, has presented the Horticultural Society with the building on Broad St., worth $100,000.

ON Thursday last $17,500 were subscribed towards the new Methodist Hospital; this amount will be added to the $200,000 bequests, making the total building fund $217,500.

THE old Gowan Mansion, Mt. Airy, has been sold to the Lutheran Church, who propose putting up a building to cost $100,000, to be used as a Lutheran Theological Seminary.

A LOT, 13th and Willow sts., 80x190 feet, of the "old Thomas estate," sold for $37,000, on one-half of which will be built a large steam bakery; the remaining half is again up for sale.

A LAND association has purchased a lot of 24 to 30 acres, between Mount Pleasant and Mount Airy aves., and are cutting Chew st. through it, and will, as soon as ready, commence erecting 3 story dwelling.

KERSHAW & MCGOWAN have erected eleven two and three-story dwellings, on Buest ave., between 62d and 63d sts., eight of which have already been sold, realizing from $2,100 to $2,300, according to location.

A PUBLIC road is to be laid through the lands of Messrs. Drexel, Childs and Charles Brooke in Chester county. It is understood that when this has been done that the above named gentlemen will build extensively.

THE Wesley Methodist Episcopal Church congregation at Wilmington, Delaware, will build a new structure with the opening of spring. The Bethany Baptist Church, of the same place, will also build a new structure.

FLEISHER BROS. have applied to their warehouse, Third below Market st., Williams' patent system for heating by exhaust steam. The Eastern Penitentiary are also adopting it. Messrs. Kline Bros. are putting it up.

GEORGE L. PARKER, 2019 Fairmount ave., reports the following sales: 1801 Berks st., $6,500; 2843 Howard st., $2,200; 2407 Fairmount ave., $4,500; 2315 Virginia st., $1,400. Also two houses on Fulton st., east of Second, at $700 each.

THE DOUGLASS BROS., Agents for the Cape Ann Granite Co., will likely receive a contract for the construction of the hanging stairways in the northwestern and northeastern pavilions of the new City Hall. Each block of granite will furnish eight steps.

J. A. MUNDY, South 9th st., has the plumbing and sanitary arrangements of the following work: 37 houses for W. S. P. Shields, at 49th and Darby road, six and nine-room houses; one hundred and nine dwellings at

15th and Diamond sts., and sixty on 15th and Diamond sts., (3-story houses,) for the same builder.

NINE houses have just been completed at Suffolk, 27th ward, seven of which have been sold at good prices, and others are in negotiation. The builders, Messrs. Kershaw & McGowan, say that in the coming spring they expect to put up at least one hundred houses more.

S. & J. WELSH have sold to the Pennsylvania Warehousing and Safe Deposit Co., the wharf property known as Pier No. 34 on South Delaware ave. Also adjoining lot on west side Delaware avenue running back to Swanson street. Extensive warehouses are to be erected.

KLINE & BRO., 11th and Willow streets, are fitting up the sanitary arrangements for the Armory, 3d Reg. N. G. P., Broad and Wharton sts. T. Lonsdale is the architect. Also doing extensive work to John Bromley & Son's Mill, Front & York sts. Putting in steam boilers and all steam appliances.

THE Pennsylvania Warehousing and Safe Deposit Co., whose banking-house is located in the Girard Bank Building, have effected the purchase of the extensive property for a long time owned and occupied by Messrs. S. & J. Welsh, and located on Delaware ave., in the immediate vicinity of the sugar refining industries of the city. The wharf is the largest on the Delaware river, with the exception of those constructed by the Pennsylvania R. R., and is 72 feet wide by about 300 feet long with ample water on either side for the accommodation of the largest steamers entering the port.

Architect's Notes.

THERE is a great deal to be said in regard to the law of frauds embodied in the statute of frauds. A great many difficulties are continually arising from a misunderstanding and non-understanding of what the law really is in regard to engagement for services. It is a well-know rule of law that any agreement for services that are not to be performed until one year from the time of the making of the agreement, unless the agreement is in writing is void. The courts have decided a great many questions of this kind and the law is clear.

W. H. DECKER, architect, 1404 Penn sq. will erect for Messrs. Ford & Kindig, a store and warehouse, 20x132, with five stories, located 27 North Seventh st., at the cost of $24,000. The contractors are Messrs. Rea and Reiley. The basement, first and second floor will be used by the owners and the remainder of building to be rented for light manufacturing purposes. Steam boiler and engine will be placed in the cellar; elevator to fifth floor, and will be run by steam for use of tenants. Each floor will be furnished with power; water closets on each floor supplied from tank on roof. Fire hose on each floor, fire shutters on all rear windows. The front will be of pressed brick with granite, terra cotta and galvanized iron trimmings.

Gas at 75 cents per 1000 Feet.

The corporation of Glasgow, Scotland, sells its gas at 75 cents per 1000 feet, though the cost of its coal is more than Philadelphia ought to pay and 15 cents more than Washington does pay for its gas coal. It therefore follows that if Philadelphia had the advantage of competition which Washington City enjoys in the transportation of its soft coal the gas consumers of this city ought to pay less than 75 cents per 1000 feet for their lighting. The process of manufacture employed at Glasgow could be availed of by Philadelphia.—*Phila. Record.*

Council Doings.

The following Common Council measures were concurred in :

To permit R. W. Gibson to erect a frame hay warehouse, with corrugated iron roof, at Thirty-second and Market streets.

To authorize the opening of Mount Vernon street, from Thirty-second to Thirty-third street, with an amendment by Common Council that a bond be given by property owners restricting the damages against the city to $2,500.

To authorize transfers in the appropriations to the City Treasurer, Coroner, Fire Commissioners, Board of Education, House of Correction, City Prison and Recorder of Deeds.

To permit the Church of the Rosary to erect a frame temporary chapel on the lot at the southeast corner of Sixty-third street and Westminster avenue.

To authorize the paving of Salmon street, from Ash to Bockius street, Twenty-fifth Ward.

Granting permission to John Dunlap & Sons to erect a frame shed on Eleventh street, above Cambria.

To authorize the opening of Thirty-third street, from Walnut street to Fairmount avenue.

To make the Fourth Street National Bank a depository of the city money. Adjourned.

Common Councils at its meeting on Thursday passed the following Select Council Bills, namely, to lay water pipe in Broad, Chew, Musgrove, Douglass, Hancock, Reese, Jefferson, Thompson, Twenty-ninth, Berks, Twenty-seventh, Huntingdon, Leverington, Belfield, Sunset and Wayne avenues, and for sewers in Budd, Dugan, Filbert, Fifth, Ogden, Pink, Sixteenth, French, Third, Thirteenth, Thirty-fourth and Thirty-sixth streets. A bill was passed to remove the sheds on Callowhill street from Crown to Fourth street. Fire-escape stairways were authorized at the school houses at Pine and Quince streets, and Fairmount avenue, above Twelfth. Bills were passed to lay water pipe on Fairmount avenue from Orion to Thirty-fifth street, and on Carpenter street, from Twenty-third street to Gray's Ferry road.

To authorize the placing of water in the property of battery "A," N. G., on Ludlow street, above Thirty-third street.

To permit the Lehigh avenue Railway Company to construct a railway, build depots, &c., on said street, with an amendment providing for five cent fares.

Granting permission to the Western Union Telegraph Company to lay and maintain underground conduits, cables, wires and manholes from Third and Chestnut streets, through Dock street and down Walnut to Delaware avenue.

Mr. Jones moved an amendment similar to that of Mr. Etting in the Bell Telephone ordinance relative to removal of poles and liability for forfeiture of provisions of contract. The amendment was agreed to and the bill was laid over to be printed.

Granting permission to Bailey, Banks & Biddle to lay a pneumatic tube from the north-east to the south-east corner of Twelfth and Sansom streets to connect their two buildings.

Granting permission to the Philadelphia Time Telegraph Company, Limited to lay and maintain underground wires across and under certain streets from the Delaware to Broad street and from Cherry to Pine street, for the purpose of furnishing electric standard time to subscribers.

New bills were introduced to lay water pipe in Bodine st., from Dauphin ; to open Fairmount ave., from Forty-sixth to Forty-seventh st.; to make an appropriation to pay the interest on the funded debt, falling due January first ; to pave Twenty-seventh, Twenty-eighth, Thirty-first and Thirty-second streets with Belgium blocks to purchase a lot of ground on Wolf and Eighth sts., for a school, to authorize Harrison, Frazier & Co., to construct a vault and a siding on Delaware avenue.

The Mayor asks for an increase in the police force in several sections of the city and stated that the average number of patrolmen covering a square mile at any one time is in New York, 33 ; Baltimore, 14 ; Brooklyn, 10 ; Cincinnati, 10 ; Chicago, 9 ; Louisville, 5 ; Philadelphia 4.

A petition was presented asking that the sale of the market sheds on Girard avenue between Howard and Third sts., be postponed until May 1st.

Architect McArthur knows nothing about the new clock for the City Hall which the papers have been talking about.

—At the meeting of the Select Council on last Thursday, a resolution was passed to investigate the wholesale charges in the Fire Department.

Building Fermits.

Earnest Aiken, 1306 S. Tenth st., one 2-story house, 16x26, Austin and Wharton sts.

Thomas W. Wright & Son, 7 Harvey st., one 2-story building, 20x92, Center, above Evans st.

Fred L. Michaelson, 3825 Fairmount ave., a 2-story shop, 70x32, Spring Garden and Thirty-ninth st.

J. K. Freedly & Sons, 210 S. Twenty-fourth st., a 2-story mill, 21x141, Twenty-fourth, above Walnut st.

Keystone Watch Case Company Nineteenth and Brown st., a 5-story factory, 34x81, Nineteenth above Wylie st.

P. Flaharty, 1020 South Eighteenth st., a 2-story building, 12x14 1020 S. Eighteenth st.

William H. Long, 1627 S. Sixteenth st., a 2-story building, 14x10, rear of 1627 S. Sixteenth st.

James W. Saunders & Son, 230 N. Twenty-second st., a 1-story kitchen, 10x13, 248 N. Twenty-second st.

David Mayhew, 1426 Palmer st., a 3-story factory, 18x115, Howard and Oxford st.

Jones & Benner Co., 218 S. Fourth st., a circular iron building 55 ft. in diameter, Mount Vernon st., and Ridge ave.

John Sullivan, Thirty-second and Woodland ave., a 2-story house, 15x38, Centre above Thirty-sixth st.

E. H. Hammin, 55 Mill st., 1-story house, 27x96 Stenton ave., and Hains st.

R. C. Winnals & Bro., 4620 Worth st., a 2-story house, 15x43, Worth and Orthodox st.

Samuel McClellan, 223 Vaughn st., two 2-story houses, 16x42 1544 S. Nineteenth st.

John Bateson, Jr., 1002 S. Nineteenth st., seven 2-story houses, 14x38, Wyalusing and Forty-fifth st.

Thomas Laney, 804 Cumberland st., a 2-story stable, 20x92, 2439 N. Ninth st.

J. C. L. Pinnon, 1901 Wood st., a 2-story house, 20x66, 1526 Master st.

Hugh Todd, 1913 Wilcox st., 2-story house, Twentieth and Morris sts., 16x47.

George Kessler, 1332 Marshall st., 2-story office, Fifth st. and Columbia ave., 18x32.

Mechanics' Liens.

Thos W Mellor owner, Geo W Harrison cont—Wm J Kramer & Co claimants, S E s Penn st, 206 ft S W of Chew st $45

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

WHY ARCHITECTS, BUILDERS and ROOFERS SHOULD PREFER TO USE

Stamped and Guaranteed Roofing Plates.

Every sheet of "Gilbertson's Old Method Extra Heavily Coated and Camaret Brands guaranteed Roofing Plates is stamped, not only with the name of the brand, but also its thickness—IC or IX.

SHANKS & BARRETT—PRACTICAL TINNERS.

RICHMOND, VA., October 12th, 1886.

Messrs. MERCHANT & Co., Philadelphia, Pa.

Gentlemen:—In reply to your letter in reference to stamping Roofing Plates would say that we recognize it as the only way by which we can secure honest competition, and, therefore, we are certainly in favor of stamping all sheets.

We would say of your Camaret brand that we have been unable to find its equal in the roofing line.

Hoping you will succeed in your good work for honesty, we remain

Yours very truly,

[Signed] SHANKS & BARRETT.

WARLICK & WINGATE—ARCHITECTURAL SHEET METAL WORKERS.

ATLANTA, GA., October 9th, 1886.

Messrs. MERCHANT & Co., Philadelphia, Pa.

Gentlemen:—Your letter in regard to Guaranteed Tin Plates at hand. In reply will say we heartily agree with you that the system of stamping each sheet is productive of fairer competition, and a thing no reliable firm need fear.

It should be a pleasure to any honest man to be able to prove to his customers that everything he does is according to plans and specifications.

STAMPED SHEETS enable him to do this in the roofing business. You have done a good work. Keep on.

Yours truly,

[Signed] WARLICK & WINGATE.

MERCHANT & CO.,

525 Arch Street, Philadelphia. **182 and 184 E. Kinzie St., Chicago**

THE PHILADELPHIA

Real Estate Record

AND

BUILDERS' GUIDE.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 47. PHILADELPHIA, MONDAY, NOVEMBER 29, 1886. PRICE 15 CENTS

Items of News.

—The *California Architect and Building News* says that California architecture, first of all things, estimates the effect of earthquakes. The tallest buildings are treated, from foundation to roof, in view of the severest shock. Wood is largely used, and when it is substituted or supplemented by brick, stone or iron, a system of tie-rods and supports, intended to make the building earthquake proof, is used.

—The Exchange Building Association of Kansas City, Missouri, are about to erect a building for themselves and for other tenants, at an expense not to exceed $400,000, and have appointed a building committee with full powers to select and architect to carry on the work. This committee has invited Messrs. Burnham & Root, of Chicago, Geo. B. Post. of New York, and Peabody & Stearns, of Boston, to each prepare a sketch or preliminary design for the proposed structure, for which they will be paid the sum of $500 each. Notice has also been given, through the public prints, that the committee will receive and entertain designs by other architects not so invited.

—A prominent western architect, working under the eight-hour system, says of it: "I can't see, as far as I have been able to observe, that the building mechanics have improved their condition by the eight-hour system. Although they do not commence work until eight o'clock in the morning, I notice they come to the building at the old time, 7 o'clock, and stand around shivering in the cold until it is time for them to commence work. They quit at 5 o'clock, and instead of going home promptly at that time they generally spend an hour standing around the job talking, rarely leaving before 6 o'clock. Since the weather has become cooler, though, I see they leave promptly when the day's work is done, but how they spend the balance of the time I do not know."

—Profit-sharing in addition to wages is a true harbinger of the interests of capital and labor. It converts the industrial association of employer and employees into a moral organism, in which all the various talents, services, and desires of the component individuals are fused into a community of purpose and endeavor.

The dividend to labor is not usually an increase of pay, by a form of extra pay for extra services and an inducement calling them out, making an invaluable educational discipline, developing diligence, fidelity, caretaking, economy, continuity of effort, willingness to learn, and the spirit of co-operation. If labor gets an enlarged reward arising from an unusually favorable state of the market, it is not an injustice to capital (which, with no profit-sharing, gets all the increase). There is an element of venture and risk in the undertakings of labor, as well as in those of capital. While capital runs the risk of osing a part or all of its expected reward, so labor may have its wages reduced or lose employment altogether. The fortune of a suddenly good state of the market, then, ought to be shared in by labor.

—The result of a long series of recorded observations in ten different cities during 192 days, in which over 800,000 horses were observed, showing that on an average a horse traveled 583 miles before falling on asphalt, and only 413 miles before falling on stone; or, in other words, that for the same distance traveled there were 41 per cent. more accidents on stone than on asphalt. The gritty surface of the Trinidad asphalt pavement, due to the combination of sand and bitumen, is incapable of taking the polish which makes stone pavements so slippery. It dries quickly after a rain, and thus escapes the damp,greasy condition which renders wood so slippery. The recorded accidents among 36,000 horses passing over Fifth avenue, New York, in one week, were 5 falls on the Trinidad pavement in front of the Worth monument, 29 on the wood pavement near Thirty-second street, and 95 on the French asphalt in front of the Hotel Brunswick.

Gum and cypress wood is becoming popular in the south. One builder contracted a building entirely of these woods which took a beautiful finish. Cottonwood is also receiving some attention, one variety being hardly distinguishable from the best yellow pine.

Rosewood varies in color from light hazel to deep purple. Some specimens are as open in the grain as coarse mahogany, but the best qualities are cut into veneers. Frequently solid pieces are used in cabinet-making and upholstery. The harder kinds are very highly polished, but it seldom retains its lustre as long as mahogany. Single logs, cut into veneers, have realized from $500 to $600.

The time is not far distant when good cherry timber will be as difficult to obtain as good walnut is at the present time. The cherry forests of Pennsylvania, undoubtedly the finest in the country, are nearly exhausted, and about all that is left in that State is held by a few large operators who have advanced the price of the manufactured lumber to such a figure that in certain sections it has become a difficult matter to secure trade.

—One of the most difficult problems is to arrange ventilation flues so that they will work satisfactorily, and at the same time not afford a channel for conducting the flames to the concealed portions of the building. It is hardly necessary to say that the flues should be of fire-proof material, brick or fire-clay being preferred. Their joints should always be tight and they should never be of anything but masonry, except in the basement or in places where they are not covered or concealed, where they may be of galvanized iron. If desired, the hot-air flues may be dispensed with by using a compound coil radiator, placed under the window-sill and enclosed in a tin-lined wood or marble box, to which fresh air is admitted, either through an opening under the stone window-sill, or through a hollow sill placed just under the bottom sash. The heated air passes into the room through a register in the top of the casing. By this method a certain supply of fresh warm air is secured, and without the cost or inconvenience of numerous hot-air flues. By putting a small register at the bottom of the casing, the air in the room may be warmed before air is admitted from the outside and thus save fuel.

In the opinion of the writer this is the most practical method yet devised for heating offices, etc., above the first story. If proper flues and a motive power are provided for carrying off the vitiated air, good heating and ventilation are certain.

—It is perfectly useless to expect an improved condition of our streets so long as there is no system, under which the proper pavement can be laid with a moderate degree of assurance that it is not to be disturbed unless through imperative necessity. The fact is, our highway department seems to be running the streets on a free and easy basis, the railway companies unceremoniously rip and tear the streets as they please, and with an indifference truly surprising a permit is granted to about every applicant and the work of tearing up goes bravely on without even so much as a care taken, as to the manner the repaving is done.

On Ninth street, between Race and Vine streets, Belgian blocks have been laid so recently that the sand is hardly discolored, yet the Traction Company on Friday last was tearing up the newly-laid pavement. The sooner the streets are placed under control the better.

—From stoves to the hot air furnace is a long step, in respect both to convenience and cost—the latter being, to the great majority of small householders, an insuperable difficulty in the way of their adoption. The advantages, however, of a central source of heat for every room, instead of a dozen different fires, more or less, to tend every day, of having all the coal in one place, and the ashes, as well, and both in the cellar, where no carpets or furniture are soiled by them, the uniform, comfortable heat in every part of the house, without kindling a special fire to warm a particular room, the warmth through the halls, where there is no place for a stove, so that room doors can stand open just as in summer, without a cold draught from the halls, the freedom from smoke in the rooms, the more perfect combustion of fuel in one large fire, than where there are many small ones, the conveniences of heating, without losing the space which a stove takes in a small room, and the safety in respect to children, all these are so important and so patent that the hot air furnace, in one form or another, is almost universally used in houses of the better class, and, from present indications, it is likely long to hold its place in public favor.

VOL. 1.—NO. 47. PHILADELPHIA, MONDAY, NOVEMBER 29, 1886. PRICE 15 CENTS.

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, NOV. 29, 1886.

PHILADELPHIA ought to be proud to know that it has some dry goods merchants and wholesale and retail storekeepers who are able to teach Colonel William Ludlow about engineering, most especially concerning the value and fitness of the Schuylkill river as a source for our future water supply. A number of these gentlemen met in the office of a merchant prince, who certainly knows more about dry goods than he does about engineering matters, and decided that the present water facilities, with a little improvement, were sufficient for Philadelphia's future requirements, and that we can get along for the present. Col. Ludlow's thirty years' experience as an engineer seems to be of no account to these gentlemen. An intercepting sewer is to be the great cure-all for the filth which now finds its way into the water supply of Philadelphia. These gentlemen reached surprising conclusions. If the 700 people who die annually from typhoid fever, superinduced by impure water and unsanitary surroundings, could rise up from their graves, they would contradict these short-sighted conclusions. Every one knows that the intercepting sewer was ordered to be constructed in obedience to popular clamor and nothing else. Any engineer of standing knows that it will not do what it is expected to do. In fact, it is not expected to do more than to carry off the refuse matter from a small locality near the city. The great sources of pollution still remain, and the Schuylkill must continue to be nothing more nor less than a sewer of immense proportions. If these gentlemen have any reasons for upsetting the conclusions of such engineers as Ludlow and Hering, will they furnish their facts and reasonings to the people? They will be obliged for any light they can throw upon this problem that such eminent engineers have not as yet been able to furnish. The impression left upon the mind of the public is that they have some reason for saying the Schuylkill's supply is sufficient, other than that which appears on the surface. The facts are too few and too plain to make room for any discussion. The city is growing at the rate of 30,000 in population per annum. It is no prophecy to say that it could and would increase to fifty or sixty thousand population per annum under proper conditions. The Schuylkill Valley will grow in importance as a manufacturing section. Instead of one Manayunk we will have a dozen of them, and if one intercepting sewer will save us from the poisonous contaminations at Manayunk, we will need a dozen intercepting sewers to save us from the rest before many years.

There is no reason or sense in such short-sighted logic as advises us to be content with existing sources of supply. A remedy is demanded, and the intelligence of the people will not tolerate any trifling with the problem just at present. They may feel like settling questions nearer at hand, such as the gas question, but even with such pressing problems upon us, it is dangerous to delay a consideration of a more vital one than even these. The people are now awaiting the establishment of a municipal government upon a new basis.

The Bullitt bill will soon be in working operation. If existing evils are to be continued under it, there will be a protest, loud and long. The people want and demand more extended facilities and better water supply, and a freedom from political misrule which has cursed them for the past twenty years. Above all, they demand a more bounteous water supply. Our manufacturing interests demand it, the insurance authorities have called for it in vain, and the growth of the city is hindered for want of it. All these facts are patent. In the face of such facts a dozen or more gentlemen of local repute meet in a little office and throw cold water upon the only scheme and upon the only system which will furnish this city with an ample supply on the only terms within our reach. Let us ask these gentlemen when the city will be able to even complete its reservoirs; no one can answer. Every dollar that is appropriated to such a purpose is pinched. Our small pipes in the business section of the city do not afford a sufficient supply to put out a fire, and the insurance authorities in consequence are advancing their rates of insurance. They are obliged to do so. The evil will grow in magnitude. The question is one which will not wait on political considerations. Politicians may desire delay, but delay will cost us many valuable lives, the loss of large manufacturing interests, and certainly a serious and saddening waste by fire.

IDENTIFICATION will be required hereafter before city warrants will be paid.

BUILDING permits are decreasing in number; not that there is less building contemplated, but because builders do not like to be caught by cold weather.

CHEAP postage popularizes the mail service and increases its usefulness. It would be better to meet a $20,000,000 deficiency with an appropriation out of the surplus revenues than continue the present two cent letter postage rate.

THE fall crop of titley-benders (loose bricks in side-walks) is coming on, and although spring is the best time to find them plenty, they are plenty enough now in wet weather to suit most any one. Councils should pass an ordinance prohibiting the renewing of brick sidewalks.

ALFRED R. WOLFF, M.E., writes a very interesting article on BUILDING, commenting upon the investigations of Sir William Thomson, relative to the economy of heating buildings by means of currents of air. Sir William says that it might at first sight appear that the utmost economy would be attained if all the heat produced by the capacity of coals used were communicated to the air. He upsets this theory and points out that its apparent absolute limit may be surpassed, and a current of warm air may be mechanically obtained by a steam engine driven by fire which actually burns less coals than are capable of generating the required heat by their combustion. His investigations show that any substance may be heated thirty degrees above the atmospheric temperature by means of a properly contrived machine driven by an agent spending not more than about one-thirty-fifth of the energy of the heat thus communicated, the body drawing about thirty-four-thirty-fifths of the heat from surrounding objects. This principle is familiar in ice machinery. There is no creation proper, of heat, but the heat comes from the surrounding bodies. The ordinary steam engine covers about one-tenth of the steam generated in the mechanical effect. He describes a machine by which a substance can be raised thirty degrees

above the atmospheric temperature by the expenditure of one-eighth of the coal that would be required to produce the same elevation of temperature in the direct process. We will let the English investigator speak for himself, as he can do it better.

"Two cylinders, each provided with a piston, ports, valves and expansion gearing, like a high pressure double-acting steam engine, are used, one of them to pass air from the atmosphere into a large receiver, and the other to remove air from this receiver and discharge into the locality where it is wanted. The first, or ingress cylinder and the receiver, should be kept with their contents as nearly as possible at the atmospheric temperature, and for this purpose ought to be of good conducting material, as thin as is consistent with the requisite strength, and formed so as to expose as much external surface as possible to the atmosphere, or still better, to a stream of water. The egress cylinder ought to be protected as much as possible from thermal communication with the atmosphere or surrounding objects. The pistons and valve gearing must be worked so as to keep the pressure in the receiver below that of the atmosphere. If the cylinders be of equal dimensions, the arrangement would be as follows: The two pistons working at the same rate, air is to be admitted freely from the atmosphere into the ingress cylinder until a certain fraction of the stroke, depending on the heating effect required, is performed, then the entrance port is to be shut, so that during the remainder of the stroke the air may expand down to the pressure of the receiver, into which, by the opening of another valve, it is to be admitted in the reverse stroke, while the egress cylinder is to draw air freely from the receiver through the whole of each stroke on one side or the other of its piston, and in the reverse stroke first to compress the air to the atmospheric pressure (and so heat it as required), and then discharge it into a pipe leading to the locality where it is to be used. If it be required to heat the air from 50° to 80° Fahr., the ratio of expansion to the whole stroke in the ingress cylinder would be 18-100, the pressure of the air in the receiver would be 82-100 of that of the atmosphere (about 2.7 lbs., as the square inch below the atmospheric pressure), and the ratio of compression to the whole stroke in the egress cylinder would be 13-100. If one pound of air (or about 13¼ cubic feet, at the stated temperature of 80°, and the mean atmospheric pressure) be to be delivered per second, the motive power required for working the machine would be .283 of a horse-power were the action perfect, with no loss of effect by friction, by loss of expansive power due to cooling in the ingress cylinder or otherwise. If each cylinder be four feet in stroke and 26.3 inches diameter, the pistons would have to be worked at 26.1 double strokes per minute."

THE latest reports from cities East and West show that there is a good deal of new work projected which will be executed during the winter. The winter promises to be an open one; if it is a large amount of new work will go forward. There is a feeling that more or less trouble will be experienced next spring on account of wages, hours of labor, or trade regulations of one kind or another. There are a great many people who need work to be done running from one hundred to one thousand dollars in cost. Labor is generally cheaper in winter by twenty-five to fifty cents a day, and a good deal of this small work in the way of repairing and extension will be pushed through. Builders will endeavor to have matters settled this winter, so that when the Spring comes there will be no disputes to settle and no strikes to be encountered. It would certainly be a good thing for all parties concerned if the rates of wages and the hours of labor could be settled in January. Last Spring we escaped what otherwise might have been a very serious depression. Builders and investors were taken by surprise then and yielded to points, which, had they had proper notice they might not have conceded. They have been forewarned and will now see to it that they will not be placed at a disadvantage.

SCRANTON wants an elevated railroad. The citizens of Philadelphia want one, but will they get it?

BUDDENSIEK built wiser than he thought. A granite mansion of unquestionable strength, will be his residence for some time to come. The Albany N. Y. Court of Appeals has confirmed the judgment of the lower court.

LABOR organization is spreading throughout the city, but there is more or less complaint made from the unsatisfactory character of Trades Union management. A good many workmen expect too much from organization and many are impatient for results which cannot be realized in a day, month or year.

THE demands of sewage is a question which does not, but ought to, engage the attention of sanitary authorities and agricultural interests. In Great Britain and in Europe there is a vast amount of interesting literature upon this subject. Engineers are studying everything in connection with it, and when circumstances make it necessary for us to devote attention to it we will find a rich store of valuable information from foreign experience.

MEMBERS of the New York Real Estate Exchange, after having accomplished a great many more or less valuable reforms, are addressing themselves to more important problems. One of these involves the reform of real estate laws, or laws effecting real estate interests. One of the members asks this question. "Ought not the dower right of a wife, in real estate to be abolished?" His reason is, that it restricts free business in dealing in real estate. He asks: "Ought not all rights by the courtesy of a husband in his wife's estate, to be abolished also?" Third: "Is it not time to pass a statute authorizing a direct deed from a husband to his wife, or from a wife to her husband, instead of whipping the devil around the stump and going through the humbug form of deeding it first to a trustee and then the trustee deeding it over?"

Measures have already been taken to pass legislation on this question. The members have been asked to give their opinions on the desirability of such acts. It is surprising how favorably the circumstances have been received, prominent members answered, they have long been in favor of just such legislation. The project to have such laws passed is heartily endorsed, with here and there some limitations. What is good for New York might be as good for Philadelphia and Pennsylvania. What do our own real estate dealers think of such laws for our State. Will any of them favor us with an opinion?

FRENCH architects are giving a good deal of attention to questions effecting the building trades, both directly and indirectly. A well-known writer on architectural matters in Paris is arguing what to us seems a return of the old-fashioned way of putting in windows, viz., to run them up to the ceilings. He furnishes strong reasons for running windows up to the ceiling and shows that under the present system a great deal of light is excluded. He says that the smallest ray from the zenith, if it succeeds in squeezing through the window into the room, pours into it a direct light a hundred times superior to the gray light reflected from the opposite wall. In many of our houses, especially the finer ones, which have plenty of room, there is no need for care in this particular, but in the crowded localities it would be well if the hint was acted upon and windows were run clear to the ceiling. He goes on to show how much light is excluded by upholstery. While not condemning the use of heavy hangings he strongly urges that more light is more desirable than fine display.

THE Magneso-calcite Fireproof Company is introducing successfully a valuable fireproof material, suitable for lining between floorboards to act as a deadener of sound. They have various grades and qualities for fireproof purposes. Vulcan paint is one of the most valuable paints recently introduced. Where it has been used the fire risks have been reduced. Ulesote paint is another paint attracting attention of architects and builders. It was the paint used for covering the iron and steel work of the Statue of Liberty. Dixon's Silica Graphite paint is also a well-known paint with an excellent reputation. It is furnished for regular surface painting of trimmings for houses, outside buildings, metal or shingle roofs, bridges, locomotive work, agricultural implements, and, in short, for all exposed wood or metal surfaces.

THERE is a great demand in New York for real estate. Vacant lots are selling quickly. Several large estates have been broken up into building lots and have brought good prices. As a rule the prices realized are fair rather than exorbitant. Buyers, including builders and backers of building operations, are complaining that the price is a little too high. In the case of the Carrigan estate, which was a very large one, higher prices were realized than were anticipated by the heirs. The New York builders anticipate a great deal of Winter and early Spring work. Two or three land companies have been recently incorporated for the purpose of pur-

chasing, holding, selling, leasing and improving real estate and buildings. A great deal of building is being pushed to completion in the out-of-town localities. A great many fine suburban towns are attracting New Yorkers, and as a consequence, real estate is in active demand and bringing good prices.

HERE is an ideal parlor, as furnished by an English architect: "The walls should be paneled with frames of ebony filled with velvet of a rich violet color. There ought to be magnificent mirrors let in here and there in place of the velvet, and round the mirrors the ebony should be enriched with the most delicate carving. The chimney-piece should be of pure white marble sculptured by some great sculptor. All around the room silver candlesticks of exquisite design should spring from the ebony frames of the panels, each a separate invention." And further: "The furniture is to be of ebony with orange damask or gilded, with violet velvet."

Furnish us one at once!

WHY should the Pennsylvania Railroad Company donate transportation to a committee of Councilmen who are sent on the city's business to investigate fire-brick pavement? Such is the fact, however, as a sub-committee from the Committee of Streets and Highways started on Monday evening last for Steubenville, Ohio; Wheeling, W. Va., and Cumberland, W. Va., where the brick is manufactured. How does the Pennsylvania Railroad Company expect to be reimbursed for the expenses of the trip? It usually exacts the last farthing from its customers, and its love of Philadelphia is not so great that it can be expected to do so much for nothing.

THERE are indications that large consumers of materials of all kinds will shortly place large contracts for material. Just now manufacturers and consumers are uncertain. They recognize that there is an upward tendency in prices and they do not like to strengthen it by crowding in orders; at the same time feeling they may yet be obliged to do so. As an indication of this tendency the Lake Superior Copper Mining Companies last week placed contracts for between eight and ten million pounds of ingot copper for December and January delivery at 12 cents, the highest point reached this year. Several Lehigh Valley pig iron companies expected heavy orders for No. 1 foundry at $10.

WE are told that there is an entire absence of the professional jobbers and lobbyists about the departments at Washington. Large shipbuilding contracts are to be shortly given out, and it is said that nothing but square bidding is now in order. This will be welcome news to the body of bidders who heretofore had found themselves secretly deprived of work to which they felt themselves entitled. There is to be no favoritism hereafter. Every one who knows how government work has been done heretofore knows that there is great need of and room for improvement.

PHILADELPAIA, to all practical purposes, is at the mercy of the Traction Company. The Court's command to produce certain leases has formally been obeyed, but the Traction people are still defiant. These people are allowed to practically defy the law, the courts, and public opinion. Blockade after blockade takes place and nothing is done. The riding public are annoyed week in and week out with delays longer or shorter. No assurance can be given that this bad management will shortly be terminated. The Traction Company meantime is getting a firmer grip.

There is but one solution to this annoyance, and that is in the construction of an elevated or underground system; it must come to this sooner or later.

IT is a singular episode in the receipts of the Postoffice Department that notwithstanding rates on second-class matter has been greatly reduced, and the weight allowance on first-class matter has been doubled, yet the deficiency in the last fiscal year was $100,000 less than that of the previous year, when the old rates were charged. This is one of the strongest arguments for a one cent postage rate on letters that can possibly be advanced, for it is not at all unlikely that at a one cent rate the receipts would equal the expenses.

IN the face of the fact that the tax-payers get so little for their taxes, the present tax rate of $1.85 is quite enough. If the rate was higher, it would only afford greater opportunity for waste and speculation, as it is the affairs of the city could not possibly be in a worse condition. At every turn the tax-payer witnesses evidences of mismanagement and official neglect, he feels that his representative is subsidized or likely to be, confidence is destroyed and reform seems a delusion and a sham. Combinations, syndicates, and railroad magnates, are all powerful in defeating measures that would enrich the city, add to the comfort of its citizens and make Philadelphia worthy of its rank and place among the cities of the country.

An awakening must come, a realization of the necessities of home must take place or we must sink lower and lower.

We want a strong man at the helm, will we get him?

THE appropriation bills approved by the Finance Committee have about exhausted the tax limit. The item of $325,000 for main sewers is laid aside for the present, and only $50,000 will be expended on the branch sewers, inlets and man-holes. The sum of $25,000 will be allowed the Board of Health for the removal of nuisances and incidental expenses. Slight reductions were made in the Poor Department. The Water Department bill calls for $572,802, besides $1,860,000 for permanent improvements and extensions. The amount appropriated to the Public Building Commission is $600,000, instead of $1,205,000, the amount asked. Sub-committees were directed to investigate the applications for increases of salaries.

MISS ALICE FISHER is entirely too competent herself, and exacts an entirely too high grade of ability from her assistant nurses at the alms house, to suit many of the poor guardians who have friends and relations who might fill these positions, were it not for Miss Fisher's arbitrary requirements. Competence and ward politics never flourished together and they never will, one or the other must go under.

IF the citizens and tax-payers of this city desire to maintain their corporate rights, they must come to the front and emphatically make themselves understood, there is no use begging the question, the city is in the hands of the politicians, combinations composed of members of both parties working in unison for years in and out of councils, have like evil spirits concocted scheme after scheme, having but jobbing and robbery in their worst forms in view and our citizens are paying the penalty.

In many instances partisan newspapers have altogether abandoned the people, and to-day we witness an eminent journalist, whose caustic pen has done good work in the past, advocating, yes even recommending the iniquitous stealing of a cool hundred millions of the people's gas property.

THE city is frequently involved in expensive law suits, through the neglect of those whose duty it is to look after its interest. A suit for $20,000 is now being tried before a master, which was brought by Thomas H. Belcher, the dry goods merchant at Eighth and Filbert, for damage to his goods, which was occasioned by the defective construction of a culvert at the corner of those streets, and now Chief Inspector Martin, of the Board of Health, has reported a number of inlets throughout the city as being defective, and needing cleaning. The Board declared all of them nuisances, and referred them to the Highway Department.

AT a recent auction sale of real estate held in London, under the direction of the Court of Chancery, 260 leasehold houses producing about $5,500 per annum, were sold. These were divided into 109 lots, and were sold for £51,842. Improved leasehold ground rents, amounting to £1115 per annum, realized £17,925. A freehold house on High street, Shoreditch, let at £120 per annum, sold for £2,950; and a freehold ground rent of £20, secured on houses at Kingsland, realized £850. There was a large attendance on each day, and the competition for many of the properties was very keen. The tenants were in many instances the purchasers. The total amount realized was £73,567.

ACCORDING to an extract taken from a Japanese paper, that nation has some peculiar laws governing the sale of its public lands. The main purpose seems to be to exclude the land speculator altogether. To prevent speculation one person is allowed to purchase about eighty acres of agricultural land, only. Official inspections are frequently made with the view of compelling owners to apply their land to the purpose announced originally. Land does not become the actual property of its cultivator until ten years have expired, and all land not utilized as originally designated reverts to the government. During the ten years of probation the holder has the use of the land free of rent and taxes; at the expiration of this period he can purchase it at $1.25 per acre.

West Philadelphia is to have a $250,000 iron works. A three-story machine shop 75x261 feet will be erected on an eight-acre tract near Marion avenue and 58th street. Two hundred men will be employed. Machinery of many kinds, including vertical and horizontal engines, will be made, and machinery for gas making by the Hanlon & Ledley process will be the specialty. Five capitalists and machinists are interested, viz: Wm. L. Elkins, Jr., Martin Maloney and C. K. Robinson of Philadelphia, and B. W. Gust and Edwin A. Moore of Reading.

A Problem—the solution of which will prove of great interest to the manufacturers of steel all over the world,—is to be solved by Henry Disston & Sons, at Tacony. This enterprising firm contemplate the erection of a gas plant with the view of supplying gas fuel to their different departments, and if the adventure proves successful they also contemplate furnishing gas to the inhabitants of Tacony for fuel and lighting purposes. The risk attending this experiment is nothing compared with that which this firm would take by a removal to Pittsburg, in order to obtain the advantage of natural gas.

Light, heat, and power, by wholesale is to be furnished in a few months by a company recently chartered with a capital of $1,000,000. Among those identified with it are Jamison, Little, Swain, Huey and Dechert, all well known names. Contracts have been made with the Edison Company of New York. The incandescent system will be used. The plan is to at first erect two plants at a cost of $400,000 each in some central locality, and subsequently to extend the system throughout the city as it is found to pay, each plant covering perhaps eight blocks or more. This will supercede the present system and enable all who want light, heat or power to have it. No sites have been purchased as yet, but the active men in the Company have their eyes on what they want and are quietly picking up bit by bit.

As to the practicability of such a scheme there are no doubts. The people are ready for it and the only difficulty will be the price at which accommodations will be furnished. The Company is in danger of making its greatest mistake right here.

In a pastoral letter recently issued by Archbishop Corrigan, of New York, he touches in the most sensible manner upon the right of property in land, and in a simple although thoroughly logical way he says that although God made the earth for the use of all mankind, it was left to reason to determine whether its possession was to be in common or by individual ownership. Such determination has been, and is, that man can by lawful acts become possessed of the right of ownership in property, and not merely of its use, the reason being because a man is strictly entitled to that of which he is the producing cause, to the improvements he brings about in it, and the enjoyment of both. The learned Archbishop also says that the evil which needs redress is the trampling on the rights of the toiler, and the snatching from his grasp the fruits of his labor, but that redress for this can never be brought about by denying a fundamental right or perpetuating a radical wrong. The core of Henry George's apple is lost sight of in most criticisms, however, viz., that the unearned increment belongs to the users of the soil. At present a man buys land, holds it for five, ten, or twenty years, and sells it for ten or twenty times what he paid for it. It is this unearned increment that George is opposing.

Council Doings.

A sub-committee consisting of Messrs. Warwick, Smedley and Graham have been instructed by the sub-committee having in hand the metropolitan bill, to confer with the Chief Engineer and the City Solicitor for the purpose of having inserted in the bill now under consideration such provisions as may be necessary to protect the interests of the City. This committee, if it obeys the public bequests, will allow no far-fetched objections to stand in their way. Our city officials and Councils also can take a hint from what is going on in New York City. The judicial proceedings in which certain aldermen are defendants are attracting the attention of the people of Philadelphia at this time because they have vital interests at stake, which they do not propose to see sacrificed. Dishonesty at this time is dangerous. The public believe that there is a too great willingness on the part of Councils to be guided in their deliberations by the dictations of combinations, syndicates and companies seeking important franchises. The general public is not mistaken. Their interests will not be subserved unless they are on the alert.

The Survey Committee opened bids for sewer building. The lowest bidders were: For sewer on Seybert street, between Eighteenth and Nineteenth, B. McNichol, $1.78 per foot; Fifteenth street, from French to Fontaine, P. C. & T. McEntee, $2.09 per foot; Berks street, from Seventeenth to Eighteenth, J. McParland, $2; at Sixteenth and French streets, M. C. Hong, $2.05.

Ordinances for the following new sewers were ordered to be returned to Councils with a favorable recommendation: South College avenue, from Twentieth street west; Twenty-ninth street, from Stiles to Jefferson; Twenty-sixth street, from Girard avenue to Poplar; Thompson street, from Twenty-eighth to Thirtieth; Jefferson street, from Twenty-eighth to Thirtieth; Carleton street, from Fifteenth to Sixteenth; Eleventh and Nevada streets; French street, from Fifteenth to Sixteenth; Ployd street, from Cedar lane to Haines; Bringhurst street, from Germantown avenue to Mercer street and Frankford avenue, from Paul street to Foulkrod.

It was agreed to return to Councils for reference to the Highway Committee the ordinance providing for the building of a bridge over Poquessink creek.

Lumber Notes.

The lumber reports from all sections of the country are much the same. A great deal of business is being done. Syndicates are being formed for the purchase of pine land in the Northwest. A speculative movement seems to be in progress there and if it means anything it means that pine land is advancing in value. If there is anything behind this it is that lumber territory in other sections of the country will soon come into market. Large quantities of lumber are being shipped all over the West. Extensive shipments have been made to Eastern markets during the past thirty days. Dealers are stocking up, and nearly all of our local lumber dealers are well supplied with lumber for the next month or two. Firm prices are quoted and the figures realized this fall are somewhat better than they were at the opening of last winter. Not quite as much business has been done recently on account of the advance of freights. Previous to that, large contracts were placed, and shippers and dealers now feel like letting a little more time elapse before they put in more large orders. The railroad companies are heavy purchasers. The New York Central and Pennsylvania and the Baltimore & Ohio have all made heavy purchases. Lath and shingle are in good demand.

The hemlock market is stiff, and prices are advancing. Pennsylvania mills are crowded with orders, and all along the line comes word, "take no more orders except at good advances over last month's prices." This condition of affairs renders consignment profitable, as dealers are now ready to offer more than the sellers asked a few weeks ago. Actual sales of joist have been made at $13 a thousand, and boards have been placed at $13.50, and wall strips and half joist at $12 to $12.50. New York state mills report that they will be able to fill orders taken, but some of the dealers are becoming nervous and inclined to doubt the promise, a condition that creates a better sale for Pennsylvania stock.

The demand for oak for car purposes is very heavy. The New York Central Railroad Company is in the market for 1,000,000 feet of oak for car purposes. Furniture dealers are large buyers of plain oak, cherry and walnut. The entire lumber market will continue strong throughout the winter as stocks are not likely to be in excess of the actual and urgent market requirements. The winter outlook according to the opinion of our best posted lumber dealers is good and every confidence is felt by those who have large orders out for early winter shipments from primary markets. The receipts of yellow pine continue heavy and the Southern mills are crowded with orders. A good deal of saw mill and planing mill machinery has recently been put up and it is the intention of owners to hasten forward with milling operations because of the excellent prospects and strong inducements which are presented on every hand.

—On the 26th instant the statement of the Treasurer showed gold, silver, United States notes and other funds in the United States Treasury to-day to be as follows: Gold coin and bullion, $252,950,320; silver dollars and bullion, $188,161,968; fractional silver coin, $25,819,955; United States notes, $37,100,767; national bank notes, $223,670; national bank notes in process of redemption, $2,225,251; deposits with national bank depositories, $13,202,391; total, $519,684,322. Certificates outstanding—gold, $91,047,519 silver, $104,258,922; currency, $7,035,000.

A New Cinder Brick.

The Delaware Concrete Works, Wilmington, Del., are introducing into the market a Cinder Brick; the principle material is cinders from soft coal which when combined with the rest of the composition renders it very light making a porous composition which has the following advantages over clay bricks—first, when used in lining of press-brick fronts makes a dry and fire proof wall. Secondly, a wall of these bricks may be white coated without plastering it, and will do away with stripped and studded walls, as the bricks will absorb little if any moisture and thereby give a splendid white wall, in which nails may be driven like in hard wood leaving no holes when broken off larger than the nail taken out. Third, when walled together become one solid mass and hardly separable, common morter is only necessary to unite them—a wall built of these bricks may be immediately white coated and will quickly dry, wainscoting or any wood may be nailed to it without plucking the walls. The bricks are all uniform in quality, and no cracked or defected material is sent out, unlike clay they will not shrink, they are fire proof and may be made to any shape, they will make a solid arch and cost much less than terra cotta and will not weigh more than 80lbs. to the cubic foot including mortar joint, these bricks can be made light or heavy, to suit the purpose required for, and will stand as much or more pressure than the ordinary clay bricks.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ACKNOWLEDGMENT.

An acknowledged deed is evidence of seizin in the grantee, and authorizes recording it; while an unacknowledged deed is good only between the parties and subsequent purchasers with actual notice. An acknowledgment of a deed cannot be taken by any one who has an interest therein.

ADVERSE POSSESSION.

When both parties claim under the same title; as, if a man seized of certain land in fee have issue two sons, and die seized, and one of the sons enter by abatement into the land, the statute of limitations will not operate against the other son; for when the abator entered into the land of his father, before entry made by his brother, the law intends that he entered claiming as heir to his father, by which title the other son also claims, and therefore cannot claim title by adverse possession.

DEED (CONSTRUCTION OF).

The construction of deeds is favorable to their validity; the principal includes the incident; punctuation is not regarded; a false description does not harm; the construction is least favorable to the party making the conveyance or reservation; the habendum is rejected if repugnant to the rest of the deed. (The habendum limits and defines the estate which the grantee is to have.)

EASEMENT.

A privilege which the owner of one adjacent tenement hath of another, existing in respect of their several tenements, by which that owner against whose tenement the privilege exists is obliged to suffer or not to do something on or in regard to his own land for the advantage of him in whose land the privilege exists.

ESTATE FOR LIFE (HOW CREATED).

Estates for life may be created by act of law or by the act of the parties. In the former case they are called legal, in the latter convential. The legal life estates are estates tail after possibility of issue extinct, estates by dower, estates by curtesy, jointures.

GROUND RENT.

In Pennsylvania it is real estate, and in cases of intestacy goes to the heir. The interest of the owner of the rent is an estate altogether distinct and of a very different nature from that which the owner of the land has in the land itself. Each is the owner of a fee-simple estate. The one has an estate of inheritance in the rent, and the other an estate of inheritance in the land out of which the rent issues. The one is an incorporeal inheritance in fee, and the other is a corporeal inheritance in fee. The owner of the rent is not liable for any part of the taxes assessed upon the owner of the land out of which the rent issues

TENANT.

A tenant for years who assigns his whole estate in the term, reserving rent, cannot distrain for it unless the right of distress be expressly reserved.

A mere removal, in the daytime, without the knowledge of the landlord, is not fraudulent.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE property 1604 N. 15th street, sold for $10,500.

No. 2126 Mervine street was sold this week for $3,300.

2010 COLUMBIA AVENUE is being altered into a fine store.

1623 NORTH 18th street was sold for $6,500, to C. H. Shomaker.

THE old "War Office Hotel," at Merion Square is to be rebuilt.

THE demand for lumber by builders was never greater than now.

S. B. MCDOWELL is erecting a club stable on Gratz below Berks street.

THE dwelling and lot, 53x88, No. 1514 York avenue, sold for $5,000.

SAMUEL GARRIGUES is to erect five houses at White Hall, Chester county.

THE three-story brick dwelling, No. 1020 Race street, 20x170, sold for $8,650.

J. B. KIRBY is erecting three three-story houses on 39th and Baring streets.

THE Lower Merion Baptist Church is to be enlarged and otherwise improved.

MARTHA J. MILLIGAN, of this city, has purchased a building lot at Ridley.

HORACE HOWARD FURNESS will build a seaside residence at Point Pleasant.

JOHN C. TULLOCK, of this city, has bought several lots at Prospect Park, Ridley.

THE Hampden Fire Company of Reading, will build a handsome engine house.

JOHN L. GALLOWAY has bought several lots at Ridley Park for building purposes.

C. C. MOORE is erecting 35 houses on Fairhill and Lehigh Ave., two and three story.

THE Arlington Cotton Mills, at Wilmington, Delaware, will erect a large woolen mill.

A DWELLING on south side Fairmount avenue, east of 16th street, 24x114, sold for $11,500.

ISAAC CLOTHIER contemplates extensive improvements to his property at Wynnewood.

ABOUT $18,000 of unpaid Reading city taxes will be put in the hands of collectors next week.

HENRY S. CATTELL purchased the property east side of Broad street, below Brown, for $15,750.

PARKER avenue, between Collingwood and Darby, is to be opened and improved with dwellings.

A NEW jail building at Carlisle, Pa., has been recommended by a grand jury of Cumberland county.

THE Wayne Building and Loan Association was chartered on Wednesday, with $500,000 capital.

JOHN P. CROZER has bought a large tract of land in Upland, Delaware county, which he will improve.

GEO. GIBSON is erecting 9 nine-room houses on 17th street, three on Berks, and three on Monument avenue.

WILLIAM ALSTON GORDEN, of this city, has bought grounds in Upper Darby, which he will build upon.

THE Real Estate Exchange has elected Richard M. Hartley Treasurer, and James L. Stevenson Secretary.

MESSRS. ODNOLD, of Merion Square, contemplate a number of handsome building improvements there.

THE improvements to the Allen A. M. E Church, Lombard street, above Nineteenth have cost over $5000.

THE South Pittsburg Railway & Iron Company has purchased 27000 acres of land in north-eastern Alabama.

1424 NORTH 16th street, $15,100, to E. T. Maguire; 1712 north 18th street was purchased by Mr. Seeley for $9,500.

THE Pennsylvania Building and Loan Association, of Roxborough, has been chartered with a capital of $1,000,000.

No. 1540 Wellington street, was sold by Mr. C. Harry Shoemaker, for $3,800; also 1541 Centennial avenue, for $6,800.

RUMOR has it that John Mundell, the shoe manufacturer in this city, will erect a large factory at Beverly, New Jersey.

E. H. CLOUD is building ten three-story houses, eight on south Chester avenue, and two on 42d street, all highly finished.

THE congregation of the Simpson Methodist Episcopal Church at Altoona contemplates building another church edifice.

THE Pennnsylvania Granite Company, near the Falls of French creek, has offered its creditors 80 per cent. of its indebtedness.

THE Builders' Exchange of Pittsburg, has proved a great success. Nearly all the local employers' building trades have promised to join it.

THE new building of the Bryn Mawr College will be ready for occupancy about the first of the year. It will be a very handsome structure.

ARCHITECTS are having considerable fun out of the mint in this city which, being designed after a Grecian Temple looks very odd with a Mansard roof.

No. 1726 North 8th street, frame house and lot, was sold for $1,700; the lot is 15x104 and will have a fine house erected on it on Eighth street, with stable in rear.

PRESIDENT GEORGE PHILLER, of the First National Bank, has bought a tract of land at Haverford College from James C. Booth, and will build another residence.

ENON HARRIS, JR., Darby's borough surveyor, is about engaging in the dividing of a tract of land at Yeadon into building lots. It is the property of Wm. B. Bullock.

HENRY ABBOTT, of Chester, will erect eight brick dwellings in that city. Extensive improvements will be made by the Lincoln Manufacturing Company of the same city.

THE town of Hamburg on the line of the Pennsylvania Schuylkill Valley Railroad, has been visited by a large number of capitalists, with a view to locating manufactories there.

JOHN F. BETZ is doing considerable in the building line. His country seat, "Betzwood," Montgomery county, is to receive many building improvements.

PHIL. J. WALSH has purchased twenty-five seven-room houses on north side Chadwick street, between Moore and Morris streets, and also twelve houses on opposite side. Prices not given.

C. C. CARMAN is building six three-story houses on 19th above Monument street; also six on Gratz, street (three-story), also ten two-

story houses on Charles Ave., between 19th and Gratz streets.

AT auction, the three-and one-half story office building, 913 Walnut street, lot 25x120, sold for $19,000; also three-and-one-half-story brick dwelling, 1120 Walnut street, 23½x100, sold for $21,000.

THE real estate of the late Phineas Paist, in Easttown township, Chester county, in full view of Berwyn and Devon stations is for sale and, when purchased will undoubtedly be improved with dwellings.

THE Pennsylvania Building and Loan Association of Roxborough, Philadelphia, capital $1,000,000, and the Reading Eagle employes' savings fund, of Reading, capital $100,000, were granted charters at the State Department, recently.

IT is reported that Governor Pattison and Judge Gordon have purchased adjoining houses of C. C. Moore, situated on Chestnut street, east of 37th street, at the cost of $12,000 each. They are on the south side and have fine marble fronts.

THE late Roger Sherman, of the printing firm of Sherman & Co., left personal effects of $207,072.37. This does not include his interest in the above firm and in the firm of J. M. Stoddart & Co., as they cannot be correctly estimated at the present time.

EIGHT acres have been purchased at Fiftieth street and Merion avenue, West Philadelphia, by the Pennsylvania Iron Company. New works are to be erected. The capital stock of the Company amounts to $150,000. The business of the Company will be the construction of gas machinery.

MR. H. R. SHOCH has just disposed of the following buildings: Eight seven-room houses on Crosky street, for $3,000 each; three on 23d street, for $4,500 each; also two corner stores on Tarley and Berks streets, one for $4,500 the other $5,500; also seventeen houses on Ringgold and Taylor streets, for $2,000 each.

THE firm of Wm. Stewart's Sons, of Philadelphia, now operating a tapestry and curtain manufactory on Walnut street above York, Pottstown, has bought three lots of P. L. Egolf, Matt. Geist and Dr. W. H. Eck, on the Laird farm, east of Pottstown, on which they propose to erect a large new building in which to conduct its business.

MR. W. A. LEVERING has just disposed of two lots of land on Lehigh avenue, between 31st and 32d streets, with a frontage on Lehigh of 575 feet by 1027 feet, to Odd Fellows' Cemetery Co. for $70,000. This property will join up to their northern cemetery known as the "Mount Peace Cemetery." It is their intention shortly to build a chapel, fine archway, and wall it round on two sides.

THE increase going on in Philadelphia in the erection of dwellings is something almost marvelous. The present season, allowing a fair estimate for the remainder of the year, the number will foot up 6,335 dwellings. In the six years that have elapsed since the census was taken in 1880, there have been added to the dwellings in Philadelphia as follows: 1881, 2104; 1882, 2,280; 1883, 3,626; 1884, 4,255; 1885, 5,406; 1886, 6,336; total, 24,206.

WM. CRAVEN & SONS, 1546 north 7th street, have just disposed of the following properties: 2931 and 33 Orkney street, four-room houses, for $1,350 each; also 2908, 22 and 24 Lawrence street, five rooms, for $1,600 each; also 2240 Leithgon street, five rooms, for $1,300 each; also 2424 and 26 Bodine street, (five rooms,) for $700 each; 2206 north 28th street, dwelling and slaughter house, for $3,400; also 1604 Columbia avenue, three stories, for $7,400.

—A series of paints, which are made ready for use simply by the addition of cold water, have for some time past been successfully introduced abroad, the paint thus produced drying, it is stated, with a fine, hard surface, which, although mixed only with water, is impervious to rain and uninjured by frequent washings, even with diluted disinfectants; as oil and turpentine are also dispensed with, these paints have the additional advantage of being free from objectionable smell. They can be used for exterior work on wood as well as on brick, plaster, iron or stone, and for interiors they are of course peculiarly applicable. The paint can likewise be reduced by oil, which produces a hard and glossy surface. It is thought that non-poisonous and washable paints will prove of peculiar adaptation for tropical countries generally, where cleanliness and freedom from infection are particularly requisite.

—D. & P. McNichols has been awarded the contract for building a sewer on Fifteenth street, from French to Fontaine, at $1.78 per foot.

Building Permits.

John Mander, 2641 Germantown ave., two 2-story houses, 16x50, Huntingdon st. and Lehigh ave.

Brocklehurst and Ewing, 523 West Norris st., a 2-story market house, 70x156, Third st., and Girard ave.

George Kessler, 1333 Marshall st., a 2-story office, 18x32, Fifth and Columbia ave.

Cunningham, 2417 Huntingdon st., 2d-story bathroom, Huntingdon st., near Gaul, 12.6x12.6.

G. T. Gibbons, 2248 Master st., six 2-story houses, 14x30, Marshall and Tioga sts.

Daniel Jacoby, Blue Bell Hill, two 2-story houses, 16x42, Nice ave., and Town Line Road.

Humphrey Donahue, 310 St. John st., a 3-story building, 16x23, 310 St. Jon st.

F. H. Henry, 1713 Columbia ave., 3-story back building and front alterations, Columbia ave., near Fifteenth st., 17x27.

Friel & Simpson, Nineteenth and Wharton sts., three 2-story houses, Tasker and Mole sts., 16x45.

A. C. Wagner, 431 N. Fourth st., 2-story boiler and refrigerating machine factory, Trenton ave., and York st., 33x20.3.

A. E. Wagner, 431 N. Fourth st., 3-story ice-house, Queen st., below Baird, Germantown, 27x33. Also, 2-story stable, Baird st. below Queen, 15.6x21.6. Also, 2-story brew-house, Queen and Baird sts., 40x26.

A. Hindle, 1522 N. Twenty-first st., front alterations 2010 Columbia ave., 18x27.

G. F. Payne & Co., Sansom st., new front and underpin 140 Thompson st., 18 ft.

M. Schmid, 217 Walnut st., alteration and lay floor in cellar 2 feet lower, Oak st. near Wood, 32x44.

J. Simpson, 1719 Christian st., ten 2-story houses, Bateman st. near Reed, 14.6x40.

J. J. Torpey, 2666 Kensington ave., three 3-story houses, Lehigh ave., near Orkney st., 15 and 14½x51. Also, two 2-story houses, Orkney st. above Lehigh ave., 15.6x34.

William Tecklenberg, 1604 Cadwalader st., two 2-story dwellings, west side of Tyson st., between Lehigh ave. and Huntingdon st., 16x27.

John Owen, 52 Springer st., an additional story to a dwelling rear of 5742 Germantown ave.

J. E. Jeffords, 2027 Walnut st., an addition to a factory on Tilton st., between Lehigh ave. and the Philadelphia and Reading Railroad, 17x48.

William Rusling, Frankford ave. and Poplar st., front alteration.

L. Schwab, 940 N. Sixth st., 2-story back building, 172 Girard ave., 12x12.

Abbreviations.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M. L. D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B. B.—Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E. J.—Ejectment Suit.	
E. S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

Labor Matters.

—A Knight of Labor says there is a widespread dissatisfaction among the Philadelphia Knights with the way the General Executive Board and the Executive Board of District Assembly No. 1 are managing affairs in this city. The textile workers and the bolt makers, and the stove workers are loud in their protests. The dissatisfaction is so strong that it is effecting the membership of the order. District Assembly No. 1 owes the local assembly of stove workers $4,000 for strike benefits and is either unwilling or unable to pay it. It is said the same condition of affairs exists in other local assemblies. There are 4000 iron workers in this city who, it is said, are tempted to withdraw from the order.

—The Annual Session of the Federation of Trades Unions will begin December 9th at Columbus, Ohio. Another meeting will be held at the same time in the same city by the Trades Union's Conference Committee. It is probable that a combination of these two wings will be made.

—The Building Trades Council held a meeting on last Thursday evening at which business in the different trades was reported as good. The carpenters and sheet iron workers and slate roofers were all received into the council.

—The six local assemblies of brick makers in this city sought to obtain a charter for a district assembly but were refused one. There is trouble among the maltsters of the city. Only one of the brewery employers is paying the wages asked by the unions. A new association of carpenters will be established for the accommodation of those residing in Kensington and Frankford.

—So far as mill construction is concerned, the system of longitudinal girders has been absolutely condemned as unsuitable both from the engineering point of view, with a view to light, with a view to economy of material, and with a view to safety. For what reasons is it adopted in the construction of warehouses?

—J. C. Bullit is at the head of a syndicate of Philadelphia capitalists which has purchased a large tract of land on the boundary of Washington City, known as Kalomamo Heights. The track embraces 86 acres of land and cost $400,000. $200,000 will be immediately expended on improvements. This will be made a very desirable spot for residences. It is within easy reach of the city, and all that will be necessary will be sufficient railway facilities, which will no doubt be supplied.

FURNITURE

MANUFACTURERS.

BUY OF THE MAKERS,

If You want to Save Money.

WEBER & WEINMAN, Retail Store, 927 Market Street.

BOOKS BOUGHT.

If you have a large library or a small parcel of books you do not want, send us your address and we will call and examine them. We are always prepared to buy and pay the cash at once, whether it amounts to five or five thousand dollars

Knabe, Guild, Vose & Son's Pianos.

Wilcox & White's Parlor and Chapel Organs.

Low Prices and Easy Terms.

All the Novelties in Sheet Music, Popular Songs, Fashionable Dances, etc.

F. A. NORTH & CO., 1308 Chestnut St

—Damp Cellers.—We are asked by a correspondent what to do with a cellar that is too damp to keep vegetables or milk in. It is not easy to answer the question without knowing just what the cause of the dampness is. Sometimes there are springs about the cellar, and sometimes there is nothing more than the usual dampness that comes from the earth. If the cellar should be well cemented, that would remedy the trouble. Dig down on the outside and cement the walls, and cement the bottom of the cellar. Tile drainage will do good, and sometimes entirely remedy a trouble like this. Perfect ventilation will often be all that is necessary. Many cellars have no ventilation at all. There is still another means that will prove valuable. It is placing fresh lime in the cellar. Lime is very absorptive, and a half peck of it will absorb as much as two quarts of water. It is the custom of some people to place a lump of lime in their stoves that they put away for the summer, and when it is done it will prevent the inside of the stove from rusting, a fact that shows the value of lime for drying a damp cellar.

—Reeves & West obtained the contract for plumbing the Municipal Hospital, for $467.50.

Real Estate Record

AND

BUILDERS' GUIDE.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 48. PHILADELPHIA, MONDAY, DECEMBER 6, 1886. PRICE 15 CENTS

Items of News.

—The Henry Horst estate is valued at $10,000.

—In Judge Wilson's Court on Tuesday last the Church of the Covenant, Filbert street, west of Seventeenth, received a verdict against the Pennsylvania Railroad Company for $19,333.33 for injuries to the property by the construction of the Filbert street elevated railroad.

—Mrs. Emily Pearce was given an award against the city by referee George W. Norris for $8594, and Mrs. Susanna Sykes, for $8485.75, as damages for land taken in the opening of Fifty-second street, from Warren to Lancaster avenue; these awards include interest from July 3d, 1885, when the properties were taken.

—At the regular annual meeting of the Philadelphia Chapter, A. I. A., the following officers were elected:

President, Theophilus P. Chandler, Jr.; Vice-President, Edward Hazlehurst; Treasurer, John Stewardson; Secretary, Arthur Truscott; Executive Committee, Messrs. Charles Balderston, Walter Cope, James H. Windrim.

—Two buildings on South Fourth street, above Walnut, opposite the site of the Fourth Street National Bank, have been purchased by the Insurance Company of the State of Pennsylvania. The company intends to tear the old buildings down as soon as the necessary arrangements can be made, and to erect a large and handsome new building on the site. The price paid for the two properties is said to be $60,000.

—At the December meeting of the Illinois State Association of Architects, the Committee on Revision of Sanitary Law will report a bill for special discussion, which is of great importance so far as the sanitary construction of all new buildings is concerned. The bill is entitled

"An Act to provide for the regular inspection of the sanitary construction and alterations or modifications of buildings in cities and villages, and to secure proper ventilation and sewerage systems for habitable buildings, and declaring certain things to be nuisances, providing penalties, and for the issuing of injunctions in certain cases."

—Judging from the number of churches that have been built in this city within a year, and the number projected for construction next year, it would seem that the spirit of Christianity is gaining ground. Among a certain class of people, at least, there is an increasing attendance. Hospitals and Homes are also increasing in number and extent. The same increase is observable throughout the West. A spirit of charity is taking practical shape and wide scope, and opportunities are being offered whereby the sick, lame, halt and blind will be better taken care of than they have been. This is certainly a creditable phase of human nature. Money which is gained often in speculation and by sharp commercial practices, finds its way in course of time in channels where it is expended for the good of those who were crushed by those who first gathered it together.

—$200,000 worth of Real Estate jeopardized through a lawyers error:—"An important equity suit, involving property valued at $200,000 and which in 1884, the year of the great flood, sold for $850, will be on trial at this term of court. The case is one of unusual interest and strikingly illustrates how a little mistake in the transfer of property leads in a few years to great difficulties, especially where real estate is continually increasing in value.

"Henry Jent was a farmer, who, twenty-five years ago, owned a large tract of land a short distance east of town near the old race track, described in the legal papers as south half of the northeast quarter and the north half of the southeast quarter of section 34, township 50, range, 33. January 16, 1884, Silas Holmes bought the land consisting of 160 acres for $850. Jent gave him a warranty deed, but by an oversight in drawing the deed, conveyed a portion of the land only, and another piece of land in section 34, to which Jent had no title or claim, making however, the correct number of acres. Holmes himself overlooked the error and took possession of the property first described, with the knowledge of Jent, both parties to the transaction supposing that all was right. In 1855 Silas Holmes died, leaving the estate to his widow and his only children and heirs. A decree was rendered by the court by which the land was partitioned.

"All of the purchasers have brought suit to obtain just titles to the land which Jent intended originally to convey."—*Kansas City Times.*

—*Building* says the conclusion arrived at by investigators in regard to the use of lead pipe for conducting water is, that it is, in their judgment, impracticable to replace lead service pipes by iron pipes, or by pipes of tinned lead, and that it would be a huge undertaking to apply some protective coating to lead pipes. As regards tinned lead pipe the tinning is found to be not only detrimental to the strength of the lead, but it is likely, unless the coating be perfect, to assist the dissolution of the lead. Iron pipes, although strong and safe so far as health is concerned, are more likely to break, more difficult to adjust and repair, very easily oxidisable, and liable to obstruction from accumulation of rust. They suggest the lining of iron pipes with Angus Smith's solution, or a silicious glazing as a possible remedy, without, however, referring to the Bower-Barff process of making iron rustless.

For a while it was accepted that soft waters acted to a greater extent on lead pipe than hard water. This theory has been upset.

Recent investigations of Mr. Lory, of Grenoble, seem to lend strength to the opinion entertained by many that water containing organic matter in solution attacks iron pipes very speedily. If this be true, it is easily understood why in some cases, iron pipes remain quite free from corrosion, whereas in other cases they become covered with rust carbuncles.

—"Artus," in *Building*, throws out some good suggestions concerning the preparation and use of asphalt: For flat roofs not having a greater inclination than one in ten, asphalt may be used with much success. It is usually put down in two separate layers, to a depth of about ¾ inch, on either a bed of felt soaked in pitch, or concrete resting on rough boarding secured to the roof. The material is also frequently used to cover in the extrados of an arch to prevent the percolation of water, a thickness of ½ inch being sufficient for the purpose. Beyond having the advantages of being impervious to moisture and resisting the weight, the material is very suitable for this purpose, as should the arch settle, of which there is every likelihood, and the asphalt crack, it will generally join of itself again by contact.

It is frequently found that a pavement of asphalt will continually present an appearance more or less damp, and it is sometimes thought that such an appearance is inseparable from the use of the material itself, but this is not so. In most of such cases the dampness is probably due to the condensation of moisture caused by a want of ventilation in the building, and as the asphalt does not absorb the damp it naturally becomes more conspicuous.

What is known as asphaltic mastic differs materially from the ordinary asphalt in composition. It is formed of the following materials, in about the proportions given, viz: Asphaltic cement, 50 per cent.; sand, 34 per cent.; petroleum and limestone powder, each 8 per cent. The addition of too great a quantity of petroleum renders the material liable to become too soft in hot weather, while an insufficient quantity has the effect of causing it to crack. Pavements or roads laid with this mastic are very little slippery, as the large proportion of sand used in its composition gives it a roughened surface.

It should be remembered with regard to the advantages of asphalt, that when once a perfect foundation is obtained the asphalt will take some considerable time to wear out—twenty years has been given as the average time it lasts in a roadway exposed to the heaviest and most continuous traffic—and that it can be taken up and a fresh coat laid at comparatively small expense on the old foundation, which will be uninjured, not having been subjected to wear. Thus a roadway may be kept in excellent order at a minimum cost.

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

THE new East Park drive has just been opened. It runs from the tunnel on the Schuylkill to Strawberry Hill.

So far, this year, 3744 building permits have been issued. The number of operations are 8772 against 7681 operations for the same time last year. This shows an increase of about 1100 operations or about 14 per cent. Even at this late date a good deal of building work is talked of. The permits for the month of November number 239, embracing 418 operations.

THE River Front Railroad Company is having its fair share of legal difficulty. The accusation made by the petitioners, James V. Watson and the Baltimore and Ohio Company is that the River Front Road is controlled by the Pennsylvania Company, and that company is desirous of breaking its monopoly which it now has. The Philadelphia and Reading Railroad Company has also filed a bill in equity.

REPRESENTATIVES of 60,000 Knights of Labor in Chicago met and passed resolutions of a friendly character to the condemned Anarchists. The public who roundly denounced the Richmond Convention for a resolution of sympathy do not understand the heart of labor. Labor sympathizes with its fellows of whatever state or opinion and under all circumstances. The Anarchists, the Chicago workingmen think, were honest at heart though bordering on insanity in their methods.

THE Twentieth Annual Convention of the American Institute of Architects opened in the Mutual Life Insurance Building, New York, on Wednesday. Only forty members responded to the first roll call. The total membership is 161, with 90 associate members. A number of interesting papers were read upon questions connected with architecture, both home and foreign. There are twelve chapters, mostly in the Western States. Our Eastern architects do not recognize or appreciate the value of organization. It is to be hoped that a stimulus will be given to organize among the architects. A more fraternal spirit would be productive of good.

THE Citizens' Municipal Association adopted a series of resolutions declaring that it had been credibly informed that the work on the Market Street Bridge was not being done according to specification. The matter is to be looked into. It certainly seems very strange that any attempt should be made by such a firm as Malone & Son to disregard the terms of the contract, and we await with interest the investigation which is to be made. The piling which is used and which is the subject of complaint, may be and may not be just as good as white oak, but nevertheless the contract calls for white oak, and unless some very good reason can be shown to the contrary, none other should be used.

THE special order of the day for next Tuesday is the consideration of the South Mountain Water Company's proposition to furnish a water supply to the city of Philadelphia. An invitation is extended to persons both for and against the proposition. It is to be hoped that this invitation will not be ignored by those in opposition to it. It is charitable to their judgment to say that they do not know what the South Mountain Water Company really means. Will they attend and hear? It does not follow because an infamous gas works lease is being pushed through City Councils that therefore the water project should be stamped as doubtful. If there are any weak spots in the proposition, let them be laid bare. We speak for property owners, manufacturers, and the public generally, in saying that the matter of the future water supply ought not to be postponed.

TWO HUNDRED AND FORTY-SEVEN thousand dollars seems a mere bagatelle to the Pennsylvania Railroad, for this is the amount it has just paid to the trunk line pool, because its earnings amounted to that much over its quota established by the combination, and yet it complains that it is compelled to pay over a million dollars a year to the other companies in the pool to make even the allotments of the trunk line traffic. In other words, the stockholders are robbed to maintain weaker trunk lines, the manufacturers and people of Pennsylvania are robbed by cruel and unjust discrimination in order that dividends may be paid and deficiencies occasioned by this million dollar subsidy made good. A little Congressional law against trunk line pools might relieve the people and protect the honest stockholder.

WE are glad to observe that more attention is being given to those who engage the services of builders in reference to the execution of contracts according to specification. There is a constant tendency to slight work among certain contractors whose reputations have not been firmly established. First-class contractors need no supervision, and in fact are themselves the best inspectors of work. Of all the work done in this city not 2 per cent. has been badly done. This is saying a great deal. Builders of Philadelphia have a pride in their work, and it is to be said that the great bulk of it is done fully up to specifications. In fact there is no disposition to do other than the very best of work, and there is a general anxiety upon the part of all who have work in hand to not only render satisfaction to those who employ them, but to do creditably the work for the work's sake.

THERE seems to be a general disposition upon the part of railroad managers, manufacturers, big and little, jobbers and workingmen to advance the cost of what they have to sell or the services they have to render. This is human nature. So long as there is a strong basis for such action, there is nothing to be said against it. Just what the results will be it is not easy to say. One thing we can say, viz., that where the advances are, universal as they seem to be, we are left just about where we started. Higher cost of living and of traffic and of travel, higher rents and higher prices in every direction absorb the increased cost of labor or products of labor. Still there is no help for this, it is the way things go. People seem satisfied when prices are advancing. It encourages enterprise and strengthens confidence, yet as stated above the practical results are doubtful. Fortunately there is an abundant supply of money in the country and a great many opportunities for the full employment of labor and capital.

THE people of Kensington are complaining about the Delaware river water. Coun-

cils have set apart $300,000 to complete work on the Cambria and East Park reservoirs next year. The water authorities desire to get along with as little Delaware river water as possible but are obliged to use it on account of the fact that the storage facilities elsewhere are temporarily cut off. The building of the Baltimore and Ohio Railroad tunnel has obliged the cutting off of nearly all of the mains of the Fairmount reservoir. Mr. Ogden said that a 48-inch main could be laid from the Spring Garden station to the Lehigh avenue reservoir at a cost of $300,000, or a main could be laid south from Frankford to connect with the present system at a cost of $160,000. The water in the Lehigh avenue reservoir is not sufficient and it is therefore necessary to pump water directly into the mains. This water not being filtered is unfit for use, and this action is therefore the subject of protest and complaint by the citizens and the sanitary authorities. These facts only emphasize the necessity for some radical and statesman-like management upon the part of the city's authorities.

When William M. Tweed was in the zenith of his glory and with voluptuous munificence was lavishing his ill-gotten gains upon his thousands of retainers, and Judges and Legislators were fawning at his feet and the "old man's" power seemed unlimited and interminable, there suddenly came a turn of the tide, an outraged people rose in judgment against him and the poor "old man" divested of his pomp and power writhed in the hands of justice, and with shame and misery and death, paid back measure for measure all the wrong he had committed.

The time will surely come when history will repeat itself right here in Philadelphia, and an outraged and greatly wronged people will bring to justice the arrogant knaves who, with the effrontery of the devil, barter away her best interest under the searching lash of their masters. What a humiliating spectacle the scene presents—Councilmen beseeching the bosses to withdraw, or so modify their commands that they need not vote for the gas lease and thereby lose their chances for re-election. The sacred nature of their obligations, and the more sacred duty of citizenship, stand for nothing against these municipal potentates.

If there is one thing more than another that will weaken the confidence of workingmen in their labor organizations, it is the custom of making large assessments for strikes and other purposes. Mr. Powderly has just appealed for an assessment of 25 cents upon all the local assemblies of Knights of Labor to help the families of the Knights of Labor out of work. This is a humane, charitable and most creditable act. It is to be hoped that the 25 cents will be at once forthcoming. Even with all our activity and prosperity there is need of this assessment. The practice of making assessments will develop a humane feeling among the workingmen which is needed, but we speak of this for another purpose. There are tens of thousands who are really unable to spare such a trifling amount as this. It means five loaves of bread or three pounds of beef, and this is a great deal to men who are making from $1.25 to $2.00 per day. The organizations will respond promptly to the first and perhaps to the second assessment, but the danger is that more frequent assessment may become necessary, and the fear of this will exercise an unfavorable influence upon the membership.

The Council Finance Committee has completed its work upon the appropriation bills. The total appropriations foot up $9,854,643,08. The estimated expenditures for next year are $13,072,586,94. The appropriations for the current year were $8,763,829.06. The highest item in next year's appropriation is the bill for water, which calls for $2,444,000. The next is education, calling for $2,172, 958.-35. The third is police, calling for $1,613,254.-73. Next highways, $1,270,000. Next public buildings, $1,226,637,26. The House of Correction laid out $195,355; the receiver of taxes $115,180; the Department of Surveys $509,706; the Electrical Department $178,114. The report stated that there is about $1,500,000 more money available for next year than was appropriated this year from the tax rate; $50,000 was granted to be used by the Board of Education in increasing the salaries of assistant teachers. This important work has been very well done but the only mistake was in not making the tax rate five to ten cents higher in order that certain very important pieces of work could be at once prosecuted.

The amounts for permanent improvements figured up by the committee are: Pavements, $150,000; main sewers, $150,000; water-pipes, $300.000; new bridges, $100,000; underground cables, $50,000.

The list of railway enterprises that have been talked of lately would fill a column. One of the latest is in the hands of Mr. Wharton Barker. He proposes to raise money through the help of English capitalists to build a railroad across the State of Pennsylvania to the Ohio border connecting with western lines at that point, thereby establishing a new trunk line and increasing the trouble which already exists between these trunk lines. An enormous amount of railway construction is projected, not only in the Middle States but in the far West. No doubt as much as 15,000 miles of railway will be laid next year. A great deal of this mileage will be in the way of repairing. The cause of this activity is in part due to the purchases of a great many railroad companies who, for the past two or three years have made very few purchases. The activity in traffic during the past few months has increased the necessity for repairing and increased their ability to purchase. The railway activity will extend throughout the entire country. Long lines are projected in the South and South-west. The influx of $10,000,000 manufacturing capital for a month in the Southern States is stimulating rail road building, and the favorable returns made by the railroad managers in the South are strengthening the confidence of investors both American and foreign.

It will not go well for those councilmanic statesmen whose constituents own property or have business interests on the streets bordering on the Delaware river front, if they do not give efficient aid in passing the new elevated railroad bill when it is presented.

The business men of North Second street and the property owners on North Front and Water streets regard the elevated railroad as the dawning of a new business era, and that it will add a decided increase to the valuation of property in that section, there is but one opinion. The sentiment along the river front is unanimous for the elevated, as it will bring Frankford and other outlying districts to their very doors.

The conduct of the managers of the two great railroad monopolies of the State of Pennsylvania towards its manufacturers is simply disgraceful, their exhorbitant tariff exactions on coal alone is enough to compel an abandonment of the iron interests in the State altogether. No sooner does the iron interests feel the beneficial effects of the increased demand for its products when an advance is ordered in both the price of coal and the cost of transportation, and even then stability is not assured for the railroad companies give the manufacturers to understand that a further change is liable to occur at any time after January 1st, next.

This policy is simply suicidal and must in the end drive our furnaces in quest of cheaper fuel and greater advantages.

The iron interest of the State is in no condition to be handicapped with railroad coal combinations. The South already promises too formidable rivalry, and if half the reports be true we may look forward to a gradual loss of our former prestige as the iron State, and our railroads may as a consequence be compelled to carry their coals to New Castle and even then go begging for a market.

The declaration of Mr. Garrett, President of the Baltimore and Ohio Railroad, to the effect that that company will at least keep faith with the people of this city, and that, notwithstanding the conciliations held forth by the Pennsylvania Railroad Company, the original purpose of building a through line from Baltimore to New York will be strictly adhered to, can very justly be regarded as an exceedingly good omen for the future of Philadelphia. It seems like the dawning of a new era, and that the time has come when the withering influences of the worst monopoly that ever cursed a State will for the first time be counterbalanced by healthful competition and progressive influences. That President Roberts has more than found his match in the wily Garrett the officers of the Pennsylvania Railroad Company now fully realize; they also recognize the coming of the Baltimore and Ohio Railroad Company to this city as the entering of the wedge that

will divest their company of a large part of its wonderful power and influence all over the State. For the first time in the history of the road its officers have been out-generaled; they have played every card, and played well, but they have lost every trick, and, as a last resort, sought by cajolery and subterfuge, to honey-fuggle the Baltimore and Ohio people into a compromise, which Mr. Garrett's better judgment and sense of duty to the people of this city would not permit him to entertain.

All the moral support and patronage that the people of this city can give to the Baltimore and Ohio Railroad Company it now justly merits, for its through line when completed will infuse new life and vigor into the business interests of the State, and to a large extent it will remove the aggravating restrictions, amounting practically to an embargo, which the Pennsylvania Railroad Company has heretofore placed upon Western and Southern purchasers who decided to bestow a share of their patronage upon Philadelphia merchants and manufacturers.

MESSRS. WM. CRAMP & SON'S success in obtaining the contract for the new United States war vessels is certainly a masterpiece of good luck for the mechanics of this city. The constant employment of a thousand mechanics and laborers for nearly two years is such a streak of good fortune that no city in the Union could afford to sneeze at it.

A PROMINENT dealer in machinery stated last week that it is very difficult at present to place an order for new machinery of any considerable size, as most of the large shops had already taken more orders than they can fill. This fact, together with the booming condition of the pig-iron market, certainly means prosperous times ahead. It is said that there is not a furnace in Pennsylvania that will now take a large order, because there are on hand orders enough to run for two or three months.

THE population of this city is certainly increasing at a more rapid rate than most people suppose. The comparatively few houses to rent, notwithstanding the great number of dwellings that have been erected during the year, shows that building has not been overdone, and that the demand is equal to the supply. The building outlook for next year is not only good, but the probabilities are that in new dwellings, at least, 1887 will discount the present year. Material will no doubt be much higher, but with the evidences of prosperity ahead this will have no retarding influence. The fact that families are not doubling up is in itself sufficiently significant to make the coming year one of great expectation for the building interest.

LAST week we referred to the action taken by a self-constituted committee who undertook to tell the citizens of Philadelphia that the ablest engineers the country affords were not as well posted in engineering matters as they. On last Tuesday the Citizens' Committee submitted to Councils a memorial in which they stated that the water of the Schuylkill river is chemically as pure as any that can be brought to the city from further points and that the quanity in the river is now sufficient to supply the city for generations to come. The Committee urges that the present sources of water supply should be relied upon and that other schemes and projects should not be considered. The Sanitary Committee which has been investigating the Kensington Water Supply has declared that the water taken from the Delaware in front of the city is a nuisance and prejudicial to public health. We are suprised, and we are not surprised at the short sighted action of those who are seeking to chain the city of Philadelphia down to what is little better than a mud-puddle. The statement that the Schuylkill is a pure and sufficient source for the future supply of water is not a truthful statement in the opinion of such engineers as Ludlow, and Herring and many others who have examined this question. It will be strange if the recognitions of tinkers and tailors and candle stick makers will be accepted in the place of the statements of proven civil engineers who have nothing to gain or lose. There is in truth very little room for argument. If the Schuylkill river is such a sufficient source of supply why is it, it might be asked, that the water has been so impure for many years, and so unfit for use for long periods of time. The fact of the matter is simply this, that there is something behind these distinguished citizens, as they are called, and it is probable their judgements are not altogether disinterested. It is not surprising that such a great enterprise as this should meet with opposition. Every great public benefit that has ever been secured has had its obstacles to fight and those who raised them were generally distinguished citizens. We all remember how the distinguished citizens of fifty years ago fought the introduction of gas. We can call to mind ever since then how distinguished citizens fought every municipal improvement that has been established: not only has this been the case in our own city but in all large cities throughout the country. The people of New York fought the Broadway Street car line until it was an established fact, and now they could not be induced to part with it. The distinguished citizens of Philadelphia who perhaps do not take a drink of water four times a year, being able to use something more agreeable, are quite willing that the million people of this City who are less able to drink other fluids should be compelled to put up with such impure water and suffer the consequences of such impurity.

—The referee in the suit of Frederick Sheeler against the city for groceries supplied to the Almshouse in 1882, warrants for which were issued to Major Phipps but never received by Sheeler, returned a verdict in favor of the plaintiff for $4,799.35. It is now supposed that Phipps forged Sheeler's name to the warrants.

THE Directors of the New York Real Estate Exchange have declared a three per cent. dividend. The annual report shows that there has heen a steady increase in revenues. The membership is growing, and the Exchange is in a very healthy condition.

A GREAT deal of vacant real estate in New York is selling. Most of the buyers are persons of moderate means. A great many people are purchasing properties immediately north of the Harlem river. Real estate speculators are watching the tendency with a view of purchasing for speculative purposes.

F. E. KIDDER is furnishing a series of very interesting articles in New York *Building*, which throw a good deal of light upon a neglected question, namely, the heating and ventilating of buildings. Great progress has been made in this department during the past few years, but still neglected, is observable in some of our finest buildings even now; the reason is that the principles underlying heating and ventilation are not properly understood. We go by all rules which are good enough in small houses, and still are, but we draw inferences which do not hold often, when we come to supply heat and ventilation to some of the larger structures. There are many nice points to consider, such as the philosophy of air, the effect of friction upon it, by angles in pipes and flues, and by eddies or counter currents. Ventilation is a purely mechanical problem, but it requires close figuring sometimes to secure it to the best advantage.

THE discussion which the *Record and Guide* of New York started in regard to the right of dower and courtesy is very interesting to business men and lawyers. The discussions lean to the principle that when a lien is made it should be made upon all the husband's property. That paper is drawing attention to another more practical question concerning the railway terminal facilities of New York. Some radical departure is necessary in order to accommodate the increasing railway traffic. The Hudson river is now crowded with crafts, transferring freights from one place to another. The suggestion is that tunnels be constructed by which the Western traffic could be run direct into the city. It would be a valuable thing to have tunnels not only for freight, but for passenger traffic. New York, great as it is commercially, is sadly in need of improved facilities, and it will not be many years before railroad capital will solve the problem and construct tunnels. There is no other escape. We, of Philadelphia, however, cannot cast reflections upon New Yorkers. We are in far greater need than that city of improvements. Any one at all familiar with our needs could point out how one hundred million dollars could be expended in five years to our great advantage, in water, gas, parks, streets, roads, below and above ground, and in efficient railway terminal facilities,

the extent of which have not yet even been hinted at by those who talk about such things.

THERE is a strong tendency among American architects in our large cities to build houses in olden style. This tendency is particularly noticeable in New York. Several blocks of houses have been built in that city, which revives the architecture of two hundred years ago. One block of these houses has recently been completed at the corner of 78th street and West End avenue. The fronts are of Philadelphia and moulded brick, interspersed with terra cotta. The Mansard is of red Akron, diamond roof tile and cresting. The stoops and coping are of grey granite. The parlor windows have opalescent glass, and are executed in cabinet finish. The dining rooms and halls are in quartered oak or ash. With all our knowledge of architecture we have something to learn from the originality of our fore-fathers. There is no good reason why houses should be all alike, either inside or outside, nor is there any good reason why they should be built up closely one against the other, as though land was more valuable than light, health or convenience. Before the days of street cars there was reason why people should live close to their places of business. But now, with the probability of under-ground railways, there is no reason for such crowding, as has characterized our building policy for generations past. Hygienic and sanitary requirements call for more room and light. It is propable that the architects will encourage this tendency, and a reproduction of the architecture of the 16th and 17th centuries will be a welcome feature.

THE activity in real estate in Philadelphia markets might be much greater than it is; but when we go over the whole field we find that the activity is of that natural and healthy character which means a great deal more than large operations sometimes mean. Money enough could be found to go into real estate speculation if there were an opportunity. No such operations are known. Land is too plenty. Yet desirable sites are becoming scarce. During the past year negotiations have drawn about a thousand acres of good land into the market, that will be covered with houses. Some of the finest sites in Frankford, and one on the Jersey side below Camden, as well as along the P., W. & B. and the B. & O. have been bought up, and are now or will be in the market next year for the benefit of lot buyers. Upwards of three thousand lots have been sold within the past year for building purposes, a good many on monthly payments. The purchasers are persons earning from ten to twenty-five dollars per week, who are anxious to get out of narrow streets and into the country. Those who have purchased these properties, and are now selling them out, will realize excellent margins, provided they sell all they have purchased. Philadelphia is a growing city, and all of these sites will be in demand, in a comparatively short time, by lot buyers who are anxious to get away from city surroundings. Those who are obliged to hold portions of their purchases for three or five years will be better pleased than were they successful in selling out every lot at present prices. So far this year we have built 6,500 houses, and that means that we will build 7,500 houses next year. The building of manufacturing establishments and shops will keep pace with the enterprise that has been exhibited this year, but the fact must be kept in mind that we cannot afford to ignore the urgent requirements of better and cheaper gas, and better and cheaper water, and better and cheap traveling facilities. All these things underlie industrial prosperity. If we do not keep these factors in mind, other cities will grow at our expense, and industry and business which belongs here will go where it is more welcome.

Councils Doings.

Common Councils passed several ordinances, among which was one, for the erection of a school-house at Forty-third and Ogden streets, Twenty-fourth ward; to appropriate $3,468 to reimburse William M. Singerly for grading streets in the Twenty-eighth ward; to prevent the balances of the Departments of Highways, Surveys, Law, City Property, Police and Electrical, the Boards of Guardians of the Poor and Education, and the Park Commissioners from merging December 31.

Mr. Jenks, of the Twenty-fourth ward, introduced an ordinance to expend $25,000 on the Mill Creek sewer.

Mr. Hall introduced an ordinance to appropriate $10,000 for repaving a portion of Hamilton street; to construct a sewer between Ontario and Tioga streets, and to grade a number of streets in the Twenty-third ward by the use of House of Correction labor.

Ordinances were introduced in Select Council to put down an improved pavement on Locust, from Fourth to Broad. Several Common Council ordinances were concurred in: to lay water pipes on certain streets, and appropriating $13,887 for a new school-house in the Twenty-second ward.

An ordinance was also introduced designed to regulate the stopping of horse-cars only at the intersection of cross-streets and before churches, theatres and other public halls.

Proposals are to be invited by the Public Building Commission for the granite bond-stones to cover the masonry of the tower, also for the girders and beams for its final floor, and for all the bricks, cement and coal needed for 1887. It will cost, according to the estimate of Mr. Howard Murphy, $6,000 to bring the water main for the public building across the Market street bridge.

The citizens of the Municipal Reform Association, propose to see to it, that new buildings are erected according to the ordinance of 1884, which provides that on Chestnut street that no new building shall be built or old building re-built or altered, which is not placed back 30 feet from the middle of the street.

The New-Yorkers expect to have a new Custom House building in the near future. The present house was intended to be a residence for the President of the United States. The managers of the House of Refuge want to sell that property to the State for $550,000; that money will enable them to rebuild farther out in the country. The present building could be used as a prison or State reformatory.

"The Connoisseur."

The second number of Messrs. Bailey, Banks & Biddle's *Connoisseur* has come to us laden with much that is worthy of commendation, and little or nothing that calls for adverse criticism. The present number is a great step in advance of No. 1.

Jno. V. Hood writes on "The Art of Jewelling." Fannie M. Atwell submits three capital translations from the French: "The Court Balls of Marie Antoinette," by Henri De Chennevieres; "The Study of Interior Decoration," by George Duplessis and "The Muff," by Octave Uzanne; "Three Great Artists," by Paul Lepricur; a song by William M. Briggs; a rondeau by Robert Edwards, and "The Limoges Exhibition," offer a variety of good matter to the general reader, while "Philadelphia Homes" and "Old English Iron-Work," the latter by Reginald T. Blomfield, M.A., merit the attention of architects and builders.

The embellishments are from such well known artists as Percy and Leon Moran; Designs by C. E. Dakin; sketches by F. E. Lummis, and an engraving of unusual merit by Reed & Williams. *The Connoisseur* is one of the best of its kind, and reflects great credit upon the enterprise and energy of the gentlemen under whose supervision it is published; and it may be hypercritical to suggest any improvement in a magazine combining so much that is excellent in art matter and make up; but if Messrs. Bailey, Banks & Biddle would reach the very "high top gallant" of artistic success, it can be done by eliminating some of the process work, and giving us more like "At the Art Gallery," on page 31, engraved by Reed & Williams. the pen and ink sketch on page 22 by Leon Moran, and the designs by Dakin, engraved by T. E. Sugden. *The Connoisseur* is only 50 cents per year, and to those interested in art and home decoration any one number is worth the yearly subscription.

City Tax Receipts.

The amount collected for City tax thus far for 1886 is $9,615,800.19. This is an excess of the total amount collected for 1885 of $311,-312.61.

For State taxes $400,061.69 have been paid in up to December 1st. This is an excess of $79,387.66. This makes a total excess of $390,700.27 received for the first eleven months of this year over the same period of 1885.

A Great New Church.

THE NORTHWEST CONVOCATION RECEIVES A GIFT OF $250,000 FOR ITS ERECTION.

AN adjourned meeting of the Northwest Convocation of Philadelphia was held last night in the Guild room of the Church of the Epiphany, Fifteenth and Chestnut streets, Rev. Dr. Miller presiding. It was reported that a lot had been purchased for $28,000 on the Northwest corner of Eighteenth and Diamond Streets, on which the New Memorial Church will be built, for the erection of which two ladies, acting through Richard Y. Cook, have given $250,000. The building is to be a memorial to a deceased relative of the donors. The lot extends on Diamond Street to Gratz 177 feet and in Eighteenth Street 200 feet. Ground is to be broken in the Spring. A chapel costing $25,000 will first be built, after which the church will be erected. On the lot now stands the mansion of the Longstretch family and this will be leased to the Northwest Convocation preliminary to the erection of the church buildings, in order that the House-to-House Mission may have a centre.

Rev. T. William Davidson, secretary of the Convocation, was appointed to the new mission for six months, and $400 which had been set aside for the mission work was allotted to him. It was stated that Bishop Stevens approved the choice of Mr. Davidson as missionary. A committe of three clergymen and two laymen will be appointed to assist Mr. Davidson in his work, which he proposes to begin next Sunday morning. A resolution was adopted, thanking the ladies and Mr. Cook for the church.—*Press*, Nov. 23, 1886.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

BUILDING ASSOCIATION.

A feme-covert, who is a stockholder in a building association, cannot bind her separate real estate for more than the amount actually loaned, with legal interest; unless the loans were made for the improvement of her separate estate.

If a member of a loan association fail to exercise his right of applying his payments to the reduction of mortgage debt to the company, a Sheriff's vendee of the mortgaged premises has no right to make such application.

DEED.

An immaterial alteration will not avoid a deed, nor a material one if made by a stranger.

A reservation of the pine timber upon the land conveyed, with the right to enter, cut and remove the same within a fixed term, confers no right in the timber not removed within the term specified; it becomes the absolute property of the grantee.

GROUND RENT.

The owner of a lot of ground out of which a ground rent is reserved is liable therefor during his tenure; the delivery of a deed to a purchaser of the property will not be presumed prior to the date of the acknowledgment and record.

HIGHWAYS.

Where a city corporation gives bond for the damages to be sustained by the opening of a street, and on an appeal from a report of viewers a judgment is recovered, the primary fund for the payment of such damages is the assessment for benefits against other property, which must be first exhausted before recourse can be had to the bond.

LANDLORD AND TENANT.

Where a tenant holds over a parol agreement made by the lessor, varying the time for the payment of the rent, is binding between the parties; it is not void for want of consideration.

A landlord has no right to distrain upon the goods of an insolvent deceased tenant, on the demised premises, in the hands of his administrator; they are *in custodia legis*.

Where the lease provides that goods removed from the premises shall remain liable for a period of 30 days thereafter, the landlord cannot follow and distrain upon such goods for rent that was not due at the time of removal.

MECHANIC'S LIEN.

A mechanic's claim cannot be made to embrace other buildings on which no labor was bestowed and to which no materials were furnished, unless connected with or indispensable to the enjoyment of the main construction.

MORTGAGE.

Where a mortgage is paid in fact, by one who has covenanted to pay the same, he cannot take an assignment of it and keep it alive for the purpose of compelling contribution by one who is jointly liable.

A foreclosure sale destroys a wife's inchoate right of dower.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE dwelling 925 Spruce St., 18½ by 63 feet, sold for $9,000.

W. H. JANVIER will build a $16,000 dwelling at Villanova, Pa.

A. K. MCCLURE will erect a two-story brick dwelling at Wallingford, Pa.

BUILDING operations were never more active in West York than at this time.

THE Society for Organizing Charity has expended in the last seven years $2,790,996.-24.

THE brown-stone dwelling N. W. corner Broad and Brown Sts., sold by auction for $40,000.

JOHN A. BETZ will tear down the old Peterson mansion, at Broad street and Girard avenue, and erect thereon a handsome residence.

J. S. ALLEN of South Bethlehem has bought property in that place which he will improve.

THE Odd Fellows of Langhorne, Bucks county, will erect a handsome building in that place.

THE members of the Spring City Methodist Church will erect a church edifice in Royersford.

A NEW mill for the manufacture of pipe is to be built by the Reading Iron Works at Reading, Pa.

THE personal estate of Samuel F. Troth is appraised at $79,476,30, and of Edward J. Robinson at $63,351.66.

LEOPOLD STERNBERGER has purchased the store N. W. corner 5th and Market Sts., 18 by 100 feet, for $30,000.

THE gross receipts of the Philadelphia Post Office for November were $149,735.73, against $134,595.65 last year.

CHARLES OSMOND has sold his house and lot near Langhorne, of ten acres, to Daniel LaRue, of Philadelphia, for $4,000.

THE Pennsylvania R. R. Co. bought a property north side Market street, east of 18th street, 84 by 180 feet, for $27,000.

JOHN F. GREINER, manufacturer of shoe uppers and leather goods, on North Fourth street, died on Wednesday, aged 50 years.

ARTHUR H. WILLIAMS has the contract for a new bank building, north-east corner 3d and Market streets, Camden, New Jersey.

A BUILDING and loan association has been formed at Wayne under very auspicious circumstances. Building operations are very active there.

A NEW cotton mill, five stories high, and to cost $175,000, is to be built at Newark, New Jersey, for the Clark Mile End Spool Cotton Company.

A MEETING was held at City Hall, Franklin, Venango county, on Friday evening last, for the purpose of organizing a building and loan association.

AT Harrisburg, recently, the Broad Street and Wyoming Avenue Mutual Land Association, of this city, was chartered, with a capital stock of $75,000.

THE twenty-acre lot of Joseph H. Leary, on the Durham road, in Buckingham township, Bucks county, has been purchased by Henry Watson for $5000.

T. B. PETERSON, the book publisher, has sold his splendid property S. W. corner Girard avenue and Broad street, 70½ by 160, to John F. Betz, Jr., for $47,500.

MESSRS. HOLLINGHEAD & NEWKIRK, 927 Broadway, Camden, N. J., have sold a frame house on 7th and Mt. Vernon streets, for $1,100; 6 rooms. Lot 20 by 100 feet.

WILLIAM DOLON, of Kensington, has bought twenty-six acres of the farm of the late Mark Watson, on the Bustleton turnpike, near Wheat Sheaf, for $375 per acre.

BROAD ST. properties are in demand; a house and lot east side, above Poplar, 20 by 160 feet, sold for $13,000; and a house and lot east side, 23 by 130, below Wallace, brought $6,900.

A NEW club house is to be erected on Girard avenue, east of Fortieth street, for the Pennsylvania Bicycle Club. It is to be 40x42 feet, and two stories high. It is to be built of brick with red stone trimmings.

MR. WILLIAM B. RAMBO, of Upper Merion, Montgomery county, has purchased Mr. J. Gardner Cassatt's house, No. 1320 Locust street, Philadelphia, and with his family has taken up his residence therein.

L. B. HUMPHREY, 3d and Market streets, Camden, N. J., has made a sale of a three-story property, 407 Friends ave., for $1,050, brick and rough cast; also 804 Federal street, three-story white marble front, for $2,850.

THE Mechanics' Mutual Improvement Club is a new organization at Bristol which has made application for a charter. The membership is about one hundred, and its object is to aid and foster building improvements.

DURING the present year 3744 building permits, representing 8772 operations, have been issued. During 1885, 3551 permits, embracing 7681 operations, were issued. November of this year includes 239 permits with 418 operations.

IT is proposed to organize a stock company, with a capital of $50,000, divided into 1000 shares of $50 each, for the purpose of purchasing and operating the "Girard Roller Mills," formerly owned by Mr. Samuel Hartranft.

THE farm of Isaac N. Urner, known as the Stover farm, containing 260 acres and 61 perches, located in North Coventry twp., Chester county, was sold at public sale on Thursday afternoon, of last week, to George Smith, Jr., of near Birdsboro, for $100 per acre.

$500,000 was paid by Messrs. John C. Bullitt, Geo. F. Tyler, W. W. Kurtz, Wm. L. Elkins, P. A. B. Widener and Robt. Glendenning, for the Kalorama property in Washington, D. C. The property is to be graded and divided into building lots.

BY the will of Margaret S. Lewis, which was admitted to probate in Philadelphia yesterday, the sum of $30,000 is bequeathed to the Home for Children at Angora. It is understood that with this sum, extensive improvements will be made to the institution.

FINZELL BROS. have sold the properties 1219 and 1221 Market street, to Henry C. Lea, for $100,000. The buildings are to be torn down and a new six-story warehouse and factory will be erected for Trimby Hunt & Co. Work will begin about February next.

THE farm of 95 acres belonging to the estate of Wm. Hanna, deceased, near West Spring Mill Station, Montgomery county, has been sold at public sale to Letitia Lovett, of Lower Merion, for $125 per acre. It is understood that a number of dwellings are to be erected thereabouts.

ROBERTS & COHN made a sale of 7 five room houses on Clinton street, Camden; also 14 four-room houses on Edward street. Mr. Cohn has just purchased a lot on 2d and Cooper streets, 54 by 114 for $3,400, on which he will in the spring erect three dwellings.

W. A. TURNER, 904 Broadway, Camden, N. J., sold a property at 4th and Mt. Vernon streets, three-story brick, for $1,300; also 309 Mt. Vernon street, four rooms, frame, for $600; also 626 Chestnut street, frame, four-room house, for $800; a lot N. E. corner 4th and Chestnut streets, 20 by 90 feet, for $800; also a house on 3d street, No. 1213, for $900.

THE Moore property, located near Darby, containing 48 acres of land, with improvements, was sold last Thursday by the executor. Ten acres of the tract adjoining the borough here sold for $1,200 per acre, and was purchased by Mr. Barry of Philadelphia. The remaining 38 acres, with improvements, brought $340 per acre. The Moore farm is a part of a tract of 500 acres, which was conveyed by deed from William Penn to Margaret Thomas in 1683.

MR. BENNAGE, of the firm of Bennage & Elliott, 112 South 11th street, sold properties 1902 and 1904 Fairmount avenue, three-story back and front, eleven rooms, for $7,500 each; also 672 North 19th street, fancy press brick, also three-story, eleven-room house, for $5,750. Mr. Bennage has just purchased a lot 32 feet front on 6th street, above Race, Nos. 212–14, on which he will erect two eleven-room houses early in the spring. The cost of the lot was $5,000.

THE courts will be compelled to settle the question as to the validity of the city ordinance of 1884, establishing a new building line on Chestnut street. City Solicitor Warwick having notified Mr. Doherty, who is erecting a new front to his building, 1433 Chestnut street, that he is violating the law by re-building on the old line, and unless the law is complied with he will issue an injunction. Mr. Doherty will appeal to the court and thereby test the validity of the law.

A LANGHORNE, (Bucks County) correspondent says:—Beside the continued sales of the improvement land, other real estate is changing owners. The "Scott" farm recently purchased by James W. Hibbs has been sold at private sale to his brother, Spencer F. Hibbs, on private terms. Frank. R. Osmond has bought James N. Newbold's farm of 114 acres, at Wildman's Corner, for fifty eight dollars an acre. Daniel La Rue, of Philadelphia, has purchased of Charles Osmond, near Janney station, a house and ten acres of land for $4000, They will all take possession in the spring.

The following are some recent sales at Wayne:—Mr. D. H. Lane's property on Bloomingdale avenue, which was sold to Miss Pugh, residing near Devon, for the sum of $7,650 cash. This was a good sale for Mr. Lane, and a better purchase for future value to the buyer. Miss Pugh will make considerable improvements to the cottage under direction of her relative, Theo. F. Ramsey. The other property was one belonging to Mr. F. X. Kelly, which he sold to W. E. Sharpe, Esq., and is located on the west side of North Wayne avenue. The price was $5,500. Terms not made public.

A LOT has been purchased on the north-west corner of 18th and Diamond streets, for $28,000. The lot extends on Diamond street to Gratz street, 177 feet, and on 18th street 200 feet. It is intended to erect in the spring a chapel to cost $25,000, after which a fine church will be built. On the lot now stands the mansion of the Longstretch family which he leased to the North-west Convocation preliminary to the erection of the church buildings, in order that the house to house Mission may have a centre. Two ladies acting through Richard Y. Cook have given $250,000. The building is to be a memorial to a deceased relative of the donors.

THE *Media American* relates this: "One of the most successful real estate ventures we have heard of recently was that wherein a certain gentleman of a western township in Delaware county, purchased a tract of land containing over a hundred acres, in one of the northern townships. The sale was made last spring. A month ago a portion was sold at a fair profit, and then a second, and finally the remainder was disposed of. It is said the gentleman made over $6,500 by the transaction. The property is nicely located, of good farming land, but the real cause of the advance was that it was in close proximity to the long contemplated railroad which is to run through that section of the county.

THE following sales of real estate have recently been made in Lancaster:—Henry Shubert, auctioneer and real estate agent, sold at public sale, November 24, at the Franklin House, the property belonging to the estate of Mary Ann Killian, deceased, situated on the west side of North Mulberry street, No. 112, to Harry A. Shenk, for $1,700. The property of Mrs. Mary Fite, No. 437 North Mary street, offered at public sale on Wednesday evening, was withdrawn at $1,100. Henry Shubert, auctioneer and real estate agent, sold at private sale the property belonging to the estate of A. W. Russell, deceased, situated on the east side of South Queen st., between Vine and German streets, No. 113, to B. F. Keen for $4,000. Also the property belonging to Mrs. J. P. Swarr on the south side of East Walnut street, between Duke and Lime streets, No. 156, to A. Settley for $3,500.

Building Permits.

A bicycle clubhouse, 40x42, Girard avenue and Fifty-ninth street, to Pennsylvania Bicycle Club.

Henry Ashworth, Ridge and Paoli avenues two 2-story houses 10x38, Paoli and Ridge avenues.

W. H. Messide. 723 Walnut st., a 2-story house, 14x27, Tasker, above Front st.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

A Hint for Boycotters.

Judge Brigham in the Salem, Mass., Boycotting case, recently tried at Plymouth, laid down the law, in the following unmistakable words:—"The right of a laborer to labor, or not to laborat his option, for any person, in any process of manufacture, for in the use of any material, is no more an established legal right, or more under the protection of the law, than the right of an employer of labor, at his option, to purchase for that labor and use materials of any quality, manufactured by any person. Such being the respective legal rights of laborers and manufacturers, any interference of either with the stated rights of either of the others, by fraudulent or forcible means, would be unlawful and criminal; and if two or more persons combined and conspired to use such means in such interference they would be guilty of a criminal conspiracy. The acts of conspirators in furtherance of a criminal conspiracy and the results of those acts are principally important as evidence of that conspiracy and its purpose and intent. It is not necessary that the acts which two or more persons criminally conspire to do should all of them be done by those persons, or that their scheme to do those acts in its full original purpose and intent should be consummated."

Yonkers, N. Y.

WHY ARCHITECTS, BUILDERS and ROOFERS SHOULD PREFER TO USE

Stamped and Guaranteed Roofing Plates.

Every sheet of "Gilbertson's Old Method Extra Heavily Coated and Camaret Brands guaranteed Roofing Plates is stamped, not only with the name of the brand, but also its thickness—IC or IX.

SHANKS & BARRETT—PRACTICAL TINNERS.

RICHMOND, VA., October 12th, 1886.

Messrs. MERCHANT & Co., Philadelphia, Pa.

Gentlemen:—In reply to your letter in reference to stamping Roofing Plates would say that we recognize it as the only way by which we can secure honest competition, and, therefore, we are certainly in favor of stamping all sheets.

We would say of your Camaret brand that we have been unable to find its equal in the roofing line.

Hoping you will succeed in your good work for honesty, we remain

Yours very truly,

[Signed] SHANKS & BARRETT.

WARLICK & WINGATE—ARCHITECTURAL SHEET METAL WORKERS.

ATLANTA, GA., October 9th, 1886.

Messrs. MERCHANT & Co., Philadelphia, Pa.

Gentlemen:—Your letter in regard to Guaranteed Tin Plates at hand. In reply will say we heartily agree with you that the system of stamping each sheet is productive of fairer competition, and a thing no reliable firm need fear.

It should be a pleasure to any honest man to be able to prove to his customers that everything he does is according to plans and specifications.

STAMPED SHEETS enable him to do this in the roofing business. You have done a good work. Keep on.

Yours truly,

[Signed] WARLICK & WINGATE.

MERCHANT & CO.,

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 49. PHILADELPHIA, MONDAY, DECEMBER 13, 1886. PRICE 15 CENTS

Items of News.

—Charles C. Phillips' personal estate has been appraised at $42,497.

—Dr. Charles N. Holbrook's estate is estimated between $150,000 and $250,000.

—A crystal palace, 200 feet by 260 feet, is to be built in San Francisco at a cost of $82,000.

—Professor Baird of Washington asks Congress to appropriate $250,000 for a new building.

—The *Ledger* has been doing good work in the crusade of the people against the lease of the Gas Works.

—The personal estates of John S. Haines and Edwin D. Woodruff are appraised at $14,056.39 and $51,428.12.

—Building permits all over the country foot up remarkably well, considering the lateness of the season.

—The Penn Electric Co. will lay underground conduits from Second to Eighth street on South street.

—The city will be divided into seven highway districts for 1887. This division will greatly simplify the work.

—The people of Phœnixville are interested in the establishing of a silk works at that place, which is to cost $15,000.

—Upper New York is to be supplied with several miles of new and well paved streets between 160th street and northward.

—The Pottstown Rolling mill is to be enlarged by the addition of a mill 32x54 feet. The development of the iron trade is making this extension necessary.

—The retrenchment policy resolved upon by the Reading Company is likely to stir up the locomotive engineers and the Knights of Labor.

—A new marble terrace is to be built around the south and west sides of the capitol at Washington, replacing the green earth works previously there.

—The cost of the Beacon street Church in Kensington was $80,000, of which $60,000 has been raised. Wm. Cramp & Sons gave $1,000 to it and Mr. J. H. Converse of the Baldwin Locomotive Works gave $1,000.

—The *American Architect* is receiving circulars giving lists of twenty books an architect can least afford to do without. The list will be a very interesting one when completed, and will no doubt show a wide difference of opinion upon the part of architects.

—The Coroner who investigated the case of Jacob Dicks who died from injuries received by the fall of a floor of the building at the S. W. corner of 4th and Chestnut streets, censured the contractor for carelessness. The cause of the accident was the giving away of a false girder, the location of which was not known.

—The Traction people spent some days in Washington in the interests of a Traction railroad company which proposes to operate in Washington City. The effort was made to get the bill before the last Congress but failed. The chances are against the enterprise, although the promoters of it know no such word as fail.

—The Public Improvement Association of the Twenty-fifth Ward is looking after the city improvements in that section of the city. The Bridesburg Improvement Association is co-operating with the Twenty-fifth Ward Association in order to bring about certain desired improvements in that section of the city.

—Controller Dechert on last Tuesday held a hearing concerning the paving of a portion of Front street below Christain with Belgian blocks by D & P. McNichol. Messrs. Hyle Bros., sugar refiners, claim that the blocks were too far apart. The existence of a culvert it was contented prevented better work, and it was explained by Mr. MacDonald that the work is to be gone over in the Spring.

—The Standard Oil Company has been called an octopus. It is entitled to the distinguished appellation. Every letter of the work means millions. Its last operations are in Lexington, Kentucky, where it has tossed an odd penny from its treasury in the shape of a half million dollars for the purchase of the Kentucky Union Railway, which penetrates the richest coal, iron and lumber fields of Eastern Kentucky. The purchase includes nearly a half million acres of land.

—The Board of Fire Commissioners met on Wednesday of last week at Race and Juniper streets, and awarded the following contracts: Henry Warden, two boilers, $671.94; the La France Company, rebuilding extra engines for Companies Nos. 1 and 20, $4000; the same company, one Hayes truck, $3000. The La France Company offered to build a new engine for $3100, and was the lowest bidder, but the Commissioners had only $2500 at their disposal for that purpose, and the bids were referred to the Committee on Supplies and Repairs, with power to act.

—*Journal of Progress* says that it has been suggested that in order to insure greater strength and consequently more safety in ropes used for scaffolding purposes—particularly in localities where the atmosphere is destructive of hemp fibre—such ropes should be dipped, when dry, into a bath containing twenty grains of sulphate of copper per litre of water, and kept in soak in this solution some four days. The ropes will thus have absorbed a certain quantity of sulphate of copper, which will preserve them for some time both from the attacks of animal parasites and from rot.

—The effect of a heavy weight resting upon the side of timber is very much greater and more injurious than when the weight rests upon the metal cap interposed between the floor timber and the head of the post. This bad effect more than offsets the slight additional weight which may be placed upon the floor constructed. In any mill of several stories, the shrinkage of the actual floor timbers is a matter of consideration with reference to the alignment of shafting, but where the opportunity for shrinkage is doubled by resting a fourteen or sixteen inch timber upon a girder of the same kind, the difficulty in keeping shafting well adjusted is doubled.

—Examinations made on the strength of columns, on the testing-machine at Watertown Arsenal, showed that the resistance of Southern pine columns to compression averages about 4450 lbs. to the square inch; while the transverse resistance of Southern pine to crushing was about 1750 lbs. to the square inch, or about 60 per cent. Therefore, a wooden column directly supporting wooden beams should have an iron cap at least two-and-a-half times the area of the cross section of the column, in order that the longitudinal resistance of the column and the lateral resistance of the beams should be required to resist intensity of pressure proportional to their strength in both instances.

—The new seven districts are: First, all streets South of South street between the Delaware and Schuylkill rivers; Second, between South and Vine streets and between the two rivers; Third, between Vine and Poplar between the two rivers; Fourth, between Poplar street and Lehigh avenue, from Broad street to Delaware avenue, including the Eastern portion of the Twenty-eighth Ward; Fifth, the Twenty-third and Twenty-fifth Wards; Sixth, the Twenty-first, Twenty-second, Twenty-ninth Wards, and the Twenty-eight Ward West of Broad street; Seventh, the Twenty-fourth and Twenty-seventh Wards, or all territory West of the Schuylkill River.

—The Pennsylvania Warehousing and Safe Deposit Company will erect an extensive warehouse on their property recently purchased from S. and J. Welsh, on South Delaware avenue, including Pier 34. It will have a frontage of 169 feet and a depth of 200 feet. It will be six stories high. This, in addition to their large warehouse at Front and Lombard sts., will furnish them with all the facilities they need at present. The Pennsylvania Co. will construct sidings into the projected warehouse. It is intended to greatly improve the freight facilities along South Delaware avenue. This company has also entered into a general banking business, and besides, will establish storage yards, particularly for iron, and they will advance money on merchandise held.

THE PHILADELPHIA

REAL ESTATE RECORD

AND

BUILDERS' GUIDE.

VOL. I.—NO. 49. PHILADELPHIA, MONDAY, DECEMBER 13, 1886. PRICE 15 CENTS

THE PHILADELPHIA

REAL ESTATE RECORD,

AND

BUILDERS' GUIDE,

PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:

One Year, in advance, - - - - $5.00

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, DEC. 13, 1886.

WHAT an excellent thing it is for this city, that John Bardsley hasn't more eyes. If he can do so much harm "with an eye single in advancing the material interests of the city," there is no knowing what he might do with an eye double. The people ought to be very grateful.

THE managers of the new corporation for the distribution of light, heat and power, have not as yet perfected their preliminary work. Mr. S. B. Huey was seen by a REAL ESTATE RECORD reporter, and said that as soon as some matters of detail were completed, he would be at liberty to speak fully as to the specific plans of his company.

THE Evening *News* says:—"Philadelphia may be lamb-like, but she is not to be the prey of Wall Street Wolves:" The fact is the wolves at home possess such voracious appetites that by the time they get through there will not be much more than a few bones left. The *News* has kept very quiet over the gas lease, for decency's sake perhaps.

THE average unsophisticated man reasons, that if the Pennsylvania Company did not have to pay a million dollars a year to other companies to even up allotments of percentages, he might get lower and competative freight rates. The Directors of this Company at a late meeting, passed $274,000 over in one check for overs, and President Roberts said the advantages of such taxation were not quite as evident as sound business principles demanded, they should be, still the "combine" as the New York "boodlers" call it, must be kept up, and the poor public must pay the piper.

anufacturing interests of the country s apprehension this winter than during previous sessions of Congress on the tariff question. The country has spoken in a decided voice and it is probable that Congress will be less anxious to upset the verdict of the people. A feint will be made to introduce a bill for the purpose of reducing duties but it is not likely the bill will get much farther than an introduction. The Free Traders in Congress will feel that by raising this rod over the head of Protectionists they have done their duty and proven their bravery. They will be very careful not to bring it down on the heads of any one, because they have already felt the stripes on their own backs from their constituents.

Now that Mr. William M. Singerly has been made a Park Commissioner, the people, knowing, as they do, the tireless energy of the man, and his warm and unselfish interest in their enjoyment and welfare, will feel assured that much will be done that ought to be done and very little left undone, that will enhance the beauty of the Park, and add to the comfort of its many visitors. No man knows better than Mr. Singerly just what is needed; and it will be very strange if some cheap and comfortable mode of travel is not soon adopted, in order that the people may be enabled to visit remote sections of the Park, and enjoy its many attractions from which they are at present precluded by distance, and the want of cheap and proper transportation.

THERE is a good deal of cheap buncomb going the rounds among newspapers and politicians about the tax-burthened people of this country, but practical methods and consistent legislation, tending to relief, are extremely scarce. If President Cleveland had included in his message to Congress a recommendation that one cent letter postage, and an abrogation at least of the revenue laws be adopted at once he would have suggested a more practical method of relief than any idea expressed in his whole message. Horace Greeley's method of resuming specie payment was to resume, and as the people need relief from onerous taxation, the best way is to relieve them.

JOHN WANAMAKER has a right to feel indignant at the remarks of Mr. John Bardsley, made before Councils, upon Mr. Wanamaker's proposal to lease the gas works. Mr. Wanamaker is entitled to respect, and his proposition is entitled to the same consideration that has been given the Dolan, Barker Syndicate. Mr. Bardsley's motives may be perfectly honest, but he is certainly entirely too earnest in the interest of the syndicate, and the question has been frequently asked whether Mr. Bardsley, as Chairman of Council's Finance Committee, has really forgotten his official duty, and instead of manfully standing as a barrier against this piece of voluptuous piracy allowed himself to be seduced by the honeyed words and magnificent figures of the syndicate. There is one thing as certain as death itself, and will surely follow as a sequence of this gas lease business, certain gentlemen, who have hitherto commanded the respect and esteem of the people of this city, will, from the distinguished prominence they have assumed in the interests of this gas works grab, be consigned to well-merited oblivion and eternal insignificance.

WM. WILKINS CARR, has just published an interesting pamphlet concerning the city's future water supply. His pamphlet should be widely read because of its instructiveness. One paragraph states in reference to the Schuylkill Supply:

"The statutes against pollution and the stipulations in the contract with the Schuylkill Navigation Company as to its lessees of water power at Flat Rock are explicit, yet because their enforcement would affect injuriously large manufacturing interests they have become dead laws. Increased penalties and enlarged scope in the legislation are needed, but will never be secured by reason of the opposition of the manufacturers of the Schuylkill Valley. No adequate legal protection exists, because preliminary action of Councils is necessary to authorize suits being brought in the name of the city; and even if such authority were obtained, legal protection depends upon conclusive proof of such injurious pollution as would warrant a decree damaging manufacturing interests and would involve great expense and the unavoidable delay of earnestly contested lawsuits. So long as the city itself by reason of the drainage of its sewers, streets and property continues the chief offender against the law it is idle to expect private property owners to give it voluntary obedience."

One hundred years ago Benj. Franklin stated that the Schuylkill Valley was the natural drainage of a large territory of enormous mineral wealth yet undeveloped, and that no possible protection could be devised against the pollutions that must naturally come from that region into the Schuylkill river, but then Ogden thinks otherwise. Poor old Franklin did not know that there would be an Ogden in 1886. Great is Ogden, small is Franklin, smaller still is great Ludlow if anywhere. Put up a monument for Ogden.

The Real Estate Exchange.

The Real Estate Exchange has now fully completed its organization, George W. Hancock has been elected President, Lewis H. Redner and Samuel T. Fox, Vice Presidents, James L. Stevenson, Secretary and Richard M. Hartley, Treasurer. A suitable building will be secured at an early day, and no effort will be spared to make the organization what its name implies in every particular. The New York and Baltimore Exchanges have been visited by a committee of gentlemen, representing the Board of Directors, and much valuable information has been obtained. The committee in its report has expressed a decided preference for the style and manner of the Baltimore organization, deeming it more in keeping with the peculiarities of the real estate business of this city, than is the New York concern.

An effort is to be made to interest real estate men and builders in this organization, with the view of promoting united and harmonious action, and for the purpose of establishing just and equitable business principles. There is certainly a grand field of usefulness, and thorough and efficient work now open for this organization, much good can be done in shaping and controlling legislation, and no better opportunity can possibly be presented for the Exchange to make its influence felt than the present iniquitious gas works steal. For surely an interest involving a cool billion of dollars as does the real estate investments in this city alone, ought to make itself felt through its exchange in combatting, even through an interminable legal fight, if necessary, a transaction involving millions of dollars worth of the peoples property, and which through the sublime impudence of the people's? representatives is intended to enrich local political ringsters and their friends. What a grand chance The Real Estate Exchange has to make itself felt, honored and respected.

THE Commonwealth *versus* the Railroad Trunk Line Pool and Coal Combination.

Attorney-General Cassidy has filed bills in equity against the Trunk and Coal Combination, and has made the following railroad companies defendant's in the Trunk Line case :

The Grand Trunk Railway Company of Canada, the New York and Hudson River, the West Shore, the Delaware, Lackawanna and Western, the New York, Lake Erie and Western, the Pennsylvania, the Baltimore and Ohio, the Lehigh Valley, the Philadelphia and Reading, and George DeB. Klem, Stephen A. Caldwell and Austin Corbin, receivers thereof; the Allegheny Valley — John Scott and William H. Barns, receivers thereof; the Buffalo, New York and Philadelphia—S. Clinton Gardner, receiver thereof; the Cincinnatti, Washington and Baltimore, the Pennsylvania and Ohio, the Philadelphia, Wilmington and Baltimore, the Pittsburg, Cincinnatti and St. Louis, the Lake Shore and Michigan Central, the New York, Chicago and St. Louis, the Pittsburg, Fort Wayne and Chicago, and the Pittsburg and Lake Erie.

The Attorney-General asks that the above defendants make full discovery of all contracts and agreements and questions, and that they be prohibited from continuing the combination, the same being contrary to law.

In the coal pool case the Attorney-General asks the court to grant an injunction restraining the defendants from carrying out the coal pool agreement of December 31st, 1884, or any similar agreement and from uniting and confederating together to restrict the production of coal or the amount thereof to be marketed, or the time during which coal mines or any of them may be worked, or for regulating the prices to be charged, collected or paid for coal, and especially from discriminating in their prices against parties in this Commonwealth or in any part thereof, and such other further or different relief as may become necessary or proper in the premises. The following railroad and mining companies are made defendants:

The Philadelphia and Reading Railroad Company, the Philadelphia and Reading Coal and Iron Company, Stephen A. Caldwell, George DeB. Keim and Austin Corbin, receivers of said companies; the Lehigh Valley Railroad Company, the Delaware, Lackawanna and Western Railroad Company, the Delaware and Hudson Canal Company, the Pennsylvania Railroad Company, the Pennsylvania Coal Company, the New York, Lake Erie and Western Railroad Company, the Lehigh Coal and Navigation Company, the Lehigh Valley Coal Company, the Susquehanna Coal Company, Mineral Railroad and Mining Company, the Summit Branch Railroad Company and Lykens Valley Coal Company.

THE singular apathy and indifference of the citizens of this city in the face of an attempt to rob them of millions of property, and to deprive them of an investment which, if properly managed, could be made to earn a sum yearly equal to one-third of the entire expenses of the city, cannot be accounted for in any other way than extreme loyalty to party and party interest. This solution of this very problematical and enigmatical condition of the public mind at the present time may not be in keeping with the ideas of those extreme partizans who believe the king can do no wrong but what other interpretation can be given. True, some little indignation has been expresssed in one way or another, yet there has not been that outburst of popular indignation which carries everything before it, and impresses the originators and advocates of this iniquity that this trifling with the people's interest must stop.

The leaders of the dominant party have presumed upon the loyalty and fealty of their followers often enough to feel secure in this their masterpiece of villainy. Public opinion is divided, and, in fact, so perfectly secure do they seem to be hedged in by the popularity of their party that they intend pushing the gas lease through anyhow, and the only wonder is that it has taken so long to get the job done.

This state of municipal mismanagement and arbitrary misrule must last until our citizens arrive at a proper understanding of their duty. It is an outgrowth of party arrogance, and is simply impossible where a high standard of worth and integrity on the part of candidates for office command the respect and support of the citizen over party fealty or regular nomination.

The success of either political party in a city desiring the best and most economical government must be made a minor consideration, or good government is impossible. No citizen, whether Democrat or Republican, who takes an average interest in the city's affairs can, at the present time, feel other than humility and disgrace at the present condition of our municipal government.

There is no use mincing matters. Facts must be looked squarely in the face. Responsibility rests with the voters, and so long as ringsters and party hacks receive the support and votes of citizens simply because their nominations were regular, just so long will the present state of affairs exist, and millions of the people's property and wealth be dissipated.

Now that our own Real Estate Exchange is just making its bow to the public it may not be amiss to make a note or two of what our New York cousin is doing. During the past year thirty-seven stock members and fifty annual members have been admitted. Property amounting to $45,000,000 has been sold at auction. The revenue derived from annual members was $2 830, and from the auction room $13,838. The rents amounted to $25,795. The basement of the building having rented for $15 additional. The taxes amount to $8,611. The Bureau of Information is a very important feature of the Exchange. Information has been asked for during the three months ending November 30th on 7000 pieces of property as against 1280 similar applications during the corresponding three months of last year. The Exchange has also its own post office. The brokers' meetings have been found to be very advantageous. Several amendments to the charter will be made at the coming session of the Legislature. The contemplated changes involve an increase in the number of directors to twenty-one. The division of the capital stock will be made into 500 shares of one thousand dollars each. Certain modifications will be made in the declaration of powers as to the election, suspension or expulsion of members, and an endowment fund is also contemplated ; and a Committee on Arbitration will also be appointed. Circulars setting forth these contemplated modifications have been sent to the membership.

The Legislative Committee has done a great deal of valuable work. The Land Transfer Reform Bills will likely pass this Winter's Legislature It passed the Senate last Winter but failed in Assembly.

WITH the aid of rapid transit facilities and excellent water facilities New York is in the infancy of its development. The attention of builders and speculators is being drawn to the region beyond the Harlem. No doubt that vast section will shortly be thickly populated. One reason of this is that a road known as the Suburban road will shortly be constructed, or rather completed. This ought to be a hint to Philadelphia. They can do what New York is doing they cannot do this without doing ju New York has done. The wond

ing activity that has been going on all over the upper end of the island during the past one or two years would not have been possible but for the fact that persons could get there in a few minutes. The improvements in the real estate of Manhattan Island would pay the cost of the elevated railroad system over and over again. What the elevated system has done for New York can be done for Philadelphia. Farseeing New Yorkers recognize the fact that that section of country beyond the Harlem will become as important a part of New York City as that section above Fortieth street was fifteen years ago. West Philadelphia twenty years ago was the country; now it is a part of the city. Population has extended about as far as our mule system will allow. We must now either consent to be tied in the meshes of our own shortsightedness or move ahead through the adoption of the methods which our metropolitan cousin has adopted with so much profit, and which is within our reach.

THE New York Real Estate Exchange has had its attention called to the existence of abuses which have grown up in the selling of real estate at auction. The RECORD AND GUIDE recommends that the bill be drawn putting the legal sales on a more satisfactory basis than they are at present.

AN experimental test of the new fire-brick pavement is to be made by laying down a square or more. The REAL ESTATE RECORD would suggest that the experiment be tried on Market street, between the Delaware river and the Farmers' Market, but it is more than probable that Oxford street, or some other isolated spot, where there is scarcely any travel will be chosen.

Governmental Extravagance.

The annual report of Navy Secretary Whitney discloses some singular facts as coming from investigations made by the Inventory Board. Over $20,000,000 are lying idle, represented by an unnecessary accumulation of store and supplies, between three and four millions of this amount being obsolete and of no use, and requiring the expense of keepers and constant care to prevent decay. At the eight navy yards, there have accumulated 46,566 augurs and bits, of which 25,274 have been lying for several years at closed yards; 29,542 gross of screws are on hand, 10,896 gross lying at closed yards. There are 146,385 files in stock, 42,142 lying at closed yards. There are 11,813 paint brushes in stock, 2,246 of them lying at closed yards. All of these tools are not only serviceable, but are mostly new. There are over 12,000 tons of cast and wrought iron lying in scrap about the yards; 759,000 pounds of composition and brass; 159,000 pounds of old copper, and 193,000 pounds of old lead. Capt. Mead, President of the Inventory Board, in his report said: "In going through one of the yards where the construction department was short of cut nails, the store-house in charge of Steam Engineering was found filled from floor to ceiling with barrels of the needed nails. I asked the officer in charge, how long at his present rate of expenditure it would take to use up those nails that construction and repair so badly needed; 'Well sir, he replied, about fifty years.'"

THE New York correspondent of the Philadelphia *Record* says: The coming season promises to be the busiest one in the building line that was ever known. Plans are placed on record every week, for more than $1,000,000 worth of new buildings, in addition to alterations and improvements.

THE Real Estate Exchange through its attorney, has filed exceptions to the American Warehouse Company, changing its name to the Real Estate Exchange Company, of Philadelphia. It is claimed by the Real Estate Exchange people that the new company intends to interfere with the business of the exchange.

MR. P. PRUNER, a chemist, residing at 1223 Filbert street, in a protest which he makes against the Gas Works lease says: "The proposed processes to lessen the expense (of manufacturing gas), will produce sickness, as it creates oxide of carbon, the most treacherous air known, being not noticeable by smell but very deleterious and poisoning." Mr. Pruner says that this air would be even worse than permanent cholera.

THE real value of property on Chestnut street baffles even the best judgment of our most experienced real estate men. The recent sale of the old Post-Office property for $413,000 to Mr. A. J. Drexel shows an increased value of nearly fifty per cent. in a single year. At the first sale the fixed valuation of $300,000 made by the Government was considered by many real estate men entirely too high; at all events, $276,000 was the highest figure offered, and as a consequence the property was withdrawn. It is doubtful if the property could be bought today from Mr. Drexel for less than $500,000.

A Hospital for Animals.

A building costing $30,000, is to be erected for a hospital for sick and injured animals, its construction will be under the supervision of Mr. Robert Waln Ryerss, President of the Society for the Prevention of Cruelty to Animals, the hospital will be endowed with a fund amounting to $40,000. The erection and endowment of the hospital is in accordance with the will of Mrs. Ann Ryerss, who also by a codicil to her will, made the bequests conditional to the business prosperity of her son, Mr. Robert Waln Ryerss. Mr. Ryerss has generously withdrawn the codicil, and the building will be erected.

The Public Building.

$166,000 is the amount which the Public Building Commissioners have agreed to expend in erecting two granite staircases in the north-eastern and north-western corners of the Public Building. They are to be similar to those already erected in the southern corners of the building. There is a disposition on the part of the Commissioners to defer all work upon the tower after the marble is in place, and to spend all of the appropriations in completing the main building. As a consequence, this proposition, if carried out, will settle the clock question for several years at least.

Labor Matters.

—As it will cost only $15 to come from Liverpool to New York we may expect quite an influx of foreigners next year to profit by the opportunities afforded in this country for laboring.

—The building trades councils met Thursday evening and received encouraging reports from the various trades unions represented. The German carpenters met on Thursday evening and resolved to form a union to be composed of Germans only The political committee of the united German trades held a meeting on the same evening.

—The green glass blowers at Woodbury, N. J. have gone to work at a reduction of 5 per cent from last year's wages. The textile workers' union met and resolved to advise their membership to join united labor clubs. The co-operative board of the Knights of Labor is in session in this city to devise how to invest $40,000 intrusted to it by the Knights of Labor in a co-operative way.

—The old William Penn farm near Tullytown, overlooking the Delaware river about five miles above Bristol was sold December 8th on a foreclosure of mortgage. The farm is an historical one. Part of the old foundation wall of the house which was built in 1700 is still intact and a well sunk by Penn gives a good supply of water. The farm comprised 136 acres, and brought about $75 per acre.

Councils Doings.

Select Councils held a meeting on Thursday last, and transacted a great deal of business.

The bills made appropriations to the Departments of Port Wardens, Boiler Inspectors, Sinking Fund, Ice Boats, Prothonotary, City Treasurer, Coroner, District Attorney, Law, Sheriff, Recorder of Deeds, Clerk of the Quarter Sessions, Register of Wills, County Controller, Receiver of Taxes, Board of Revision of Taxes, County Commissioners and County Prison.

The following Common Council bills were also passed finally: To place on the city plan Cottman, Oxford, Spring, Wissinoming, Middleton, James, Edon, Keystone, Tulip, Edmund and Bleigh streets, in the Twenty-third Ward, and Orkney street, in the Twenty-fifth Ward; to permit James C. Biddle Cope to lay a pipe across Commerce street, east of Seventh; to permit Joseph Rieger to lay a two-inch galvanized iron pipe across Cadwalader street, between Columbia and Montgomery avenues; to grade Hicks, Mole and Morris streets, in the Twenty-sixth Ward, and to grade Tasker, from Broad to Sixteenth.

The Joint Committee on Estimates and Property of the Board of Education submitted its report to Select Councils, suggesting in expenditure of $1,212,600. To this the Committee on Finances has appropriated $1,935,765.35. The following is a list of the purchases recommended: First Section—Purchase of lot Eighth and Wolfe streets, $7,000; erection of a twelve-division schoolhouse, $36,000; Third Section—Purchase of properties of the West Side Fletcher Schoolhouse on Christian street, $7,000; Fourth Section—Purchase of lots adjoining the Ringgold School and for new building for the relief of the Ronaldson School, $60,000; Fifth Section—For purchase of properties near Wharton School, Third street, near Wharton, $12,000, and for properties adjoining Horace Binney School, $12,000; Sixth Section—For enlargement of schoolhouse, Crown street, above Race, $30,000; Seventh Section—For purchase of property adjoining schoolhouse at Nineteenth and Addison treets, $7,000; Tenth Section—For purchase of property, Race street, near Fifteenth, $21,000, and

at Nineteenth and Cherry streets, $16,000; Thirteenth Section—For addition to Wyoming schoolhouse, Sixth street and Fairmount avenue, $12,000; Fourteenth Section—For purchase of properties at Twelfth and Weston streets, also Twelfth and Ogden streets, $16,000; Seventeenth Section—For additional appropriation to that from gas loan, $45,000, where $75,000 is required, less the amount of $30,000 already appropriated, which will relieve the Harrison Building and give another eighteen-division building; Eeighteenth Section—The sum of $75,000 is asked to purchase ground and erect a twenty-one-division schoolhouse upon the site of the present Morris Schoolhouse, though the sum of $35,000—the appropriation is deducted, leaving the amount asked for as $40,000; Nineteenth Section—To add a story to schoolhouse at Fourth and Dauphin streets, now under contract, $14,000; for purchase of lot, Second street and Columbia avenue and erection of a building, $50,000; and for the same purposes at Seventh street and Cumberland avenue, $50,000; Twentieth Section—For additional appropriation for lot and erection of schoolhouse near Thirteenth and Thompson streets, $70,000, less present appropriation of $25,000, leaving the amount of $45,000 to be given; Twenty-first Section—To close contract for schoolhouse, Ridge avenue, near the Wissahickon Station, $1100; for additions to same to make it a twelve-division building, $20,000; Twenty-second Section—For six-division schoolhouse, at Franklinville, $20,000; also $10,000 for schoolhouse at Rowlandville; Twenty-third Section—For purchase of lot and erection of schoolhouse, Paul and Unity streets, $57,000, and for addition to the schoolhouse at Tacony, $14,000; Twenty-fourth Section—For the purchase of lots at Fiftieth and Parrish, Thirty-ninth and Parrish, and Forty-second and Girard avenue, estimated cost, $30,000, and for the erection of three twelve-division buildings on those lots, $106,000; Twenty-fifth Section—For erection of a fifteen-division building at Bridesburg, $45,000; purchase of lot and erection of a building near Halliwell schoolhouse, $45,000; for improvement of McClellan schoolhouse, No. 1, $10,000; Twenty-Sixth Section—For additions to schoolhouse of eighteen divisions at Sixteenth and Moore streets, $54,000; for additions to Landreth School and completion of the Alcorn School, $31,000; Twenty-seventh Section—For twelve-division schoolhouse, Thirty-sixth and Locust streets, $36,000; one house at Fifty-second and Baltimore avenue, $14,000; purchase lot and erection six-division schoolhouse at Sixty-second and Woodland avenue, $25,000; Twenty-eighth Section—For erecting a fifteen-division schoolhouse at Thirteenth and Somerset streets, $45,000; improvements, $2500, and purchase of lot and building, Twentieth and Tioga streets, $15,000; Twenty-ninth Section—For purchase of lot and erection of a building West of Thirtieth and Girard avenue, $50,000; Thirtieth Section—For purchase of a lot and improvement at Thirtieth and Catharine streets, $6,000; also of property in rear of Pierce School, $6000; Thirty-first Section—For purchase of lots and erection of houses between Norris and Otis and Front and Amber streets, $45,000, and in vicinity of Cumberland and Belgrade streets, $45,000.

Another hearing will take place on Thursday of this week in reference to the five cent fare case. Mr. N. DuBois Miller, the examiner, listened to Mr. Wm. Wharton, Jr., last Thursday, who testified concerning certain agreements. Nothing of very special interest has thus far been developed but a great deal of work remains to be done.

—The Capital Stock of the Manor Real Estate and Trust Company is to be increased from $100,000 to $100,000,000.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ACKNOWLEDGMENT.

A notary imposed upon by a personation is liable only for clear negligence. It is a legal presumption that he acted on reasonable information, and his absence of memory as to what occurred does not destroy that presumption. The function of an acknowledgment is two-fold—to authorize the deed to be given in evidence, without further proof of its execution, and to entitle it to be recorded. An acknowledged deed is good between the parties, and subsequent purchasers with actual notice.

DELIVERY.

The delivery of a deed in escrow contrary to the condition is voidable; but it cannot be avoided against a *bona fide* purchaser.

GROUND RENT.

The purchaser without notice of a ground rent charged upon a lot upon which three houses had been erected, is not affected with notice of an apportionment thereof between the several owners of such houses, in which the former owner of the ground rent had acquiesced for more than twenty-one years.

HIGHWAYS.

Against the owner, dedication may be proved by his express declaration, whether by deed or parol, or by any act unequivocally evincing his intention to dedicate, as by his opening a way for the public use over his land, or it may be implied from his acquiescence in the use of his land for a public highway. Where acquiescence is the only evidence of dedication, it must ordinarily have continued for twenty years; though any shorter period will suffice, if such acquiescence cannot reasonably be accounted for except upon the supposition of an attempt to dedicate. This intention is the indispensable ingredient of the proof against the owner of the fee.

LANDLORD AND TENANT.

There is no covenant or promise implied on the part of the landlord that he will make repairs; unless the landlord bind himself by an express covenant to repair, he is not liable for any repairs whatever.

There is an implied covenant upon the part of the lessee, that he will make fair, ordinary and tenantable repairs so as to prevent waste and decay of the premises, but the lessee is not bound to make extraordinary or substantial and lasting repairs.

A lease made by a married woman without the consent and joining in the lease of her husband is void. It may however be made valid by the woman when becoming a widow, accepting rent under it from the tenant.

A lease by a married woman must be acknowledged by her separate and apart from her husband before a proper officer designated under the acknowledgment acts.

MORTGAGE.

Where land has been sold by the sheriff, a mortgagee whose mortgage apparently does not cover the land so sold, will not be permitted to show a mistake in the description, so as to give him a priority over a judgment creditor, whose judgment is subsequent to the date of the mortgage. A mortgagor's equity of redemption can only be extinguished by his own agreement by some act which operates as an estoppel or by a judicial sale.

Where land is conveyed "under and subject" to a mortgage a contract of indemnity is implied, if the mortgage constituted a part of the consideration.

MUNICIPAL ASSESSMENTS.

If the property owners nominate a contractor for paving a street they may subsequently revoke their nominations.

Where a contract for paving a sidewalk has been substantially performed and accepted by the municipal authorities a property owner cannot resist payment, on the ground of an immaterial variance in the width of the pavement.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

Trade Notes.

In cements and plasters. Stocks are fair. Receipts are increasing. Some two or three new makes are coming into the market.

The brickyard men are now quiet, except at three or four places. A steady demand will be kept up all winter. The stocks are low, and in consequence, prices are firm.

Work among the engine and boiler makers, and makers of shop and factory machinery is plenty. In some works in this city, there is business enough to engage the entire labor force employed for ninety days.

Nails are selling at $2.00 to $2.20 in eastern markets. In western, at $2.15 to $2.30. All or nearly all factories are on full. Builders are not buying more than is needed for current constructive requirements.

In planing mill products there is no dearth of supply. There is much complaint in the centre of the state of low prices in sash and door work. For all that, we learn that new mills are going up, and we know from reliable local sources, that much machinery will be put up this winter.

The building trade prospects generally are good. Labor will shortly make known its demands for the coming year. A conservative feeling exists. An eight hour day will not be asked for, unless the situation is changed. The workmen feel that the drop from ten to nine hours is as much as it is fair in reason to expect, until there is a more complete readjustment of the new relations.

The use of hardwood for interior construction has kept prices stiff all along, and manufacturers have at last taken the hint, and are now hurrying some inferior material into the market. The yard stocks are light. The receipts will not be heavy for a month one reason of this is, that wholesalers in primary markets, especially for white and yellow pine, have taken the notion that wood must advance, and that by holding on a while they will be $1.00 richer on all the lumber they can sell.

This week's reports from some of the lumber dealers seem to point to the probability of a greater demand for lumber than is usually experienced in the winter. Yellow pine receipts have been heavy, and every thing has gone into consumption, or at least into consumers hands. The receipts of white pine have gone far ahead of last year, but despite this fact, there is less in stock than we have had for years. The wholesalers, both here and at New York, feel that the only danger ahead of them is, that they have not stock enough to see them through.

—The Baltimore & Ohio Telegraph Co. has completed its connections with the Canadian Pacific Railways telegraphic lines, and it is expected that connections will be made from Vancouver to San Francisco within a month.

Charters Granted.

The Grassy Island Water Company, of Winton, Lackawanna county; capital, $5000. The Peerless Slate Company, of Pittsburg; capital, $3000. Oil City Tube Company, of Oil City; capital, $100,000. The Germania Brewing Company, of Philadelphia; capital, $500,000; the Treasurer is John F. Betz. The Independent National Gas Company, of Sewickley, Allegheny county; capital, $40,000. Notice is given that the capital of the Cameron Coal and Iron Company, of Philadelphia has been increased from $1,000,000 to $3,000,000.

THE decided preference given by persons looking for houses to live in, for those recently built is but natural; many of the old houses are really unfit for people to live in, owing to causes that could be easily remedied at small cost. Houses that are not supplied with an abundance of water, and that have not sewer connections, should be condemned by the Board of Health, as unfit for tenants until the proper water and sewer connections have been made. All privy-vaults should also be condemned by the Board of Health, and the owners should be compelled to have them cleaned and filled with sand or clay. There is no question but that these outside closets are the very worst propagators of disease. They are frequently used by different families, and typhoid and other low fevers are frequently contracted through them.

THE sales of real estate during the past six days include more than the usual share of all properties. Among these are several that will be turned from dwellings into business places, and quite a number of up-town houses and stores will be torn out for large stores. The demand along Columbia avenue is quite an important one and many property owners have had unsolicited offers of an attractive character. Some of them will be accepted and work of altering will begin after the holidays. Demand for store purposes is quite strong and the old timers are finding it possible and easy to sell out at a high price and retire. Even on Spring Garden street and Fairmount avenue, there is a demand for store and shop purposes which will, in a short time, change the appearance of those streets.

THE building situation in New York is very satisfactory. The total number of buildings projected during the first eleven months this year is put at 3,958 against 2,000 last year, costing $56,739,853. The total number projected in November was 254 at an estimated cost of $3,620,785.

The number of conveyances up to December 1st, were, 12,887 against 11,412 for same time last year. Mortgages, 11,303 against 10,432. The money represented in the conveyances amounts to $221,000,000 this year, and in mortgages, $130,000,000. November was a more active month than for two years. The estimated expenditures this year are $14,000,000 ahead of last year.

The total number of projected buildings in Kings county for eleven months is, 3,758 againts 3,661, for same time last year.

—In its annual summary of the iron-ore business the *Iron Trade Review* says that the sales for 1886 will reach the largest figures since the opening of the Lake Superior iron-ore industry thirty years ago. For the season ending December 1st, it estimates that 3,536,500 gross tons were sold, compared with 2,938,486 tons in 1885—an increase of 598,105 tons over last year. The amount of unsold ore at lower lake ports one year ago was estimated at 130,000 tons; this year the unsold surplus is less than 70,000 tons. The total receipts at Lake Erie ports for the season of 1886 were 2,166,554 tons, being 664,565 tons in excess of last year. The amount of ore on dock at Lake Erie ports on December 1st was 966,472 tons, or 62,468 tons less than at the same time last year. From all these facts the *Review* concludes that the docks will be cleaned up by the Spring, and that the output of the Lake Superior district, which this year reached nearly 350,000,000 tons, will next year very neary approximate 400,000,000 tons.

—The personal estate of Christian J. Hoffman is appraised, at $195,134.74; that of Jas. C. Horn, at $102,456; of Anna S. Bowen, $123,214.46.

—The Committee on the works of the Gas Trust, report that since the last re-arranging of lamp lighting sections, 1209 lamps had been erected and 235 gasoline lamps changed to gas lamps.

—A statement is made on the authority of the National Labor Bureau, that one-half of the members of the Knights of Labor received only $6 per week; one-fourth from $10 to $12; and the balance from $15 to $18.

—The Reading foreclosure suit is still being argued by the masters appointed by the court. A final hearing was to have taken place yesterday. These final hearings are something like the farewell tours of leading actors.

BUILDERS' ITEMS.

Building and Real Estate Notes.

THE Ebenezer Baptist Church paid $12,000 for 1336–34 Mt. Vernon street.

A PROPERTY S. E. cor. Tasker and Carlisle streets, 47x335½, sold for $17,950.

A NEW Methodist Church is to be erected at Malvern, Chester County, Pa.

THE Iron Workers Building Association, of Chester, has assets of $78,398.10.

THE Pottstown Iron Company will erect eighteen dwellings in that place.

THE property N. E. cor. Thirteenth and Green streets, 16x53½, sold for $11,000.

THE S. W. cor. Moyamensing avenue and Christian streets, 24x62, sold for $9,000.

A STOVE foundry to locate at Lansdale, will erect buildings at a cost of $15,000.

STEWART avenue, at Fernwood, has been still further opened and will be largely built upon.

NATHAN SNELLENBURG bought the S. W. cor. Fifth and Bainbridge streets, 16x96, for $10,000.

THE old Post Office building on Chestnut street, below Fifth, sold by auction for $413,000.

EDWARD KELLY, of Pottstown, has bought property in that place, which he will greatly improve.

REGULAR disinfecting furnaces will be found a necessary feature in all large cities in a short time.

T. K. MOYER, of Hilltown, Bucks County, has purchased a property there which he will improve.

ENOS GAYMAN, of Bedminster, Bucks County, has purchased a property which he will improve.

ANDREW TAYLOR, 417 Pine st., reports real estate exceedingly quiet. Transfers and sales very slow.

ON Saturday, M. S. Bellows sold his farm of 125 acres, in Gwynedd, to a Philadelphia party for $20,000.

JOSEPH F. NACE has purchased a number of lots at Blooming Glen, Bucks County, upon which he will build.

THE Old Valley Baptist Church, established 1711, have lately erected a new and handsome chapel at Berwin.

THE handsome residence of Charles Leedom, at Ridley Park, which was recently destroyed by fire is to be rebuilt.

PAOLI HEIGHTS IMPROVEMENT COMPANY has sold a house and one acre of land at Paoli to Law Greenfield for $3,000.

BUILDING literature is being enriched by the liberal contributions of architects and builders on both sides of the water.

THE sale of the old post office property on Chestnut street to A. J. Drexel, for $413,000, has not yet been confirmed by the government.

A BUILDING AND LOAN ASSOCIATION has been started at Wayne, which has for its purpose the further improvement of that place.

THE builders are already busy upon plans for the Winter. Alterations will be numerous both in New York City and all the towns and cities around it.

THE probable outcome of the meeting of the National Association of White Lead Manufacturers, recently held at Pittsburg, will be an advance of prices.

THE lots purchased by Mr. W. D. Bennage are on 16th street, and not on 6th street, as was erroneously reported in the last issue of the REAL ESTATE RECORD.

THE Pennsylvania Railroad Company has bought six acres of ground at Sixth and State streets, Camden, N. J. Machine and repair shops are to be erected.

THE Pennsylvania Railroad Company, has purchased six acres of land at Tenth Street Junction, Camden, N. J., upon which they propose to erect machine shops.

THE lot at the north-west corner of Thirteenth and Willow streets, has been bought by David Stewart, for $37,000. Mr. Stewart will erect a large cracker bakery.

JOSEPH W. HUNTER, ESQ., of Jenkintown, has sold the residence and about ten acres of land in Weldon, belonging to Howard Noble, to William Diller, of Philadelphia.

CLOSE & CHUBB, 450 Wharton st., have some choice lots for sale at the corner of Sixth and Worth, extending to Sylvester street, and others at Sixth and Moore.

ELDRIDGE CLAIRBORNE, of 1520 South Sixth street, reports rental list in a flourishing condition. Is making sales from time to time although not as busy as he might be.

E. MELCHAR CHUMARD, of Stroudsburgh, Pa., has invented a sash supporter which has a single-headed cam-detent pivoted at one end to the plate. It is said to be a good thing.

JOHN J. CARSON, real estate agent, at Norristown, has sold the house of Julia Martha, on Second street, Bridgeport, to Thomas B. Ridington, of West Conshohocken, for $2,000.

THE Morton *Chronicle* says: Willis P. Hazzard, of West Chester, who sometime ago purchased the Rhoads' farm, in Springfield, has laid out a portion of it into fine building lots.

F. M. AND H. BROOKE have sold a valuable piece of ground, south of the railroad station and west of Orange street, in Media, to J. E. and A. L. Pennock, builders. The lot is 100 by 200 feet, and the price was $3250.

GEORGE C. YERKES, Hatboro, has just sold some building lots in that borough, at the following prices: One 225x140 feet, for $1,200, to Charles C. McNair; one 50x146 feet, for $300, to William Cadwallader.

E. H. FLOOD will erect 80 houses of two and three stories, 16x52 feet, on Vaupet street, Dauphin, Susquehanna and Diamond streets, covering two squares. They will be fitted up with all the most modern conveniences.

IT is stated that George W. Childs, of the Philadelphia *Ledger*, has disposed of all his land at Wayne, with the exception of the lots belonging to him which have been built upon. The portion sold consists of some 400 acres.

COL. DICKINSON, of Philadelphia, who also owns the National Hotel at Duncannon, Perry County, has bought the Sulphur Springs, about three miles from Duncannon on the Newport road, and will fit it up as a summer resort.

THE West Jersey College of Physicians which bought the dwelling of Benjamin Stara, on Seventh St., Camden, will not erect a new building, but make such alteration in the present structure as to adapt it to the uses intended.

THE action of the American Institute of Architecture, in New York, in requesting the resignation of Mr. E. F. Baldwin, one of its members, and a prominent architect of Baltimore, has created considerable talk among men in this business.

WM. PENN EVANS has given the Methodists of Malvern a beautiful lot, on which they will erect a church soon. Mr. Evans is traveling for the benefit of his health. He spent the summer in Colorado, and will spend the winter in California.

W. S. WORRALL has commenced operations on a two-story and attic dwelling house, in the grove near the entrance to Idlewild, near Media. Its dimensions are 26 by 40 feet. The first story will be frame, making it a very pretty building.

GEO. WIEGAND, builder, has just completed 14 three-story dwellings, at Twentieth and Norris streets. Three of which he has sold within the last week, for $7000. He has also sold 5 nine-room houses on Thirty-eighth and Spring Garden streets, for $5000.

THE Gurney Hot Water Heater Company, of Boston, have introduced a hot water heater which possesses some novel and valuable features. The Company have placed twenty heaters in operation within a few weeks, and over seven hundred during the past two years.

THE property at the N. E. cor. of Broad and Arch streets, 60x110 feet, which is a part of the Gratz estate, has been purchased by the German-American Real Estate Title Insurance and Trust Company, of this city. The present buildings may be improved or new ones erected.

E. J. PAXSON made a sale recently at 1219 North Second street, of a property running through to Palethorpe street, improvements being a three-story store and dwelling on front and two small three-roomed dwellings in the rear. This was a cash sale $8,000, clear of incumbrance.

THE New York *Sun* calls attention to the fact that we have over 400 building associations, representing $50,000,000 capital managed by workingmen at little expense. The West has wisely copied our building association system, and is finding itself improving from year to year in consequence.

JOHN D. RAGGIO, the furniture man whose factory was recently burnt down, has bought two properties, one from Mr. Hunt, of the Knickerbocker Ice Co., and the other from Washington Butchers, and will erect a large mill and a number of dwellings for his employees. Mr. Green is the builder.

A GREAT many new devices for ventilation and heating are being introduced. Each successive patent or improved system has something in it worthy of mention. The A. A. Griffing Iron Company, of Jersey City, has introduced a radiator for hot water or steam use of an all-thread joint connection.

PARISIAN Architects are using a cheap concrete made of 8 parts sand, gravel and pebbles, 1 part of burnt and powdered common earth, 1 part of pulverized clinkers, and 1½ parts of unslacked hydraulic lime. This makes a hard and solid mass which can be still farther strengthened by one part of cement.

THE BETHLEHEM *Times* publishes the following real estate transactions there:—

Real Estate Agent James Graham has sold a lot on Second street, near Oak, the property of J. S. Hess & Bro., to James Hanly for $275. He has sold a lot on Clewell street, near the Bishopthorpe School, to J. Stewart Allam. These properties will be improved with dwellings.

THE earthquakes have started interesting discussions which bear upon building. If there is any way by which the effects of earthquakes can be avoided in building it is likely to come out. So far the discussions have not produced any very practical results. Every one knows that they occur, but the methods for avoiding the disastrous consequences are not forthcoming.

GEORGE LEWIS has sold the Brick Hotel, near Brandywine Manor, to Wm. Fell, of Salisbury, Maryland, who took possession on Monday. Mr. Fell has already put a large force of men at work repairing, repainting and remodeling the building. In the spring he proposes to enlarge the house by covering it with a mansard roof, and fit up the building for summer boarders.

A FRANKFORD paper publishes this: It is stated that parties have purchased the Boswell ground, a large piece of ground situated at the terminus of Penn street, and bounded by Franklin, Leiper, Wakeling and Dyer streets, for the purpose of improving it. The ground will be surveyed and laid out in lots this Winter, and as soon as the season opens the whole will be built up in very nice houses.

D. L. LEEDS has just completed a fine residence at Eagle Station, on the Pennsylvania Railroad, for Mr. Newhall, in the Treasury Department of said Company. The lawn extending clear down to the Company's walk. Mr. Hughes is building a house right at the station which is for sale, and another about a square away in which he intends to live. This is a very handsome residence. They are building new residences at almost every station along the line, and the varied improvements are something wonderful.

A SELLERSVILLE, (Bucks County) Item says:— "A. M. Hilton, who has an extensive woolen factory in Philadelphia, has completed arrangements for the erection of a large building adjoining the chair factory, and will begin work at once. As soon as the building is completed he will carry on his business here instead of at Philadelphia. The reason assigned for the change is the excessive expense of conducting the business in the city. Our town extends a hearty welcome to all such as are in search of a site for the erection of factories, etc."

THOMAS H. PARKS, 1947 Norris street, is one of our uptown enterprising real estate men, and is reporting business very flourishing, so much so that he has found it necessary to seek a city office, which he hopes to be located in by January 1st of 1887. Within the last twenty days he has succeeded in making the sale of twelve seven-room houses, situated on Edgley and French streets, west of Sixteenth street, for $30,000. Also, Nos. 2017, 9, 21, 3, 5, 7, 33, 7 and 41 North Twentieth street, for $4500 each. Also, 2029 North Twentieth street, for $5100; and 2030 for $5200.

MR. BECKER, S. 4th st., states that there is quite an improvement in rents along South street for business purposes, rents having gone up from ten to fifteen per cent. There has been some few transfers at good figures. He has made more sales of small houses for investment this fall than ever, the reason for this is that the houses in the centre of the city are less liable to be vacant than those on the outskirts. There are quite a number of improvements contemplated on South street for spring. Several old frames will be torn down, new fronts put in and other general improvements.

THERE is a more hopeful feeling in real estate circles in all the large Eastern cities. The new houses that have been erected, have either been sold remarkably well or rented well. The artistic edifices wherever built have become very popular. In New York buildings for the accommodation of retail trade on the first floor, and tenants upstairs, have command very ready sales. The auctioneers have had an excellent year, and are, of course, highly pleased with results. All over the upper end of New York, property has sold rapidly and at good, though not extravagant, prices.

FREEL & SIMPSON, of 1900 Wharton street, sold last week, six dwellings on Chadwick street below Morris. They also sold twenty-five dwellings on the same street to Phil J. Walsh; also, on the same street, to Thomas P. Twibell, twelve houses. This firm have built 135 houses this season, and have only four corner stores and two small houses to sell. Out of between 200 or 300 houses on this firm's rental list they have no vacancies. They have just bought sixty-five lots in the southern section of the city and are going to commence digging out the cellars right away (if the weather permits) so as to be ready for Spring.

AN interesting discussion arose in the Twentieth Annual Convention of the American Institute of Architects, which met recently in New York on the question of an American style of architecture. The points made in the discussion were, that we must unite the quiet serenity shown in Greek architecture with the heaven-aspiring tendency of the Gothic, that the proportions must be as graceful as the French, vigorous as the English, refined as the Florentine and systematic as the German. Every detail must tell carnest thought and cold study. This is a high standard to lay down and opens an immense field to American originality.

MANUFACTURING interests have been encouraged by the past season of activity and an enormous amount of manufacturing capacity of one kind or another will be erected during the coming year. It is impossible to say much more than this as the manufacturers themselves have not made up their minds to what extent to add to their facilities. Nearly every manufacturer feels encouraged to do something. They remember, however, that during the last period of unusual activity they expanded too rapidly and this resulted in the depression which lasted between three and four years. Out of this has come a conservatism which we are now witnessing. They see the room for taking more business, but remember that it may be overdone.

A NUMBER of very large farms are located in Lower Merion, Montgomery county. The Moro Phillips place comprises 365 acres; that of James Mitchel Magee 300 acres, and John Y. Crawford's 206 acres. The largest, is that of Mrs. Naomi Morris, north of Bryn Mawr. Her lands comprise 594 acres, and of these not less than 100 acres are in one piece of woodland. Mrs. Morris is now ninety

years of age. She is in possession of her faculties to an unusual degree for one of her age. This Morris family are descendants of the celebrated Robert Morris, the financial head of the American cause in the days of the Revolution. These lands were purchased by him, and have been in the hands of his posterity ever since.

WOOD PULP is being used in Norway for the manufacture of all kinds of building ornaments. The pulp is first ground from wood, then pressed into ornaments of any kind, which look as well after being finished as any plaster of Paris. It would be a good thing to introduce the same into this country, and especially as the pulp can be made at a trifling cost. It would give a great impetus to the pulp interests. Tests have been made to show the strength of the articles made. For instance, a bar of this material one foot in length, one inch in thickness, and five inches in width, neither broke nor sustained any serious injury on being hurled with full force against a stone wall a couple of yards distant. The material is very light, and can be made into ceilings, friezes, etc. It resists moisture, and they can be nailed or secured to the wall or ceiling, or wherever wanted.

THE new club house of the Penna. Bicycle Club, on Girard avenue, east of 40th street, will be 40 feet front by 42 feet deep and about 45 feet high, divided into three stories, with a basement and sub-cellar. The basement will be used as a wheel room; on the first floor will be the reception and billiard rooms, together with a large hall and lavatory; on the second floor the meeting and committee rooms, and the third floor is designed for a gymnasium and dressing rooms. Of the materials to be used, the front will be of Pompeian brick and English red stone, with copper trimmings, and the roof of dark English tiles, will be pierced by two windows, one of tiles, the other a dormer, of brick surmounted by a copper pediment. The interior woodwork will consist largely of white pine, alternating with yellow pine in ceilings, stairs, etc., in natural finish. The architect is A. J. Boyden of 411 Walnut street, and the contractor James Bradley of West Phila. The contracts for heating and plumbing have not been awarded.

MARKET STREET, west of the Public Buildings is destined to feel the march of improvement. There are a great many old houses along that street which have no business there, and it is rather surprising that they have been permitted to disfigure that beautiful thoroughfare so long. Several purchases are now contemplated, and in fact, it is intimated that the terms have already been made involving the sale of twelve or more sites, including the old rookeries. That street will become a too important one for ordinary buildings, with the Pennsylvania Station at one end of it, and the Baltimore and Ohio Station practically at the river end of it, there will be an inducement to storekeepers and business men to locate somewhere on it. The details of the transactions which have taken place, cannot be had at present for reasons which real estate operators will appreciate. Several new stores will be erected early next year; some of them of large proportions. It would be no guesswork to say that investments on that street are safe. It is also said by real estate authority that investors are looking to some of the cross streets, between Fifteenth and Twenty-third, and that the spirit of improvement will break out there on some of them next year.

THE brick-making season, which has been an unusually heavy one, has just closed with a very satisfactory showing. The yards have all shut down excepting those of the Purington-Kimbell company and the Pullman company, which will be kept running until the severity of the weather stops brick-making under cover. The crop has been the largest ever produced, having exceeded that of last year by fifty millions, making the total output of brick for 1886, in round numbers, 380,000,000. This includes only common brick made in and around the city and for the Chicago market. Of the crop manufactured there have been consumed in the walls of buildings 305,000,000, leaving on hand undelivered 75,000,000. This number will not be much more than sufficient to meet the demand until next May, when the new crop will come in. The present consumption on work in progress is 750,000 brick per day. The prices are the same as they have been for a month past, the rates being from $7.87½ to $8.15 per thousand.—*Chicago Ex.*

AMONG some recent patents taken out by builders is one for a window sash which consists of plates, having detachable front parts, horizontal socket, grooved castings, pivot, cross-piece and a cord having a weight attached thereto.

Another is a compact land anchor and lightning conductor for buildings. The anchor is composed of a cone-shaped base with attached cable and sectional body linked or hinged together at their top ends, fitting upon and adapted to be expanded at their bottom ends by said cone only.

Another is a door hanger which is composed of rollers, bracket formed with projections, standard formed with grooves, a plate from which said standards project, an adjusting screw carried by said plate and engaging with threaded socket formed in the roller, supporting bracket and a plate secured to the upper edge of the door and provided with bolts that enter slots formed in the plate.

Another is a roofing tile which consists of a flat surface having at one side an upright longitudinal flange, provided on its inner side and near its lower end with an offset, and at the other a convex curved part, which terminates in a downward projecting longitudinal edge.

A wall paper manufacturer has brought out a new kind of paper which consists of a printed design having a continuous surface of flock, of a single color, through which the design appears. The method of producing flock-surface paper consists in first printing the paper with a figure or design, then coating the entire surface with glue, and finally applying flock to the entire glue-coated surface.

A Connecticut inventor has invented a window hoist which consists of swing, tackle-frame, ledge-support, the upper support pivoted to the tackle frame and the clamp hooks for the upper part of the window.

Architect's Notes.

A GOOD deal of complaint is expressed among architects at the tired out and rusty appearance of a good deal of our bronze architecture. The reason is that the bronze is cast iron in disguise. The Japanese and Chinese do better bronze work than we do. They make a splendid black color out of 80 parts of copper, ten of lead, four of tin, and two of zinc and the rest of iron, nickel, silver, gold and arsenic.

Building Permits.

R. P. Mattson & Co., 841 Walnut st., 4-story store, 106 N. Sixth st., 14x39.

G. Kessler, 1332 Marshall st., 3-story house, Warnock st., below Oxford, 12x42.

C. Snyder, 1204 Vine st., alterations and repairs, 267 N. Eighth st.

Stewart Bros., 2154 N. Fifth st., rear alterations, 2205 N. Front st.

T. Hockley, 235 S. Twenty-first st., 2-story addition, 10x10.

J. E. and A. L. Pennock, 1901 Wood st., 8½-story banking house, Fourth and Chestnut sts., 47x76.

S. M. Button, 2522 N. Fifth, two new fronts, 2448 and 2452 Kensington ave.

G. B. Heath, Elmwood, 2-story house, Holstein above Eighty-eigth, 20x34.

T. Livingston, 721 S. Twentieth, underpin and new front, 751 S. Twentieth.

G. Plowman & Co., Seventeenth st. and Fairmount ave., alteration, Vine st. below Eighth.

T. H. Marshall, 813 Jayne st., front alteration, 1115 Market st.

T. C. Nesbit & Son, 425 Locust st., fifth story on 22, 24 and 26 N. Front st., below Arch, 22x67.

McFetridge & McConnell, 1608 Spruce st., front alterations, 1528 and 1604 Columbia ave.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M.L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

News Items.

—Firebrick pavement is to be tried in Wilmington, Delaware.

—The active membership of the Union League Club is 1250.

—The New State House at Springfield, Illinois, cost nearly $4,000,000.

—Gas is now sold to consumers in Wilmington, at $1.35 per thousand feet.

—The personal estate of Francis H. Woodruff is appraised at $129,544.64, and of Josiah Gilbert at $30,766.87.

—Twenty dollars per ton for No. 1, and $19 per ton for No. 2, are the prices named by the Thomas Iron Company for Pig Iron, for 1887.

—Judge Schuyler has decided in a case recently tried at Easton, Pa., that a power of attorney cannot be given on account of unearned wages.

—The values of the exports of domestic breadstuffs for the eleven months ended November 3, 1886, were $135,076,674, or $15,503,806 more than for the corresponding eleven months previous.

—Work on the new Lehigh Avenue Passenger Railway will be commenced in the spring. The company's charter forbids it charging more than five cents for each fare.

—Orphans' Court has adopted a rule that in all Real Estate Sales in that Court under partition proceedings the dower of a widow, where one exists, must remain upon the property sold. The purchaser buys subject to her dower, and must pay the interest to her until her death, after which it goes to the decedents heirs.

THE AMERICAN ARCHITECT

On the So-Called Bribery of Architects.

"'Tis true, 'tis pity; and pity 'tis, 'tis true."

Strange things happen so rapidly in this age of wonders, that the most astonishing fail to create more than passing notice unless from those directly interested. Magnificent rascality now and then staggers the public mind more from the glittering cheek and reckless daring of the operator, than from a moral horror at the heinousness of the rascality perpetrated, corruption in its worst forms seems to have entered so thoroughly into social and business life, that honor and integrity have largely become articles of merchandise. That every man has his price is proclaimed from every street corner, and the haste which some men make in their anxiety not to get left, seems to give at least a shading of truth to the assertion.

The lackey from the stable must be compensated by a merchant for no other reason than that his master buys the merchant's wares and woe be-tide the merchant who refuses.

The candidate for office with earnest promises, and soft and pleasing platitudes, obtains his election, and chuckles at the credulity of the fools who believed him.

The professions embracing as they do men of the higher type, men of mental strength and moral worth, men of high aspirations and family pride are not entirely free from the corrupting and debasing influences that beset them, for notwithstanding the fact that they as a class, fully appreciate the trust reposed in them, and that as a body, they would scorn an act, bearing even an attainment of suspicion, yet every once in a while a solitary brother falls by the roadside a victim to some fatal Moloch.

"'Tis true, 'tis pity; and pity 'tis, 'tis true," and can it be wondered at when men whom we expect to see hurling the thunder bolts of Jove from their pen's points in sharp cutting anathemas against corruption, using in their stead the softening influences of honied words, backed with the dignity and high character of their Journals to show that nothing was intended.

Read this from the columns of the *American Architect.*

"SO-CALLED BRIBERY OF ARCHITECTS.

"Several weeks ago we received from several architects in New York and Boston copies of a circular issued by a business firm which, although it was headed "confidential," did not appear to be one of those flagrant attempts at corruption which we are willing to expose, but rather an offer of a trade discount such as business houses may and do issue every day without departing in any particular from the strict path of mercantile morality. As we had done in other cases, we addressed a letter to the firm explaining the peculiar attitude of an architect as toward his client, and giving them an opportunity to withdraw the circular or explain their real meaning. They have chosen the latter course, and have sent us the following statement, which we trust will be as satisfactory to the architects who lodged their complaints in our hands—and whose nice sense of propriety we cannot too much applaud—as it is to ours:

"NEW YORK, Nov. 19, 1886.

TO THE EDITORS OF THE AMERICAN ARCHITECT:—

"*Dear Sirs,*—Your favor of the 15th to hand, and contents carefully noted.

"In regard to our 'confidential' circular issued to architects, would state we have issued quite a number of them to architects in New York and Brooklyn, not, however, with the slightest "evil intent," or with the idea of "corrupting" any one. The whole matter is simply this, the construction of our rail requires that they be made in sizes to fit each particular opening, therefore, it is almost impossible for hardware men to keep a supply of them on hand, and they simply order them from us when they have a positive order for some. And we know of a great many instances where our rail has been called for in specifications, and when a hardware-dealer or his agent figures on a job, he has, in many instances, tried to work off either the common floor-rail or some patent hanger that he has in stock, and very often does not hesitate to misrepresent our rail, and say it is no good, and even say he knew of cases where it was put in and had to be taken out because it did not work.

"We have worked very hard to try to get this rail introduced here, and it has cost us a great deal of money, and the results thus far in a pecuniary way are not gratifying, although in every instance the rail has, as far as we can learn, given entire satisfaction. In some cases, where we heard the rail did not work, we found it was caused, at times, by a wanton disregard of the directions given for laying same, or plaster was allowed to cover it up, and then the rail was blamed. In every case we looked into the matter and rectified the error of others and made everything all right. In offering a commission of ten per cent. to the architects on such a thing as this, it would show a very poor conception of their integrity, if it was offered as a bribe, but we knew that in many instances the hardware is ordered direct, and the architects wish to save as much for their client as they possibly can, and in offering this commission or discount, we wished to get on the track of places where our rail was to be used, so that when it went in we could follow it up and know that it *worked* satisfactorily. This is entirely separate and distinct from our trade discount, and we did it simply to find out where our rails were located, so that we can *know* they work properly.

"The writer knows, from personal experience with several architects, that they are on the war-path about this very circular, but when the matter has been explained to them in the manner in which I have just written, that they are satisfied with the explanation. We have too much at stake, and value our reputation too highly to attempt to bribe any one. If we were furnishing a material that was in the open market, and offered a commission that the contract was to be given to us, it might be assumed that we offered a bribe, and it might lay the party accepting same open to this belief, but it is not so.

"We simply wish to get a check on these persons who try and spoil the sale of our rails. We adopt this method after long consideration, and after referring with parties whom we believe are in a condition to know.

"We thank you for your kind consideration in this matter, and assuring you that we appreciate your kindness, remain,

Yours truly,

GEORGE T. TAYLOR,

General Agent."

The Architect then says:—"We believe that the Boston firm of gasfitters who issued a somewhat similar circular which, to our minds, merely offers a rebate that the architect can secure for his client, is a straightforward business proposition which does not contain the essential essence of bribery, and so do not hold them up to scorn as we have been asked to do."

Not only is the above communication a surprising one but also are the comments upon it. If newspapers can be found, who will excuse such doings, the architects will not. If those who sell material have no reputation at stake or no conscience to guide them, the architects of the country certainly have. The above letter is a jumble of excuses for doing something which no honorable firm has a moral right to do. Architects look for their pay to those who employ them, not to those whose material they purchase, and no amount of evasion or circumlocution can get around this plain point. Anyone

who offers a commission to an architect in a circular marked "confidential," is doing something which he may have a bare legal right to do, but certainly the right ends there. If the proposition was a square one, the circular containing it would not be, and should not be marked "confidential." If the rule of Geo. T. Taylor, General Agent, of whom we know nothing, was to be adopted as the rule in business generally, it would reduce business of this kind to a demoralizing competition between supply houses. It would result in saying that the man who could offer the biggest commission would get the business regardless of the requirements of merit. If there are any other goods in the market like the goods which Mr. Taylor furnishes, he has no need of their special inducements. If his goods are better than other people's he certainly has no occasion for confidential communications. Any one can see at a glance what a confidential communication of this character means. If it does not mean to induce the architect to take Mr. Taylor's goods in preference to some one's else then what does it mean? If it means this, the proposition is intended to do harm to some one else. It is intended to induce the architect to betray his principal, or else we do not understand the relations which exist, or which are supposed to exist between principals and architects. There might be an excuse in offering to a builder commissions on material purchased because the market is full of different brands, all of which may be said to possess practically the same merits. The relations between an architect and his principal are personal, professional, delicate, and should not be marred or threatened by hopes of profit. Again we fail to see how Mr. Taylor can put a check on the persons who try to spoil the sales of his rails by offering ten per cent. commission to the architect who will use them in preference to others. As well a druggist gives a physician ten per cent. commission upon the drugs his patients would buy, as for an architect to accept a ten per cent. commission upon the material he would recommend. To adopt this rule would be to introduce an element of doubt, and uncertainty in the relations of architects and their employers. The reasoning of the above correspondent may suit the editor of the *American Architect*, but it will not meet with the approval of the architects of the country, nor with the publishers of any other trade journal in architects, or honest builder's interests.

THE New York Real Estate market continues very active. One day's auction sales last week foot up over half a million dollars. One estate brought $170,000 for the plain land. A great many purchases are being made by private contract. Considerable land is bought along the Hudson now nothing more than farm land. One tract of eighty-two acres near Tarrytown, was bought for $18,500 to be turned into building sites next year. Lots are selling all over New York and Brooklyn, on which old tenements or old store-houses now stand. The interest of the purchasers is to tear down and rebuild fine store buildings, which will furnish from three to ten times the amount of floor space that they afford, and thus greatly increase the rent income. This is a feature of enterprise in New York which will develop itself to very large proportions next year. In the older sections of the city, there is a great deal of property that could be increased in its productiveness. Many builders have been going far up-town, putting up fine properties apparently neglecting excellent down-town sites which can be had at next to a song. The New York Real Estate Exchange has been giving attention to this feature, and quite a spirit of speculation has been developed. Philadelphia offers similar opportunities for judicious investment. Reference has been made to opportunities in the older section of Philadelphia, where properties can be had at a comparatively low figure. Improvements can be made which will be well. The elements of risk in purchases and ventures of this kind, is much less than is generally supposed. The old-fashioned dwelling house that has been transformed into a store no longer answers or at least ought not to answer. Those who have built large structures on Market street, Arch street, and some other streets, have been gratified at the returns on their ventures. The large structures on Filbert and Sansom streets are paying well. Their success has led to the discussion among a few capitalists of similar ventures. Property on these streets is considerably less than on Market, Arch and Walnut, and these streets are likely to be selected for large shops and warehousing purposes.

MR. C. J. HARRAH would make a good Bullitt Bill Mayor.

ONE of the officials of the Wilmington, Delaware, Gas Works says that the price of gas in Philadelphia ought not to be over one dollar per thousand feet.

WHILE murderers can be hired to waylay and kill people for the small pittance of $15, as was the case recently at Baltimore, we have no just reason to be surprised at vanishing bank cashiers, or gas works lease councilmen.

WE have seven or eight Barkeses who are "willin" to lease the Gas Works. All of them are anxious. Mr. Wanamaker's proposition really opened up the interest of the public in this fight, or whatever it is. The original syndicate is almost lost sight of. Still, it would not be safe to say they will not come out first best. A good deal of artillery practice is going on and we do not know how many more batteries are being hurried to the scene of the conflict. We were not aware we had so many millionaires amongst us or that we had a dry goods merchant or a newspaper publisher who could carry our Gas Works as an annex to his business. There is certainly no need of going away from home to find a customer. If it were necessary, there are plenty of them to be found. It is not likely that Councils will make a Christmas present of the Gas Works for twenty-five years to anybody. Canada is too cold and Cuba is too unhealthy.

THE New York Gas Companies are talking about reducing the price of gas to $1.25 per thousand feet. Our Professor Lowe says gas can be made at 9 cents per thousand feet.

IF it was put to a vote of the people of Philadelphia they would vote almost unanimously for an underground or elevated railroad. The weather during the past few days has made the travelling public appreciate the importance of the construction of some new system of travel. We must get to it sooner or later. This is what everybody says. "Street car lines must go" is an observation frequently heard. The interests which are growing rapidly will force a better system upon us. Must we, then, wait for circumstances to do what judgment clearly dictates in advance should be done. It seems that way. The only obstacle in the way of construction of a better system is the profits of the street car lines. They average from thirty to forty per cent. on the original cost. They constitute a powerful combination against improvement. The people know it and feel it. They know that any effort to inaugurate a better system will be met by the silent, and for that reason more powerful opposition of the syndicate of street car companies whose interests are opposed to the interests of the million people of Philadelphia.

THE New York newspaper reporters are after the Kings County Insane Asylum managers who have 1500 people where 800 ought to be. The complaints are made of bad cellars, bad sanitary surroundings, bad sewage, and a general overcrowded condition.

BUILDERS are continually saying that the services of architects are not needed for ordinary houses. That the ordinary house consists simply of walls, floors, windows, doors with a roof, and that, therefore, there is no room for or need of the services of an architect. Mr. E. S. Babbitt thinks otherwise. Mr. Babbitt is a competent authority, and he writes in a way which shows that he is decidedly in the right on this question. He refers to the writings of Mr. Walter Smith, who went over the same subject in a masterly manner. Mr. Smith pointed out the distinctions between architecture and building, and showed that architecture comprehends building only as its instrument; that architecture and building stand to each other as body and soul, united giving life. Mr. Smith says that the less a building costs the more architectural skill should be employed, and he is nearer right than might be apparent to first glance. Ninety-five per cent. for bricks and for brains is not such a bad division after all. Certainly brains have very little to do with the average houses. Old European towns and even

British towns and cities show how architecture can be advantageously applied to small houses. In these days we expend our art notions and taste on personal rather than on real property. He advises and urges that more care be given to the architectural features of our home. As they are now built they represent the age of barbarism rather than of enlightenment. With such an abundance of architectural skill at our command, there should be no shortsighted parsimonious display. Five per cent. on $2000, will make an elegant and attractive home out of what would otherwise be a plain one.

In connection with this question, we notice an interesting discussion that took place at the last monthly meeting of the Illinois State Association of Architects. Among other questions discussed was one of sanitary importance. The President of the Association showed that at an additional cost of five or not more than ten per cent, a house could be made complete from a sanitary and plumbing standpoint. Take a house costing from $2000 to $5000 where the plumbing ranges in cost from $250 to $500, he said the increased cost of good plumbing would not go above ten per cent. costing from $25 to $50. Good carpentry would increase those figures to $50 or $100. He held that the difference in cost of maintaining plumbing repairs in good condition of a house of that and cost, would be diminished by more than seven-and-a-half to fifteen dollars per annum.

The tendency is to recommend and urge upon builders and the public generally, the advantages of employing skill of all kinds in the construction of houses. Sanitary, engineers, architects, and others demonstrated this fact completely, and showed that it is shortsighted economy to disregard the advice of experts or even to attempt to build without their advice. All this is very true. Yet many builders do not believe it. They are in a position to have their adviced taken, because they are not professionals. Professional pride and propriety forbids sanitary engineers or architects from foisting themselves, or their services on those who have money to spend in houses or buildings of any kind. They must stand back and see mistakes made, which they know how to obviate and which ought to be obviated. The only way to fence off bad work of this or any other kind, is to have very stringent regulations concerning the doing of work. Western associations have made more headway in the discussion of this question than Eastern associations. In fact, Eastern associations have altogether neglected it. Possibly the reason is, that there is no occasion for vigilance on their part. Certainly there ought not to be, and would not be if builders were alive to their own best interests. The building public need to be enlightened as well as instructed upon, not only the importance of proper architectural and sanitary, measures, but they need to know that they cannot wisely cast them aside.

A question that is the subject of some discussion among architects is, who should take out the permit for the building, the architect or the owner? It might seem that there is no reason or even occasion for discussion on this point. The owner is certainly the most interested, but frequently the most neglectful of the matters which should require his closest attention. The Health Departments in cities, prefer that the responsibility for securing permits, should rest solely with the plumber or the architect. The architects think that the responsibility should rest with the owner of the building, and that such seem to have the best of the discussion. The architects take the ground that plumbing should not be covered up until after question has been thoroughly examined. Upon this there is very little difference of opinion, excepting on the part of the plumbers who think that they ought to be trusted with the proper performance of their work. The architects insist that there is need of a radical change in existing methods of doing plumbing work. Much bad plumbing is certainly done, and the amount of it is increased when it is permitted to be covered up. The architect whose reputation is at stake, will oppose this covering up until he can have passed upon it, and in this he is right.

We are glad to observe that there is a growing sentiment in favor of an American style of architecture. The sentiment has been growing rapidly of late years. American architects have been copying from the entire world, and from the best minds and works of all ages. There is a need, because there is a demand for something entirely distinctive. The American government and its political systems are entirely distinct from European governments and systems. It is not for this reason that we need a different order or style of architecture, but because of the demands which our progress in the arts and our mental progress have made necessary. The severe criticisms which have been justly made by home and foreign architectural critics upon our work is well placed. Some call it copying, others pilfering. Whatever the word may be, the fact remains that we are not original in the true sense. Most of our work consists in selecting, or rather copying, according to the accusations of our critics. This copying may approach to the verge of stealing or pilfering, to put it more mildly; but nevertheless the spirit of imitation is there, and can be traced distinctly in all of our finest work. Neither the ancients nor the leading spirits of the mediæval ages exhausted the arcana of nature so far as architecture is concerned. There is great progress yet to be made, and it will be made. Our churches show a poverty of ideas; our public buildings show that we have gone very little beyond primitive ideas in the few cases where we attempt originality. The attention which is being directed to this question will stimulate effort, and the demand which exists for originality will no doubt in time produce a new order of American architecture which will furnish lessons to the old world, as the old world has been furnishing lessons to us. Architecture is but in its infancy with us; it has reached its mature growth with older countries.

THE Real Estate Exchange is formulating its programme for the future. The only danger is that it may lay out entirely too much work for itself. This organization must grow like all others. It may spoil its efforts by attempting too much. One very urgent need is that of legislation in real estate interests. Matters have been going along in a hap-hazard way at Harrisburg for years. All legislation relating to real estate interests could be wisely gathered together in order that the membership might know exactly what it is. Several modifications of existing laws are needed. Entirely new legislation would be advisable in some things. The New York Real Estate Exchange, when it began its work, found real estate legislation in a very crude and ill-digested position. They have unravelled all of the difficulties and have made the legislation in reference to real estate interests harmonious and comprehensive, and deserving of study by others who are attempting the same problem.

UNCLE SAM wants a new building in New York city. The present custom house was intended to be the residence of the President. Eighty thousand dollars per year is paid out by the government for rent in New York city alone. This calls for a structure that will be a credit to the city, State and nation. It might as well be on Broadway, where people can see it. Private corporations can put up business palaces. The government ought to have a building that would answer all its present requirements, and be sufficient to meet the requirements for the next hundred years. This would be the best kind of a memorial. Had the government expended a million or two in 1876 in building a Custom House for this city on the site of the present custom house and its old post-office it would have been a far more creditable memorial than the squatty stone hut built out in West Philadelphia by the State of Pennsylvania.

WHEN the Philadelphia *Press* goes gunning it generally bags the game. Its exposure of the Cumberland tramp swindle is not only commended by the citizens of Cumberland county, but it is asked to turn its long range double-barrel editorial gun towards other sections. What good work it could do right here at home just now!

THE special committee of builders and architects sent by the Fire Insurance Companies, of New York, to Charleston, report that they inspected in all 8000 buildings, and found that nine-tenths of those built of brick, were more or less damaged, and that frame buildings were injured from falling chimney and the cracking of plastering. The factories and mills suffered as well. The churches suffered more than any other class of edifices. Not 100 chimneys out of 1400 escaped damage. Nearly all were broken off at the roof. The New York Companies have not yet decided what to do in reference to insuring property in that city.

THERE is considerable demand for apartments, consisting of from three to five rooms suitable for housekeeping adjacent to business and in respectable neighborhoods. The fact is, such apartments would rent for even more than is obtained for small houses up town. They should be so arranged that a small family could enjoy the same privacy a small house affords. There are hundreds of properties on Walnut, Spruce, Pine, Arch, Race, Vine, and the cross streets that are not only available if properly altered, but which would yield a rental equal to two dollars for every dollar they bring in as they are at present. The success of such houses would greatly depend upon the care exercised in the selection of tenants, and the care taken in the management of the houses.

FROM all accounts there is a general prostration of business throughout the whole country. This is largely owing, it is claimed, to labor disturbances and overproduction. The influence which has caused the present dearth of business, more than anything else, is said to be the fearful drainage upon the savings of workingmen belonging to the Knights of Labor and Trade Unions to support the members of these organizations who were idle during the strikes all over the country. What little money the working people have left is being carefully husbanded for fear of further trouble. The condition of trade in this city is not at all encouraging, for notwithstanding the approach of Christmas many of our merchants have really been doing little business.

THERE is some talk of filtration as a means of purifying Schuylkill river water and with that aim in view a Committee on Filtration has recently visited and examined filtration works at Summerfield New Jersey and Wilmington Delaware. The probability is the Councils Water Committee will instruct the chief engineer to ask for proposals for the construction of filtering plants at one or more of the city's water works. This seems like borrowing trouble and wasting money. There is no doubt but much good can be done and the water greatly improved for mechanical purposes by filtration but it will not render it pure and suitable for drinking by any means, for while it is possible to rid water of solids contained in it, what process short of distillation will eliminate the impurities held in solution by it. The chemist filters his tinctures with the view of ridding, them of fibre and other insoluble matter, but they are none the less powerful on account of the filtration they receive. Is it to be supposed then that even were it possible to filter the water daily consumed by the people of this city that such filtration would take from it the soluble parts of the worst form of sewage from the half million people living on the borders of the Schuylkill north of Fairmount dam. The scheme is neither practical nor consistent with scientific facts and it is worse than folly to waste money in such useless expedients when common sense and good judgment points to but one solution of the problem and that is an aqueduct. To construct an aqueduct and works suitable to meet the requirements of the city, would involve a cost of about $30,000,000, which sum could be procured after the necessary legislation had been secured upon an issue of a three per cent water loan, this means debt, of course, but debt is preferable to death, our high typhoid rate which is beyond a question owing to the poisonous water we drink, is too great a sacrifice and demands a remedy no matter how great the cost.

THE total expenditures of the Traction Co. on Market street, west of Ninth street, has been $748,000.

A REPRESENTATIVE of this paper called on Mr. Drexel, and learned from that gentleman that his house had not yet decided what disposition to make of the recently purchased post office property.

THE next hearing in the Traction Co.'s case will be on January 7th. At the present rate of progress results will be arrived at about the beginning of the next century. The law defilers are teaching those people of anarchic tendencies a good lesson or a bad one, according as we view it.

THERE is nothing just in the four mills tax law as it stands under the interpretation placed upon it by the Supreme Court. It is very certain that the law was not intended to discriminate against the private citizen in favor of wealthy corporations; as it stands, however, the citizen must pay 1 4-5 mills more tax than corporations. To grin and bear it is the only way until the law is repealed.

THE Gas Lease question comes up again this Monday evening. Out of various propositions now before the public will no doubt be formulated one which will prove acceptable to the city provided the people can be induced to favor the leasing of the works. Mr. Wanamaker rendered an excellent service to the public a thousand times more valuable than protests and resolutions of organization or even of public indignation meetings which were spoken of. The public has been educated not only to comprehend the injustice that has been perpetrated upon it for years past but to understand the real character of the gas question. It now understands that there is no excuse for gas costing $1.60, $1.50, $1.25, or even $1. It knows that invention and enterprise are at work to solve the problem of dear gas and that sooner or later the price of good gas will be reduced far below the present prices. Mr. Wanamaker, as well as Mr. Harrah, asserts the correct principle when they say that the monopoly of furnishing gas to the people of Philadelphia should continue in the ownership of the people rather than that of any private person. The people understand that if the price of gas can be reduced to $1, as is promised, in a few years it can be reduced much below that figure. In fact, experts who have thoroughly investigated that subject say that gas at 50 cents per thousand will be reached within a few years. It would certainly be a very unwise step for the city to bind itself to pay $1.25 or any other price when it is possible to reach cheaper gas.

The Camaret Roofing Plates.

The popularity of Merchant & Co's brand of roofing plates, known as the Camaret, is the natural result of careful production, and a strict and faithful adherence to an expressed determination on the part of this firm, to maintain the excellence of the Camaret brand at any cost. There is certainly no part of a building, whether a costly mansion or the modest home of a working man, that so largely enters into its very life as does the roof, and experience has taught the builder of the present day, that it is poor economy to roof a building with poor material, and in this sense, it is the established reliability of the Camaret brand that has gained for it national popularity. "Good wine needs no bush," neither does the Camaret require fulsome puffing nor praise, thousands of architects and builders concede its superiority, and are willing to attest its merits. While architects and others as a rule, have been entirely satisfied with the Camaret plates, Merchant & Co., although proud of their record, and particularly gratified at the decided preference that has been given them, conceived the idea of making the Camaret brand for 1887, even better than ever, and as the result of their efforts, the announcement is now made, that in future the Camaret plates will be greatly improved, and will be much heavier coated. We ask the attention of our readers to a letter from the Aberdulais Tin Plate Works upon this subject, which appears on the last page of this paper.

DECEMBER 17, 1886.

J. N. GALLAGHER, ESQ.

Dear Sir:—In last week's issue of the RECORD, on the tenth line under title "Acknowledgment," the second word should have been "*un*acknowledged," instead of "*acknowledged.*"

Truly,

F. R. SHATTUCK.

Obituary.

Gilbert Fitzgerald, son of Colonel Thomas Fitzgerald, publisher of the *Item*, died on Sunday, 12th instant, of pneumonia. Mr. Fitzgerald's death was a surprise to his family and friends. He possessed a vigorous constitution which had not been impaired by excesses of any kind. He delighted in athletic sports, such as rowing and ball playing, and had acquired considerable local reputation as an oarsman. He had been identified with the *Item's* staff since his early manhood and was deeply interested in his work, and bestowed upon it the best efforts of his life. He had many warm personal friends, and was highly esteemed by all who knew him.

His death makes the first break in a family of jouralists, consisting of a father and five sons. Any one of whom is capable of assuming command at a minute's notice, or efficiently filling any position from the compositor's case to the editorial chair.

—Engineers, John A. Wilson and J. H. Linville, each received $500 for their inspection of the piers of the old Market Street Bridge.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ARBITRATION.

A clause in a lease providing for a submission to arbitration of any dispute which may arise between the parties during the term does not oust the jurisdiction of the Courts in the first instance.

BOARD OF HEALTH.

The power of the Board of Health does not extend to the removal of tenants, and the closing up of their houses, unless justified by the existence of a pestilential disease.

BUILDING ASSOCIATION.

In an action against a defaulting borrower upon a judgment note, given to secure the loan, the defendant is only entitled to a credit for the actual amount paid upon his stock (pledged as collateral security), not for the value of the stock at the time of trial.

A building association cannot by a by-law, compel its stockholders to offer a premium for priority of payment, after its shares have become worth par.

COVENANT.

Where a grantor, with warranty, has no title, but subsequently acquires an indefeasible one, it immediately inures to the grantee by estoppel; and in an action for a breach of the covenant of seisin, the latter can only recover the actual damages sustained.

The covenant against encumbrances, created by the words "grant, bargain and sell," extends to a municipal assessment for a street improvement, though the purchaser had knowledge of it at the time of his purchase; the effect of such words can only be limited "by express words contained in the deed."

DEED.

Where a land owner lays out a town, and conveys the streets to trustees, for the use of the public purchasers of lots bounding thereon, acquire no title to the soil of the streets.

EASEMENT.

The reservation in a deed of a private right of way, over a portion of the land granted, does not create an easement appurtenant to the remaining land, it is simply a personal right, which expires on the death of the grantor.

LANDLORD AND TENANT.

The goods of a tenant holding by a renewed lease are not liable to distress, for arrears of rent of the preceding term, if a third person has acquired an interest therein; nor though the latter be the succeeding tenant.

MECHANICS' LEINS.

Digging and walling a well is not a subjectof a mechanics' lien, unless included in the contract for building the house to which it is appurtenant; or unless it be so annexed to the main building as to become a part thereof.

MORTGAGE.

A mortgage of a leasehold estate is valid between the parties, and if accompanied by a change of possession, against the execution—creditors of the mortgagor; a purchaser at such execution sale takes subject to the mortgage. A suit will not lie upon a mortgage given to secure a widow's dower, until one year after her decease.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

Charters Granted.

Henry Disston & Sons Company, of Philadelphia; capital, $3,000,000; the stockholders are all members of the Disston family. The Amalgamated Building and Loan Association, of Pittsburg; capital, $200,000. The Pinegrove Water Company, of Schuylkill county; capital, $25,000. The Edison Electric Light Company, of Philadelphia; capital, $100,000; the stockholders are Charles M. Swain, Amos R. Little, Henry M. Dechert, Samuel B. Huey and B. K. Jamison.

BUILDERS' ITEMS.

Building and Real Estate Notes.

FRANCIS H. WOODRUFF left an estate of about $129,544.

THE Notaries Public of our city last year paid a State tax of $2,803.

THERE are 515 persons registered as engaged in the trade of plumbing.

A DWELLING and lot, 18x150, on Broad street, below Norris, sold for $12,000.

THE property s. s. of Chestnut, 33 feet east of Thirty-seventh street, sold for $11,000.

THE corner stone of the new M. E. Chapel, at Collingswood, New Jersey, has been laid.

URIAH H. PAINTER, has purchased a property in West Chester, which he will improve.

WILLIAM HUEY, has purchased a property in Oxford, Chester county, which he will improve.

THE Grocers and Importers have been talking of shortly building themselves a fine exchange.

JOSEPH BUTLER, has purchased a property in upper Mechlan, Chester county, which he will improve.

THE West Chester Fire Company, of West Chester, contemplate at an early day erecting a new engine house.

THE Third Regiment Armory now being built on Broad street, below Federal, will be a very fine building.

W. R. MATCHETT, Hall & Garrison, and others, also contemplate extensive building operations next year.

CORNER property are in demand; N. W. cor. Broad street and Allegheny avenue, 150x396, sold for $20,000.

JONATHAN TRAVILLA, has purchased a large amount of property in West Chester, which he will improve.

R. H. SCHOENAN, has purchased a property at Rittersville, Lehigh county, upon which he will erect a large refrigerator.

A FRAME dwelling costing about $8000, will be built for Dr. C. S. Thornton, Moorestown, N. J. Moses & King, architects.

JUMBO PARK, will be built up with fine residences which, it is understood, will be built under the supervision of the Drexels.

TWO LARGE seven-story finished stores, will be commenced to be built early in February, one on Arch street and one on Market street.

THE Real Estate Title and Trust Company, 621 Chestnut street, propose erecting a large building on Chestnut street, on the South side.

THE Standard Oil Company will erect a new refinery at Franklin, Pa., $250,000 has already been appropriated to commence building.

THE Holland Memorial Church congregation, will erect a fine church at the S. E. cor. of Broad and Federal streets, on a lot 100x200 feet.

HARRISON CHRIST, has purchased a farm in Penn Township, Chester county, upon which he will make extensive building improvements.

A BILL has been favorably reported by the Senate Committee on Public Buildings and Grounds, for the erection of a Public Building at Chester, Pa., to cost $75,000.

JOHN J. DEERY, architect, is making plans for a three-story frame house and stable, for Mrs. Caroline Biddle, to be erected at Ardmore, Pa. Both to cost about $10,000.

A COMPANY is to be organized for the purpose of erecting a suitable building for hall and other purposes for the Hibernian Society, of this city, of which John Field, Esq., is President.

MR. CHANDLER, will also build a Cottage for Mr. Barker and Miss Felton, at Bayhead, N. J. It will be built of North Carolina shingles and the hallway will be of California redwood, and will cost $5000. W. M. Applegate is the builder.

W. W. ALCORN, has recently sold a lot of ground at the N. W. cor. of Broad and Wharton streets, 164x108 for $15,000, to John Gibson, a builder, who will erect eleven very fine houses in the Spring. Mr. Alcorn, has also sold building lots on the west side of Broad, above Wharton, 18x110 for $2400, for building purposes.

THE Orphans' Court has adopted a rule that in all sales of real estate in that court under proceedings in partition the dower of the widow, if any, must remain upon the property sold, the purchaser buying subject to her dower, and must pay the interest to her until the time of her death, after which it goes to the decedent's heirs.

AN energetic up-town builder, in the N. W. section of the city has opened up an entirely new enterprise in house renting. In addition to his finishing the interior in the best possible style, he has commenced to furnish them throughout, leaving nothing wanting in housekeeping, so that for a newly-married couple, they have nothing to do but to bring home their trunks. He has already fitted up ten and has either let or sold them; and we have no doubt next year he will carry out this plan more fully.

N. C. THORP, of Philadelphia, let the contract on Saturday last for the erection at a point east of Berwyn station of a handsome hotel property of stone and mansard roof, containing 42 rooms, and to cost in the neighborhood of $15,000. He also at the same time let the contract for building, in close proximity to the hotel, two new cottages which will cost about $5000 each. The first-story of these will be what is known as the "broken range" (stone) and the other parts will be of frame.

IT is settled beyond a question, that the tenants occupying the buildings belonging to the Girard Trust Company, situate between Hood, Bonbright & Co.'s new store, on Market street and Twelfth street, must vacate early next spring, as many of the tenants are already seeking new quarters. This of course means a heavy building operation on the part of the Trust. Considerable curiosity is expressed as, to what the improvement will be, although it is strongly intimated that the ground floor will be arranged for stores with 30 feet fronts.

THEOPHILUS P. CHANDLER, JR., 302 Walnut street, will erect a fine three-story and basement building for the Central News Company, to be erected on Locust street, above Sixth street. It will have a frontage

of 63 feet and 116 feet in depth. It will be built of Buff brick, with Indiana lime stone trimmings and large plate glass window. The cost of the buildings is estimated at $50,000. W. Devitt & Son, are the builders.

Also, adjoining the building, will be be erected a fine stable, 47 feet square, and will have a handsome frontage of stretcher brick and Indiana brown stone trimmings. It will be three-stories and have accommodation for 25 horses, and will be finished throughout in white pine. The first-floor will be the carriage room, the second the stables, and the third will be for hay-loft, living kitchen, two chambers and bath room, and will cost $15,000. Mr. J. Bradin is the builder.

THE HOMESTEAD Co., will occupy the rear office in the Mutual Insurance Company's building, at Tenth and Chestnut streets. The whole of the spacious office has been thoroughly re-arranged, and is handsomely fitted up in oak and plate-glass. Mr. C. M. Burns, Jr., architect, and G. W. Winneberger & Son, builders. Mr. Burns has entirely re-decorated, re-furnished, and put in new windows in the St. James Episcopal Church, at Bristol, Pa. He is also building for Geo. D. Worrell, Esq., attorney, at Pine Knob, Uniontown, Penn., a pine log cabin, 2½-stories, 40x40 feet, without the porch. It will be situated on the mountain. The central feature of the house is a stone chimney, measuring 9 feet across. The house to the peak of the roof, is 35 feet, on the first-floor there are three rooms and large hall, and to open stairway, and is lined throughout with tongue grooved boards; the second-floor contains 6 rooms, and above are two attics, the porch is made of rustic posts and brackets, with shingle roof. The whole structure is built with a view to picturesque effect, and to harmonize with the location. The architect has already been commissioned to erect another, and it is likely they will become very popular; it is the first of the kind that has ever been built. He has also a house to erect for Mr. Howard Davis, on Fourth street, Riverton, N. J. It will be 2½-stories, and built of stone and frame.

Architect's Notes.

MESSRS. GERSON & Co., dry goods men, will take down and rebuild the two stores Nos. 40 and 42 North 8th street. Mr. J. S. Brican is the architect.

MOSES & KING, architects, Walnut street, are making sketches for extensive alterations to be made to J. S. Starr, Esq., residence on Linden street, Camden, N. J.

CHAS. F. COLLOM, 907 Walnut street, architect, is preparing plans for a fine house for Mr. Duncan, at Tacony. It will be three stories and contain 14 rooms with all modern conveniences. It will be built of press brick with brown stone trimmings.

ROBERT CAMMERER, architect, 603 Walnut street, is making extensive alterations on the N. E. cor. of Third and Market street, taking out the entire frontage and making alterations in basement, and putting in a handsome plate-glass front. The store is occupied by A. E. Massman & Co., cigar manufacturers. This property belongs to the J. B. Lippincott Estate.

AMOS J. BOYDEN, architect, 413 Walnut street, is building a house and stable (frame), for Dr. James Tyson, Rosemont. Also a house and stable for Col. McClure, at Wallingford; it will be 2½-stories, and will be of brick, stone and frame. Also a Bicycle Club House, at Fortieth and Girard avenue, 40x42 feet, with three-stories and basement; it will have a fine frontage of English stone and brick, and will be fitted up with all the modern conveniences of a first-class club.

MR. LINDLY JOHNSON, architect, Walnut street, is making extensive alterations and enlargement to the Brighton Hotel, Atlantic City, N. J., running it 100 feet towards the sea and 60 feet back to Illinois avenue, and adding a story to the entire building and put on a new Dutch roof, open fire places, heating the whole place by steam and thoroughly renovating the entire building, at the cost of $45,000. Also erecting a cottage for Mr. Hawkins, at Media, Pa., to be of stone and frame, at the cost of $5000. Also, house for Mr. Alfred Rex, at Chestnut Hill. It will be built of stone with shingle roof, and of the Flemish style of architecters.

WILSON BROS. & Co., 435 Chestnut street, architects and civil engineers, will construct a two and a-half story dwelling house for Mrs. Perry, at Toms River. The first story will be brick, the remainder frame, and will cost about $7000. Also building at Moorestown, N. J., for J. E. Watkin, Esq., a cottage to cost $7000. Also one each in the same place, for W. N. Bannan, J. E. Rogers and Ed. H. Pierce, of frame, with slate roof, to cost about $5000 each. They are also to erect a fine brick station at Meridian, Miss.—Union station, on the M. & O. and C. M. O. and T. P. R. R. It will be two stories and have an iron bridge for street traffic crossing the end. They have just completed a fine dwelling for Anthony Drexel, Jr., at 39th and Walnut streets. It is a three-story brick and finished in hard wood.

J. J. DEERY, architect and civil engineer, 328 Walnut street, is renovating St. Michael's Church, Second and Jefferson streets, both interior and exterior. Also, building base ball pavillion and grounds on Broad and Huntingdon street. Also, making extensive alterations at La Salle College, N. W. cor. Broad and Stiles streets; the south wing of which has now reached four-stories, leaving the remaining wing to be put up in the spring. It is intended at the same time to make the whole building uniformly four-stories all around. Also, a frame and brick house at Oak Lane, for H. H. Becker, to cost $8000. Also, house and stable at Ardmore, for Mr. C. Biddle; it will be of stone, brick and frame, and cost $12,000. Also, a stone school house at Bristol, Pa., to cost $18,000. He is also building at Bridesburg, the new cemetery entrance with building stables vault, and laying out the entire lot, putting macadamized roads, lithogen gutters the whole cemetery is thoroughly drained right through to the Frankford Creek.

Building Permits.

Haibach & Auchter, Twenty-sixth and Thompson streets, alterations, S. E. corner Thirty-first and Thompson streets. Also, alterations to ice-houses, Thirty-third and Thompson streets.

A. Ewing, Lombard street, above Eighteenth, one-story addition to back building, 1940 Howell street, 16 ft. by 20 ft.

W. P. Davis, Forty-fifth street and Girard avenue, two-story house, Girard avenue, below Merion street, 14x28 ft.

D. S. Cofrode, 4027 Baring street, two story slaughter-house, Thirtieth street, near Baring, 64x190 ft.

McManus Bros., 4 Evans street, Germantown, two-story shop, Germantown avenue, near Chelten, 18x28 ft.

William J. Bailey, new fronts, 709 and 711 N. 13th street.

McManus Bros., two-story shop, Germantown avenue and Price street.

D. S. Cofrode, slaughter-house, 30th street and Powelton avenue.

S. B. MacDonald, livery stable, Gratz street and Montgomery avenue.

Alexander Ewing, third-story addition to 1940 Howell street.

S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action
1517 invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the
1300 amount of the judgment, the damages have
143 not been assessed.

The first name in each line is that of the
2309 judgment debtor.

An asterisk (*) denotes judgment confessed
466 or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after
350 the name of the plaintiff indicates the number
500 of the Court. The letters D. M. J. and S.
275 after the number of the Court indicate the Term as D., December Term, M., March Term, as J, June term and S., September
..... Term.

An examination as to the nature of judg-
1000 ments and suits will be made for subscribers without extra charge on application.

ABERDULAIS TIN PLATE WORKS,

NEATH, WALES, NOVEMBER 19TH, 1886.

Messrs. MERCHANT & CO., Philadelphia,

DEAR SIRS:—We are in receipt of your favor of November 9th, which has our most careful attention. For the past two years we have endeavored to meet the views of yourselves and customers in reference to improving the coating of the "CAMARET" leaded plate. That our mutual efforts in introducing guaranteed and stamped plates have been successful does not admit of a doubt.

Your desire to further improve the coating of the "CAMARET" so that Architects, Builders and Roofers may be still better satisfied meets our entire approval, and you can inform all friends of the "CAMARET" Roofing Plate that this brand of 1887, which we are now making for you, will be much heavier coated than any of the "CAMARET" plates we have shipped you heretofore.

We are confident that the extra coating now being put on this brand, together with our usual care in assorting, squaring, etc., will cause the "CAMARET" Roofing Plate to continue—as we are satisfied it is to-day—the leading brand of regular coated plates in America.

Yours very Truly,

(Signed) JOS. WILLIAMS & CO., Ltd.

Per J. H. R. Ritson.

One Year, in advance, - - - - $5.00

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, DEC. 27, 1886.

IF THE country will build 10,000 miles of main line next year, as railroad builders have given it out, we may assuredly anticipate a year of industrial and commercial activity such as we have not seen since 1882. All the Trunk Lines it is understood contemplate extensive additions to their mileage. The Southern lines also contemplate important extensions. Consolidations are also in progress of lines now isolated, for the purpose of organizing the railway interests throughout all of the Southern States. Huntingdon, Jay Gould, and some lesser railroad lights are now at work upon this gigantic problem. The aim is two-fold: first, to organize the southern railway mileage into a system which it has heretofore lacked; second, to develop the resources of the South which have heretofore been neglected. Attention has been directed to this latter point by the activity of industrial managers who have gone South during the past two or three years building factories, mills and shops by the hundred, and developing the mineral resources of the South. This has given the railway managers a hint and they are now preparing to build lines of longer or shorter extent into various sections of the South which are rich in natural resources. The truth of this may not be apparent at once. The development of the South is attracting Northern and foreign capital at the rate of $10,000,000 every month. The South will drain the North of Capital, labor skilled and unskilled, and that surplus energy which is always accumulating in a country like ours. This Southern development will result in what might be termed a balancing of the industries by which one will become and remain a vast market for the products of the other. It might be said with safety that the panic or depression which overtook us in 1883 and continued for three years would either not have taken place or would have been of less duration had the South been more fully developed. To-day the South is a far better market for Northern products than three years ago, and every week it is becoming a more valuable market. Its abundant supplies of coal and lumber will be more easily reached. It will become an excellent market for our tools, and machinery, and mechanical appliances. The far West has developed wonderfully, but new sources of supply have also developed, thus practically cutting Eastern cities, like Philadelphia, off. The Great West goes to Chicago and St. Louis, instead of to Philadelphia or New York. The development of the Southern States, especially of the Atlantic Coast will make Philadelphia, if not the first, the second, market in importance, and will bring to our city with the help of the Baltimore & Ohio R. R. Co. a valuable trade which will stimulate our industries and increase the volume of our business. The Pennsylvania R. R. Co. seeing the grand opportunities in store have recently concluded negotiations by which they will come into possession of a new line, practically a trunk line, throught he Atlantic and Gulf States. It is the intention of this company to construct feeders from then main line into every locality where traffic is likely to be developed, and thus become a grand agent in the rehabilitation of the South. These observations are not mere sunshine, but they are the reasonable deductions from existing facts and conditions. Capital which is always conservative and slow to move cannot take advantage of the developing opportunities too rapidly. Money is reaching southward by the million instead of by the thousand. Pennsylvania and Ohio iron and steel makers and lumber manufacturers are looking for opportunities there instead of elsewhere. Railroad managers are finding encouragement there instead of in the far West. The development of the resources of the South will bring more business to the Northern Atlantic coast cities than can be possibly expected from the greatest possible developments of the far West.

IF the iron trade is a correct barometer, its present strength points to a year of unusual activity after January 1st. Consumers are crowding orders into market or where they are not doing so they are making inquiries for very large supplies. The result of a great advance in the iron market will be to create an unnatural condition of trade and to lead to speculative ventures which cannot but bring harm to those who indulge in them. The iron trade suffered from the boom of 1882. A boom now would produce disastrous results. The productive capacity of the country is enormous and it is sold up in nearly all directions. The steel rail makers take the lead, and are reported to have sold more material than they can supply in six or seven months. The plate and structural mills are also sold up for some time to come. The blast furnace capacity is 123,000 tons per week and it is probable that this capacity will be sold from two to three months ahead during January. Two or three companies have withdrawn their quotations. The trade prospects for the coming year are certainly of a very promising nature. The country desires to avoid a boom because it would be destructive of commercial health.

PRESIDENT CAMMANN of the New York Real Estate Exchange, in delivering his annual address said, that the total receipts from rents and auction room fees were, $42,000 for the past year. The cost of running the building, and taxes and interest on debt, left $22,000 for the actual running expenses of the exchange and salaries. The membership takes the deepest interest in the Exchange, for they find that through it a great deal of valuable work is done.

THERE have been many serious accidents already this winter, occasioned by the uneven surface of brick side-walks. How long this abomination will be allowed to continue no one can answer. Will not some of our many Councilmanic Statesmen present a resolution containing an edict against, 1st, the relaying of brick for side-walks; 2d, against the use of brick for side-walks in front of new buildings. Through these restrictions the inhabitants of this city in the year 2000 may be able to see the last of them.

OUR system of transferring titles to real estate is barbarous and calls for a change. The lawyers of course, would oppose anything which would take money out of their pockets or keep business from their offices. This subject is attracting more attention in New York City than elsewhere. In our land transfers we are a hundred years behind the age. An improved system prevails in Prussia, and even in New Zealand and New South Wales. Steps are being taken in Great Britain to so reform the land laws as to make registration, and the passing of titles easy, cheap and certain. Mr. Dwight H. Olmstead recently read a very interesting paper upon this subject. He stated that in 1881, the fees in New

York for searching titles amounted to $1,750,000. The official fees besides this amounted to $400,000 more. The business this year is much greater than then, and would amount to not anything less than $2,500,000, the most of which is thrown at lawyers and officials for no really valuable service. Powerful monetary interests are opposed to any appeal. The lawyers and the title guarantee companies are preparing to lead in the opposition to any efforts in this direction. Lord Hobhouse said, "the present shackles upon land are not the result of any national deliberation but are pure inventions of lawyers." The Duke of Marlborough said, last year, in the Fortnightly Review, that the transfer of land has at all times been surrounded with legal difficulties of every description. He is in favor of a measure which will free land from the grip of the law and render it as negotiable as other forms of wealth. He says the simple cure is to sweep away at one blow the entire machinery of deeds, and substitute in matters of sale, a simple mode of registration of parcels bought and sold. Deeds he says are the inventions of lawyers, and registration is a complete substitute. The State must afford means for the wholesale registration of land on a very different basis to the feeble attempts, which have been heretofore made in that direction. Mr. Osborne has opened an investigation which ought to extend into every business community. It by no means follows that a system of this kind would prove an injustice to the lawyers as is supposed. The legal fraternity have an important position in our social economy. Their valuable services cannot be dispensed with. Their skill and knowledge is necessary. In dispensing with mere clerical services, involved in the writing of long deeds full of meaningless words, which a first-class lawyer has no time to trouble with, we are not interfering with their legitimate occupation. The interests of the public, and the interests of real estate operators and conveyancers, are involved in the simplification of the present cumbrous system of land transferring.

MR. ROBERT'S testimony in the Railroad Pool case, would indicate that Railroad Pools were a great blessing to the people of this commonwealth. Just think of it, you poor long suffering and unsophisticated mortals who have to eat and live, you are better protected than you have ever had any reason to suppose, listen to this sage of reason and on bended knees, thank the glittering stars that you are still alive. Mr. Roberts said in his testimony on Saturday, the 18th instant, that the purpose of the pool "was largely to enable the present corporations to properly protect the public against the influences that were brought to bear to discriminate against the interests of the company and the people which they had to serve."

Mr. Roberts may believe this, but it is doubtful, he may also believe that the people can be made to believe it, but in that he will be mistaken. There are too many years of railroad aggression against the people of this State, who know what discrimination means in its fullest sense, and who also know its bitter cost. What "were the influences that were brought to bear" of which Mr. Roberts speaks? Surely not competition for until lately railroad competition in this State, has had practically little or no existence. If no other good comes from Attorney General Cassidy's suits, they will at least give his successor an opportunity to continue them, failing in which General Beaver will necessarily go on record as favoring the Railroad Companies, and as against the interests of the people.

THE New Yorkers propose to have another bridge, which will cross the East River at Sixtieth street. It will have two termini, one at the Grand Central Depot, at Forty-second street, and another at the Fourth avenue tunnel, at Eighteenth street. A double track road is projected from the Long Island terminus to Brooklyn. This will greatly enhance the value of property in Long Island City, and will open vast possibilities for that side of the city. The bill which Messrs. Everett and Hewitt, have introduced into Congress, provides for a bridge three and one-half miles long, 155 feet above mean high tide at the centre, and built to sustain a strain of 3000 live pounds to the running foot. Besides its railroad accommodations, it will have a wide drive-way and a cable system, by which the trip can be made in seven to ten minutes. It is proposed to build a cantilever bridge.

WE are in receipt of several letters from architects thanking the REAL ESTATE RECORD for its article commenting upon the *American Architect* and its *quasi* endorsement of N. G. Taylor's confidential circular to architects, which has excited so much indignation and engendered so much bitter feeling. The fact is, the circular, as well as the *American Architect's quasi* endorsement of the same was indicative of an under-estimate of the mettle of the men it was intended for. It is simply pure and unadulterated simplicity for any journal, no matter how popular, to extenuate with sheer twaddle, such a palpable insult and outrageous reflection upon a profession that has justly earned the entire confidence and support of the public, and which had a right to expect better vindication than the *American Architect* seems disposed to give it.

IT is rather surprising to hear the New York people say that the elevated railroads will not answer the future requirements of that city. Cable systems are proposed in place of the horse car lines. The elevated roads are now over-crowded during certain portions of the day and the managers are not able to put on trains enough to carry the people as fast as they come. Col. F. K. Haim admits that their carrying capacity is about 700,000 per day. The cable system is working on Tenth Avenue, 125th street, and on the Brooklyn Bridge satisfactorily. The superiority of this system has been demonstrated in San Francisco, Kansas City, Chicago and other Western cities. On April 24th, 1884, a charter was granted to certain New York parties to build a cable road over twenty-nine lines mapped out, including seventy miles of track along the leading avenues in the busiest cross-streets in the city. Too much opposition was manifested and the project was dropped. A cable line is projected, beginning at the southern terminus of West street, thence to Tenth avenue, to 33d street, thence to Fort George Avenue, to 11th avenue, and thence to 190th street, and from there to 10th avenue again. This is a long line but it is intended to be only a pioneer in the cable system which it is proposed to adopt, and five cents is to be the fare between extreme points. The Third avenue Company has carefully investigated the cable system and has decided to put it in operation on its main line on Third avenue and the Bowery. This will involve an expense of $1,500,000. Certainly New York proposes to adopt the most practicable system of rapid transit. The outside world has been taught to believe that the facilities of the elevated system were almost inexhaustible. It looks almost like taking a step backward to drop from the elevated system to the cable system. In this connection we may be permitted to throw out the hint that a company has been organized to build a pneumatic line for the transportation of freight and passengers. It has plenty of capital back of it, and its promoters believe that it will more satisfactorily solve the question of rapid transit than either elevated or cable roads. While New York may not be able to move fast enough with its elevated roads, it does not follow that such would be the case in Philadelphia. Such a road would answer the requirements of our people for an indefinite period. The question is an open one in both cities, and the only thing we are safe in saying is, that rapid transit will be an accomplished fact before many moons have passed.

IT begins to look as though "organized charity" was a humbug, a lie, a delusion, and a snare. The details given in the *Times* of the sufferings of the Devlin family at 1807 North Second street are so thoroughly sickening that the reader almost wishes he had not read them. It is very evident that many of these sleek morsels of voluptuous goody-goodyness to whom is relegated the distribution of alms generously contributed by warm-hearted citizens who's earnest desire is to ameliorate the condition of the poor, are abusing the trust and are simply playing upon the credulity of the sympathetic on the one hand, and working upon the terrors of the poor with threats of charges for vagrancy and the house of correction, with the view of curtailing expenditures, in order that they may reap the benefit. If you wish to help the poor the better way is to attend to it yourself and not entrust it to an organization that requires expenses amounting to several hundred per cent. over the amount distributed.

THE question of repeal of dower and courtesy is bringing out a great deal of interesting discussion among the New York lawyers and conveyancers.

THE New York real estate brokers are looking for a big rush of winter business. Our Philadelphia brokers anticipate considerable activity during the first two months of the year.

IN less than twenty years the entire character of Broad street must undergo a radical change. Its situation practically makes it the Broadway of Philadelphia. It is the dividing line between the Easterly and Westerly sections of the city and is of easy access to both. The Northern tendency of the city's growth will soon make a change imperative and even now the erection and opening on North Broad street of a few magnificient stores of the Wanamaker type, would very soon influence a host of followers.

The fact is the northern wards have grown so rapidly in wealth and population that they will soon tire of business isolation and demand the change. Predictions of dazzling magnificence may be justly ridiculed now, but he who lives through the second or third decade of 1900 will realize what a fool he was in 1886.

In 1857 the writer's father bought New York lots adjacent to Fifth avenue and the Central Park for $250 each, they have since been sold for a sum equal to a hundred times that amount, the eligibility of these lots for magnificent returns never equaled that of Broad street property south of Columbia avenue taking the present time as the estimate for Broad street probabilities.

THE prosperity of the Knights of Labor is due in a large measure to the fact that labor is in great demand. Workmen rush into organizations when they see an opportunity through organization to advance wages. Suppose in a year's time the tide turns, tens of thousands are disemployed, enterprise lags, a panic overtakes us — what then? The same incentive to organization would not exist. A fight would take place for employment. Employers would naturally give the preference to an efficient non-union man rather than to an efficient union man, provided he can employ the former cheaper. When the motive to join a union is removed, and an inducement is offered to not belong, membership will fall off. If we encounter another industrial depression, the Knights of Labor will scatter, but the organization will not be destroyed. That organization had its great start in 1877 and 1878. It was not until 1881 or 1882, during the period of greatest industrial revival, that it began to gain rapidly. The presumption is a safe one, that a panic will drive out tens of thousands, and for this reason, that there are tens of thousands in the organization who are there for purely selfish purposes, and who have no genuine sympathy with the cause of labor. A considerable percentage of the membership has either been dragged or induced in, and that element will be the first to desert the organization when a pretext or an opportunity presents itself. Those employers who begin to feel that they are under the permanent control of an organization of labor, must remember that the Knights have not yet won their spurs. They have not yet gone through the ups and downs which can alone put life and permanency into any combination of men. In other words, the storm which the Knights have to encounter will test their strength. There are some labor organizations which no possible defeat could destroy, such as the Amalgamated Association of Iron and Steel Workers, the Locomotive Engineers', the Carpenters', and one or two others. These associations of workmen have come up slowly through the heat of battle. They have suffered defeat after defeat, and have learned wisdom from experience. The spirit of antagonism which exists between so many employers and their workmen has very little place between the employers and the members of these organizations. Bad feeling has been weeded out, and mutual respect has been engendered. The same will ultimately be the relations between the Knights of Labor and those that employ them. But this desirable relationship cannot be established simply by the force of numbers, or by the demands which organized labor may make in a peremptory spirit. The organization of labor is to be desired and commended, but the hundreds of thousands of new men coming together generates a spirit of retaliation and oppression, which will weaken them in proportion to its bitterness. The Knights have important lessons to learn, and they will learn them and profit by them, as all other labor organizations have done before them.

WE might borrow a few ideas from our New York cousins in reference to collecting taxes from delinquent property holders, although our system is not as bad as the system prevailing in some Western cities. In the former city a catalogue of all pieces of property which are in arrears for taxes or water rent, is made out and advertised to be sold at a given time. The effect of this is to have the owners redeem about one-half of the property before sale. In bidding upon lots thus offered, the bidder names a term of years instead of making a cash bid, and the person bidding the lowest term of years receives a lease to the property provided the owner does not redeem it as specified by law, which he is allowed to do in two and a half years, upon the payment of all arrears and legal charges and interest at the rate of 14 per cent. on the money paid by the purchaser from the date of the sale. If the owner does not show up within two years and a-half the lessee receives a formal lease from the city to the property for the term of years for which he bid it off. The condition of the purchase is that he shall pay up all arrears upon the purchase with interest at 7 per cent from the time when the several assessments fell due, together with the various expenses of the advertisement of the sale and the sale itself. The purchaser then notifies the former owner of what he has done; in practice this business amounts only to getting 14 per cent on the money paid out. In this year's catalogue there are 4,219 separate lots, of which 3,000 have been redeemed by their owners.

CITY SOLICITOR WARWICK might have seen for himself that the alteration Mr. John C. Doherty is having made to his store front 1423 Chestnut Street does not come within the meaning and intent of the new building line law on the north side of that thoroughfare. An examination of Mr. Doherty's building will show that its first story has been greatly improved by the substitution of beautiful stone work for the old brick, while the rest of the front will have the outside shell of brick removed and a shell of stone substituted. It seems too bad that every effort of property owners who desire to improve and beautify the fronts of their buildings on the north side of Chestnut Street should be met by an ultra-construction of this building line law which is simply an abortion at its best. The law as it now stands is particularly an embargo upon improvement and a premium upon the continuance for years of the many eye-sores this busy street contains. What we need is the repeal of this law and the question of widening the street delayed until the city is in a financial condition to pay the damages, then have the widening done altogether. Mr. Doherty should be allowed to proceed with the work without further hindrance.

CONTROLLER DECHERT is no doubt actuated by the most commendable intentions in exercising the close espionage that he does over the city's finances, in fact he has justly earned for himself the sobriquet of the Watch Dog of the City's Treasury, and no man could possibly be more earnest than he in protecting the interests of the city, but there is such a thing as inflicting cruel injustice upon a few who have bills against the city and who are in no way responsible for the sad mental condition of Sheriff Rowan. Mr. Dechert is certainly right in refusing to countersign warrants where there is the least element of suspicion that things are not just right, but for work honestly done and where there is no question, it is not altogether right that the city's creditors should be denied their money on a bare technicality. The Controller refuses to countersign the Sheriff's warrants for advertising Sheriff's Sales in the *Evening Bulletin*, *Evening News* and the *Freie Press* because the stamp used by Sheriff Rowan is not official handwriting. The Controller must not forget that the business of the city must be transacted notwithstanding the illness of the Sheriff, and although technically correct perhaps, (and the question is an open one) yet there is room for large discretionary power and its exercise in liquidating claims against the city where there is no question as to the correctness of the same. What if through a railroad or other accident, the Sheriff had lost both his

hands? the question of the validity of a stamped signature from a stamp held between his teeth would hardly be raised, consequently, it is not a question of official handwriting after all, but one of mental qualification, then the Sheriff being *non compos mentis* as is claimed, why should the city's business be hampered in cases involving no property interests and which are everyday business transactions, and which are as safe in the hands of Deputy Ridgway, with or without the Sheriff's stamped signature, as though the Sheriff were transacting the business himself. The ways and customs of a mercantile house in a similar emergency is all that is required in liquidating the bills of creditors against the city when properly authenticated.

THE fire insurance companies of this city are entirely too indifferent to their own interests, with the proper combination of the companies, backed with their capital and influence, short work could be made of the overhead wire nuisance. The fact is, unity of purpose aiming at the correction of such abuses as yearly entail heavy losses upon the fire companies is so decidedly needed that it seems next to imbecility that it does not exist, or if existing that it does not give some tangible evidence of its existence. The science of fire insurance as a profitable investment for stock holders seems to have extended no farther than the A. B. C. class of experts, and that part of the science which is practically the sub-strata of the science itself, seems to be ignored. It is easy enough for fire insurance companies with plethoric purses to meet losses but it would be a great deal more satisfactory to stock-holders if those losses had not occurred. Fully seventy-five per cent. of the fires that occur annually could be prevented under a proper system of inspection and espionage, and that too, at an insignificant percentage of the annual fire loss, hence the basis of the science of fire insurance is prevention, and with the collective efforts of the companies aiming at the maximum of prevention fire, insurance as a science would make such rapid progress that at minimum risk rates, profits could be increased several hundred per cent. Life insurance, or rather its progress as a science, presents such valuable data that risks can be estimated with almost mathematical correctness, it has ceased to be speculative almost entirely. Whereas fire insurance is practically a speculative institution altogether, and it must remain so just as long as the present system exists. Re-construction is greatly needed and until such time as fire insurance means that when a property is insured that property is not going to be burned if it is in the power of human agents to prevent it, the science will amount to no more than it is now viz: a costly guarantee against loss without the element of protection for either owner or company. There never was a grander opportunity for a man of genius than that which the science of fire insurance presents at the present time.

OUR industrial health is best exhibited in the multiplicity of charters for commercial and manufacturing purposes. Capital, instead of hiding in bank vaults for high rates of interest, is rushing into employment in all sections. Confidence was never more general.

PEOPLE imagine a pneumatic line is only for the transportation of parcels. Passengers and freight can be shot through a pneumatic tube as easily as parcels. It is only a question of diameter of tube and diameter of cylinders, in short a question of dollars and iron. Eminent engineers have said that pneumatic tubes would eventually arrive into common use. Years ago the suggestion was laughed at. Philadelphia will have such a line before long.

MARKET street, east of Broad, is not what it ought to be. Take out twenty or thirty buildings and there is nothing to point the attention of the stranger to. It could be made one of the grandest thoroughfares in the United States. The old-style structures, fifty years old, ought to be torn out. The block occupied by Lovell, Gummy, Sperring, Ingram & Co., Amos Hillborn & Co., and Tallman & McFadden, are creditable to the street. The building of Trymby, Hunt & Co. all put up, will relieve the street at that end of its primitiveness. Land ought to be too valuable on that thoroughfare for anything less than five, six, or seven story structures. It is difficult to get out of old ruts or ruts of any kind; but it must be done. Those who have made the break wonder how they stuck so long in their dingy old quarters.

WE learn that a large number of residents between the two rivers contemplate building in the suburbs next year. Real estate agents have been instructed to select sites or present sites for consideration. Germantown and Chestnut Hill are the favored localities, but the southwestern section of the city is by no means neglected. The most eligible sites are being quietly picked up even now, and no doubt a great deal of real estate for building purposes will be purchased by those desiring to get away from the increasing noise and travel and attendant inconveniences of a residence between Broad street and the Schuylkill. Practically this section has been condemned for business purposes by an authority higher than that of the courts and statute books, viz., the law of public necessity. Parties residing on West Chestnut and West Walnut streets have already had liberal offers, and some have decided to accept. When the City Hall is fully tenanted, and the B. and O. depot at Twenty-third and Chestnut streets is completed the invasion will begin. Market street west of Broad is already feeling the effects. Several pieces of property are now in negotiation. The coming twelve months will exhibit a great change in the section referred to.

IMPORTANT questions are crowding on the local public mind. The mayorality question is substantially settled. The gas lease will be disposed of at an early day. The water question should come up next. This is really more important than any of the others, so far as the comfort and necessities of the community are concerned. We understand that names representing $200,000,000 of capital have been appended to a writing concerning the water question, which will be presented to the councils of the public at an early day. The insurance interests of this city have spoken. The manufacturing and commercial interests have spoken. The great body of the people have not formally spoken, because they cannot, but the people want more and better water, and a safer and more permanent water supply. Philadelphia ought to congratulate herself that there are enough public spirited citizens with millions enough and enterprise enough to come forward and offer to do this work.

The hearings that have been had, and the representations made, show the propositions to be devoid of the defects which were presented in the gas lease proposition. The public understand this question, and will not over-look any dereliction of duty on the part of those entrusted with the legislation necessary to put such an enterprise on its feet.

ONE cause for the lack of rapid growth in our city is to be found in the fact that a great deal of real estate is locked up by provisions in wills. One of these provisions is that the property devised is not to be sold until it has reached its maximum value. The Harrison Estate is one of this kind. Improvements which are absolutely necessary are impeded, and property which is of comparatively trifling value is kept at its low limit. Some of the sites controlled by the Harrison estate are in the very centre of the city and could be made exceedingly valuable to the estate itself if the old houses could be torn down and new ones erected in their place. This is of course impossible. On one of these sites is a small two-story grocery and on the corner of two of the principal streets of the city. The estate owns that and several other buildings adjoining, 100 feet front running back 190 feet. The property adjoining that has been built upon and a six-story structure gives credit to the locality. The corner must however, continue to be a tumble-down, discreditable concern. There are scores of sites in this city subject to the same law of decay. On some of these are old buildings devoted to business uses which apart from the valuable ground on which they stand would not bring a thousand dollars apiece. Yet the old fogies who own them and the young fogies too, hang on to them year in and year out. It is not just in order to rejoice at seeing a fire come and clean out a half a block of these old shanties of brick, but when one sees fine structures erected upon their ruins they feel a compensating gratification.

In all sections of the city there are old houses bound up in some way or another and there are many properties bound up by lack of enterprise. There is a need for a general shaking up. Philadelphia is con-

trolled to a great extent by men who have been dead from ten to twenty years. They write words on paper called a will which forbids improvement for a long term of years. The struggling city must make the best of it. Its increasing business requirements must go on, but the commands of these dead men must be respected. What we want is live men and live enterprise. There is too little of it even here. There is room for much but it is not occupied. Hundreds of instances could be mentioned where business houses yield rent from $1000 to $3000 which if property improved could be made to yield double their present rental. We do not believe in chastising Philadelphia or Philadelphians on paper but there is certainly an indifference and an overlooking of the highest interests which ought to be corrected. There is very little, if any, excuse for business men and manufacturers hanging on to houses that were built thirty or sixty years ago, especially when more room is demanded. This indifference and neglect to our best interests is to be met with everywhere in the older sections of the city.

Chicago can put us to shame. There are entire blocks in that city of from eight to eleven stories high paying rentals of 10 per cent. upon investments. The answer to all this may be that Chicago can do this but Philadelphia cannot.

THE coinage executed during the last fiscal year, at the mint in this city, was of the value of $27,660,039.40, as against $18,509,280.25, for the last year. The total expense of the coinage for 1886 was $489,493.50, as against $543,581.97 for last year. There were 42¾ tons of gold coined, and 1215 tons of silver, besides 18 tons of gold and silver refined, making a total of 1275¾ tons of precious metal refined and coined during the year.

The superintendent recommends that Dr. James C. Booth, be reimbursed by Congress, for the 1980.12 ounces of silver bullion deposited by him in place of the three bars of silver stolen in 1885.

ZOLA'S NEW BOOK!—Zola in his new book has taken Artist Life in Paris as his theme, its title being "CHRISTINE; THE MODEL," and it is one of his very best productions, being full of spice, dash, vigor and originality. Claude Lantier, brother of the beautiful Nana, and son of Gervaise and Lantier of L'Assommoir, is the hero. He and Christine pervade the book, a thrilling picture of their ardent love being given. Under the name of Sandoz, Zola personally figures largely in the fascinating novel. "Christine, the Model," is in press and will be published in a few days by T. B. Peterson & Brothers, Philadelphia, Pa., by whom advance copies will be sent to any one, on their remitting the price of it, 75 cents in a letter to them.

—The Heine Safety Boiler Company, that is represented in this city by John K. Shinn, at 68 North Third street, is meeting with success in introducing the boilor made by this widely known company. It is built by six of the largest builders of steam engines in the United States, and has advantages in point of economy in space and fuel, and in avoiding the collection of scale, which makes it a boiler that will stand favorable comparison with any in the market.

BUILDERS' ITEMS.

Building and Real Estate Notes.

PUBLIC buildings are to be erected in Scranton.

A CATHOLIC CHURCH is to be built at Ardmore, Pa.

TELEPHONIC communication has been opened with New York.

PLANS are in order for the Carnegie Library to be erected at Pittsburg.

ABOUT $12,000 have been subscribed toward the Third Regiment building.

THE property S. E. cor. South and Charles streets, 21¾x80, sold for $15,000.

MARKET STREET, properties are looking up; 1623, 20x170, sold for $40,100.

A NEW hotel with forty-two rooms, and to cost $15,000, is to be built at Berwyn, Chester county.

TWENTY-FIVE thousand dollars have been subscribed for the erection of a Methodist Hospital.

THE Connecting Railway has purchased 17½ acres, N. E. cor. Thirty-third and Master streets, for $24,589.

BUILDING operations bid fair to be greater in Reading during the next Spring than was ever before known.

CONTRACTOR William H. H. Achuff has secured the contract for building a bridge across the connecting railroad at Glenwood avenue.

NEW GRETNA, Burlington county, New Jersey, is to have a new town hall. The amount for building the same has been subscribed.

JAMES VANFOSSEN has sold a building lot in Lansdale, to Josiah Rissmiller for $385. And Isaac Vanfossen has sold two lots in the same place to Reuben Kriebel and Wm. Kriebel for $600 apiece.

THE United States Supervising Architect has submitted in his estimate for repairs to public buildings, $46,000 for the Philadelphia Custom House, and $39,500 for the Post Office ventilation and repairs.

TRYMBY, REHN & CO., 1217 Market street, will next year rebuild their premises, making a fine frontage, seven-stories high, with a 40 feet frontage and running back to Silver street, 180 feet. The building will cost $100,000.

A NEW opera house is projected for Camden, New Jersey. It is proposed to purchase a suitable site 60x100; and the cost is to be raised by a stock issue. About $8000 have been subscribed, and it is said that the necessary amount can be easily procured.

A NEW bank building is to be erected on Atlantic avenue, Atlantic City, New Jersey, for the Second National Bank, just organized. George F. Currie, of Atlantic City, has been elected president, and Jesse G. Hammer, of Philadelphia, cashier.

TUINING & SON, Columbia avenue, real estate and insurance brokers, have just completed the sale of four dwellings, on Redner street, for $2,100 each. Also, two houses on Grove street, $2,300 each. And is making alterations to private dwelling, 2010 Columbia avenue and 1735, putting in store fronts.

THE Norristown *Register* says: John J. Corson, real estate agent, has sold 3½ lots on Franklin avenue, belonging to Gen. J. F. Hartranft, to Henry L. Everett, for $1340. Mr. Everett intends in the spring, to erect a handsome residence on these lots. He is at present boarding at the Montgomery House.

THIS is from the Chester *Evening News*. J. E. & A. L. Pennock, former residents of this county, and now of Philadelphia, who are building six cottages for F. M. & H. Brooke in Media, and a similar number for themselves south of the railroad, are the contractors for several houses in Philadelphia, amounting to $500,000.

H. F. HOOVER, real estate agent, who is in charge of Mr. H. R. Shock's properties, has just made a sale of two large houses on the east side of Twenty-third street, above Berks, for $4,500 each. Also, a house on Taylor street, between Twenty-fourth and Twenty-fifth street, for $2,200. Out of 85 houses built this season, 72 have been disposed of. With only $4,000 mortgage on the whole. Mr. Hoover says, he never had a better season for cash sales, and within the past 60 days, they have turned over $75,000 to $85,000 worth of properties.

W. T. B. ROBERTS, has disposed of a fine property at the corner of Seventeenth and Jefferson streets, for $16,500. Also, Nos. 1504, 1506, 1508, on Seventeenth street, for $14,000 each. These houses are all in architecture. Something quite new, and very attractive, and are built in a row of thirteen, ten of which are still for disposal, and will be tenentable in a few days. He has also sold a fine residence on the corner of Jefferson and Bouvier streets, for $11,500. And two on Jefferson street, for $9,550 each. Also, Nos. 1511 and 1513 on Bouvier street, for $5700 each.

THE experiment of enclosing a lot with canvass and heating the interior with a view of keeping the temperature inside the enclosure, at such a point as to prevent freezing, in order that the work of laying the foundation may go on during the winter months, is being tried for the first time at the new banking building, for Brown, Bros. & Co., at the S. E. cor. of Fourth and Chestnut streets. The idea is a good one if practical, and its success will introduce a new feature in building. The work is being closely watched, and the predictions of success or failure are about evenly divided.

C. H. SHOWAKER, Seventeenth and Oxford streets, real estate broker, has just completed the sale of a property at the corner of Twenty-first and Columbia avenue, for $12,000 cash, and which will be shortly turned into a store. Also, a property 1622 Venango street, Tioga, for $3,800. Also, 1425 North Sixteenth street, for $15,100 cash, to Edward T. Maguire, wholesale liquor dealer. Also, disposed of corner store, 2111 Columbia avenue and Norwood street, to Mr. P. Picard, jeweller, for $8,000. Mr. Picard has made extensive alterations at great cost. Also, disposed of 2113 to David Doyle, who has turned it into a store, renting it out for a shoe store, realizing $65 monthly. Mr. Doyle paid $8,000. Mr. Showaker has recently purchased a property from Mr. P. Barlow, 425 Walnut street, 1623 North Eighteenth street, (private dwelling), at the cost of $6,000. He has also sold a property for Alex. Rickey, Esq., 1812 North Eighteenth street, for $9,500. Mr. Showaker has still four houses on Venango street, Tioga, which are elegantly fitted up, which he offers on easy terms, $300 down and $25 a month.

COL. FLOOD, real estate agent, Diamond street, is erecting eleven houses on Diamond street, which will be completed in a month from now, they will contain ten rooms, two of which are already sold, for $6,500 each. He has also sold twenty-two houses on the North and South side of Fontain street, for $3,000, each corner bringing $3,500. They will commence to build, January 1st, 80 seven-room houses with all modern conveniences, 16x75 feet on Vanpelt street, running from Diamond to Dauphin street. They are also

erecting on Lawrence street, some very desirable properties, 14 ft. 6 in. by 51 ft. And 11 on Lithego street, (four-rooms), above Cambridge, 7 of which have just been sold, for $1,500 each, and two of the Lawrence street properties, for $2,600. Also, store and dwelling, for $2,300. Col. Flood, will in January, commence digging for as many more in the same streets. Since Diamond street has been opened, property has advanced at least, one-third, and owners are looking for a further advance.

WEST PHILADELPHIA DOINGS.

WE regret to state that Mr. Wm. Mattick is very seriously indisposed with inflamation of the stomach.

WHEN West Phila. gets the elevated road, for which its property owners are agitating, real estate will double itself as regards price.

GEO. E. GOLDBECK will, with the opening of spring, build several dwellings and stores. The dwellings will contain six rooms, with porch and front yards.

BALDWIN & MASSEY, 3911 Lancaster ave., have several choice building lots for sale. Some of them they are holding at $10 per foot, $8 being freely offered. They have very few vacancies on their large rental list.

G. W. HANCOCK, 40th and Lancaster ave., is not doing very much at present in real estate, in West Phila., but at his down town office he is quite busy placing mortgages. He has a good deal of vacant ground for disposal.

C. F. HALL, 3944 Lancaster avenue, is contemplating the erection of ten or twelve dwellings and stores of the better class. He has lately sold two lots on Baring street, for $24,000. He has but few vacant houses on his rental list. Small houses are in good demand.

AS soon as the weather permits, C. Wesley Thomas, of 3913 Lancaster avenue, is going to build ten houses, six of them on 41st street, and four on Brown street. They will be eleven-roomed houses, of good design, and first-class in every respect, and will sell for $8000 or $9000 each.

ALTHOUGH we cannot say that real estate is booming in West Philadelphia, yet things have a decided prosperous look for spring. Real estate there, has more of a standard price and is gaining nearer its valuation though property is a little too cheap yet. One of our real estate men is contemplating the erection of several stores, and has two bespoken already. More houses will go up in West Philadelphia the coming year than last. Bricklayers will be in good demand and will look for higher wages than last year. The stock of bricks at the various yards is very low, with the exception of steam-made brick. Our brick makers will not be able to produce sufficient brick the coming season to meet the demand, and we will have to look outside of Phila. for brick. The B. & O. R. R. people consumed an immense amount of brick late in the fall, and a large amount was also used for sewer work; this will in a measure account for the present low stock of bricks. There are very few vacancies on the rental lists in West Phila.; five years ago you could not walk a square without seeing one or more houses to let; to-day notwithstanding the number of new houses that have been erected you can walk for squares and not find a vacant dwelling. Money seems plenty; several of our real estate men are having cash offers for houses right along. Loans for real estate are easy: one of our firms told your correspondent that they could lay their hands on $65,000 to-day right in West Phila., for that purpose. There is a sale for all good properties in this section of the city. Some of our real estate people seem to think it is cheaper to buy houses than to build them.

Recent Decisions in Pennsylvania in Relation to Matters Concerning Real Estate.

Decided by the Supreme Court of Pennsylvania.

ACKNOWLEDGMENT.

A Notary Public cannot take an acknowledgment in another county than the one in which he resides, and was appointed.

DEED.

The measure of damages in Pennsylvania for the breach of a covenant of warranty, is the consideration of money at the time of conveyance with interest.

An exercise of the right of eminent domain does not render the covenantee liable.

LANDLORD AND TENANT.

The principal obligation on the part of the landlord, which is in fact, always to be implied from the operative words of the lease, but which is usually inserted as a distinct covenant, is that the tenant shall enjoy the quiet possession of the premises, which means substantially that he shall not be turned out of possession of the whole or any material part of the premises, by one having a title paramount to that of the landlord, or that the landlord shall not himself disturb or render his occupation uncomfortable by the erection of a nuisance on or near the premises, which the law hold tantamount to an eviction.

MECHANICS' LEINS.

The lien of mechanics and material men on buildings and for work done and materials furnished is unknown either at common law or in equity, and consequently is dependent entirely upon statutory enactments.

The lien affects only real estate, and attaches to the materials only when they become real estate by being erected into a building and attached to the land, but should the building be removed or destroyed the lien does not remain upon the land, nor upon any portion of the materials of which the building was composed.

PARTNERSHIP REAL ESTATE.

In order to make land really firm assets the title should be in the partners as a firm, otherwise the partners would be mere tenants in common, and the land, as to purchasers and creditors, would be the individual estate of the partners regardless of the funds by which it was purchased, and the uses to which it was put; but as to the partners and their representatives the land would belong to the firm in such case.

SALE.

When a contract has been entered into for the sale of lands, the legal estate in such lands still remains vested in the vendor, and it does not become vested in the vendee until he shall have received a lawful deed of conveyance from the vendor to him; and the only remedy of the purchaser at law is to bring an action on the contract and recover pecuniary damages for a breach of the contract.

In equity, however, after a contract for the sale the lands are considered as belonging to the purchaser (provided the contract complies with the law in regard to same,) and the court will enforce his rights by a decree for a specific performance, and the seller will be entitled to the purchase money.

F. R. SHATTUCK,
Attorney at Law,
58 South Third St., Phila.

Building Permits.

J. J. Lush, 518 Federal st., 1-story addition, 244 S. Fifth st., 7 ft. by 14 ft.

Haibach & Auchter, Twenty-sixth and Thompson street, 2-story machine-shop, Thompson street, between Thirty-third, 30x60.

J. M. Langton, 307 N. Twenty-fourth st., two 1-story buildings, 1110 S. Eleventh street, 15x30.

W. Charlton, 2700 Girard ave., front alterations, Twenty-ninth street, near Cambridge.

ABBREVIATIONS.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M.L.D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B.—Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E. J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J , June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

Items of News.

—James Simpson's estate is appraised at $432,199.24.

—John Consty's estate represents a total valuation of $124,200.53.

—Jay Gould, has purchased the Little Rock, Mississippi River and the Texas Railroad, for $50,000.

—The new Baltimore and Ohio Tunnel was opened on last Wednesday afternoon. Trains will be run regularly hereafter.

—The market sheds on Girard avenue need not be removed until March 1st. Those occupying stalls there made a personal appeal to have the removal postponed until the new building is completed.

—A new automatic fire extinguisher invented by William Kane, has been recently tested under the supervision of experts from the Board of Underwriters, and has proved equal to the test.

—The controller has filed exceptions with the highway department, against the bill of contractor, J. M. Mack, for paving Otsego street, between Reed and Moore streets, because the work was not done as the specifications require.

—The Terry cloth weavers contemplate the establishment of a co-operative establishment in this city. Co-operative establishments will be attempted in other branches of trade provided money enough can be gathered to make the venture.

—The City Hall Tower is now 330 feet, 1½ inches high. The last course was finished on Thursday and the tower was covered with boards for the winter. There is only seven feet three inches of marble to be laid. On top of this will come the iron work.

—William Hubert Washington, Esq., who was master in a suit brought by the city, against Robert A. Wilkinson, to settle the question as to whether ten feet of the highway on each side of Girard avenue, from the Girard Avenue Bridge to the junction of Fortieth street and Elm avenue is public or private property. Has decided against the city. This will necessitate final legal proceedings to widen the avenue at the above points.

—It is reported that Ford, Brown & Co., wholesale dry good merchants, on Market street, have purchased from Cooper & Conard, S. E. cor. Ninth and Market streets, the good will of their dry goods store, for $100,000. The stock to be taken at inventory and appraisement. The business of the new concern, report says, is to be conducted under the firm name of Cooper & Conard, and Haines, Granville B. Harris, Esq., to be general manager of the business.

—On last Wednesday the Councils' Committee on Water Works met and heard the report of the Sub-Committee that was appointed to inspect the filtering springs at Summerville, N. J. and Wilmington, Del. The report set forth—"That the waters, of both the Schuykill and the Delaware at all times, contain a certain amount of impurities and sediments is universally admitted, and that after a heavy rain they are objectionable both to the eye and the taste cannot be gainsayed. Moreover, complaints have been made to your body recently of the dangerous condition of the water pumped at the Kensington Water Works, and a large section of the city is now supplied from the Spring Garden Works by pumping directly into the mains.

"The engineers of the filtering companies and the Chief Engineer of this department have informed this committee that it would be practicable to put up a filtering plant at the Spring Garden Works at a comparatively reasonable cost, owing to the existence of the forebay there, and your committee would recommend, therefore, that the Chief Engineer of the Water Department be instructed to ask for proposals for the erection of a filtering plant at this point, and also for the erection of another plant at the Kensington Water Works." Two other filtering machines were examined — namely, the Crocker, at New York, and the machine made by the New York Filtering Co. Both companies were anxious to put their machines up and try them before being paid for them. The probable cost of the filtering plants contemplated at Kensington and the Spring Garden Works is $150,000. Another meeting will be held in a few days to further consider the matter. Purity of water is very desirable, but the fundamental difficulty in the way is the deficiency of supply.

Charters Granted.

The Anchor Building and Loan Association, of Mansfield, Alleghany county, capital, $100,000. The William H. Lorimer Sons' Company, of Philadelphia, for manufacturing textile fabrics, capital $20,000. Columbia Avenue Saving Fund, Safe Deposit, Title and Trust Company, capital, $250,000; the Directors are George S. Graham, Barclay J. Woodward, James Strong, John K. Cuming, Robert A. Jacob, James A. Hayes and John Middleton.

The Gallitzin Building and Loan Association, of Cambria county; capital $1,000,000. The Good-Will Building and Loan Association, of Pittsburg; $800,000. The Christiana Rolling-Mill Company, of Philadelphia, capital, $20,000. The Verona Building and Loan Association, of Verona, Alleghany county; capital, $500,000. Pittsburg Novelty Manufacturing Company, of Pittsburg; capital, $25,000.

Century Building and Loan Association, of Philadelphia; capital, $600,000. Nay Aug and Crosstown Street Railway Company, of Scranton; capital, $50,000.

The Pennsylvania Iron Works, of Philadelphia, capital, $150,000; the directors are Martin Maloney and W. L. Elkins, Jr., of Philadelphia, and B. W. Geist, of Reading. The Jordan Waxed-Paper Company, of Philadelphia, capital $50,000. The O'Shanter Coal Company, of Clearfield, capital, $18,000.

The Chartiers Electric Light Company of Alleghany county; capital, $1000. The Mansfield Electric Light Company of Alleghany county; capital, $1000. The Mountain Water Company of Pittstown; capital, $13,500. The Shader of Gas Coal Company of Pittsburg; capital, $250,000.

Charters Granted in Four Years.

A search through the records in the office of the Secretary of the Commonwealth at Harrisburg reveals the fact that letters patent were issued to a greater number of corporations during the four-year administration of Governor Pattison than during the preceding period of nearly ten years. The figures showing the number of corporations created under the General Corporation act of April 29, 1874, and its supplements are as follows (excluding railroad, street railway and insurance companies):

From April 29, 1874, to Jan. 16, 1883.....1576
From Jan. 16, 1883, to Dec. 1, 1886.....1672

Excess by present Administration..... 96

In addition to the above, 119 street railway and railroad companies and 33 insurance companies have been chartered within the last four years. In view of the great increase in the tendency toward the use of public franchises, would it not be wise to consider the advisability of putting some limitation on this wholesale manufacture of artificial persons?—*Philadelphia Record.*

Pennsylvania Earnings for November.

The statement of the business of all lines of the Pennsylvania Railway Company, East of Pittsburg and Erie, for November, 1886, as compared with the same month in 1885 shows:

An increase in gross earnings of.....$375,679
An increase in expenses of..... 465,243

A decrease in net earnings of.....$89,564

The eleven months of 1886 as compared with the same period of 1885 show:

An increase in gross earnings of.....$4,382,509
An increase in expenses of..... 2,797,276

An increase in net earnings of.....$1,585,233

All lines West of Pittsburg and Erie for the eleven months of 1886 show a surplus over all liabilities of $22,455, being an increase as compared with the same period of 1885 of $1,187,646.

—Floating bricks are now manufactured in France, the material of which they are composed being a kind of earth found in Tuscany, consisting of fifty-five parts of sandy earth, fifteen of magnesia, fourteen of water, twelve alumni, three lime and one iron. It exhales a clay-like odor, and, when sprinkled with water, throws out a light, whitish smoke. It is infusible in the fire, and though it loses about an eighth part of its weight its bulk is scarcely diminished. Bricks composed of this substance resist water, unite perfectly with lime, are subject to no alteration from the heat or cold, and the baked differ from the unbaked only in the sonorous quality which they acquire from the fire. Their strength is a little inferior to that of common bricks, but much greater in proportion to their weight.

—The aggregate assessed valuations of the several railroad companies in New Jersey are as follows: Pennsylvania, $59,590,474; Philadelphia and Reading, $47,535,789; New York, Lake Erie and Western, $12,275,408; Delaware, Lackawanna and Western, $38,907,606; railroads not classified, $34,671,064; total, $192,980,341. The State Board of Assessors have fixed the taxes for the year for the several companies as follows: Pennsylvania, $394,524; Philadelphia and Reading, $321,921; New York, Lake Erie and Western, $104,785; Delaware, Lackawanna and Western, $264,617; unclassified, $251,416. The increase in the total tax over last year is $21,000. Each of the companies must pay a little more than last year.

—The financial statement of the Western Union Telegraph Company for the quarter ending December 31st, partly estimated, showed that the net earnings were $1,000,000, a decrease of $250,000 as compared with the same period in 1885. The balance, after making interest and sinking-fund payments, was $856,530, a decrease of $249,702. No dividend was declared for this quarter, so that the surplus is now $6,180,791, an increase of $1,843,691. It is said that the net revenue for this quarter was the smallest ever reported by the company.

JOHN N. GALLAGHER, Prop'r.

Refers with permission to William M. Singerly, Proprietor of Phila. "Record."

PHILADELPHIA, MONDAY, JAN. 3, 1887.

SOME of the architectural and building papers are pointing out to the benighted people in their respective communities what they want. It is surprising how much a live editor can see a community wants in the way of improvements. It would appear that the country has been surrounded with impoverishment of one kind or another, that it had made no progress, that it had made no improvements, that the spirit of enterprise was dead, and that it was relapsing into barbarism. We read a great deal about "what Boston needs, what St Louis needs, and what Chicago needs" and so on, and we believe we have been somewhat guilty ourselves in talking about what Philadelphia needs. It is a commendable weakness, however, and we hope our friends will forgive us if we have laid out too much work for our councils and the community generally to enter upon. This is the season when new and good resolutions are taken and the past is reviewed. We, of course, see that Philadelphia needs a good many things she is not likely to get, and the politicians have also occasion to regret that there are some things they are not likely to get. For instance, the control of the Gas Works for a quarter of a century. Still, we have every reason to rejoice at the turn of the year. Whichever way things go we are better off. We need a great deal more than we will likely get during the next five years, but a spirit of enterprise is thoroughly aroused. We find cities to the east and west of us forging ahead, and we feel the urgency upon us to do more to make our city better and to attract capital to it as well as to retain what we have. It has been remarked that there is a tendency in local capital to leave the city. A dozen or so firms have made this departure. There is no deep-seated cause for such a course. It is true we may ask more for anthracite coal than we ought to; it is true we have not the railway facilities that we ought to have; it is also true that a great deal of valuable property is controlled by dead men and men who ought to be dead but after all we have the superabundance of young blood, young brains animated with the spirit of energy which will overcome obstacles just as fast as pluck and energy can overcome them. The general public is being educated to a broader comprehension of the possibilities in store for it. We will, no doubt have a better class of councilmen, a better class of officials. These improvements will be followed by a more careful consideration of the public interests. Jobbery will be less prevalent. Honesty will be more common.

No one can foresee the future of Philadelphia. London has grown enormously within the past few years; so has Paris. Chicago now claims over 800,000. New towns and cities are springing up, and old cities are expanding. The advantages of centralization are recognized on all hands, A diversification of industries is going on in the cities and throughout the country which is laying a broad foundation for our future industrial growth. Philadelphia has no need of fearing that she will fall behind other large cities. The spirit of enterprise which is manifesting itself will multiply her opportunities.

THE technical associated press is well spoken of by some of the Western Journals. The annual convention of the Missouri State Association of architects will be held on the 11th of January.

THE Society for the Prevention of Cruelty to Animals is asking for more money and its request will no doubt be met with a cheerful response. The field for this organization is a grand one, but it fails materially in its purpose from the fact that it does not seem to be in the hands of practical men and women. An amusing circumstance expressing this idea occured on Market Street quite recently. A horse driven before a hansom became stubborn and refused to go, petting and coaxing were of no use, the vehicle was for all purpose stationary, to the detriment of travel and the annoyance of drivers, a number of whom by sheer force pushed the horse and hansom along, when the horse suddenly threw himself upon his side in the mud of the street. A lady standing on the sidewalk immediately protested against the horse being disturbed as he was tired and sought rest. She announced herself as a member of the Society for the Prevention of Cruelty to Animals and threatened the severest punishment on behalf of the society to anyone who disturbed him. She was laughed at, of course, and the horse was made to get up and with the vehicle was taken out of the way. It is these cases of frivolous interference that makes the Society seem ridiculous, while on the other hand the most flagrant outrages and cruelty are perpetrated under the very noses of the Society and to the disgust and annoyance of persons who make no claims to super-sentiment. We mean the over-loading of horse cars, daily the poor animals, particularly those hauling the cars going north, are over-loaded and on slippery pavements and up a heavy grade, they are strained and tortured, and all in the interest of the passenger railway companies, that are legally bound to provide sufficient cars to meet the ordinary requirements of travel. We would suggest to this extremely well petted organization, that its subscribers, patrons and the public generally have a right to expect something better than the arrest of some impecunious and defenseless old man, who at his best can barely eke out a subsistance for himself and family because of a trifling sore on his poor old horse's breast. There is better game, Mr. President, and good round benefits can be obtained to the satisfaction of the public and the fattening of the Society's exchequer by fines, etc., through the arrest of drivers and conductors who over load their cars, and this besides helping the poor horses will compel the officers of street railway companies to pay more attention to the wants of the traveling public.

IF boycotting and other outgrowths of labor combinations can justly be regarded by the courts as conspiracies and the humble workingman who enters into them can be held criminally responsible, under what code of ethics or law are corporations who form coal and oil combinations to be excused? They cruelly and unjustly by behest or subterfuge, inflict upon thousands of families misery and suffering through their greed for gain. If there is a law against the workingman's combinations, the same force that is used to make it felt should also take cognizance of the wicked and all powerful influences which practically drive him to the wall and in self-defense, compel him through sheer desperation to resort to force. The strong arm of the law, while disciplining laborers should with equal force bring to strict account those transgressors who flirt with the blind Goddess of Justice as though her intellectual vision extended no further than the workingman.

THE profession of the architect is growing to be a more important one, year by year. The architect of a few years ago was simply a man who could estimate the cost of a house and supervise its construction, seeing that justice was done to the owner. Now, much more is required. The advancement we have made and are making in steam plumbing and other directions calls for a great deal of special knowledge and fitness which cannot be had without the closest study of current architectural and building literature.

WE believe we do not state what is incorrect or, exaggerate when we say that we are on the eve of a general improvement in architecture. The ordinary architect, he who possesses no genuine originality, can controvert this statement in a dozen words, in one word in fact. The studious architect, he who loves his profession, sees that there are grand possibilities before it and before those who have a keen perception of the beautiful in nature and in art. The growth of wealth has made it possible for architecture to develop itself, For decades past, the first thought and the last thought has been with the busy American, to get up walls and a roof at the cheapest cost. The idea of even convenience was secondary. Economy and utility guided all building operations. To get the most out of a dollar in brick and mortar, was the first thought and the most successful architect was the one who did so, and the most successful builder rested his reputation upon his ability to make his employer's dollars go far. All that is passing. The increase in wealth is bringing into sight a different class of ideas. We are becoming a nation of travelers and of readers and of students. We are becoming more observant of the beautiful things abroad and at home, and are endeavoring to rise in the scale of progress by the equalizing of the ideas and the works of others. This is a healthy sign. At first the departure from primitive simplicity was observable in churches, then in other public buildings. We have not yet tried to make the schoolhouses look what they ought to be. Individuals have liberated themselves from old cast iron ideas,and have of late years been splattering architectural ability over their residences with more profusion frequently than goodtaste. Still we are making progress, and at the same time making mistakes, but it is only through the making of mistakes that we educate ourselves. Were there no serious architectural mistakes committed, there would be no room for the pungent criticisms that are made.

The indications of improvements are numerous. We have seen an originality develop itself among American architects of a most promising nature. It possesses the peculiar features which only the influence of American life can give it. It learns from foreign masters. It sees the beautiful in everything which the experience and culture of foreign architects raise as monuments for our study. The increase of wealth will stimulate this tendency, and no doubt will in time, furnish us with a class of architects far superior to any that have arisen in Europe during the past one hundred years. Centuries ago when labor had no market value, the architects and builders erected piles, which remain to this day an honor to their age and a credit to the genius which devised them. We are returning to such possibilities. Labor now is the chief factor, but with the aid of machinery and mechanical appliances and the development of wealth, we are more and more able to realize the ideals which a higher architectural education is creating.

MR. WILLIAM S. HUEY'S scheme for a railroad in Fairmount Park, is the most practical proposition that has been submitted to the Park Commissioners. The necessity for this or some other railroad that will afford visitors cheap transportation through the Park, is becoming more apparent every year. The many beauties which the Park posesses, are realized by very few persons owing to the want of cheap transportation. This new road if built, will render the Park more attractive, and will enable those who cannot afford a carriage ride to at least gratify their desire for change.

MR. E. M. NEEDLES, president of the old Penn Mutual Life Insurance Company of this city, is justly indignant over the insinuation made as to the unfair treatment on the part of his company, in cancelling General Logan's life insurance policy for $5,000. Mr. Needles says that the General had his life insured in that company on July 8th, 1881, that he was at the time 55 years of age, that the annual premium was $309.00, payable quarterly, that on June 8th, 1886 the policy lapsed for premium then due, that repeated and continued efforts were made to get the General to continue the insurance, and that the company had even offered to accept his note, for the premium and that a receipt for the premium had been twice sent out, in the hope that the General would maintain his policy. It is very evident from this statement of facts, that General Logan had no desire to continue the insurance upon his life with the Penn Mutual and it is simply absurd to attempt through any stretch of fancy or morbid sentiment, to hold the company responsible for the cancellation of the General's policy, when it is self-evident that he did not want it continued under any circumstance.

THE system of wants and offers in operation at the New York Exchange leads to a great deal of business that would otherwise remain undone. During the past week some thirty or forty wants were bulletined calling for property ranging in value from $10,000 to $100,000. Double as many offers were made of properties in all sections of the city, running up as high as $100,000 each. This is a valuable feature of the Exchange, and is constantly bringing properties into market. The effects of this system are good. People can soon find out what their property is worth. If they want to, they are at liberty to withdraw their offers, and are not obliged to accept anything they do not want. The membership of the Exchange is increasing week by week. A real estate property owner who is not in the Exchange is a small potato. The past week has been rather dull in our sister city in real estate. Special sales have taken place, and a good deal of property has been sold at auction. During the past week ten new buildings were projected at a cost of $136,000, against fifty last year, at an estimated cost of $339,000. Austin Corbin, the Reading President, bought a $165,000 cash-down price house at 38th and 5th avenue. That settles the fact that he will not be a Philadelphian. Quite a number of high-priced houses have been sold lately, ranging in price from $20,000 to $80,000. A great deal of property is changing hands. During the past week sixty houses were projected in Brooklyn at a cost of $260,000, against seventy-four for same week last year, at a cost of $293,000.

The builders are doing a good deal of work and are preparing for a good deal more. The real estate agents are buying up vacant property for building purposes, and the New York architects are credited with having considerable work on hand for spring operations.

THE discussion of the dower laws in New York draws the fire from an old bachelor, who says that he would not marry the best woman in New Jersey and take the risk involved in getting her to sign her name to deeds of property which he might want to sell. He says that in New Jersey large owners of vacant lots always get up land corporations which can be got up by three persons. It is by these corporations that they retail the property by the single lot; by this process no woman's signature is needed only the president and secretary sign the deed. There is a strong feeling in New York in favor of doing away with the law of Dower and courtesy and certainly the arguments made by those who have engaged in the discussion are in favor of their abolishment.

THE theory of Henry George which proposes to place all taxation on land is finding some apologists and adherents in unexpected quarters. Real estate dealers and owners are beginning to recognise that if the present system of taxing improvements can be done away with it might and probably would have a very encouraging effect upon those whose interest it is to improve real estate, providing that they are not taxed out of existence in consequence. An address was recently delivered by Mr. Thomas J. Shearman to the Twilight club of New York wherein Mr. Shearnan takes rather decided ground upon this new question; Mr. Shearman says that after a careful inquiry he believes it is to the best interest of the country and people if all taxes were concentrated on Land.

Mr. George says that the taxes to be levied upon lands should be high enough to absorb as much as nine-tenths of the ground rent thus leaving the landlord but one-tenth of his receipts as payment for his management or ownership. Mr. Shearman does not go so far, but believes that the taxation upon land should be reduced to one half of what it now is. The evils and inequalities of our present system, continues Mr. Shearman, are so many and so manifest that it is the unanimous opinion of all who have studied the subject that a radical change is necessary. In order that our readers may fully understand why such a man as Mr. Shearman should advocate a system which we all have been accustomed to denounce ; we will allow Mr. Shearmau to speak for himself in the following paragraph :—

"If this system were adopted, one of the first advantages, would be the abolition of the present inequalities in the assessment of taxes. Every experienced assessor can readily appraise so many feet of land in such and such a locality, and the estimates of a score of experts would probably very nearly agree. But when the element of improvements to the land enters their calculations, then is it that the assessors cease to agree and appraise two equally valuable pieces of property at widely different figures. In many cases this error is due to carelessness or lack of thorough inspection on the part of the assessors.

"Under a system of taxation in which the value of the bare land was the basis for assessment of taxes all of these evils would be eradicated, as everything taxable would be in plain sight, could not be concealed, and could be appraised almost at a glance.

"According to the present system, if A and B own adjoining lots on Fifth avenue and B erects an imposing structure on his lot while A puts up a wooden blacksmith shop, B is forced to pay a heavy assessment for beautifying the avenue and increasing the value of property in the vicinity, while A, who does everything he can to ruin the value of property about him, is practically encouraged, by being assessed next to nothing, to continue in his work of evil doing. Under the system of taxation on the bare land both men would be desirous of building handsome structures, as such buildings would greatly increase the value of their lots, and would at the same time involve no additional taxes.

"The new method of assessing taxes would do away with all customs duties, internal revenue exactions, and false swearing on the part of owners of personal property. By a more even distribution of assessments on real-estate and the additional taxation upon unimproved land, the rate of taxation on improved property could be reduced 50 per cent., I believe, and when the system was once adjusted and in working order it would soon meet with favor at the hands of all classes. I have large investments in real estate and am naturally opposed to any revolutionary measure which would tend to disturb the present balance of society. But I have carefully studied the system of concentrating all taxes upon the land, and, after a thorough consideration of the advantages and disadvantages which would result from its adoption, I am satisfied that the measure would prove beneficial to society at large, and a great improvement over our present burdensome and unequal system of taxation."

—At the last regular monthly meeting of the Architectural League it was decided to give an annual dinner at New York.

THERE is certainly trouble ahead for the boys who by the time they reach man's estate, will find women largely filling those fields of labor now creditably filled by their fathers. That women are largely catching on to the business methods is apparent everywhere, and the coming generations of women will be prepared to enter the field against men in many business pursuits which she has not yet considered available. The idea that women are handicapped with matrimonial considerations and consequently cannot reach that efficiency that men so easily attain is mere nonsense and disproved by the fact that there are hundreds of business men right here in town, who employ women in responsible and confidential business relations, who would not exchange them for men for any consideration. When it is considered that it is quite a new thing for women to fill business positions, requiring judgment, tact and an acquaintance with business routine, it does not seem at all wonderful that there are so many women who fail, but time and our business colleges will correct this, and when the possibilities increase as they surely will, there will be found capable women enough, whose education will be based on something more than a smattering of accomplishments.

The trouble now experienced arises from the inadequate education of women seeking business positions. Type-writing as an employment necessarily requires something more than skillful manipulation of the keys, yet there are very many who attempt to fill these positions who cannot spell the simplest words. So too with stenography, it is not enough to be able to write and read the signs, for a business man has a right to expect his stenographer to possess the requisite intelligence and education to complete the letter after he has dictated its outline. The next crop of girls will recognise the fact that writing, spelling and arithmetic are really the foundation stones for business positions, then boys look out.

THE Birmingham Alabama *Daily Age* says: "there are thirteen furnaces in process of construction and ten actually projected, the building of the latter to begin as soon as the former are completed. Of the furnaces building eleven are within a radius of ten miles of Birmingham, the other two being at Sheffield. Of the furnaces projected, six are within a radius of ten miles of Birmingham, and three will be located at Sheffield and one at Florence. The *Age* estimates the annual capacity of the furnaces now in blast and projected at $872,860 tons, and of plants projected 357,000 or what will altogether very soon assure the Birmingham or Alabama district output of a little less than 1,200,000 tons of iron."

The above statement coming as it does, directly from the home of Pennsylvania's great competitor for the iron trade of the country, presents no very encouraging outlook for the future of Pennsylvania's furnaces. While no great harm has yet been done to our home interests, and while the demand is sufficient to consume the present entire output of both sections, serious results need not be apprehended, but it is very evident that the future prosperity of our home iron interests is to be impaired by the wonderful resources of the South, together with its cheaper labor and cheaper coal. The question is too serious a one not to merit the earnest consideration of every thinking man in this State. It presents so many phases of our commercial wealth and prosperity, so much of our wonderful prestage as the Iron State that our future growth and magnificence are seriously involved. It brings us face to face with the question of transportation and places under the ban of condemnation the policy of our home railroads and coal companies, which have by discriminations and combinations, squeezed the life-blood from our commercial and manufacturing veins, driving our capital and enterprise to less hampered fields and practically as well as theoretically driven the entering wedge which must separate us from those cherished industries which have characterized the Keystone State.

Right here and now we say this influence which is robbing us of our wealth and making paupers of our workingmen must be stopped. The suits brought by Attorney General Cassidy in the name of the commonwealth against these railroad and coal combinations must go on, manufacturing must be fostered or when it is too late, the people of this great State will look upon the grandure of the past as a thing to come again nevermore.

ATTORNEY GENERAL CASSIDY notwithstanding the prophecies made at the time of his appointment, has really done more for the people of this State than any of his predecessors in office for the last twenty years. If his successor does half as much, he will meet the thanks of the people of both parties.

THE sum total of the fire loss in the United States for 1886 is simply appaling, official figures have not yet been submitted, but it is estimated that it will reach a cool $120,000,000. How long this sad and sickening waste is to go on without some concerted effort on the part of our law-makers and fire insurance companies being made to prevent it, baffles even the best guessing qualities of the average Camden lawyer. It can safely be said that if common sense had been exercised in the construction of the large buildings that have been consumed by fire during 1886, the loss would have been very much less.

Reconstructed buildings originally intended for quite different uses, are generally entirely consumed when attacked by fire, because it is impossible to stay the progress of the flames on account of the many avenues for the smoke to gather in. When it is considered that smoke is composed of unconsumed carbon mixed with hydrogen, it is not at all strange that it soon becomes a dangerous conductor of flame, or even flame itself, and as a natural consequence, the structure is doomed. Indeed, there are fre-

quent explosions which often take place in such cases, said to be unaccountable, which are caused by the sudden ignition of closely confined smoke. Legislation should be brought to bear upon this subject, it might be well to enact laws forbidding the altering of old structures into places of amusement, lath and plaster partitions should be prohibited by law and metal should be used for joiner work when possible, and if not possible, then wood only after it has been rendered incombustible, in fact, wood should not enter as a part of the material used in the construction of large buildings at all, for it is not only possible to do without it, but even equal effect and finish can be produced by the metal worker. and it is a question if metal cannot be substituted for canvas and wood, even in the scenery of the theatre.

BUILDERS frequently have a very loose notion as to the amount of weight a wall should carry. Accidents of a serious nature have sometimes arisen because walls have been overweighted and simply from ignorance of builders. The importance of employing architects has been demonstrated on more than one occasion where warehouses were to be built but which were built without the employment of proper skill. The Western Association of Architects decided that the owner of a building built by one of their members should be supplied with full data of all official points involved in its construction. The owner would then know the strength of his building and its real value. It is more customary now than it was a few years ago to have the capacity of buildings for carrying weight carefully ascertained.

THE architects of Chicago are favored with an unusual amount of work for this season. Employers who have occasion to engage large numbers of men especially in the building trades, will begin to feel easier over the labor prospects for the coming year. As long as one powerful organization threatened to absorb all others and sweep all opposition before it, there was a feeling of unrest. The strength of this movement developed the latent resources of another organization that has been powerful within narrow limits, namely the old trades unions which have existed in one shape or another for the past two or three hundred years. The trades unionists are as a class a more intelligent body of men and have but one single object in view, namely that of increasing wages and providing for the present wants of unfortunate fellows. The trades unionists have been stirred to active effort and at their recent Columbus Convention showed a surprising force both in numbers and intelligence. They took action at that convention which points in two directions, first in the direction of consolidating their own membership into a more powerful organization and second in protecting the interests of employers through a more conservative action. They are not openly opposed to the Knights of Labor or their methods but in conserving their own highest interests they will act as a check and control upon the impetuosity of that organization which for a time threatened to sweep everything before it.

WE observe that architects are becoming a little more particular in the collections of bills for services when rendered. There is a class of people who think the architects like to work for the fun of it, and can spend days or weeks on plans for structures without any promise of pay. It is rather surprising that so many people are ready to take advantage of an architect's skill and hard labor. If they call in a physician they expect to pay him, but for some reason or other and architect is an exception. The profession, however, is beginning to assert its dignity and to demand pay for services rendered. It is always necessary to make a bargain at the outset and not depart from it.

HOW long will our present street car facilities answer with a growth of 7000 houses per year, and an increase of population of no less than 30,000. Already real estate has received a check because of lack of rapid transit facilities. Real estate agents know there are large blocks of property that would be cut up very shortly for building purposes if people could go to and from homes that they would erect in such places. Travel on our steam roads is not convenient to the bulk of the people. They do not want to be tied down to time tables but want to go and come as they please as they can on street cars or elevated roads. It would be a nice calculation to show just how much thirty or forty square miles of real estate within building distance of Philadelphia would be improved, nominally at least, if ten or fifteen million dollars were expended in elevated and underground railroads.

IF things go on as they have been going the insurance interests of Philadelphia will advance their rates. A large section of the city is already paying a high insurance tax because of deficient water facilities. Other sections of the city will shortly be submitted to a similar tax. There is no reason for this excepting that we do not seem to care. Rates of insurance are high in Boston. In fact the *Manufacturers' Gazette* of that city says that insurance is one of the most grievous of their expenses. Along some of the principal streets two and three per cent. is a very common rate. In one building a floor has been vacant for over a year simply because there cannot be insurance enough secured to cover the business that would be likely to occupy so large a place. A number of property owners say they have been obliged to reduce their rents in this locality because of the advance in insurance rates. The *Gazette* goes on to say:—

"We think that, if property-owners, when building, would leave their brick walls unsheathed, brick both sides of their stairways and put in iron stairs, brick up their elevators and have tin-covered and also iron doors into these wells, grout the floors so that water could not run through, and then decline to cut holes through the walls to connect with the next building to accomodate a tenant, all this property would be written for one per cent. Every building devoted to manufacturers' purposes ought to be inspected weekly by either the fire or protective departments, and when negligence in cleanliness and disregard of the building laws is found, on the spot, with the evidence in view, the owner should be fined. Recently, passing through the by-ways of our busy centre, at the back door of a six-story building, in which over two hundred men and women were employed, with an unprotected elevator-well going up beside a wood-cased stairway, boys were packing straw-stuffed barrels at the entrance, and a man loading slatternly-tied bags of book-binder's trimmings. The boys were smoking cigarretes and the teamster a pipe. The building is a two per cent. risk, the largest tenants short insured, and this peculiar exposure an almost daily occurrence. The bottom of the elevator-well, the engineer said, had never, to his knowledge, been swept out, and the appearance of things confirmed his statement."

J. F. HOBART, whom every mechanic knows, talks more solid sense to the square inch than any man who attempts to write on mechanics. In a recent dash of his pen he says something which a good many employers will agree to.

"Lazy men run all sorts of risk in putting on belts, in fooling around moving machinery, and in monkeying with running tools, such as circular saws, planers and moulders. The man who crawls around exposed machinery to oil or clean the same, when he can just as well stop the machine before exposing himself—this man deserves to be sent up for ten days for every offence. Only a few days since, a party of masons were building a 100-foot mill chimney. They had got up eighteen feet when all at once the whole party thought an earthquake had come to help them. They were all on the ground among bricks, mortar and splintered lumber, with two of their number seriously hurt. An examination showed that in nailing on the last course of ledgers only one nail had been put into some of the posts, where six should have been driven. Here was a clear case of laziness and foolishness combined, with the poor consolation, to the victims at least, of knowing that only themselves were to blame. Sometimes this carelessness becomes criminal, and is occasionally brought to justice, and lately where knavery is the cause of accident it has been frequently severely punished. There is no excuse for exposure to such accidents, and every man can educate himself out of it if he will."

The Record's New Almanac.

The Philadelphia *Record* is on top again with its new almanac for 1887. It is a valuable book, worth keeping, for it is a casket of statistical gems, garnished with the sunshine of art.

ONE corporation in Philadelphia has over $100,000,000 at interest. That corporation escapes taxation on that investment, while every individual is compelled to pay $3 per annum on every $1,000 that he lends on interest.—*Philadelphia Record.*

Communications.

PHILADELPHIA, Dec. 24, 1886.

EDITOR REAL ESTATE RECORD:

The success attained in the housing and transportation of the inhabitants of any city, is the measure of its importance as a business centre, and these facilities are a benefit to the humblest inhabitant.

The tendency of the people of the world is to live in villages, towns and cities, as the percentage is increasing each year. The most successful business cities of the world are those where great numbers of people are housed in small areas, in other words, centralized. To provide accommodations for living purposes, tenements and flats are brought into requisition, and the buildings are usually of great heighths and many stories. When to these accommodations, are added some system of local rapid transit together with that of surface railway lines, the results are a great city.

When either of these facilities are lacking, a decline in population or business is inevitable. Paris has lost 120,000 of her population in a decade, and New York City lost 87,300 of her population between 1860 and 1865. Any city whose ratio of increase per annum is less than 5 per cent. is laboring under some disadvantage, and if the remedy for the disadvantage is not soon found and adopted, that city is on the decline.

The need of Paris to check her decline and recover her old standard of healthy growth and increase, is rapid transit. Now we are creditably informed she has given the right to a company to build thirty miles of subway railroads, encircling and ramifying the city, accommodating the greatest number of inhabitants, by the routes chosen.

New York City as another example, recognizing the cause of her decline in population and business, to be the need of a quicker mode of transit, she permitted in 1872, the construction of elevated railways, and in 1878, the entire system was finished. The benefit to the city was felt soon after the commencement, business improved, and the population has grown steadily until the natural 5 per cent. increase in population per annum has been recovered.

The results of the elevated railways in New York City are not what was anticipated by the citizens, and the municipal authorities, for after a period of eight years their usefulness as a means of rapid transit, is being daily impaired, as they cannot increase the speed of train nor increase the number of cars to trains as the structure is not sufficiently strong to permit it. The accommodations are as wretched as the horse cars were when they instituted these structures, and the distance covered in one hour is only ten to twelve miles, if there are no blocks, fogs, fires, slippery rails, etc., which constantly reduce that speed. New York City has ruined the appearance and grandeur of her fine thoroughfares with iron trestles for a temporary expedient offered to travel, for the elevated railways cannot accommodate the traffic offered to them, and now she must look to subways for relief. These are promised, and early next year it is expected construction on them will commence.

This "City of Homes," is also a city of great opportunities, and among them are the needed facilities for local rapid travel. The streets are as a rule too narrow for elevated railways, while the grades and formation of her sub-soil show the adaptability to a subway system. Among the very many reasons given for rapid transit, none are more important than the reducing of distance by speed, and thus removing the natural embargo which exists between the built up sections of the existing city. Travel will be augmented, and instead of relying on letter writing, telephone, etc., visits will be made between the manufacturer, the merchant, the professional man, etc., and an impetus will be given to business whose benefits will extend to all of our citizens. The proud boast of our system of separate housing will be preserved, as the distance between all sections will be trifling, due to the rapid conveyance of our people. Prospective settlers, buyers, visitors, and others will no longer ignore our city, but will add to our greatness by their presence which we need, for be it remembered only 18½ square miles are now built up, while, we have available 129 square miles.

JOHN J. DEERY.

On and Near Columbia Avenue.

Columbia avenue within the past two years has shown considerable improvement, and from all that real estate men can see, they predict that in the near future it will be the up-town Chestnut street of the city. It has already its bank—"the Tenth National"—which has found its capacity insufficient to transact its growing business, causing it to seek more commodious premises, which it has succeeded in finding by purchasing the hotel at the southeast corner of Broad street and Columbia avenue, together with the adjoining house on each side, for which it paid the sum of $35,000, and will at an early date build a fine structure. Then we have the Bank of America, which has recently established itself at Twenty-third street and Ridge avenue, and, from what we are told on good authority, early next year we shall see what will be called the Columbia Trust and Title Company, which, from what the up-town people say, will stand well to do a flourishing business. Within the past twelve months, Columbia avenue between Broad and Twenty-third streets has undergone some very great changes, at least 50 of the private dwellings having been turned into stores, and in every case have been a success; and it is anticipated that next year will change as many, if not more. Properties between Broad street and Ridge avenue are held very firm, with the prospect of advance. To give an instance: in September last a property was sold for $6,500, and to day $8,000 will not purchase it. Daily inquiries are being made for properties, and on evening walks you may find speculators in real estate surveying properties by moonlight, estimating what they will give for this or the other, if they can get it. Corner stores in this immediate neighborhood are worth from $11,000 to $15,000.

It is stated by one of the oldest real estate men in the immediate vicinity that within the past eighteen months properties have gone up 40 per cent. Within the past few months many of our city tradesmen have taken up properties on the avenue, and opened up some very attractive stores, enabling the up-town people to purchase their goods equally as cheap, and with as fine an assortment as though they took the usual 35 to 40 minutes' inconvenient ride to the city. So far as can be learned it is evident that they want a more expedient mode of traveling to and from the city; and we can safely say the majority are in favor of the underground project, at least ten to one in preference to the elevated.

The Four Mills Tax Case.

The suit brought by the Girard Trust Company against the Board of Revision of Taxes and the assessors of the Eighth Ward, to prevent the collection of the State tax on the assets of that Company, has been decided by the master, Samuel W. Pennypacker, —to whom the case was referred—in favor of the Company. The companies have always held that all corporations practically pay this tax in paying the tax upon their capital stock. The Supreme Court of the State had already decided in favor of the corporations, but the Commonwealth in this case sought to show that the construction placed upon the law was practically un-constitutional inasmuch as it violated a constitutional provision, that all taxes shall be equal and that the $86,732,250 composed of securities held by the companies yielded under the constitution only 1½ mills on each dollar of assets, or 2½ mills on each dollar of property; whereas an individual must pay a tax at the rate of 4 mills. The master held that the Supreme Court decisions must govern the case.

Making Wood Fireproof.

Many methods have been suggested for rendering wood used in the internal construction of buildings fireproof, but the trouble is so great that it is a question if any of the many methods will ever be generally utilized. To impregnate wood that is intended for building purpose as while in the rough would perhaps necessitate special tools for working it, and it might even prove to be a difficult matter to work it at all. The following recipe is reccommended by a contemporary, but whether it will ever amount to anything more than a simple recipe remains to be seen:

Soak 27.5 parts by weight of sulphate of zinc, 11 of potash, 22 of alum and 11 of manganic oxide in lukewarm water in an iron boiler, and gradually add 11 parts by weight of 60 per cent. sulphuric acid. The wood to be prepared is placed upon an iron grating in an apparatus of suitable size, the separate pieces being placed an inch apart. The liquid is then poured into the apparatus, and the wood allowed to remain completely covered for three hours, and is then air-dried.

It can be seen at once that the above, no matter how good, is simply impracticable. What we need is some material that can be applied to the surface of the woodwork after the building is constructed. It must be a positive preventive, and must be colorless, or the present popular hard and natural wood finish will necessarily be impossible.

The Material Market.

The lumber market has gained a little strength within the past few days on account of the coming in of inquiries and orders for winter work, which were rather unexpected to the trade at large. The holidays are not usually days of activity in lumber or building material of any kind, but some special offers were made and accepted by a few of the large builders who have recently come into possession of a good deal of heavy warehouse and railroad work. The prices for white pine are maintained without any difficulty, and the quotations for hemlock are about what they have been for a month at least. Some dealers think that their moderate stocks will soon disappear, and this expectation has led them to quote a little higher for good, dry lumber, especially dry wood. The expectation of some of the wholesalers is that hard woods will be in steady demand throughout the winter, and that the promised supplies will be barely sufficient to meet the building requirements of the winter. A fair amount of yellow pine has arrived, and the stocks are kept up at their fullest limit.

The supply of brick is also ample, and more than the usual winter production will be kept up. There is very little trouble anticipated with the brick-makers. The bricklayers will be glad for all the work they can get, and the other trades will remain quiet for the winter. The carpenters expect to greatly increase their membership in this city as the headquarters of the national organization, and Philadelphia, as a matter

of pride, will like to stand at least as well in regard to trades unionism as other cities which heretofore have gone far ahead of it.

Prices of building material will not be modified to any extent before early spring, even if then. Two or three prominent builders have expressed the opinion that there is no occasion for any advance. In fact, they say that the stimulus that has been given to building during the past few months will crowd sufficient material on the market to depress, rather than advance prices. There is not much room for a depression, so all the material men say, and no doubt say correctly. The margin in brick is no more than it ought to be. The cost of brickmaking has been kept at about an even point for years past. The brick-makers will endeavor to make a little more out of their stock next year, but it is probable that when the time comes to say no or yes to big orders, that margins will be shaved down to the usual limit.

Ample preparations are being made by the producers of slate for an increased production during the year. Several new quarries have been opened, and considerable new territory has been brought within the reach of buyers through the construction of a line of road in a portion of Northampton county.

The cement manufacturers have had a good deal of encouragement this year. The construction of extensive public works, the large contracts for pavements and streets, and the general demand in which cements participate, have all been above the usual limits.

The builders are in a hopeful mood. The prospects are that the demands for small houses will continue and that at least as many will be built next year as this. A feature worth noticing is that suburban house building, will assume larger dimensions next year than it ever has. At least present circulations and preparations point to this. Those who are interested in these enterprises are able to count up some six hundred to eight hundred houses that will be built in out-of-town localities. These will be occupied largely by mechanics and persons who have been residing in the city and are anxious to get out, and whose hours allow them to live five to ten miles from their places of business. It is quite likely that the out-of-town building operations will go much farther than these projectors anticipate. One strong inducement is the low prices of land or lots; another is the increasing facilities which our railroads are affording; a third is the advantages which suburban residences afford to small families. It is noticeable that a great many inquiries for houses along lines of railroads. All that have been built have been promptly rented or sold. Special attention has been given to sites along the new Baltimore and Ohio. Land in the southwestern section is in demand. Even land in the Neck is appreciating in value, and that long despised locality is gaining in respect among real estate operators and lot buyers. Operators in real estate from five to ten miles north of the city, especially along the North Penn have been quite successful in their deals. It would be difficult to find a place around the city where real estate could be called sluggish.

All the market conditions are favorable and we see no reason for qualifying the statement that they will continue to be favorable for a long time to come.

—A fire brick pavement has been laid on Stockton avenue, Allegheny City, Pa. It has been down two years and has had no repairs. It is in excellent condition and gives thorough satisfaction. It furnishes a surer foothold than asphalt pavements, and costs less than one-half the cost of Belgian blocks. The bricks have to be well laid, and particular attention must be given to the foundation.

A New Office Building.

One of the most significant evidences of the increase in value of property in what is known as the financial district of the city, is the number of office buildings being erected on Third and Fourth and Chestnut and Walnut streets. Conspicuous among these will be the building for Brown Brothers & Co. on the South east corner of Fourth and Chestnut streets. The plans of this building are the work of Theophilus P. Chandler Jr. an architect of the most advanced school; and Mr. Chandler has been afforded an opportunity in this case to show his skill to the utmost advantage, as Brown Brothers & Co. desire to erect an office building which shall be as perfect a structure architecturally, as any in the country.

The building alluded to will be fire proof, nine stories in height, and the first floor will be occupied by the owners as a banking room, the upper floors being designed for offices. The appointments throughout, will be of the most complete character. Before making plans for this building the owners and Architect made careful examination of many of the prominent buildings in New York city, and the arrangement of the interior will be something novel and different from the principal office buildings in this city.

The building will be supplied with two high speed elevators, manufactured by Otis Brothers & Co. These elevators will be provided with air cushions and all of the approved safety attachments used on elevators made by Otis Brothers & Co., and the cars will travel at a speed of 400 ft. per minute.

It is the intention of the builders, J E. & A. L. Pennock, to have this building completed by September next; and to accomplish this the foundations are now being laid, the work being protected from the frost by a tent, under which the foundations are being laid, and the temperature is kept sufficiently high to prevent danger from frost, by large fires. This is an innovation in building which has attracted the attention of many; and among some of the conservative builders it is questioned whether the experiment will be a successful one; but owing to the rental value of the property the saving attained by being able to carry on building operations during the winter will be very great, and the enterprise of the builders is to be commended.

In addition to the building above referred to, plans are being drawn for several important buildings to be erected on Third street, regarding which we will give details in an early number.

The site is one of the most valuable in the city, and is 75 feet by 44½ feet in extent. Forty-five offices will be placed at the disposition of tenants. The interior finish will be in high priced hardwoods. The stairways will be in marble, and all the partitions and walls will be in the same material. Of course electric lights will be used all through, and the fixtures will be of the finest, no temptation will be left to fire or burglars. The closest attention has been given to fire-proof conditions, and the architect is confident that the building will be entitled to be called an absolutely fire-proof building. Particular attention has been given to the general construction, so that there will be no flame-flues to suck incipient fires into a conflagrations. Iron beams are used, but they are carefully protected from the possible action of heat. The floors are of brick arches and concrete. The roof is iron and slate, and the best of course. Its gables will add to the architectural features. The stone used on the exterior of the building is Indiana limestone, which has of late years grown so much in favor among builders and architects.

The other stores will be built with Indiana stone and Philadelphia pressed brick, and the combination will produce a very fine effect indeed. Architectually the projected building will be a credit to the city and the individual architect concerned and to the profession. Everything in the interior will be of the very best material, and the workmanship will be of the highest order. The halls will be paved with marble and the walls will be beautifully wainscoted with tiles. Ventilation, heat and light have all been most carefully provided for. The best steam heating appliances will be used, and fire-places will be liberally distributed throughout the building. The elevators will be Otis', and no more need be said. No doubt this building will stimulate enterprise in other quarters. We need a dozen or more of such buildings. The venture will prove a success. At a cost of $3,000,000, besides the lot, it does not take much figuring to see what a valuable investment has been made.

—The $10,000,000 call for the 3 per cent. bonds on February 1, 1887, embrace the following bonds, the numbers being original and inclusive:—$50, No. 47 to 48; $100, No. 582 to 609 and 9940 to 9969; $500, No. 246 to 266 and 4230 to 4234; $1,000, No. 2017 to 2175 and 23,749 to 23,777; $10,000, No. 5318 to 6325.

BUILDERS' ITEMS.

Building and Real Estate Notes.

AN Episcopal Chapel is to be erected at Ardmore.

COUNCILS at Williamsport, have appropriated $50,000 for the erection of a new City Hall.

ROBERT N. WOOD, has purchased a number of lots in Norristown, on which he will build.

WHARTON BARKER, has sold the Abington School Board an acre of ground, upon which to erect a large school building.

MRS. JANE VANSANT, of Newtown, Bucks county, has purchased a property in that place, which is to be improved.

THE Young Men's Christian Association, of Williamsport, Pa., has appropriated a large sum for the erection of a new building.

EDWIN FOREST, of Wilmington, Delaware, has purchased a hotel property in New London, Chester county, which he will improve.

LOUIS H. PETUS, of this city, has purchased a country seat, near Camp Hill Station, Montgomery county, which he will greatly improve.

ADRIAN W. SMITH and Wm. C. Prichett, Jr., architects, have formed a partnership, and will transact business at their new offices, 1430 South Penn square.

A REPORT is currant that N. Snellenburg & Co., will erect a fine structure on the sight of the Girard Estate, adjoining Hood, Bonbright & Co. new warehouse, during the coming spring.

BUILDING operations have been falling off rapidly of late, but the builders are not discouraged. Architects in all parts of the country, are engaged on more or less work for the winter and spring.

A PROPERTY was purchased by Mr. M. H. Carson, real estate agent, for Mr. G. Hirsh, at 40 North Eleventh street, for $16,500. The premises will undergo an entire renovation, and a fine store front be inserted.

IT is authetically reported that the B. & O. R. R., are negotiating with J. M. Wanamaker & Co., for the purchase of their property, Nos. 818 and 820, for the purpose of express and general central offices.

THE Manor Investment Company, in which a number of the officials of the Pennsylvania Railroad Company are interested, intend to build extensively along the line of the Midland railroad, which is the new line to West Chester.

PATENTS in building material continue to multiply. A patent has just been taken out to make artificial bone and marble. The compound consists of skim milk, with caustic sodo, glycerine, ammonia, chloride of barium, terra-alba, hydrochloric, nitric and sulphuric acids, with coloring matter.

A BUILDERS EXCHANGE has just been organized, and will hold their first meeting early in January. Already they have their by-laws, and have applied for a charter. This is an institution which is much needed, and will be found very advantageous to the building trade generally. They will locate themselves as near central as possible, but so far, the sight has not been chosen. The objects of the exchange, are to bring the Boss Mechanics together daily, to form Arbitration Committees and to take necessary steps for the welfare of the trade. The initiation fee is $25.00, and the annual dues $12.00.

M. H. CARSON, 233 North Sixth street, is one of our old and reliable real estate representatives, he having stood his ground at the above address for twenty-three years Mr. Carson looks upon the prospects for the ensuing year in real estate, as being bright. Within the past few days, he has made sale of the following properties: 1138 to 1140 John street, for $9,500; 968 North Delaware avenue, $6,000; 1632 Vine street, $9,000; 232 North Twentieth street, (three-story back and front), $9,100; 304 Cyprus street, (six-room dwelling), for $3,000; also, 1712, 1714 Barker street, (six-rooms), for $2,700 each.

THE Fort Washington, Montgomery county, Land Company, which purchased the Nash farm some time ago, is making rapid progress in disposing of the land in building lots. Twenty lots were sold to a prominent clothing house on Chestnut street, Philadelphia; N. Vanhorn, two; J. K. Shoemaker, two; Geo. W. Shoemaker, two; S. M. Bley, four; W. A. Geisinger, three; R. H. Hinckley, four; E. M. Spoerl, four; I. P. Reese, one, and Eugene Linnard, six. In the spring the streets will be opened, a fine rustic bridge thrown across the ravine, a fish pond made, and avenues erected on each side, forming a boulevard. Fourteen houses are certain to be built on these lots next spring.

Architect's Notes.

WENDELL & SMITH, have removed their office from 1430 South Penn Square to 218 North Thirty-second street.

A GOOD many architects are giving attention to the subject of interior decoration, and are developing a taste and originality in that direction, which is finding recognition among builders and others.

JOHN MCARTHUR and John Ord, are the architects who have charge of the erection of the new ward for children, at the Presbyterian Hospital, Thirty-ninth and Filbert streets. The building will have ten sides, and will have a diameter of fifty-two feet. It will be built of brick and terra cotta, and will be two stories high, and will cost $30,000.

FROM a paper read to the Royal Institute of British Architects, it appears that terra cotta shows more strength than all other building material in ordinary use. It compares favorably with Portland, Bath and ordinary stock bricks. Terra cotta possesses one advantage which stone or iron does not, namely the power of resisting heat, and for this reason alone, it is being preferred more largely by builders.

The result of these trials were published in a tabulated form in the proceedings of the Institute of British Architects at the time they were made, and a few comparative tests will be sufficient for the present occasion.

A block of Portland about 6x6x6 inches bore sustained a crushing weight equal per foot super. of....	292	tons.
A block of Bath of similar dimensions.....	104	"
A stock brick.....	82	"
A similar solid block of terra cotta.	523	"
A hollow block, slightly made and unfilled.....	80	"
The same, but filled with concrete..	163	"
A hollow block, unfilled but made with thicker walls.....	186	"

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M. L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgages and Ground Rents are in Italics. The figures in the column represent the cash consideration only.

—Perry & Co., the stove founders of Albany, N. Y., will build a large foundry at South Pittsburg, on the Tennessee river, below Chattanooga. Thus disappears another great manufacturing company. Trades unionism has done it. There is a score of other large manufacturing concerns contemplating a movement of a similar character. As the screws of trades unionism tighten down, manufacturers will fly out to escape the pressure. Southern railroad development will encourage movements of this kind. A great deal of the business of stove molders of the North is in the South and if by locating in the South they can place themselves nearer to their customers and escape the dictation of unionism, with the advantage of cheaper labor, it is quite probable they will go.

ABERDULAIS TIN PLATE WORKS,

NEATH, WALES, NOVEMBER 19TH, 1886.

Messrs. MERCHANT & CO., Philadelphia,

DEAR SIRS:—We are in receipt of your favor of November 9th, which has our most careful attention. For the past two years we have endeavored to meet the views of yourselves and customers in reference to improving the coating of the "CAMARET" leaded plate. That our mutual efforts in introducing guaranteed and stamped plates have been successful does not admit of a doubt.

Your desire to further improve the coating of the "CAMARET" so that Architects, Builders and Roofers may be still better satisfied meets our entire approval, and you can inform all friends of the "CAMARET" Roofing Plate that this brand of 1887, which we are now making for you, will be much heavier coated than any of the "CAMARET" plates we have shipped you heretofore.

We are confident that the extra coating now being put on this brand, together with our usual care in assorting, squaring, etc., will cause the "CAMARET" Roofing Plate to continue—as we are satisfied it is to-day—the leading brand of regular coated plates in America.

Yours very Truly,

(Signed) JOS. WILLIAMS & CO., Ltd.

Per J. H. R. Ritson.
